

Minutes matter. Call 911.

Accidents, falls, loss of consciousness...

Many times it is obvious when an injury demands a 911 call. But in some cases it is difficult to know when an injury is severe enough. However, dismissing an injury as “not too bad” can have terrible consequences.

When you don't know, call 911. Let professionals help determine if an ambulance is needed.

Treatment begins as soon as emergency medical responders arrive. The hospital is alerted so a specialized medical team is ready to continue care as soon as the individual arrives. Minutes matter. Call 911.
