 - A copy of the meeting, training, workshop etc. sign-in sheet that captures the names, emails, and affiliations of the attendees.
 - Discussions and decisions resulting from these activities (reports, recommendations, questions etc.), including the replicability across other state task forces.
 - Identification of an integration activity to address each year (see FOA Part 2, Section I, Sub-section 3 (FPTF), objective 3, above) and provide an update on the activity in the annual report.
 - Identification of any issues encountered during the implementation and/or adoption of FSMA or other rules/codes/ordinances.

The End of Project Report must include an evaluation/final report, including: lessons learned, results, analysis of effectiveness and impact, full written documentation of the project and summaries of accomplishments and goals. The documentation must be in a form and contain sufficient detail such that other State, local, and tribal governments could reproduce the final project.

The most recent assessment by FDA should verify the program is maintaining conformance with the MFRPS.

Due to COVID-19 restrictions and impacts to several programs, this requirement is waived until further notice and the guidelines per local and state government directives. Awardees should focus on conducting as many Full Scope PC inspections as possible in accordance to the directives. A summary of the progress should be submitted as part of the progress report.

Additional Reporting templates may be developed and made available for grantees to use after awards are made, to assist with reporting of progress achieved and/or data elements from the project goals (or outputs) listed in this FOA, and to improve monitoring for the progress and objectives of this Cooperative Agreement.
