(E) Data used to compute the area agency **on aging** allotment percentages will be derived from the most recent decennial Census of Population and Housing, for the following categories:

(3) The funds allocated to each area agency **on aging** shall include an identical base amount to each AAA in the state and an amount allotted using the factors in section (2).

*[(5) The division in consultation with all shall develop and use an intrastate funding formula for the allocation of Title III funds for Disease Prevention and Health Promotion Services.*

*(6) The intrastate funding formula for the allocation of Title III funds for Disease Prevention and Health Promotion Services shall be established by the proportion of the sum of the factors for each PSA to the total of the factors for the state as calculated by using the following three (3) factors:*

*(A) Average score of the sum of the following four (4) social and economic need indicators per region:*

*1. The proportion of the individuals who are age sixty (60) and over who are low-income to the total population of individuals who are age sixty (60) and over within each county or the city of St. Louis. A score was assigned to each county or the city of St. Louis based upon the following scale:*

- A. 0.00%—6.00% = 1*
- B. 6.01%—12.00% = 2*
- C. 12.01%—18.00% = 3*

- D. 18.01%—24.00% = 4
- E. 24.01%—100.00% = 5

2. The proportion of the individuals who are age sixty (60) and over who are receiving Medicaid assistance to the total population of individuals who are age sixty (60) and over within each county or the city of St. Louis. A score was assigned to each county or the city of St. Louis based upon the following scale:

- A. 0.00%—6.00% = 1
- B. 6.01%—12.00% = 2
- C. 12.01%—18.00% = 3
- D. 18.01%—24.00% = 4
- E. 24.01%—100.00% = 5

3. The proportion of the individuals who are age sixty (60) and over who are minority to the total population of individuals who are age sixty (60) and over within each county or the city of St. Louis. A score was assigned to each county or the city of St. Louis based upon the following scale:

- A. 0.00%—1.00% = 1
- B. 1.01%—5.00% = 2
- C. 5.01%—8.00% = 3
- D. 8.01%—12.00% = 4
- E. 12.01%—100.00% = 5

4. The population density expressed as individuals per square mile within each county or the city of St. Louis. A score was assigned to each county or the city of St. Louis based upon the following scale:

- A. 0.00—10.00 persons per square mile = 5
- B. 10.01—15.00 persons per square mile = 4

This factor is computed by dividing the population sixty (60) and over residing in an HPSA per PSA by the total population sixty (60) and over residing in an HPSA within the state; the quotient is then multiplied by one hundred (100);

(D) Data used for the following categories will be derived from the most recent decennial Census for use in allocating funds.

1. Population sixty (60) and over;
2. Population sixty (60) and over minority;

(E) Data used for the population sixty (60) and over below poverty will be derived from the most recent decennial Census of Population and Housing;
