The grantee shall require each subrecipient to permit the independent auditor access to the subrecipient's records and financial statements. If the sub-awardee merely consumes or utilizes the goods, the commodities are not in and of themselves considered sub-awards.

## GENERAL REQUIREMENTS

**Travel Cost:** In accordance with HHS Grants Policy Statement, travel costs are allowable when the travel will provide a direct benefit to the project or program. To prevent disallowance of cost, the grantee is responsible for ensuring travel costs are clearly stated in their budget narrative and are applied in accordance with their organization's established travel policies and procedures. The grantee's established travel policies and procedures must also meet the requirements of 45 CFR Part 75.474.

**Food and Meals:** Costs associated with food or meals are allowable when consistent with applicable federal regulations and HHS policies. In addition, costs must be clearly stated in the budget narrative and be consistent with organization approved policies. Grantees must make a determination of reasonableness and organization approved policies must meet the requirements of 45 CFR Part 75.432.

**Prior Approval:** All requests, which require prior approval, must bear the signature of the authorized organization representative. The grantee must submit these requests by February 28, 2018 or no later than 120 days prior to this budget period's end date. Additionally, any requests involving funding issues must include an itemized budget and a narrative justification of the request.

The following types of requests require prior approval.

- Use of unobligated funds from prior budget period (Carryover)
- Lift funding restriction
- Significant redirection of funds (i.e. cumulative changes of 25% of total award)
- Change in scope
- Implement a new activity or enter into a sub-award that is not specified in the approved budget
- Apply for supplemental funds
- Change in key personnel
- Extensions to period of performance

Note: Awardees may request up to 75 percent of their estimated unobligated funds to be carried forward into the next budget period.

Templates for prior approval requests can be found at:  
<http://www.cdc.gov/grants/alreadyhavegrant/priorapprovalrequests.html>

**Key Personnel:** In accordance with 45 CFR Part 75.308, CDC grantees must obtain prior approval from CDC for (1) change in the project director/principal investigator, business official, authorized organizational representative or other key persons specified in the FOA, application or award document; and (2) the disengagement from the project for more than three months, or a 25 percent reduction in time devoted to the project, by the approved project director or principal investigator.

**Inventions:** Acceptance of grant funds obligates grantees to comply with the standard patent rights clause in 37 CFR Part 401.14.

**Publications:** Publications, journal articles, etc. produced under a CDC grant support project must bear an acknowledgment and disclaimer, as appropriate, for example:

This publication (journal article, etc.) was supported by the Grant or Cooperative Agreement Number, NUR3DD000064, funded by the Centers for Disease Control and Prevention. Its contents are solely the responsibility of the authors and do not necessarily represent the official views of the Centers for Disease Control and Prevention or the Department of Health and Human Services.

**Acknowledgment Of Federal Support:** When issuing statements, press releases, requests for proposals, bid solicitations and other documents describing projects or programs funded in whole or in part with Federal money, all awardees receiving Federal funds, including and not limited to State and local governments and grantees of Federal research grants, shall clearly state:

- percentage of the total costs of the program or project which will be financed with Federal money
- dollar amount of Federal funds for the project or program, and
- percentage and dollar amount of the total costs of the project or program that will be financed by non-governmental sources.

**Copyright Interests Provision:** This provision is intended to ensure that the public has access to the results and accomplishments of public health activities funded by CDC. Pursuant to applicable grant regulations and CDC's Public Access Policy, Recipient agrees to submit into the National Institutes of Health (NIH) Manuscript Submission (NIHMS) system an electronic version of the final, peer-reviewed manuscript of any such work developed under this award upon acceptance for publication, to be made publicly available no later than 12 months after the official date of publication. Also at the time of submission, Recipient and/or the Recipient's submitting author must specify the date the final manuscript will be publicly accessible through PubMed Central (PMC). Recipient and/or Recipient's submitting author must also post the manuscript through PMC within twelve (12) months of the publisher's official date of final publication; however the author is strongly encouraged to make the subject manuscript available as soon as possible. The recipient must obtain prior approval from the CDC for any exception to this provision.

The author's final, peer-reviewed manuscript is defined as the final version accepted for journal publication, and includes all modifications from the publishing peer review process, and all graphics and supplemental material associated with the article. Recipient and its submitting authors working under this award are responsible for ensuring that any publishing or copyright agreements concerning submitted articles reserve adequate right to fully comply with this provision and the license reserved by CDC. The manuscript will be hosted in both PMC and the CDC Stacks institutional repository system. In progress reports for this award, recipient must identify publications subject to the CDC Public Access Policy by using the applicable NIHMS identification number for up to three (3) months after the publication date and the PubMed Central identification number (PMCID) thereafter.

