Helping Families Keep Children Safe

VACCINES for CHILDREN

Children may be eligible to receive free vaccines through the Vaccines for Children Program before their 19th birthday if they:

- are Medicaid eligible;
- do not have health insurance;
- are underinsured; or
- are an American Indian or Alaskan Native.

Doctors may charge a fee to give each shot; however, Vaccines for Children vaccines cannot be denied to an eligible child if the family cannot afford the fee.
