GENERAL REQUIREMENTS

Travel Cost: In accordance with HHS Grants Policy Statement, travel costs are allowable when the travel will provide a direct benefit to the project or program. To prevent disallowance of cost, the grantee is responsible for ensuring travel costs are clearly stated in their budget narrative and are applied in accordance with their organization's established travel policies and procedures. The grantee's established travel policies and procedures must also meet the requirements of 45 CFR Part 75.474.

Food and Meals: Costs associated with food or meals are allowable when consistent with applicable federal regulations and HHS policies. In addition, costs must be clearly stated in the budget narrative and be consistent with organization approved policies. Grantees must make a determination of reasonableness and organization approved policies must meet the requirements of 45 CFR Part 75.432.

Prior Approval: All requests, which require prior approval, must bear the signature of the authorized organization representative. The grantee must submit these requests by **December 1, 2017** or no later than 120 days prior to this budget period's end date. Additionally, any requests involving funding issues must include an itemized budget and a narrative justification of the request.

The following types of requests require prior approval.

- Lift funding restriction
- Significant redirection of funds (i.e. cumulative changes of 25% of total award)
- Change in scope
- Implement a new activity or enter into a sub-award that is not specified in the approved budget
- Apply for supplemental funds

Note: Awardees may request up to 75 percent of their estimated unobligated funds to be carried forward into the next budget period.

Templates for prior approval requests can be found at:

<http://www.cdc.gov/grants/alreadyhavegrant/priorapprovalrequests.html>

Key Personnel: In accordance with 45 CFR Part 75.308, CDC grantees must obtain prior approval from CDC for (1) change in the project director/principal investigator, business official, authorized organizational representative or other key persons specified in the FOA, application or award document; and (2) the disengagement from the project for more than three months, or a 25 percent reduction in time devoted to the project, by the approved project director or principal investigator.

Inventions: Acceptance of grant funds obligates grantees to comply with the standard patent rights clause in 37 CFR Part 401.14.

Publications: Publications, journal articles, etc. produced under a CDC grant support project must bear an acknowledgment and disclaimer, as appropriate, for example:

This publication (journal article, etc.) was supported by the Grant or Cooperative Agreement Number, **TS17-1701**, funded by the Centers for Disease Control and Prevention. Its contents are solely the responsibility of the authors and do not necessarily represent the official views of the Centers for Disease Control and Prevention or the Department of Health and Human Services.

Acknowledgment Of Federal Support: When issuing statements, press releases, requests for proposals, bid solicitations and other documents describing projects or programs funded in whole or in part with Federal money, all awardees receiving Federal funds, including and not limited to State and local governments and grantees of Federal research grants, shall clearly state:

- percentage of the total costs of the program or project which will be financed with Federal money
- dollar amount of Federal funds for the project or program, and
- percentage and dollar amount of the total costs of the project or program that will be financed by non-governmental sources.

Copyright Interests Provision: This provision is intended to ensure that the public has access to the results and accomplishments of public health activities funded by CDC. Pursuant to applicable grant regulations and CDC's Public Access Policy, Recipient agrees to submit into the National Institutes of Health (NIH) Manuscript Submission (NIHMS) system an electronic version of the final, peer-reviewed manuscript of any such work developed under this award upon acceptance for publication, to be made publicly available no later than 12 months after the official date of publication. Also at the time of submission, Recipient and/or the Recipient's submitting author must specify the date the final manuscript will be publicly accessible through PubMed Central (PMC). Recipient and/or Recipient's submitting author must also post the manuscript through PMC within twelve (12) months of the publisher's official date of final publication; however the author is strongly encouraged to make the subject manuscript available as soon as possible. The recipient must obtain prior approval from the CDC for any exception to this provision.

The author's final, peer-reviewed manuscript is defined as the final version accepted for journal publication, and includes all modifications from the publishing peer review process, and all graphics and supplemental material associated with the article. Recipient and its submitting authors working under this award are responsible for ensuring that any publishing or copyright agreements concerning submitted articles reserve adequate right to fully comply with this provision and the license reserved by CDC. The manuscript will be hosted in both PMC and the CDC Stacks institutional repository system. In progress reports for this award, recipient must identify publications subject to the CDC Public Access Policy by using the applicable NIHMS identification number for up to three (3) months after the publication date and

the PubMed Central identification number (PMCID) thereafter.

