Description:

This is very similar logic to the CCDD Category CDC Opioid Overdose v3, but with some changes. A primary chage is that this query includes the syntax for the CCDD Categories CDC Fentanyl Overdose v2 Parsed and CDC Heroin Overdose v5 Parsed along with an updated version of previous Opioid Overdose queries. Logic follows (CDC Opioid Overdose v4 Parsed) OR (CDC Heroin Overdose v5 Parsed) OR (CDC Fentanyl Overdose v2 Parsed).The Opioid Overdose portion received some changes and updates and it was adapted to now query the CCDD Parsed field. Created by partners in the CDCs National Center for Injury Prevention and Control to support states and jurisdictions in monitoring suspected all opioid overdose using syndromic surveillance data.

The factsheet is available here:
