b. Conviction, for purposes of this award term and condition, means a judgment or conviction of a criminal offense by any court of competent jurisdiction, whether entered upon a verdict or a plea, and includes a conviction entered upon a plea of *nolo contendere*.

c. Total value of currently active grants, cooperative agreements, and procurement contracts includes—

(1) Only the Federal share of the funding under any Federal award with a recipient cost share or match;

(2) The value of all expected funding increments under a Federal award and options, even if not yet exercised

## GENERAL REQUIREMENTS

**Travel Cost:** In accordance with HHS Grants Policy Statement, travel costs are allowable when the travel will provide a direct benefit to the project or program. To prevent disallowance of cost, the recipient is responsible for ensuring travel costs are clearly stated in their budget narrative and are applied in accordance with their organization's established travel policies and procedures. The recipient's established travel policies and procedures must also meet the requirements of 45 CFR Part 75.474.

**Food and Meals:** Costs associated with food or meals are allowable when consistent with applicable federal regulations and HHS policies. In addition, costs must be clearly stated in the budget narrative and be consistent with organization approved policies. Recipients must make a determination of reasonableness and organization approved policies must meet the requirements of 45 CFR Part 75.432.

**Prior Approval:** All requests, which require prior approval, must bear the signature of the authorized organization representative. The recipient must submit these requests by March 3, 2018 or no later than 120 days prior to this budget period's end date. Additionally, any requests involving funding issues must include an itemized budget and a narrative justification of the request.

The following types of requests require prior approval.

- Use of unobligated funds from prior budget period (Carryover)
- Lift funding restriction
- Significant redirection of funds (i.e. cumulative changes of 25% of total award)
- Change in scope
- Implement a new activity or enter into a sub-award that is not specified in the approved budget
- Apply for supplemental funds
- Change in key personnel
- Extensions to period of performance

Note: Awardees may request up to 75 percent of their estimated unobligated funds to be carried forward into the next budget period.

Templates for prior approval requests can be found at:

<http://www.cdc.gov/grants/alreadyhavegrant/priorapprovalrequests.html>

**Key Personnel:** In accordance with 45 CFR Part 75.308, CDC recipients must obtain prior approval from CDC for (1) change in the project director/principal investigator, business official, authorized organizational representative or other key persons specified in the NOFO, application or award document; and (2) the disengagement from the project for more than three months, or a 25 percent reduction in time devoted to the project, by the approved project director or principal investigator.

**Inventions:** Acceptance of grant funds obligates recipients to comply with the standard patent rights clause in 37 CFR Part 401.14.

**Publications:** Publications, journal articles, etc. produced under a CDC grant support project must bear an acknowledgment and disclaimer, as appropriate, for example:

This publication (journal article, etc.) was supported by the Grant or Cooperative Agreement Number, **1 NUE1EH001356**, funded by the Centers for Disease Control and Prevention. Its contents are solely the responsibility of the authors and do not necessarily represent the official views of the Centers for Disease Control and Prevention or the Department of Health and Human Services.

**Acknowledgment Of Federal Support:** When issuing statements, press releases, requests for proposals, bid solicitations and other documents describing projects or programs funded in whole or in part with Federal money, all awardees receiving Federal funds, including and not limited to State and local governments and recipients of Federal research grants, shall clearly state:

- percentage of the total costs of the program or project which will be financed with Federal money
- dollar amount of Federal funds for the project or program, and
- percentage and dollar amount of the total costs of the project or program that will be financed by non-governmental sources.

**Copyright Interests Provision:** This provision is intended to ensure that the public has access to the results and accomplishments of public health activities funded by CDC. Pursuant to applicable grant regulations and CDC's Public Access Policy, Recipient agrees to submit into the National Institutes of Health (NIH) Manuscript Submission (NIHMS) system an electronic version of the final, peer-reviewed manuscript of any such work developed under this award upon acceptance for publication, to be made publicly available no later than 12 months after the official date of publication. Also at the time of submission, Recipient and/or the Recipient's submitting author must specify the date the final manuscript will be publicly accessible through PubMed Central (PMC). Recipient and/or Recipient's submitting author must also post the manuscript through PMC within twelve (12) months of the publisher's official date of final publication; however the author is strongly encouraged to make the subject manuscript available as soon as possible. The recipient must obtain prior approval from the CDC for any exception to this provision.

