Rooming-In
At the Hospital

Getting To Know Your Baby

It is best for moms and babies to room together throughout the hospital stay.

❤️ A mother gets to know her baby by holding, cuddling and responding to baby’s cues.

❤️ Babies cry less and are easier to calm.

❤️ Moms get more rest and sleep better.

❤️ It is easier to learn to breastfeed and babies will gain weight faster.

❤️ Parents gain confidence that they can care for their baby.
