Missouri's Public Health
System *at a Glance*

Building Upon and Continuously Strengthening Our Public Health Network

Notes

Dear Senator:

The Missouri public health system is in action every day, in every county of the state. It assures our children are immunized, that plans are in place for emergency and disaster management, that infectious diseases are detected and curtailed, that the effects of diseases like cancer and asthma are reduced, that drinking water quality is monitored, that restaurant food is safe, and attention is given to preventing injuries. Your health depends on public health.

Accomplishing these enormous tasks requires an integrated system that includes health professionals who are competent in cross-cutting and technical skills, public health agencies with the capacity to assess and respond to community health needs, and up-to-date information systems. A robust infrastructure with adequate resources must be in place to support these system components.

An important step in assuring that adequate resources are available is sharing information on how resources are being used. That is why the Missouri Department of Health and Senior Services has developed this report that provides a picture of the resources available in each county in your district.

Together, we can ensure the strength of Missouri's public health system and protect and promote the health of you, your family and your constituents.

Jane Drummond, Director
Missouri Department of Health and Senior Services

Dent

County Health Center

County and Health Department Information

Title: Jane Jadwin, Administrator

Address: 601 South MacArthur, Salem, MO 65560

Phone: (573) 729-3106
