St. Luke's Hospital is an approved provider of continuing nursing education by Missouri Nurses Association, an accredited approver by the American Nurses Credentialing Center's Commission on Accreditation

School nurses own a wealth of knowledge, but tradition and old policies contribute to a comfort zone that is often challenged when new research contradicts tradition. This presentation will explore many of the routine skills and activities performed by school nurses that may not have a scientific base and recommend changes in policies and procedures to support evidence-based practice.
