

SERVICE COORDINATION PROCESS

Service coordination is a culturally competent, collaborative, proactive and comprehensive health care process designed to help each person achieve the best possible health and greatest degree of independence.

The primary mechanisms of service coordination are:

- Individualized Assessment;
- Planning;
- Plan implementation;
- Monitoring; and
- Transitioning.

Refer to the Training Guide Development of Service Coordination Assessment located on the Training Resource Web Page for specific processes, activities, and principles regarding the primary mechanisms of Service Coordination.
