**Each scoop adds about 0.2 fl oz to the amount of prepared formula.**

To Make

8
4 scoop in this can.

DRY

Use the chart below for correct amounts of water and powder. Use scoop in can to measure powder. Store

Do not use a microwave oven to warm formula.

1.

Proper hygiene, preparation, dilution, use and storage are important when preparing infant formula. Powdered infant formulas

are not sterile and should not be fed to premature infants or infants who might have immune problems unless directed and

If you have a question, we are here for you.

Ask your baby’s doctor about the need to use cooled, boiled water for mixing and the need to boil clean utensils, bottles

and nipples in water before use.

2.

Pour desired amount of water

3.

Cap bottle and

SHAKE WELL.

3.

This exclusive

formula is
