Description:

To assist state, local, tribal, territorial, and federal public health practitioners in monitoring emergency department visits for suspected nonfatal drug overdoses using syndromic surveillance data. The CCDC All Drug Overdose v3 Parsed syndrome definition was designed to be used to identify ED visits for suspected nonfatal drug overdoses of unintentional or undetermined intent. Within ESSENCE, the syndrome query is applied to the Chief Complaint Discharge Diagnosis (CCDD) Parsed field, which combines these two fields of interest. This definition also contains within itself the logic for CDC Opioid Overdose v4 Parsed, CDC Stimulant Overdose v4 Parsed, and CDC Benzodiazepine Overdose v2 Parsed.

The factsheet is available here:
