

Some Causes of Traumatic Brain Injury (TBI)

A blow or jolt to the head of a child can seem harmless at the time. It may cause injury to the brain. However, it is important to keep track of when and how the injury occurred. You may need to discuss the injury with a medical provider. The following can cause injury to a child's brain.

Falling Down the Stairs - Hitting Head

Shaking Baby Causing Head to Move

Forceful Movement of Child's Head in a Car Accident

Falling Off Play Equipment Causing Blow or Jolt to Head