Disclaimer for Conference/Meeting/Seminar Materials: Disclaimers for conferences/meetings, etc. and/or publications: If a conference/meeting/seminar is funded by a grant, cooperative agreement, sub-grant and/or a contract the grantee must include the following statement on conference materials, including promotional materials, agenda, and internet sites:

Funding for this conference was made possible (in part) by the Centers for Disease Control and Prevention. The views expressed in written conference materials or publications and by speakers and moderators do not necessarily reflect the official policies of the Department of Health and Human Services, nor does the mention of trade names, commercial practices, or organizations imply endorsement by the U.S. Government.

Logo Use for Conference and Other Materials: Neither the Department of Health and Human Services (HHS) nor the CDC logo may be displayed if such display would cause confusion as to the funding source or give false appearance of Government endorsement. Use of the HHS name or logo is governed by U.S.C. Part 1320b-10, which prohibits misuse of the HHS name and emblem in written communication. A non-federal entity is unauthorized to use the HHS name or logo governed by U.S.C. Part 1320b-10. The appropriate use of the HHS logo is subject to review and approval of the HHS Office of the Assistant Secretary for Public Affairs (OASPA). Moreover, the HHS Office of the Inspector General has authority to impose civil monetary penalties for violations (42 CFR Part 1003).

Accordingly, neither the HHS nor the CDC logo can be used by the grantee without the express, written consent of CDC. The Project Officer or Grants Management Officer/Specialist detailed in the CDC Staff Contact section can assist with facilitating such a request. It is the responsibility of the grantee to request consent for use of the logo in sufficient detail to ensure a complete depiction and disclosure of all uses of the Government logos. In all cases for utilization of Government logos, the grantee must ensure written consent is received. Further, the HHS and CDC logo cannot be used by the grantee without a license agreement setting forth the terms and conditions of use.

Equipment and Products: To the greatest extent practical, all equipment and products purchased with CDC funds should be American-made. CDC defines equipment as tangible non-expendable personal property (including exempt property) charged directly to an award having a useful life of more than one year AND an acquisition cost of \$5,000 or more per unit. However, consistent with grantee policy, a lower threshold may be established. Please provide the information to the Grants Management Officer to establish a lower equipment threshold to reflect your organization's policy.

The grantee may use its own property management standards and procedures, provided it observes provisions in applicable grant regulations found at 45 CFR Part 75.

Federal Information Security Management Act (FISMA): All information systems, electronic or hard copy, that contain federal data must be protected from unauthorized access. This standard also applies to information associated with CDC grants. Congress and the OMB have instituted laws, policies and directives that govern the creation and implementation of federal information security practices that pertain specifically to grants and contracts. The current regulations are pursuant to the Federal Information Security Management Act (FISMA), Title III of the E-Government Act of 2002, PL 107-347.

FISMA applies to CDC grantees only when grantees collect, store, process, transmit or use information on behalf of HHS or any of its component organizations. In all other cases, FISMA is not applicable to recipients of grants, including cooperative agreements. Under FISMA, the grantee retains the original data and intellectual property, and is responsible for the security of these data, subject to all applicable laws protecting security, privacy, and research. If/When information collected by a grantee is provided to HHS, responsibility for the protection of the HHS copy of the information is transferred to HHS and it becomes the agency's responsibility to protect that information and any derivative copies as required by FISMA. For the full text of the requirements under Federal Information Security Management Act (FISMA), Title III of the E-Government Act of 2002 Pub. L. No. 107-347, please review the following

SUMMARY STATEMENT

REVIEW DATE: January 30, 2017

APPL NUMBER: NU61TS2017000031

INSTITUTION: Missouri Department of Health and Senior Services

TITLE: ATSDR's Partnership to Promote Local Efforts to Reduce Environmental Exposure (APPLETREE) TS17-1701

APPROVED: Yes

SCORE: 97.00

SUMMARY:

The Missouri Department of Health and Senior Services (MDHSS), Bureau of Environmental Epidemiology (BEE) is a previous recipient of the ATSDR APPLETREE cooperative agreement and other NCEH grants. MDHSS developed and integrated a public health assessment team called the Health and Risk Assessment Program (HRAP). HRAP works closely with communities, environmental and public health agencies, and industry to reduce or eliminate human exposure to hazardous substances from hazardous waste sites or spills.

