This report represents 100 years of reporting Missouri vital statistics. Legislation passed by the Missouri General Assembly and approved on May 6, 1909, provided for the ‘immediate registration of all births and deaths’ by the State Board of Health. Improved sanitation and hygiene for the people of the state were anticipated as a result of centralizing these duties. With the pasage of the legislation, Missouri became the 19th state to enact a comprehensive vital statistics law and acceptance into the death registration area of the U.S. Census Bureau soon followed. The 1909 law was implemented by February of 1910, and the first vital statistics report using a full year of Missouri birth and death records was for 1911.

Birth and death certificates are permanent legal records that contain valuable health and medical information. As legal documents, birth and death certificates provide proof of age, parentage, and citizenship. They are used to obtain passports and driver’s licenses, enroll in benefits programs, settle estates, obtain life insurance payouts, and terminate Social Security benefits. Health and medical information from birth and death records is transformed into data to calculate population growth, identify health risk factors, measure health outcomes, plan and evaluate health programs and conduct research. Vital statistics help drive public health programs that keep society healthy and they influence our personal healthcare. Vital records and vital statistics impact our lives every day. For more than 100 years, Missouri vital records have captured a piece of the life story of every person that was born or died in Missouri.

This report presents the final tabulation of statistical data relating to vital events in Missouri during 2011. Data for the year of the report were accepted through April 15, 2012, allowing information reflecting events in 2011 to be as complete as possible.

Missouri Vital Statistics 2011 is published for use in public health and related fields as an aid for studying births, deaths, fetal deaths, marriages, dissolutions, and abortions. This document along with additional vital statistics data are available on the Department of Health and Senior Services website at health.mo.gov under Data, Surveillance Systems, and Statistical Reports.

Vital Statistics Then and Now

Changes that occur over time can be very significant but difficult to see. A benefit to having one hundred years of vital statistics is the ability to document some important changes in the public health of Missourians as shown below.

- People are now expected to live nearly 25 years longer than in 1911. Back then, average life expectancy was 53 years, while today it is over 77 years.

- More than 99 percent of all babies born in Missouri today will live to celebrate their first birthday. In 1911, ten out of every 100 babies died before they were one year old.

- Missourians are much more likely to survive childhood today than in 1911. Back then, 18 of every 100 young people died before age 20. Today, close to 99 percent of Missouri children will celebrate their 20th birthday.

- Missourians are nearly twice as likely now to live to age 65, compared to people living in 1911. Back then, only 46 out of 100 Missourians survived to age 65. Now, 82 percent live to that age.

- In 1911, about 22 percent of deaths in Missouri were caused by communicable diseases like influenza, scarlet fever, tuberculosis and whooping cough (pertussis). Today, less than three percent of Missouri deaths are caused by communicable disease.

- Women are much less likely to die as a consequence of pregnancy and child birth now than they were in 1911. The maternal death rate now (2011) is two deaths per 10,000 live births, compared to more than 77 deaths in 1911.
BIRTH AND DEATH TRENDS

A  Live Birth and Death Rates per 1,000 Population: Missouri, 1911-2011

1  Population, Recorded Births and Deaths with Rates per 1,000 Population, and Natural Increase: Missouri, 1911-1944

2  Population, Recorded and Resident Births and Deaths with Rates per 1,000 Population and Natural Increase: Missouri, 1945-2011

B  Total Fertility Rates: Missouri, 1911-2011

3  Fertility Rates per 1,000 Females by Age of Mother: Missouri, 1911-2011

C  Crude and Age-Adjusted Death Rates per 1,000 Population: Missouri, 1911-2011

4  Age-Specific Death Rates per 1,000 Population: Missouri, 1911-2011

BIRTHS

5A  Resident Live Births by Selected Characteristics by Race and Hispanic Origin of Mother: Missouri, 2011

5B  Resident Live Births by Selected Obstetric, Pediatric, and Maternal Conditions and Procedures: Missouri, 2011

6  Resident Live Births by Race and Age of Mother by Marital Status and Live Birth Order: Missouri, 2011

7  Teen-age Resident Live Births by Race and Age of Mother by Marital Status and Live Birth order with Percentages: Missouri, 2011

8  Percent Resident Low Birth Weight and Resident Live Births by Birth Weight by Race and Age of Mother: Missouri, 2011

9  Resident Live Births by Mother's Marital Status by Race of Mother with Percentages by County and Cities with 25,000 or More Population: Missouri, 2011

10A  Resident Live Births by Selected Characteristics by Race and Hispanic Origin of Mother: Missouri, 2011

10B  Resident Live Births by Selected Characteristics by BRFSS Region and Metro vs Non-Metro Area: Missouri, 2011

10C  Resident Live Births by Selected Characteristics by County: Missouri, 2011

10D  Resident Live Births by Selected Characteristics by Cities with More than 25,000 Population: Missouri, 2011

11  Resident Teen-age Pregnancies and Abortions by Selected Ages by County of Residence: Missouri, 2011

ABORTIONS

D  Resident Abortion Ratios per 1,000 Live Births: Missouri, 1971-2011

12A  Resident Abortions by Race, Age, and Type of Procedure by Weeks of Gestation: Missouri, 2011

