

Missouri Resident Child Health Profile

Indicator	Rate Denominator & Constant	Rate Type
Population Estimates		
Ages 1-4	percent of total estimated resident population per year	crude rate
Ages 5-14	percent of total estimated resident population per year	crude rate
Ages 15-17	percent of total estimated resident population per year	crude rate
Ages 18-19	percent of total estimated resident population per year	crude rate
WIC		
WIC Participation: Ages 12 to 59 Months- Inclusive	per 100 resident children ages 1 through 4 using population estimates for noted year	crude rate
WIC Children Ages 24 to 59 Months Obese (BMI)	per 100 WIC children with known Body Mass Index status per year	crude rate
Lead Testing		
Lead Testing: Under Age 6	percent of resident children under age 6 using population estimates for noted year	crude rate
Blood Lead Elevations >=10 ug/dL: Under Age 6 Tested	percent of resident children under age 6 tested for elevated lead using population estimates for noted year	crude rate
Selected Indicators Under Age 18		
Under Age 18: Asthma ER Visits	per year per 1,000 specified age population	crude rate
Under Age 18: Asthma Hospitalizations	per year per 10,000 specified age population	crude rate
Divorces Involving Children	percent of reported divorces and annulments per year	crude rate
Probable Cause Child Abuse/Neglect	per 1,000 resident children under age 18 using population estimates for noted year	crude rate
Selected Indicators Ages 1-14		
Ages 1-14: Self Pay/No Charge ER Visits	per year per 1,000 ER visits for the given age group	crude rate
Ages 1-14: Self Pay/No Charge Hospitalizations	per year per 1,000 ER visits for the given age group	crude rate
Injury ER Visits	per year per 100,000 specified age population	crude rate
Injury Hospitalizations	per year per 100,000 specified age population	crude rate
Deaths Ages 1-14		
All Causes	per year per 100,000 specified age population	crude rate
Total Unintentional Injuries	per year per 100,000 specified age population	crude rate
Motor Vehicle Deaths	per year per 100,000 specified age population	crude rate
All Cancers (Malignant Neoplasms)	per year per 100,000 specified age population	crude rate
Birth Defects	per year per 100,000 specified age population	crude rate
Homicide	per year per 100,000 specified age population	crude rate

Missouri Resident Child Health Profile

Indicator	Rate Denominator & Constant	Rate Type
Heart Disease	per year per 100,000 specified age population	crude rate
Selected Indicators Ages 15-19		
Ages 15-19: Self Pay/No Charge ER Visits	per year per 1,000 ER visits for the given age group	crude rate
Ages 15-19: Self Pay/No Charge Hospitalizations	per year per 1,000 ER visits for the given age group	crude rate
Injury ER Visits	per year per 100,000 specified age population	crude rate
Injury Hospitalizations	per year per 100,000 specified age population	crude rate
STDs Ages 15-19		
Chlamydia	per 100,000 residents age 15-19 using population estimates for noted year	crude rate
Deaths Ages 15-19		
All Causes	per year per 100,000 specified age population	crude rate
Total Unintentional Injuries	per year per 100,000 specified age population	crude rate
Motor Vehicle Deaths	per year per 100,000 specified age population	crude rate
Homicide	per year per 100,000 specified age population	crude rate
Suicide	per year per 100,000 specified age population	crude rate
All Cancers (Malignant Neoplasms)	per year per 100,000 specified age population	crude rate
Heart Disease	per year per 100,000 specified age population	crude rate
