

DHSS/DCPH Data System Summary Information

Data Set	Updated	Data set finalized	Dates Covered	Lowest geographic area available	Notes	How data is requested	RSMO Chapter	Section	Dissemination Form	Breach Penalty	Data Access Allowed	CSR
Abortions Abortion records are compiled from the Induced Termination of Pregnancy reports filed with the Department of Health and Senior Services (DHSS) as required by state law. Information received by DHSS from these reports is confidential and is only used for statistical purposes.	Annually	Calendar year, data finalized in approximately June	1975-present	City/ZIP for public health practices		LPHA Data Package http://health.mo.gov/data/lphapolicies.php	188	188.052; 188.055; 188.070	Statistical Reports Only	Misdemeanor	Local, State, or National Public Health Officers	
Adult Blood Lead Epidemiology and Surveillance (ABLES) ABLES is a state-based surveillance program of laboratory reported adult blood lead levels.	Annually	Data updated annually on 2/28	2002-present	Record level for public health practices	Updated annually and available on NIOSH website Statewide data only at NIOSH at http://www.cdc.gov/niosh/topics/ables/ables.html	Request from Bureau of Environmental Epidemiology	192; 701	192.020; 192.067; 701.328	Statistical Aggregate Form		Federal, state, or local agency public employees for the performance of their duties	19 CSR 20-20.075(3)
Behavioral Risk Factor Surveillance System (BRFSS) - BRFSS is a state-based telephone survey of adults that collects data on chronic diseases, conditions and risk factors, and other pertinent health information. Annual sample size is approximately 5300 landline interviews with increasingly more cell phone interviews conducted each year (up to 1590 in 2013).	Annually	Previous year's data file available on CDC website in late spring or early summer; Key Findings Report available late spring; Annual report with regional data later in year	Public data files from 1995 to previous year are available on CDC website at http://www.cdc.gov/brfss/	State and regional data available. St. Louis City, St. Louis Co. and Jackson Co. data available on CDC website (SMART database). Lower geographic data only possible by combining multiple years of data due to sample size	In 2011, CDC implemented a new weighting methodology; therefore trend analysis may only be conducted on data prior to 2011, and eventually from 2011 forward.	Missouri reports available at http://health.mo.gov/data/brfss/index.php Data files available through BRFSS Data Request Form from Office of Epidemiology. If zip codes are requested to be included in data file, a request for Exemption from full IRB review must be submitted.

Birth Certificate Data Live birth records are compiled from the live birth certificates filed with the Department of Health and Senior Services by state law. The birth certificate system has been in place in Missouri continuously since 1911, although changes in data items and definitions have taken place over the years.	Annually	Calendar year, data finalized in approximately April - June	1911-present	record level for public health practices (census tract; lat/long)	Data elements changed on 1/1/10	LPHA Data Package http://health.mo.gov/data/lphapolicies.php	193	193.245; 193.255	Statistical Aggregate		Federal, state, or local and other public agencies ...for statistical or administrative purposes	19 CSR 10-10.090
Birth Defects Registry The birth defects registry contains records for Missouri resident live births based on linkage of defects reported on birth certificates, death certificates, hospital patient abstracts, enrollment data for state programs to assist affected families; and screening data such as the newborn hearing screening data set. Cases include defects diagnosed and reported through the first year of life.	Annually	Calendar year, data finalized approximately 20 months later	1993-present	zip code	record level for public health practices	LPHA Data Package - request additional data elements in questions #1 or 9 on the application http://health.mo.gov/data/lphapolicies.php	191; 192	191.317; 191.323(3); 192.667	Statistical Aggregate			
Carbon Monoxide Poisoning Surveillance The carbon monoxide surveillance system is an on-going collection system for information on carbon monoxide poisonings. Carbon monoxide poisoning as a carboxyhemoglobin (COHb) level of >15% or a death certificate stating carbon monoxide as the underlying or a contributing cause of death.	Annually by October	Year closes 12/31, data available 8-10 months later	data available from 2001 (aggregate by state), Essence from 2005	Record level	death records better than illness	Request from Bureau of Environmental Epidemiology	192	192.020; 192.067	Statistical Aggregate Form		Federal, state, or local agency public employees for the performance of their duties	19 CSR 20-20.075(3)
Childhood Lead The Childhood lead surveillance system is a state-based surveillance program of laboratory reported blood lead levels in children aged less than 72 months.	Annually	Calendar year, data finalized in April	1997 - present for good data, some information available from 1993-1997	Record level		Request from Bureau of Environmental Epidemiology, MOHSAIC	192; 701	192.020; 192.067; 701.328	Statistical Aggregate Form		Federal, state, or local agency public employees for the performance of their duties	19 CSR 20-20.075(3)

