Week 18: April 27 – May 3, 2014

Summary

National:

- According to this week's CDC's FluView report, seasonal influenza activity is low and declining across most key indicators.

State:

- Missouri is reporting Sporadic Influenza Activity to CDC, with 22,954 influenza cases reported season-to-date. This represents all laboratory and aggregate influenza reports. Sporadic Activity is defined as: influenza-like illness activity has not increased and there are isolated lab-confirmed cases or a lab-confirmed outbreak in a single institution in the state.
- No specimens were received by the State Public Health Laboratory for viral testing during week 18. The most common influenza subtype detected by the State Public Health Laboratory has been 2009 H1N1 Influenza this season.
- There have been no reported Influenza-like illness outbreaks reported for Week 18. There has been one Influenza-like illness outbreak reported for the 2013-2014 season. There have been no reported school closures due to Influenza-like Illness for the 2013-2014 season.
- No pediatric influenza-associated deaths were reported in Week 18, no pediatric deaths reported for the 2013-2014 season.
- In Week 18, the percentage of visits for influenza-like-illness (ILI) reported by the Missouri Outpatient ILI Surveillance Network (ILINet) is 1.03%. This is below the national baseline of 2.0% and Missouri's baseline of 2.42%
- In Week 18, the statewide rate of Influenza-like Illness visits per total visits to hospital emergency rooms reported through the ESSENCE syndromic surveillance system was 0.8%. Northwest region reported 0.8%, Central region reported 1.0%, Eastern region reported 0.5%, Southeast region reported 0.6%, and Southwest region reported 1.2%.

Table 1. Reported Laboratory cases by for the Week ending May 3, 2014 (Week 18)

Serogroups	A	B	A or B Untyped (rapid test)	Total
Week 18	41	11	1	53

*Data Source: Missouri Health Information Surveillance System (WebSurv).

A total of 53 cases were reported for week 18. No specimens were received by the State Public Health Laboratory for viral testing during week 18.

*No weekly data reported.

1. Only counties with sentinel provider(s) are listed above.
2. This is below the national baseline of 2.0%.
3. Data Source: U.S. Outpatient Influenza-like Illness Surveillance Network (ILI)
4. To learn about ILINet, view the following website: <http://www.cdc.gov/flu/weekly/fluactivitysurv.htm>

Graph 2. Percentage of Visits for Influenza-like-Illness (ILI) Reported by the Missouri Outpatient ILI Surveillance Network (ILINet) 2013-2014 Season-To-Date as compared to the previous Two Influenza Seasons Through the Week Ending May 3, 2014 (Week 18)

ILINet baseline refers to the mean of the values during previous three influenza seasons (week 40-20, 2010-11, 2011-12 and 2012-13) with low influenza activity.

*Data Source: U.S. Outpatient Influenza-like Illness Surveillance Network (ILINET)

The proportion of patient visits for influenza-like illness is 1.03% for week ending May 3, 2014 (Week 18). This is below Missouri’s baseline of 2.42%.

Graph 3. Weekly Percentage of Influenza-like Illness Chief Complaints in ESSENCE Participating Hospitals 2010-2014 Influenza Seasons Through the Week Ending May 3, 2014 (Week 18)

*ESSENCE ILI Threshold refers to the mean plus 3 standard deviations of the values during previous influenza seasons (weeks 40-20, 2006-07, 2008-09 and 2010-2011) when influenza activity was low.

For the week ending **May 3, 2014 (Week 18)**, Missouri reported **Sporadic** Influenza Activity to the CDC. Sporadic is defined as: influenza-like illness activity has not increased and there are isolated lab-confirmed cases or a lab-confirmed outbreak in a single institution in the state.

For the week ending April 26, 2014 (week 17), Flu View reported four states with widespread, two states reported regional influenza activity, 13 states reported local influenza activity, 27 states reported sporadic influenza activity, and four states reported no influenza activity. The influenza activity reported by state and territorial epidemiologists indicates geographic spread of influenza viruses, but does not measure the severity of influenza activity.

Contact Us

The Missouri Department of Health and Senior Services after hours number for reporting disease cases and emergencies is **1-800-392-0272**.

¹*All data in this report are provisional and may change as reports are updated.*

²*Influenza activity codes are reported to CDC each Tuesday.*

Data Sources: Laboratory-confirmed cases are reported to DHSS through the passive communicable disease surveillance system. Suspected influenza clusters and outbreaks are reported through the active surveillance system. Pneumonia and influenza deaths are reported through the DHSS Bureau of Vital Records. Influenza-like illness data by age category and total number of patient visits by week are reported voluntarily by participants in the U.S. Outpatient Influenza-like Illness Surveillance Network (ILINet).
