1. In the case of a freestanding facility, the distance between the facility and the school, daycare, or church shall be measured from the property line of the facility to the closest point of the property line of the school, daycare, or church.

2. In the case of a facility that is part of a larger structure, such as an office building or strip mall, the distance between the facility and the school, daycare, or church shall be measured from

the property line of the school, daycare, or church to the facility's entrance or exit closest in proximity to the school, daycare, or church.