The author's final, peer-reviewed manuscript is defined as the final version accepted for journal publication, and includes all modifications from the publishing peer review process, and all graphics and supplemental material associated with the article. Recipient and its submitting authors working under this award are responsible for ensuring that any publishing or copyright agreements concerning submitted articles reserve adequate right to fully comply with this provision and the license reserved by CDC. The manuscript will be hosted in both PMC and the CDC Stacks institutional repository system. In progress reports for this award, recipient must identify publications subject to the CDC Public Access Policy by using the applicable NIHMS identification

number for up to three (3) months after the publication date and the PubMed Central identification number (PMCID) thereafter.

**Disclaimer for Conference/Meeting/Seminar Materials:** Disclaimers for conferences/meetings, etc. and/or publications: If a conference/meeting/seminar is funded by a grant, cooperative agreement, sub- grant and/or a contract the recipient must include the following statement on conference materials, including promotional materials, agenda, and internet sites:

Funding for this conference was made possible (in part) by the Centers for Disease Control and Prevention. The views expressed in written conference materials or publications and by speakers and moderators do not necessarily reflect the official policies of the Department of Health and Human Services, nor does the mention of trade names, commercial practices, or organizations imply endorsement by the U.S. Government.

**Logo Use for Conference and Other Materials:** Neither the Department of Health and Human Services (HHS) nor the CDC logo may be displayed if such display would cause confusion as to the funding source or give false appearance of Government endorsement. Use of the HHS name or logo is governed by

U.S.C. Part 1320b-10, which prohibits misuse of the HHS name and emblem in written communication. A non-federal entity is unauthorized to use the HHS name or logo governed by U.S.C. Part 1320b-10. The appropriate use of the HHS logo is subject to review and approval of the HHS Office of the Assistant Secretary for Public Affairs (OASPA). Moreover, the HHS Office of the Inspector General has authority to impose civil monetary penalties for violations (42 CFR Part 1003).

Accordingly, neither the HHS nor the CDC logo can be used by the recipient without the express, written consent of CDC. The Project Officer or Grants Management Officer/Specialist detailed in the CDC Staff Contact section can assist with facilitating such a request. It is the responsibility of the recipient to request consent for use of the logo in sufficient detail to ensure a complete depiction and disclosure of all uses of the Government logos. In all cases for utilization of Government logos, the recipient must ensure written consent is received. Further, the HHS and CDC logo cannot be used by the recipient without a license agreement setting forth the terms and conditions of use.

**Equipment and Products:** To the greatest extent practical, all equipment and products purchased with CDC funds should be American-made. CDC defines equipment as tangible non-expendable personal property (including exempt property) charged directly to an award having a useful life of more than one year AND an acquisition cost of \$5,000 or more per unit. However, consistent with recipient policy, a lower threshold may be established. Please provide the information to the Grants Management Officer to establish a lower equipment threshold to reflect your organization's policy.

The recipient may use its own property management standards and procedures, provided it observes provisions in applicable grant regulations found at 45 CFR Part 75.

**Federal Information Security Management Act (FISMA):** All information systems, electronic or hard copy, that contain federal data must be protected from unauthorized access. This standard also applies to information associated with CDC grants. Congress and the OMB have instituted laws, policies and directives that govern the creation and implementation of federal information security practices that pertain specifically to grants and contracts. The current regulations are pursuant to the Federal Information Security Management Act (FISMA), Title III of the E-Government Act of 2002, PL 107-347.

FISMA applies to CDC recipients only when recipients collect, store, process, transmit or use

information on behalf of HHS or any of its component organizations. In all other cases, FISMA is not applicable to recipients of grants, including cooperative agreements. Under FISMA, the recipient retains the original data and intellectual property, and is responsible for the security of these data, subject to all applicable laws protecting security, privacy, and research. If/When information collected by a recipient is provided to HHS, responsibility for the protection of the HHS copy of the information is transferred to HHS and it becomes the agency's responsibility to protect that information and any derivative copies as required by FISMA. For the full text of the requirements under Federal Information Security Management Act (FISMA), Title III of the E-Government Act of 2002 Pub. L. No. 107-347, please review the following website:

<b>Objective Review Summary Statement</b>

**Date Reviewed:** June 30, 2017

**Application Number:** NUE1EH2017000332

**Applicant Organization:** Missouri Department of Health and Senior Services

**Funds Requested:** \$1,200,000

**Recommendation:** Approve

**Final Average Score:** 86

**Human Subjects Issues:** No

## **Summary of the Project (provided by applicant):**

Missouri's Department of Health and Senior Services (DHSS) has been a leader in the development and implementation of the Environmental Public Health Tracking (EPHT) network since its inception in October 2002. With this funding, the EPHT program has developed and implemented a web-based portal with both public and secure components. The portal integrates health information with environmental, hazard, and risk data, and contains multiple core data sets and Nationally Consistent Data Measures (NCDM), dynamic data queries, searchable metadata, and interactive mapping applications.

