

Missouri Weekly Influenza Surveillance Report 2021-2022 Influenza Season¹

Week 46: November 14, 2021 – November 20, 2021

All data are preliminary and may change as more reports are received.

Summary:

- The estimated influenza activity in Missouri is Local².
- During Week 46, a total of 168 laboratory-positive³ influenza cases (137 influenza A and 31 influenza B) were reported. A season-to-date total of 533 laboratory-positive influenza cases (326 influenza A, 193 influenza B, and 14 untyped) have been reported in Missouri as of Week 46. The influenza type for reported season-to-date cases includes 61.2% influenza A, 36.2% influenza B, and 2.6% untyped. The percentage of respiratory specimens testing positive for influenza in Missouri laboratories reporting to the National Respiratory and Enteric Virus Surveillance System (NREVSS) remained low during Week 46 (Figure 5).
- Influenza-like illness (ILI) activity was above baseline for the hospital emergency room visit chief complaint data reported through ESSENCE. The reported percentage of visits for ILI through ESSENCE was 2.22 % (Figure 6).⁴
- One influenza-associated death has been reported in Missouri as of Week 46.⁵
- One influenza or ILI-associated outbreak has been reported in Missouri as of Week 46.
- National influenza surveillance information is prepared by CDC and is included in the weekly FluView report, which is available online at <http://www.cdc.gov/flu/weekly/fluactivitysurv.htm>.

¹The 2021- 2022 influenza season begins CDC Week 40 (week ending October 9, 2021) and ends CDC Week 39 (week ending October 1, 2022).

²Local is defined as: Outbreaks of influenza or increases in ILI cases and recent laboratory-confirmed influenza in a single region of the state.

³Laboratory-positive influenza includes the following test methods: rapid influenza diagnostic tests (antigen), reverse transcriptase polymerase chain reaction (RT-PCR) and other molecular assays, immunofluorescence antibody staining (Direct (DFA) or Indirect (IFA)), or viral culture.

⁴ILI is defined by ESSENCE as Emergency Department chief complaints for Influenza or (FeverPlus and (Cough or SoreThroat) and not NonILIFevers).

⁵All influenza-associated deaths became reportable in Missouri in 2016.