**Disclaimer for Conference/Meeting/Seminar Materials:** Disclaimers for conferences/meetings, etc. and/or publications: If a conference/meeting/seminar is funded by a grant, cooperative agreement, sub-

grant and/or a contract the grantee must include the following statement on conference materials, including promotional materials, agenda, and internet sites:

Funding for this conference was made possible (in part) by the Centers for Disease Control and Prevention. The views expressed in written conference materials or publications and by speakers and moderators do not necessarily reflect the official policies of the Department of Health and Human Services, nor does the mention of trade names, commercial practices, or organizations imply endorsement by the U.S. Government.

**Logo Use for Conference and Other Materials:** Neither the Department of Health and Human Services (HHS) nor the CDC logo may be displayed if such display would cause confusion as to the funding source or give false appearance of Government endorsement. Use of the HHS name or logo is governed by U.S.C. Part 1320b-10, which prohibits misuse of the HHS name and emblem in written communication. A non-federal entity is unauthorized to use the HHS name or logo governed by U.S.C. Part 1320b-10. The appropriate use of the HHS logo is subject to review and approval of the HHS Office of the Assistant Secretary for Public Affairs (OASPA). Moreover, the HHS Office of the Inspector General has authority to impose civil monetary penalties for violations (42 CFR Part 1003).

Accordingly, neither the HHS nor the CDC logo can be used by the grantee without the express, written consent of CDC. The Project Officer or Grants Management Officer/Specialist detailed in the CDC Staff Contact section can assist with facilitating such a request. It is the responsibility of the grantee to request consent for use of the logo in sufficient detail to ensure a complete depiction and disclosure of all uses of the Government logos. In all cases for utilization of Government logos, the grantee must ensure written consent is received. Further, the HHS and CDC logo cannot be used by the grantee without a license agreement setting forth the terms and conditions of use.

**Equipment and Products:** To the greatest extent practical, all equipment and products purchased with CDC funds should be American-made. CDC defines equipment as tangible non-expendable personal property (including exempt property) charged directly to an award having a useful life of more than one year AND an acquisition cost of \$5,000 or more per unit. However, consistent with grantee policy, a lower threshold may be established. Please provide the information to the Grants Management Officer to establish a lower equipment threshold to reflect your organization's policy.

The grantee may use its own property management standards and procedures, provided it observes provisions in applicable grant regulations found at 45 CFR Part 75.

**Federal Information Security Management Act (FISMA):** All information systems, electronic or hard copy, that contain federal data must be protected from unauthorized access. This standard also applies to information associated with CDC grants. Congress and the OMB have instituted laws, policies and directives that govern the creation and implementation of federal information security practices that pertain specifically to grants and contracts. The current regulations are pursuant to the Federal Information Security Management Act (FISMA), Title III of the E-Government Act of 2002, PL 107-347.

FISMA applies to CDC grantees only when grantees collect, store, process, transmit or use information on behalf of HHS or any of its component organizations. In all other cases, FISMA is not applicable to recipients of grants, including cooperative agreements. Under FISMA, the grantee retains the original data and intellectual property, and is responsible for the security of these data, subject to all applicable laws protecting security, privacy, and research. If/When information collected by a grantee is provided to HHS, responsibility for the protection of the HHS copy of the information is transferred to HHS and it becomes the agency's responsibility to protect that information and any derivative copies as required by FISMA. For the full text of the requirements under Federal Information Security Management Act (FISMA), Title III of the E-Government Act of 2002 Pub. L. No. 107-347, please review the following website: <https://www.gpo.gov/fdsys/pkg/PLAW-107publ347/pdf/PLAW-107publ347.pdf>

**Documentation and Use of Follow-up Diagnostic and Intervention Services Data through the  
Maintenance and Enhancement of the Early Hearing Detection and Intervention Information System  
(EHDI-IS)**

**SUMMARY STATEMENT**

**Date Reviewed: April 11, 2017**  
**Applicant Name: State Missouri**  
**Application #: 2017000134**  
**Score: 78 of 100**

