

# WE NEED DENTISTS & HYGIENISTS

**to volunteer to perform oral health screenings on children in their community.**

- Tooth decay is the most common chronic disease in children.
- As a dentist or dental hygienist, you can help identify dental decay.
- We ask you to volunteer two to four hours to perform oral screenings on children in your community.
- The Preventive Services Program, which is part of the Missouri Department of Health and Senior Services, will provide you with disposable mouth mirrors and other supplies to conduct the oral screenings.
- Please contact us at 1-800-891-7415 or [health.mo.gov/blogs/PSP/](https://health.mo.gov/blogs/PSP/) to volunteer or for more information.
