**Title 19 – DEPARTMENT OF HEALTH Division 20 – Division of Environmental Health and Communicable Disease Prevention Chapter 28 - Immunization**

**19 CSR 20-28.040 Day Care Immunization Rule**

*PURPOSE: This rule establishes immunization requirements in accordance with recommendations of the Advisory Committee on Immunization Practices (ACIP) for all children attending public, private or parochial day care, preschool or nursery schools caring for ten or more children, and describes actions to be taken to ensure compliance with section 210.003, RSMo.*

(1) As mandated by section 210.003, RSMo, the administrator of each public, private, or parochial day care center, preschool, or nursery school caring for ten (10) or more children shall have a record prepared showing the immunization status of every child enrolled in or attending a facility under the administrator's jurisdiction. The administrator shall also make an annual summary report to the Department of Health and Senior Services on form Imm.P.32, included herein, no later than January 15 of each year.

(2) No child shall enroll in or attend a public, private, or parochial day care center, preschool, or nursery school caring for ten (10) or more children unless the child has been adequately immunized according to this rule. Children attending elementary school who receive before or after school care, or both, shall meet the immunization requirements established in the School Immunization Rule, 19 CSR 20-28.010. Preschool-age children shall be immunized against hepatitis B, diphtheria, tetanus, pertussis, polio, measles, mumps and rubella, varicella, pneumococcal, and *Haemophilus influenzae* type b according to the latest Recommended Childhood Immunization Schedule-United States, approved by the Advisory Committee on Immunization Practices (ACIP). As the schedule is updated, it will be available from and distributed by the Department of Health.

(3) Section 210.003, RSMo, provides that a child who has not completed all appropriate immunizations may enroll if-

(A) Satisfactory evidence is produced that the child has begun the process of immunization. The child may continue to attend as long as the immunization process is being accomplished according to the Department of Health and Senior Services' recommended schedule. Failure to meet the next scheduled appointment constitutes noncompliance with the day care immunization law, and action shall be initiated immediately by the administrator to have the child excluded from the facility.

(B) The parent or guardian has signed and placed on file with the day care administrator a statement of exemption which may be either of the following:

1. A medical exemption, by which a child shall be exempted from the requirements of this rule upon certification by a licensed doctor of medicine or doctor of osteopathy, that either the immunization would seriously endanger the child's health or life, or the child has documentation of laboratory evidence of immunity to the disease. The Department of Health and Senior Services' form Imm.P.12, included herein, shall be on file with the immunization record of each child with a medical exemption. The medical exemption need not be renewed annually; or

2. A parent or guardian exemption, by which a child shall be exempted from the requirements of this rule if one (1) parent or guardian files a written objection to immunization with the day care administrator. The Department of Health and Senior Services' form Imm.P.11, included herein, shall be on file with the immunization record of each child with a parental exemption. The parental exemption form must be renewed annually.

(4) The parent or guardian shall furnish the day care administrator satisfactory evidence of completion of the required immunizations, exemption from immunization, or progress toward completing all required immunizations. Satisfactory evidence of immunization means a statement, certificate, or record from a physician or other recognized health facility stating that the required immunizations have been given to the person and verifying type of vaccine and the dates, including the month, day, and year of each immunization. However, if a child has had varicella (chickenpox) disease, a licensed doctor of medicine or doctor of osteopathy may sign and place on file with the day care administrator a written statement documenting previous varicella (chickenpox) disease. The statement may contain wording such as: "This is to verify that (name of child) had varicella (chickenpox) disease on or about (date) and does not need varicella vaccine."
