

Missouri Weekly Influenza Report 2010-2011 Season¹

Missouri is reporting “Sporadic” to the CDC for Week 45².

To view influenza maps click [here](#). Each map will give county data by placing the cursor over the county. To view progression maps of influenza throughout the state by jurisdiction click [here](#), or by rate click [here](#).

Table 1. Reported Laboratory cases by sub-type for the Week ending November 13, 2010 (Week 45)

Serogroups	A (non-typed)	A (H1)	A (H1N1)	A (H3)	B	A or B Untyped (rapid test)	Total
Week 45	8	0	0	0	1	0	9

No PCR and/or culture confirmed cases have been reported for week 45.

One specimen was received by the State Public Health Laboratory for viral testing during week 45; it was negative.

Table 2. Influenza Season-to-Date and 5-season Median by Influenza Type Through Week Ending November 13, 2010 (Week 45)

Influenza Type	2010-2011 Season	5-Season Median	% Change from 5-Season Median
Influenza A	60	79	(24.1%)
Influenza B	16	38	(57.9%)
Influenza Unknown Or Untyped	1	12	(91.7%)
Total	77	124	(37.9%)

Table 3. Influenza Season-to-Date and 5-season Median by Age Group Through Week Ending November 13, 2010 (Week 45)

Age Group	2010-2011 Season	5-Season Median
00-<02	8	6
02-04	6	6
05-14	12	21
15-24	9	11
25-49	22	28
50-64	7	16
65+	13	13
Total	77	124

Table 4. Influenza Season-to-Date and 5-season Median by District Through Week Ending November 13, 2010 (Week 45)

District	2010-2011 Season	5-Season Median
CE	4	14
EA	18	20
NW	24	16
SE	5	12
SW	26	15
Total	77	124

**Table 5. Deaths involving Pneumonia and Influenza (P&I)
Reported During the Week Ending November 6, 2010 (Week 44)**

Week 44	Season-to-Date 2010-2011	Season-to-Date 2009-2010	Week 44 Last Season	5 Year Weekly Median
87	467	408	71	71

Graph 1. Reported Influenza Cases 2010-2011 Season-To-Date as compared to the previous Four Influenza Seasons Through the Week Ending November 13, 2010 (Week 45)

The number of reported influenza cases for week 45 of the 2010-2011 season is at historic levels.

Outbreaks/Closures of Influenza-like Illness: No school closings have been reported for week 45 of the current season; three school closings were reported for this week last season. No outbreaks have been reported for week 45 of the current season; no outbreaks were reported for this week last season. No school closings or outbreaks have been reported season-to-date for the 2010-2011 season; fifty-seven school closings and thirteen outbreaks were reported for the same period (week 40-week 45) during the 2009-2010 season.

**Table 6. U.S. Outpatient Influenza-like Illness Surveillance Network (ILINet) by County
Influenza-like Illness (ILI) for the Week Ending November 13, 2010 (Week 45)**

Jurisdiction	Age 0-4	Age 5-24	Age 25-49	Age 50-64	Age 65+	Total ILI Patients Seen	Total Patients Seen	Percent ILI

*Only counties with sentinel provider(s) are listed above.

**To learn about ILINet, view the following website: <http://www.cdc.gov/flu/weekly/fluactivity.htm>

***This is **below** the national baseline of 2.5%.

The state rate of 1.22% in week 45, is below Missouri's ILI baseline of 2.47%.

Graph 2. Percentage of Visits for Influenza-like-Illness (ILI) Reported by the Missouri Outpatient ILI Surveillance Network (ILINet) 2010-2011 Season-To-Date as compared to the previous Two Influenza Seasons Through the Week Ending November 13, 2010 (Week 45)

ILINet baseline refers to the mean plus two standard deviations of the values during previous influenza seasons (week 40-20).

Graph 3. Weekly Percentage of Influenza-like Illness Chief Complaints in ESSENCE Participating Hospitals 2006-2011 Influenza Seasons Through the Week Ending November 13, 2010 (Week 45)

*ESSENCE ILI Threshold refers to the mean plus 2 standard deviations of the values during previous influenza seasons (week 40-20, 2006-2007) when influenza activity was low.

Graph 4. Percentage of Patients Hospitalized for Influenza and/or Pneumonia Syndromes By Age Group from 81 Participating Missouri Hospitals October 3, 2010 to November 13, 2010

For the week ending November 13, 2010 (week 45), Missouri reported **Sporadic** to the CDC. Sporadic activity is defined as sporadically occurring influenza-like illness or culture-confirmed influenza, with no outbreaks detected.

For the week ending November 6, 2010 (week 44), Flu View reported no states with widespread or regional. Three states reported local influenza activity, 34 states reported sporadic influenza activity and 13 states reported no activity. The influenza activity reported by state and territorial epidemiologists indicates geographic spread of influenza viruses, but does not measure the severity of influenza activity.

National influenza surveillance information is available from the Centers for Disease Control and Prevention at: www.cdc.gov/ncidod/diseases/flu/weekly.htm.

Contact Us

The Missouri Department of Health and Senior Services after hours number for reporting disease cases and emergencies is **1-800-392-0272**.

¹*All data in this report are provisional and may change as reports are updated.*

²*Influenza activity codes are reported to CDC each Tuesday.*

Data Sources: Laboratory-confirmed cases are reported to DHSS through the passive communicable disease surveillance system. Suspected influenza clusters and outbreaks are reported through the active surveillance system. Pneumonia and influenza deaths are reported through the DHSS Bureau of Vital Records. Influenza-like illness data by age category and total number of patient visits by week are reported voluntarily by participants in the U.S. Outpatient Influenza-like Illness Surveillance Network (ILINet).
