

Here's a Pitch to Play It Safe When You Go Out and Play.

- People over age 50 are at high risk for serious West Nile virus complications.
- Insect repellents containing DEET (N,N-diethyl-m-toluamide) have safely prevented millions from being bitten by mosquitoes and ticks for over 40 years.
- Apply a repellent with DEET on clothing and exposed skin when you go outdoors. After you return indoors wash exposed skin with soap and water.

**INSECT REPELLENT WITH DEET
HELPS YOU AVOID BUG BITES**
