

# Vaccines aren't just for infants!

Immunization is the single most important way parents can protect their children against serious diseases.

	7 - 10 Years	11 - 12 Years	13 - 18 Years
<b>Tetanus, Diphtheria, Pertussis (Tdap)</b>	✓	✓	✓
<b>Meningococcal Conjugate (MCV4)</b>		✓ (1 dose)	✓ (1 dose; Booster at 16)
<b>Human Papillomavirus (HPV)</b>		✓ (3 doses)	✓
<b>Influenza</b>	Every flu season! <small>Children 6 months through 8 years old who receive a flu vaccine for the first time should be given two doses, four weeks apart.</small>		
<b>Hepatitis B</b>	✓	✓	✓
<b>Poliovirus (Polio)</b>	✓	✓	✓
<b>Measles, Mumps, Rubella (MMR)</b>	✓	✓	✓
<b>Varicella (Chickenpox)</b>	✓	✓	✓
<b>Hepatitis A</b>	✓	✓	✓
<b>Pneumococcal</b>	Recommended for older children with certain medical conditions that place them at high risk.		

✓ Vaccine to be given if child is catching up on missed doses.

Missouri's immunization schedule is compatible with the current recommendations of the Advisory Committee on Immunization Practice (ACIP) of the Centers for Disease Control and Prevention (CDC), the American Academy of Pediatrics (AAP) and the American Academy of Family Physicians (AAFP). For more information, please contact the Missouri Department of Health and Senior Services, Bureau of Immunization Assessment and Assurance at 800.219.3224 or visit [www.health.mo.gov/immunizations](http://www.health.mo.gov/immunizations).