Missouri's objective is to provide information to and receive information from the national EPHT network by compiling, combining, and translating public health and environmental data into meaningful information. That information is then used to improve the health of Missourians and their communities. MO EPHT has outlined the following methods to meet this objective:

1. Operate, maintain, and enhance the MO EPHT network for the collection, access, analysis, and dissemination of environmental public health data, knowledge, and information.
2. Promote the use of MO EPHT network through marketing and outreach.
3. Use the MO EPHT network to guide policy and other actions to improve the health, safety, and well-being of Missouri citizens.
4. Foster collaboration among MO EPHT partners and stakeholders.

The purpose of this project is to expand, enhance, and strengthen national and EPHT network portals by continuing to identify environmental exposure, hazard, and risk data; and to provide timely information for public health evidence-based decision-making, and focused policy development. The MO EPHT project strives to bring consistency and uniformity to how environment, hazard, exposure, risk, and tracking databases collect and store data that is developed, analyzed, presented, and distributed timely to entities looking for environmental information and analyses. Finally, MO EPHT is endeavoring to increase information awareness, expand its' use in driving public health interventions, policy development, and provide data at the smallest practical geography.

## **Summary of Strengths:**

- Missouri's Department of Health and Senior Services has developed and operated its EPHT network since its inception in 2002. Its portal is well integrated the Department and is managed by its Bureau of Environmental Epidemiology. It seems that in addition to what the FOA has already outlined, the applicant will strive to increase identification and outreach to high-risk areas and populations.
- Collaborations with other CDC programs and CDC-funded organizations:
  - Childhood Lead Poisoning Prevention Program (CLPPP), Healthy Indoor Environment, Missouri Adult Blood Lead Epidemiology and Surveillance, ATSDR (ATSDR cooperative agreement partner and home to 10 NPL sites)
  - Collaborations with organizations not funded by CDC: Missouri State Public Health Laboratory, Local Public Health Agencies, DHSS Lead Licensing Program, Women, Infant, and Children, Missouri Department of Natural Resources, US EPA region 7, Missouri Department of Conservation, Lakes of Missouri Volunteer Program to expand to include cyanobacteria toxin testing in 2017 and beyond.
  - Collaborating with CSTE, the National Weather Service (NWS), and other federal

and state agencies to create climate change indicators. The EPHT team helped establish the Missouri Blue-Green Algae Task Force that has created policy on blue green algae blooms.

- Applicant provided ample evidence of having 90% of the core activities currently in place. While this is slightly lower than the self-assessed level of 93%, it is still indicative of a strong, established program.
- MO EPHT upgraded and released a new portal data management system in 2016 stated to provide more data, including sub-county level data, at a faster rate than the previous version.
- MO EPHT has recently added data on radon and temperature and is in the process of adding information on vector-borne diseases, life expectancy, and private water wells in year one of this grant. Applicant has improved the geographic information recorded at time of sample, which led to adding of sub-county test results to the portal, and is working on increase the quantity and quality of Electronic Laboratory Report (ELR) messages.
- New Activities (proposed) include:
  - Increase the number of environmental ELR reports from 40% to 60% in year one. Applicant has created interactive maps of radon data to provide decision makers with locally relevant information and improve targeted outreach and testing efforts.
  - Starting in year one of the grant, MO EPHT will partner with Childhood Lead Poisoning Prevention Program (CLPPP) and the Missouri Department of Natural Resources (DNR) to collect and analyze environmental exposure data related to confirmed Elevated Blood Lead (EBL) cases  $\geq 5 \mu\text{g/dL}$ . The applicant will map those with EBL, and will collect indoor and outdoor lead data to determine common exposures.
  - MO EPHT will use MOPHIMS during year one to investigate EBL cases in small geographic areas near lead mining areas to better develop and target outreach. Evaluation of the areas after outreach and remediation efforts have been completed.
- MO EPHT will work on improving sub-county mapping and charting while improving real time data integration during this grant period. Efforts are underway to improve data steward procedures to better integrate them with the new MOPHIMS data system. Features already exist in MOPHIMS for system users to export data, maps, and charts in .csv, Excel, and .PDF formats.
- MO EPHT collaborated with the Kansas EPHT program on the cooling centers map in 2016. MO's EPHT Geographic Information System (GIS) specialist provided assistance with coding and data set-up. EPHT's program provided information on Kansas cooling centers in the greater Kansas City metropolitan area.
- Using MO EPHT data, battery manufacturing plants were identified and ranked as a high level of concern based on the number of workers with elevated blood lead levels. MO EPHT staff contacted all battery manufacturing plants in the state, succeeded in convincing one of the state's largest battery manufacturing plants to request, and host a NIOSH Health Hazard Evaluation. MO EPHT staff also produced three electronic educational materials on adult lead poisoning prevention, posted to the EPHT Adult Blood Lead Epidemiology and Surveillance (ABLES) website, as well as, the NIOSH occupational clearinghouse, and currently developing lead podcasts.
- Applicant has discussed over 5 different new activities. For example, the Storm water BMPs Team is creating a tool that will allow individuals to select the best storm water

