

Missouri Weekly Influenza Surveillance Report 2022-2023 Influenza Season¹

Week 15: April 9, 2023 – April 15, 2023

All data are preliminary and may change as more reports are received.

Summary:

- Seasonal influenza activity and the Influenza-like illness (ILI) activity in Missouri remained Local² and decreased to Level 1 in the minimal category³, respectively during Week 15.
- During Week 15 a total of 97 laboratory-positive⁴ influenza cases (42 influenza A, 55 influenza B and 0 untyped) were reported. The influenza type for reported season-to-date cases includes 94.0% influenza A, 5.6% influenza B and 0.4% untyped. The percentage of respiratory specimens testing positive for influenza in Missouri laboratories reporting to the National Respiratory and Enteric Virus Surveillance System (NREVSS) was 0.08% for Week 15.
- Influenza-like illness activity for the hospital emergency room visit chief complaint data reported through ESSENCE decreased to 1.31% for Week 15 (Figure 6).⁵
- Two hundred thirty five influenza-associated deaths have been reported in Missouri as of Week 13 (week ending March 25, 2023).⁶
- Eleven influenza outbreaks and two influenza-associated school closures have been reported as of Week 15.
- Seasonal influenza activity continues to decline nationwide. National influenza surveillance information is prepared by CDC and is included in the weekly FluView report, which is available online at <http://www.cdc.gov/flu/weekly/fluactivitysurv.htm>.

¹The 2022- 2023 influenza season begins CDC Week 40 (week ending October 8, 2022) and ends CDC Week 39 (week ending September 30, 2023).

²Local is defined as: Outbreaks of influenza or increase in ILI cases and recent laboratory-confirmed influenza in a single region of the state...

³ILI Activity indicates levels of activity on a scale of 1-13 ranging from minimal to very high. For more information see <https://gis.cdc.gov/grasp/fluview/main.html>

⁴Laboratory-positive influenza includes the following test methods: rapid influenza diagnostic tests (antigen), reverse transcriptase polymerase chain reaction (RT-PCR) and other molecular assays, immunofluorescence antibody staining (Direct (DFA) or Indirect (IFA)), or viral culture.

⁵ILI is defined by ESSENCE as Emergency Department chief complaints for Influenza or (FeverPlus and (Cough or SoreThroat) and not NonILIFevers).

⁶Influenza deaths are collected from Missouri's death certificate data. Decedents with influenza listed as a cause or contributor to death are classified as an influenza-associated death. Death certificate data are generally available two weeks following the current CDC week.

Surveillance Data:

Interactive Maps

The jurisdiction-specific influenza data are provided through interactive maps available at <https://arcg.is/DKTSe0>. Click on the jurisdiction to view the influenza data specific to that jurisdiction.

- Reported Rate per 100,000 Population, Season-to-Date

Data Figures

Figure 1. Number of Laboratory-positive[†] Influenza Cases by Influenza Type, Missouri, CDC Weeks 13-15 (March 26, 2023 – April 15, 2023)^{*}

Influenza Type	Week 13	Week 14	Week 15	2022-2023* Season-to-Date
Influenza A	81	61	42	101,183
Influenza B	93	88	55	6,010
Influenza Unknown Or Untyped	0	0	0	476
Total	174	149	97	107,669

[†]Laboratory-positive influenza includes the following test methods: rapid influenza diagnostic tests (antigen), reverse transcriptase polymerase chain reaction (RT-PCR) and other molecular assays, immunofluorescence antibody staining (Direct (DFA) or Indirect (IFA)), or viral culture.

^{*}Influenza season begins with the week ending October 8, 2022 (CDC Week 40) Data Source: Missouri Health Information Surveillance System (WebSurv).

Figure 2. Number of Laboratory-positive[†] Influenza Cases and Case Rates by Age Group, Missouri, CDC Week 15 (April 9, 2023 – April 15, 2023)^{}**

Age Group	Week 15 Cases	Week 15 Rate [‡]	2022-23* Season-to-Date	2022-2023* Season-to-Date Rate [‡]
00-04	19	5.16	15,906	4,321.34
05-24	31	1.98	45,236	2,892.31
25-49	20	1.03	22,913	1,179.20
50-64	10	0.83	11,929	993.91
65+	17	1.60	11,684	1,100.15
Total	97	1.58	107,669	1,754.30

[†]Laboratory-positive influenza includes the following test methods: rapid influenza diagnostic tests (antigen), reverse transcriptase polymerase chain reaction (RT-PCR) and other molecular assays, immunofluorescence antibody staining (Direct (DFA) or Indirect (IFA)), or viral culture.

