

VACCINES FOR CHILDREN PROGRAM

2016-2017 Influenza Vaccine Order and Accountability Form

This form should only be used to order influenza vaccine by providers who haven't started using the Vaccine Ordering System. Providers who order via the online Vaccine Ordering System need to use the online system to order influenza vaccine. Using the Vaccine Ordering System will shorten the amount of time it takes to receive your vaccine.

Ensure your PIN is included on the form.

Inventory and doses administered should only be reported once per month on this form when submitting the monthly accountability report. Inventory must be reported by NDC# and needs to include the lot number and expiration date of each dose in inventory.

Order as often as needed, but only what will be needed for four-to-six weeks. Orders are allowed based on the vaccine pre-order that was submitted in February/March 2016. Vaccine orders may be partially filled depending on the amount of vaccine available but form will be kept on file and the remainder will be shipped as soon as vaccine becomes available.

Influenza NDC numbers change each year and previous versions of this form will not be accepted.

Accountability Period From	To
Provider/Clinic Name	PIN

Vaccine	Age Information	Brand and Manufacturer	VFC CPT Code	Doses in Inventory	Doses Administered (during accountability period)	Vaccine Expiration Date	NDC Number	Lot # (Attach additional sheets if needed)	Doses Requested
