

American Indian and Alaska Native children have a greater risk of getting some diseases than other U.S. children.

What is the Vaccines for Children program?

The Vaccines for Children program is funded by the Centers for Disease Control and Prevention and provides free vaccines for children who qualify.

Does my child qualify?

American Indian and Alaska Native children, before their 19th birthday, can get vaccines through the Vaccines for Children program at no charge.

How much will I have to pay?

All vaccines are free through the Vaccines for Children program. However, parents may be charged a small fee by the doctor's office for an office visit and an administration fee each immunization.

Where can I get my child vaccinated?

- Any Vaccines for Children provider
- Local Public Health Agency
- Federally Qualified Health Center
- Rural Health Center
- Private providers

To find a provider, look for the Vaccines for Children locator button on our web site!

Vaccines:

A Responsibility to Our Children

VACCINES CAN PROTECT YOUR COMMUNITY

Vaccines protect more than your child. They protect the entire community. If enough people in our communities are protected, vaccine-preventable diseases will not be passed to our children, our families and our communities.

VACCINES CAN PREVENT MANY DISEASES

You may not have seen some diseases, such as chickenpox, measles and mumps, and that is because fewer people are getting sick from these diseases in the U.S. Responsible health care providers have given vaccines to millions of children over the past years.

For more information about Missouri's Vaccines for Children program, visit www.health.mo.gov/immunizations or call 800.219.3224.
