Vaccines for Children Fahrenheit (F) Temperature Log

Temperature Logs are due the first business day of each month. Please submit to the VFC Program on-line via the Vaccine Ordering System (VOS).

Instructions: All staff responsible for checking temperatures **must be trained** to properly read the thermometer in each storage unit. In each of the corresponding columns across the page the staff person checking the temperature is to record the time, initial, record the temperature, determine if temperature is within range, and document "**yes**" it is in range or "**no**" it is not in range in the appropriate column. If the temperature is not in range **take action** and **document** the actions taken. Note: Colder is **NOT** better for refrigerator temperatures.

Document temperatures twice daily and maintain temperature logs on file for a minimum of three (3) years

LOCATION or NUMBER: (Refrigerator)_____ **(Freezer)**_____

Clinic Name: _____ **Month/Year**_____ **PIN**_____ **(Required)**

REFRIGERATOR (Temperature Range not less than 36° to 46° F) (Optimum Temperature 40° - 42° F)

Day of Month	Time: AM	Staff Initials	Actual Temperature	Are Temps in Range? (Yes/No)	Time: PM	Staff Initials	Actual Temperature	Are Temps in Range? (Yes/No)