Data Set	Updated	Data set finalized	Dates Covered	Lowest geographic area available	Notes	How data is requested	RSMO Chapter	Section	Dissemination Form	Breach Penalty	Data Access Allowed	CSR
Communicable Disease Communicable disease surveillance is a multi-component system that monitors and analyzes data that includes – but is not limited to – demographic, geographic, and disease/condition-specific information.	Annually	Calendar year, data finalized in June	1992-Present (variables and diseases reported have changed over the years). In addition, statewide case counts for various diseases are available back to 1921.	Record level for co-public health investigators. County level for all other requests.	Final data sets are stored here at DHSS but are not posted anywhere online.	Annual reports are available online at http://health.mo.gov/living/healthcondiseases/communicable/communicabledisease/reports.php For other requests, please contact the Bureau of Reportable Disease Informatics.	192; 701	192.020; 192.067; 701.328	Statistical Aggregate Form		Federal, state, or local agency public employees for the performance of their duties	19 CSR 20-20.075(3)
County Level Study The County Level Study is a BRFSS-like telephone survey of Missouri adults that collects county-specific data on tobacco use and related issues, as well as chronic diseases, conditions and risk factors	As funding is available		2004,2007, 2011	County	A new weighting methodology was used with 2011 CLS data; therefore previous year's data must be reweighted for comparisons to be made	Selected indicators are reported in Community Data Profiles at http://health.mo.gov/data/cls/index.php Comparison profiles of 2007 & 2011 data are pending. Data file may be requested from Office of Epidemiology through a data request form. If zip code data is requested in file, an Exemption from Full IRB Review must be requested						
Day Care/Preschool Immunization Data Public, Private, Parochial and Parish Day Care/Preschools report aggregate data on the immunization status of children enrolled by age category.	Data is self reported every year starting in December.	Data set is ongoing and isn't finalized	Years 2010-2011, 2011-2012, 2012-2013 and 2013-2014	City/Zip	Data is self reported by day care/preschool staff.		210	210.003	Aggregate by age category			19 CSR 20-28.040
Deaths Death records are compiled from death certificates which are filed with the Department of Health and Senior Services by state law.	Annually	Calendar year, data finalized in approximately June-August	1911-present		Data elements changed on 1/1/10	LPHA Data Package http://health.mo.gov/data/lphapolicies.php	193	193.245; 193.255	Statistical Aggregate Line Listing Containing Name and Date		Federal, state, or local and other public agencies ...for statistical or administrative purposes	19 CSR 10-10.090
Divorces (Dissolutions of Marriages) The Department of Health and Senior Services is the official state registrar for dissolution of marriage records.	Annually	Calendar year, data finalized in approximately June-August	1949-present			LPHA Data Package - request additional data elements in questions #1 or 9 on the application http://health.mo.gov/data/lphapolicies.php	193	193.245; 193.255	Statistical Aggregate Line Listing Containing Name and Date		Federal, state, or local and other public agencies ...for statistical or administrative purposes	19 CSR 10-10.090

Missouri Pregnancy Risk Assessment Monitoring System (PRAMS) PRAMS is an ongoing, population-based surveillance system designed to identify and monitor selected maternal experiences and behaviors that occur before and during pregnancy and during the child's early infancy.	Annually	Project closes in August, data available following March from the Missouri PRAMS staff.	2007-present	state		Data is requested directly from CDC. Limited results in aggregate form is available for the public at: http://www.cdc.gov/prams/CPONDER.htm . For additional data analyses please contact Missouri PRAMS staff.			Reports, Factsheets, Presentations to MCH Stakeholders. All data dissemination in aggregate form only.		CPONDER is a public access website.	
Motor Vehicle Crash & Outcomes Statewide linked records of motor vehicle crashes, patient abstract system records and mortality records.	Annually	N/A		Varies	Queries may be run on special request	Administrative Use Data Package http://health.mo.gov/data/policies.php						
Newborn Bloodspot Screening in MOHSAIC An ongoing web-based data system that captures newborn bloodspot screening data from the Missouri State Public Health Laboratory's MSDS system. The database also allows for data entry and case management to assist in the tracking and follow-up of abnormal newborn screens. Data captured includes, but is not limited to, newborn bloodspot screening results, confirmatory testing, treatment dates, confirmatory diagnosis, referral center, and demographic information.	Ongoing	Calendar year. Data is generally finalized approximately one year after the end of each year.	2005 to present	Rates by birth hospital.		Request to DHSS Newborn Bloodspot Screening Program.	191	191.331	Aggregate Reports		Aggregate data available to public upon request. Access to individual information limited to those involved in reporting and follow-up.	19 CSR 25-36.010
Newborn Hearing Screening in MOHSAIC An ongoing, individually identifiable surveillance system that collects the results of newborn hearing screening, rescreening, audiologic evaluation, risk factors for late-onset hearing loss, and intervention to guide activities of tracking, follow-up, planning, and evaluation.	Ongoing	Calendar year; generally finalized 14 months after end of calendar year.	2006 -2010	Rates by birth hospital.		Request to DHSS Newborn Hearing Screening Program.	191	191.928	Aggregate Reports		Aggregate data available to public upon request. Access to individual information limited to those involved in reporting and follow-up.	19 CSR 40-9.040