Missouri has the 14th highest number of active CERCLIS sites and four active FUSRAP sites in the state. Approximately 1,800,000 Missourians live in counties that have been extensively impacted by contamination at current NPL sites.

Because HRAP has a long history of assessing public health hazards, the team is currently involved in some stage of health assessment, remediation, and/or health education at most of Missouri's 33 active NPL sites, as well as numerous non-NPL sites. PHAs or HCS have been completed on 89% of sites placed on the NPL since 1990, and the HRAP team is currently writing three additional health assessment documents on NPL sites.

In addition, the HRAP team addresses community issues and oversees Missouri's program including annual fish advisory, private drinking water well contamination, and illicit methamphetamine laboratory contamination of homes.

HRAP consults and communicates with Federal agencies and other organizations on variety of environmental exposures such as lead, pesticides, radiation, childcare regulations, cancer cluster investigations and other state specific concerns. HRAP has developed strong partnerships and collaborations with multiple agency and organizations including the following:

- ATSDR
- Childhood Lead Poisoning Prevention Program
- Environmental Public Health Tracking Network
- Bureau of Environmental Epidemiology
- Division of Regulations and Licensure
- Bureau of Environmental Health Services
- Cancer Control Program and Cancer Inquiry Committee

- Federal Collaborators
- Local and Community Collaborators

MDHSS included several letters of support that highlight effective collaborations among the local communities in their jurisdiction. The program has successfully reduced exposure to hazardous chemicals and continues to support local communities.

HRAP team recently worked on several sites where childcare centers were found to be potentially impacted by hazardous waste releases. MDHSS believes that establishing an early childcare and education safe-siting program will assist in proactively identifying and preventing or mitigating potential environmental exposures in children.

MDHSS capability to carry out the proposed projects is highlighted by becoming the 16th state health department to achieve national accreditation through the Public Health Accreditation Board in 2016.

Strengths:

The application approach describes examples of previous and ongoing partnerships that demonstrate effective communication and programmatic success. The letters of support include detailed examples of successful reduction of exposure to hazardous chemicals. The APOW includes specific activities and outputs for over ten sites with significant environmental public health issues.

The proposal includes a specific evaluation plan for measuring program impact and outcome. The programs plan for assessing progress and community impact appear to be reasonable.

The program personnel proposal describes an integrated site team that will be able to address components of the APPLETREE program and collaborate with federal and local partners. The team possess the appropriate qualifications and experience for the project.

Strong record of collaborative partnerships to address exposure to hazardous substances in the environment including: evaluating ambient air quality data collected at the Bridgeton Sanitary Landfill, addressing exposure concerns from TCE vapors at Meramec Caverns, and investigates related to historic lead mining operations

Good evaluation and performance measurement plan with examples of the evaluation questions, indicators, and data collection methods

Health department has received national accreditation through the Public Health Accreditation Board and has access to health scientist, involvement specialists, epidemiologists and other disciplines for site work

Strong programmatic need as evidenced by applicant estimate that 1.8 million people are potentially impacted by hazardous waste site contamination in the state

FOR OFFICIAL USE ONLY

FOR OFFICIAL USE ONLY

Weaknesses:

MDHSS approach to the APOW for hazardous waste sites does not include a timeline of approach for initiating and completing activities. A letter of support from a federal agency could have strengthened the applications.

Although there is a large project staff team, no one staff member is 100% effort; majority of staff at 50% effort or less (Risk assessors at 35% effort, and 3 environmental health specialists at 40-50% effort)

Budget: \$420,000

Recommendations:

The continued funding from the APPLETREE cooperative agreement will allow MDHSS to sustain and build resources to respond to site-specific hazardous environmental exposure.
