

Community Supervised Practice

Interns will complete spend at least 450 practice hours and 60 didactic hours in community rotations. These rotations include: University Extension, Community Food and Nutrition Assistance, county health department, retail (HyVee), outreach and WIC and Nutrition Services. A complete list of all competencies to be achieved and learning activities to be completed is included in this section. Additionally, the competencies and learning activities for didactic hours and each of the sub rotations can be found in this section. A checklist has been developed for interns to use in ensuring they have completed all segments of community supervised practice. It is included in this section.

PDI has a concentration area of Public Health/Community Nutrition. The competencies and learning activities associated with this concentration will be achieved during the community supervised practice rotations. The concentration area competencies and learning activities are included on the complete listing of community competencies at the end of the document.