**Brief Summary of Application:**

*Summary of Project:*

The purpose of this project is to improve the ability of the Missouri Department of Health and Senior Services' (DHSS) Newborn Hearing Screening Program's (MNHSP) current Early Hearing Detection and Intervention-Information System (EHDI-IS), Missouri Health Strategic Architectures and Information Cooperative (MOHSAIC), to collect complete, accurate, and valid follow-up screening, diagnostic, and intervention data in accordance with goals 2-8 of the Centers for Disease Control and Prevention (CDC) EHDI-IS Functional Standards. The DHSS MNHSP will use the following project period outcome as a guide: Improve the documentation of timely follow-up diagnostic testing and early intervention services, to support the early identification of D/HH infants and help address potential developmental delays. The MNHSP will partner with the Missouri Division of Administration's Information Technology Services Division to employ activities to address the following major MNHSP EHDI-IS lapses: individual maternal demographics, receiving facility name, infant's neonatal intensive care unit (NICU) status, name of rescreen provider referred to, and the reason for not receiving recommended follow-up services. To address an irregularity in the consistent reporting of follow-up rescreening and diagnostic results, the MNHSP will use interviews and trainings to determine gaps in knowledge and increase understanding among providers of follow-up audiological testing about the importance of and the requirement to report hearing evaluation results to the MNHSP. Further activities such as the use of Memorandums of Understanding will be aimed at promoting and strengthening partnerships that lead to greater collaboration around sustained documentation of rescreening, diagnostic and intervention data. Congenital hearing loss affects one to three of every 1,000 live-born infants and negatively impacts children through delays in speech, language, social, and emotional development when not detected in infancy. The number of children born in Missouri who did not pass their final hearing screening and were referred to diagnostic testing between 2012 and 2015 averages 1,298 per year. The number of infants eventually identified as deaf/hard-of-hearing (D/HH) as a result of confirmatory testing and referred to early intervention between 2012 and 2015 averages 109 per year. It is important to document the provision of timely follow-up diagnostic testing and early intervention services to support the early identification of infants who are D/HH and therefore at risk for developmental delays. Improving documentation related to the determination of newborn hearing will lead to a greater number of infants obtaining necessary and timely follow-up and intervention.

**Reviewers' Comments on Approach**

*Strengths of Section:*

- Applicant states the Missouri Department of Health and Human Services Newborn Hearing Screening Program (MNHSP) identified 12/55 functional standards its program doesn't currently meet (using ESSET) - this establishes a clear need/problem.
- 10/16 Hearing Screening Data Elements acknowledged on ESSET.
- Reasonable and feasible strategies listed under "Training and Support" but this section needs more specificity for "activities" section.

*Weaknesses of Section:*

- They did not give provide enough detail on how they planned to complete their strategies. For strategy 1.1, they did not list any activities describing how it is or how it will be accomplished. It seemed that they lacked adequate detail throughout the Approach section. Stakeholders should have been listed in the Approach section.
- No jurisdiction specific background stated in this section; also the applicant focuses on FOA application generic definitions and standard language (e.g. EHDl definition) and not as focused on specific background/issues for jurisdiction.
- No background information on why barriers or challenges exist specific to applicant's jurisdiction, but some strategies listed address problems regarding improved documentation.

*Recommendations for Section:*

- It is recommended awardee work with CDC/EHDl Program Consultant to review and revise the proposed approach to include the work plan, ESSET tool and other supporting documentation to ensure proposed plans are in alignment with the FOA.

**Reviewers' Comments on Evaluation and Performance Measurement**

*Strengths of Section:*

- Applicant clearly lists specific mechanisms to collect data (both primary and secondary data, pg. 84 and 85).

*Weaknesses of Section:*

- The applicant should have listed their evaluation plan under the Evaluation and Performance Measurement section instead of a separate document, this would have made it easier for the reader to find and read. They need to provide more information on their performance measurement and evaluation findings. The words "Performance" and "Measurement" were not listed once in this section.
- Little information on continuous program quality improvement and demonstration of proposed work plan outcomes. Applicant should expand on the utility of evaluations and how it will shape future quality improvement for the program.

*Recommendations for Section:*

- It is recommended awardee work with CDC EHDl Program Consultant and others within six months of award to finalize project-specific measurements and evaluation plan.

**Reviewers' Comments on Organizational Capacity to Implement the Approach**

*Strengths of Section:*

- They have multiple collaborations including: Missouri State University, Missouri Department of Elementary and Secondary Education, and Missouri Department of Health and Senior Services. Provided good letters of support as attachments from their collaborating partners.
- Three letters of support provided; collaborations seem feasible.
- Program Manager has been with the program since 2002.

*Weaknesses of Section:*

- Not very well organized or polished. It has the reader jumping around to try to find what is supposed to be in the section, but instead it is listed as an attachment or listed earlier under a different section.

*Recommendations for Section:*

- It is recommended awardee work with CDC EHDI Program Consultant to ensure the required capacity is met throughout the project period to successfully complete the proposed activities.

**Reviewers' Comments on Budget and Budget Narrative**

*Strengths of Section:*

- I did not notice any over estimations or unnecessary requests.
- Applicants' budget costs sound allocable, necessary, and reasonable. Additional allocations on "Training and Support" and "Strategic Collaboration" could help strengthen application.

*Weaknesses of Section:*

- No substantial weaknesses noted.
