

May 3, 2016

Dear WIC director,

At Beech-Nut, baby's health is our top priority, and it's part of our core values.

This is why our Beech-Nut foods are already below the proposed FDA limit for rice cereals. We test every lot to ensure we are always meeting the FDA standards.

All of our Rice Cereal products meet the Inorganic Arsenic Rice standards of 100 PPB. We test every lot to ensure we never are above that level.

If you have questions regarding infant cereal please call us at 800-233-2468.

All the best,

Ximena Acosta-Molina, Senior Brand Manager  
Beech-Nut Nutrition