management system for their situation and environment. Applicant will produce PFAS factsheets, technical document and training. Applicant will track the incidence of heat-related morbidity and mortality with detailed data on risk factors.

- Proposal included excellent, detailed summary charts (p 24) showing how the various key stakeholders would be engaged in evaluation of the network activities, as well as each stakeholder's particular interests and needs to be addressed.
- The performance measures to be used in evaluation, as well as the particular data sources to be mined, were clearly summarized (p 26) and the previous full evaluation plan was provided as reference. MO EPHT is bringing in an individual with extensive experience with program evaluation to improve and implement an evaluation plan for this project.
- DHSS was awarded national accreditation through the Public Health Accreditation Board (PHAB) on March 8, 2016. PHAB accreditation was achieved following a rigorous, multifaceted, peer-reviewed assessment process to ensure DHSS meets or exceeds public health quality standards and measures.
- Examples of MO EPHT's success over the last grant cycle include:
  - Release of a second generation query system on the portal. The system is named MOPHIMS. Portal users are now able to search and query data faster, gather data in much smaller geographies, and display results in graphs tables, maps, and charts with enhanced user control and flexibility.
  - MOPHIMS has also increased access to health, human exposure, and hazard information by integrating data from multiple DHSS data systems into a common user interface.
  - Incorporation of additional data sets like radon and temperature
  - Expanded geographic mapping functionality through a transition from Adobe Flex to JavaScript API mapping technology.
- Applicant has published their own EPHT risk communications and management plan.
- Multiple letters of commitment were provided from county health departments and other programs that have worked with the applicant in the past and are extremely supportive of this relationship continuing.
- The current state tracking program maintained by the applicant was recently updated (p 28) to improve functionality and ease of access for users.
- Multiple examples of providing technical assistance to stakeholder groups was provided.

#### **Summary of Weaknesses:**

- 2 Research Analyst positions are vacant.
- These did not seem to follow the FOA prescribed format for evaluation: *Awardees must report annually on science and content; Technology and Informatics, Communications, Program Services.*
- The provided work plan did not indicate which staff was responsible for each of the major activities, as required. Additionally, the performance measures for activity PS1.B did not match the proposed outcomes or strategy.
- The evidence provided for activity PS1.B did not address the requirements.
- While public health activities were reported for activity PS2.A, the periodicity was unclear and this reviewer was therefore unable to judge whether the required reporting twice a year had occurred.
- Key communication staff member has no previous experience in communicating environmental public health; her experience (p113, 30) is limited to healthcare communication activities.

- While IT staff provided by the IT department are noted in the budget as assigned to this task, the letter of support provided by the CIO for Missouri did not call out his department's intention to support this project specifically, nor mention that they are committed to implementing the strategies noted.

**Budget:**

- Budget is appropriate and mostly for salaries. 1st year – \$1,2 million; 2nd year – 1,26 million, 3rd year – 1,32 million, 4th year – 13,3 million.
- A significant amount of resources are requested to support testing and accumulation of new data (\$85,680) and it is unclear if this type of work is within the scope and purpose of this FOA.

**Emerging Topical Activities:**

- Applicant has described activities for geocoding sub-county data.

**Human Subjects Issues:**

- No research activities are proposed.

**Recommendation(s):**

- No recommendations provided.

**Review Comments:**

- Based on the background, track record of accomplishment and proposed activities, this applicant possesses the necessary tools and expertise to successfully support the functions of the EPHT program.
