Missouri Department of Health and Senior Services Dead Bird Reporting As of December 31, 2013

The Missouri Department of Health and Senior Services (DHSS) no longer tests dead birds for the presence of West Nile virus (WNV). Although birds die from many different infectious diseases or exposure to toxins, DHSS' Internet dead bird reporting form is being used to track reports of dead birds because they may be an early sign of WNV activity in an area.

Users of these data are cautioned that reports from the public are not authenticated or confirmed in any way and are subject to inaccuracies. For more information on reporting and disposing of dead birds, go to <https://webapp03.dhss.mo.gov/DeadBird/Index.aspx>
