Re: Broadway Arches Behavioral Health Facility, Project #6158 HS – 72-Bed
Behavioral Health Facility in St. Louis City

Dear Ms. Dorge,

I would like to extend my support to Broadway Arches in its application to obtain a certificate of need for a new 72-bed inpatient behavioral health facility in St. Louis City.

There is significant need for inpatient psychiatric beds in the state of Missouri. In the service area for this proposed facility, there is a need for hundreds of beds. Residents of this area and the state will greatly benefit from the addition of the proposed facility. The applicant proposes to renovate an existing 4-story building that was formerly a nursing facility and that is currently vacant. This renovation will add much needed jobs to the community, and the facility itself will add 135 permanent professional and semi-professional jobs, not to mention many other jobs and revenue created for services such as laundry, food deliveries, transportation, and the like.

The applicant has extensive experience with providing inpatient behavioral health services, successfully operating inpatient facilities in other nearby Midwest states, Ohio and Indiana, which are Joint Commission or CARF accredited. Applicant operates several adjacent behavioral health companies in those states, including transportation, community-based outpatient services, applied behavior analysis, and outpatient adolescent behavioral health, which further demonstrates applicant's commitment to providing a continuum of care for patients with behavioral health needs.

For these reasons, I fully support this project and encourage you to approve the application.

Very truly yours,

kyates outreach