12B  Recorded Abortions by Race, Age, and Type of Procedure by Weeks of Gestation: Missouri, 2011
Resident Abortions by Age, Marital Status, and Education by Race and Hispanic Origin: Missouri, 2011

Resident Abortions and Ratios per 1,000 Live Births by County and BRFSS Region of Residence: Missouri, 2011

Resident Abortions by Marital Status, Number of Living Children, and Number of Previous Abortions by Age of Patient: Missouri, 2011

NATURAL INCREASE

Resident and Recorded Live Births, Deaths, and Natural Increase with Rates by County: Missouri, 2011

Resident and Recorded Live Births, Deaths, and Natural Increase with Rates by Cities with Over 25,000 Population: Missouri, 2011

Resident and Recorded Live Births, Deaths, and Natural Increase with Rates by Multi-County Cities: Missouri, 2011

Resident Live Births and Deaths by Cities with 10,000 to 24,999 Population: Missouri, 2011

Resident Live Births and Deaths by Cities with 2,500 to 9,999 Population: Missouri, 2011

DEATHS

Twelve Leading Causes of Death by Race and Death Rates per 100,000 Residents: Missouri, 2011

Five Leading Causes of Death and Percentages for Selected Resident Age Groups: Missouri, 2011

Resident Deaths with Age-Specific Rates per 1,000 Residents by Age Group by Race and Sex: Missouri, 2011

Resident Deaths by Selected Causes by Age Groups: Missouri, 2011

Male Resident Deaths by Selected Causes by Age Groups: Missouri, 2011

Female Resident Deaths by Selected Causes by Age Groups: Missouri, 2011

Resident Infant Death Rates per 1,000 Live Births: Missouri, 1960-2011

Resident Perinatal, Infant, Fetal, Neonatal, Post-Neonatal, and Maternal Deaths by County and Cities with 25,000 or More Population: Missouri, 2011

White Non-Hispanic Resident Perinatal, Infant, Fetal, Neonatal, Post-Neonatal and Maternal Deaths by County and Cities with 25,000 or More Population: Missouri, 2011

Black Non-Hispanic Resident Perinatal, Infant, Fetal, Neonatal, Post-Neonatal, and Maternal Deaths by County and Cities with 25,000 or More Population: Missouri, 2011

Resident Perinatal, Infant, Fetal, Neonatal, and Post-Neonatal Deaths by Resident BRFSS Region with Rates per 1,000 Live Births: Missouri, 2011

Table/Graph

23  Resident Infant Deaths and Rates per 1,000 Live Births by Cause of Death By Race and By Age at Death: Missouri, 2011

24  Resident Infant Deaths and Rates per 1,000 Live Births by Age of Mother by Birth Order: Missouri, 2011

25  Resident Infant Deaths and Rates per 1,000 Live Births by Birth Weight by Race of Mother: Missouri, 2011

26A  Resident Deaths by Selected Causes of Death by Race and Hispanic Origin with Rates per 100,000 Residents: Missouri, 2011

26B  Resident Deaths by Selected Causes of Death by BRFSS Region and Metro vs Non-Metro Area: Missouri, 2011

26C  Resident Deaths by Selected Causes of Death by County of Residence: Missouri, 2011

26D  Resident Deaths by Selected Causes of Death by Cities with 25,000 or More Population: Missouri, 2011

27  Recorded Deaths by Type of Accident by Age by Sex: Missouri, 2011

28  Resident Deaths by Selected Characteristics by Determination of Tobacco Use Contributing to Death: Missouri, 2011

29  Abridged Life Table for the Total Population and by Sex: Missouri, 2011

MARRIAGES

F  Marriage Rates per 1,000 Population: Missouri, 1950-2011

30  Reported Marriages by Age of Groom by Age of Bride: Missouri, 2011

31  Reported Marriages by Age by Previous Marital Status of Bride and Groom: Missouri, 2011

32  Reported Marriages by Previous Marital Status of Bride and Groom: Missouri, 2011

33  Reported Marriages by Race of Bride and Groom: Missouri, 2011

34  Reported Marriages by Month of Event: Missouri, 2011

35A  Reported Marriages by County of Recording with Rates per 1,000 Population: Missouri, 2011

35B  Reported Marriages by BRFSS Region of Recording with Rates per 1,000 Population: Missouri, 2011

DISSOLUTIONS

G  Dissolution Rates per 1,000 Population: Missouri, 1950-2011

36  Reported Marriage Dissolution Decrees by Month by Type of Decree: Missouri, 2011

37  Reported Dissolutions and Annulments of Marriage by Number of Previous Marriages of Husban and Wife: Missouri, 2011

38  Reported Dissolutions and Annulments of Marriage by Duration of Marriage and Number of Children Affected: Missouri, 2011
Table/Graph

39  Reported Dissolutions and Annulments of Marriage by Race of Wife by Race of Husband: Missouri, 2011

40  Reported Dissolutions and Annulments of Marriage by Petitioner by Disposition of Children by Child Support Awarded: Missouri, 2011

41  Reported Dissolutions and Annulments of Marriage by Age of Wife by Age of Husband: Missouri, 2011

42A  Reported Dissolutions and Annulments by County of Recording with Rates per 1,000 Population: Missouri, 2011

42B  Reported Dissolutions and Annulments by BRFSS Region of Recording with Rates per 1,000 Population: Missouri, 2011