^{*}Influenza season begins week ending October 8, 2022 (CDC Week 40) Data Source: Missouri Health Information Surveillance System (WebSurv)

[‡]Incidence Rate per 100,000 population

Figure 3. Number of Laboratory-positive[†] Influenza Cases and Case Rates by Region, Missouri, CDC Week 15 (April 2, 2023 – April 8, 2023)^{*‡}

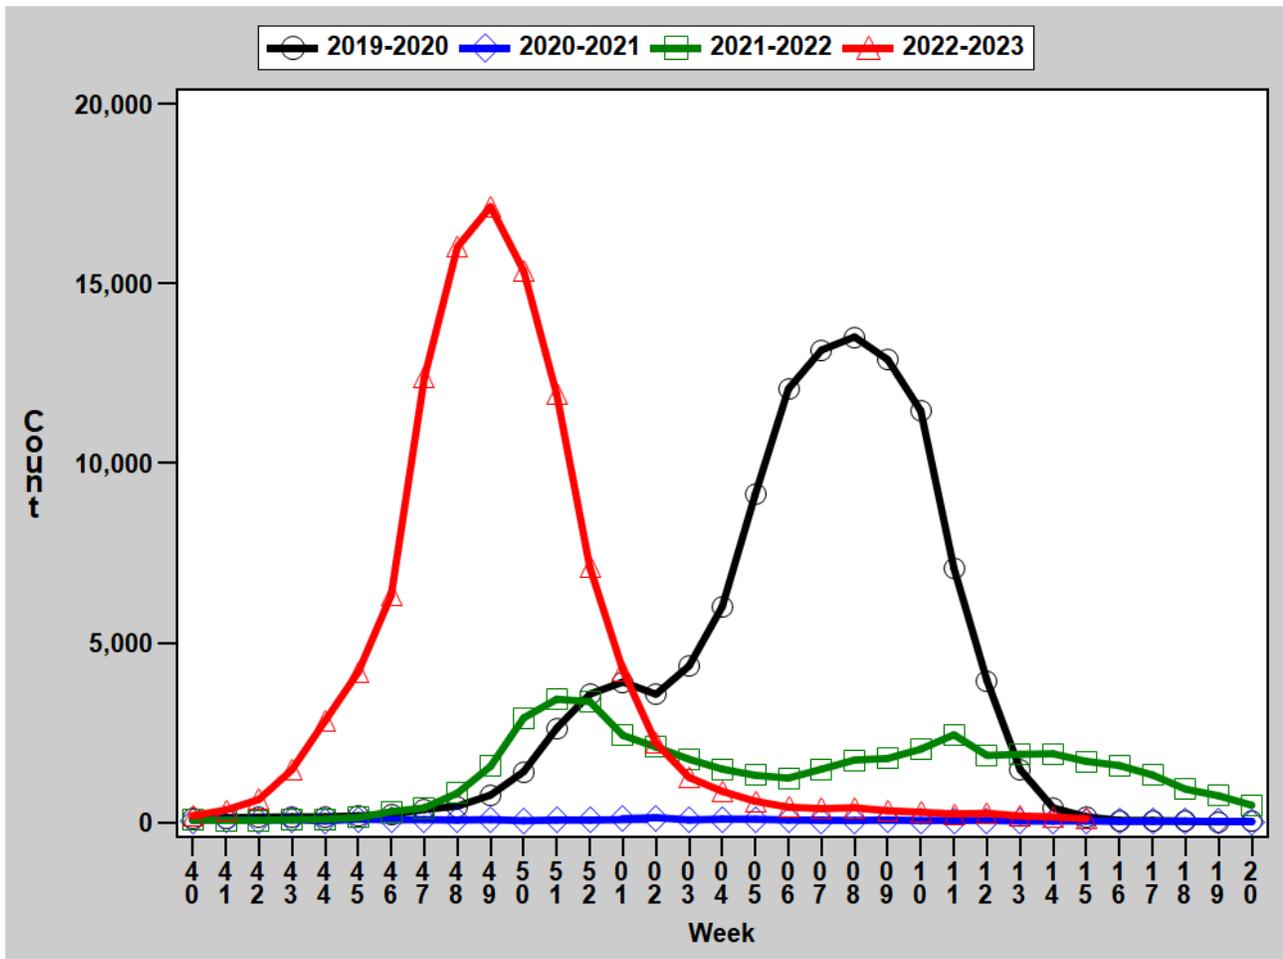

Region	Week 15 Cases	Week 15 Rate [‡]	2022-23* Season-to-Date	2022-23* Season-to-Date Rate [‡]
Central	16	2.37	11,205	1,660.45
Eastern	45	1.98	29,986	1,322.26
Northwest	17	1.04	30,872	1,322.26
Southeast	5	1.16	12,446	2,878.10
Southwest	14	1.33	23,160	2,204.39
Total	97	1.71	107,669	1,754.30

[†]Laboratory-positive influenza includes the following test methods: rapid influenza diagnostic tests (antigen), reverse transcriptase polymerase chain reaction (RT-PCR) and other molecular assays, immunofluorescence antibody staining (Direct (DFA) or Indirect (IFA)), or viral culture.

^{*}Influenza season begins week ending October 8, 2022 (CDC Week 40) Data Source: Missouri Health Information Surveillance System (WebSurv)
