

# INSECT REPELLENT WITH DEET MAKES SKEETERS SCATTER

- Insect repellents containing DEET help you avoid the irritating bites from ticks and mosquitoes. Protection from bites means protecting your family against the diseases these insects can carry, like Rocky Mountain spotted fever and West Nile virus disease.
- For over 40 years insect repellents containing DEET (N,N-diethyl-m-toluamide) have safely prevented millions from being bitten by mosquitoes and ticks.
- Apply a repellent with DEET on clothing and exposed skin when you go outdoors. After you return indoors wash exposed skin with soap and water.

INSECT REPELLENT WITH DEET  
HELPS YOU AVOID BUG BITES
