

# YOUR COMMUNITY NEEDS DENTISTS & HYGIENISTS

*Volunteer to perform oral health screenings on  
children in your community.*

- The Missouri Department of Health and Senior Services Office of Dental Health (ODH) coordinates with schools across the state to provide an oral health program called the Preventive Services Program (PSP).
- PSP provides an oral health screening, education, supplies and fluoride varnish to children in their school.
- PSP relies on volunteer dentists and hygienists to perform an oral health screening to help identify tooth decay, which is the most common chronic childhood disease.
- Help ODH to combat and prevent tooth decay by volunteering today!

*Thank You!*

Please contact us to volunteer or for more information.
