

Assessment, Prioritization and Priority Population Worksheet

Use this worksheet with your partners to summarize the results of the community needs assessment and identification of priority health issues and population.

1. What was the priority health issue identified through the community needs assessment and prioritization processes?

2. What disparities among demographic factors were found when completing the community needs assessment, if any?

3. What geographic disparities were identified in the community needs assessment, if any?

4. What is (are) the priority population(s) with which you intend to plan an intervention?

5. Who are subgroups of the priority population(s), if any?

6. What is approximate number of people comprising the priority population and any of its subgroups?

7. What are the shared social and cultural characteristics of the priority population?

8. Other considerations for working with the priority population?
