## Project Abstract Summary

- PROJECT ABSTRACT** Project Title: Missouri Violent Death Reporting System (MOVDRS)  
 Applicant Name: Missouri Department of Health and Senior Services Principal Investigator: Venkata Garikapaty, MS, PhD, MPH Address: 920 Wildwood Drive, Jefferson City, MO 65102 Phone Number: Voice: 573-526-0452 Fax: 573-526-0225 E-Mail Address: Venkata.Garikapaty@health.mo.gov Violence is now well recognized as a significant public health issue in the United States affecting people of all genders, ages, races, ethnicities, religions and sexual orientations. With a population of six million, Missouri had 1609 violent deaths (homicides, suicides and undetermined deaths) in 2014 causing significant pain and suffering to the surviving families and communities. Similar to national trends, a significant proportion (62.4%) of violent deaths in Missouri between 2010 and 2014 were suicides. Suicide rates have steadily increased from 12.4 per 100,000 in 2000 to 16.1 per 100,000 in 2014, underscoring the magnitude of the violent death problem in Missouri. In 2014, Missouri had the eighth highest rate (25.9 per 100,000) for violent deaths when compared to the 18 states that were participating in the National Violent Death Reporting System (NVDRS). Furthermore, in 2014 based on Uniform Crime Report statistics from the Federal Bureau of Investigation, St. Louis City and Kansas City –the two major cities in Missouri were ranked #1 and #10 respectively for big cities with highest violent crime rates. For the same time period, St. Louis City, MO was also ranked #1 for big cities with the highest murder rates. Violent deaths in both cities continue to be an endemic problem disproportionately affecting minority communities. The steady increase in violent deaths in Missouri, particularly suicides, underscores the need for a violent death registry system. A violent death registry system in place will allow for a better understanding of the circumstances surrounding these deaths and tailor effective injury prevention strategies. By teaming up with the NVDRS project, the Missouri Department of Health and Senior Services plans to:
 
  - Establish a Missouri specific violent death registry system and enhance the quality of surveillance data on violent deaths in Missouri by collecting data from multiple sources – death certificates, medical examiner/coroner reports and law enforcement reports;
  - Establish a standardized web-based data collection system for violent deaths that will enable Missouri to compare violent death data nationally and with neighboring states that share similar demographics on a common platform to monitor progress;
  - Provide timely and quality data on violent deaths to state, national and local injury prevention partners to formulate strategies and interventions leading to the prevention of violent deaths (homicides and suicides) in their respective communities; and
  - Contribute data and expand the capability of the current NVDRS system at a national level for a more comprehensive view of violent deaths in the U.S. leading to program policy changes that could ultimately result in reducing violent deaths in the nation. In summary, this funding will enable Missouri to implement a comprehensive and coordinated violent death surveillance system for the first time and will greatly enhance Missouri’s capacity to gather data on violent deaths beyond conventional means. Furthermore, data dissemination from this system will be used to actively engage partners towards implementing evidence-based violence prevention programs in their respective communities to reduce violent deaths.
