Overview of Show Me Healthy Women and WISEWOMAN Programs

Welcome to the Missouri Show Me Healthy Women (SMHW) and Well-Integrated Screening and Evaluation for Women Across the Nation (WISEWOMAN) programs. These programs are offered through the Missouri Department of Health and Senior Services (DHSS). The purpose of the SMHW and WISEWOMAN Provider Manuals is to help participating health professionals understand program requirements and provide services to program-eligible women.

This manual is intended to offer an integrated approach in providing SMHW and WISEWOMAN services. It is designed to provide important information needed to enroll clients into the SMHW and WISEWOMAN programs, explain health professional roles and responsibilities, define reimbursable services, and provide necessary reimbursement and billing information. It also includes a framework for clinical guidelines to adhere to program standards. The SMHW and WISEWOMAN staff are available to assist providers on a regular basis using e-mail, telephone, and on-site visits as needed. Help is available from the SMHW and WISEWOMAN staff by calling toll-free at 866-726-9926 or 573-522-2845.

Show Me Healthy Women Vision and Mission

Vision Statement

Improve the quality of life in Missouri through the cure and elimination of breast and cervical cancers.

Mission Statement

Support quality screening, diagnostic and treatment services, in accordance with current medical standards of care, for breast and cervical cancers for all women in Missouri. This is achieved by education, community outreach, and resource development in partnership with public and private entities, communities, and citizens.
WISEWOMAN Vision and Mission

Vision Statement

A world where any woman can access preventive health services and gain the wisdom to improve her health.

Mission Statement

Provide low-income, underinsured or uninsured 35-64 year-old women with the knowledge, skills and opportunities to improve their diet, physical activity and other life habits to prevent, delay or control cardiovascular and other chronic diseases.

History

National Breast and Cervical Cancer Early Detection Program

http://www.cdc.gov/cancer/nbcedp/

The United States Congress passed the Breast and Cervical Cancer Mortality Prevention Act of 1990 (Public Law 101-354) to establish the National Breast and Cervical Cancer Early Detection Program (NBCCEDP) in 1990. The Centers for Disease Control and Prevention (CDC) authorizes the NBCCEDP to provide grants to states, American Indian/Alaska Native tribes, and U.S. Territories to carry out cancer early detection activities.

WISEWOMAN

http://www.cdc.gov/wisewoman

Congress amended the NBCCEDP Public Law 101-354 in 1993 to create the WISEWOMAN Program. The WISEWOMAN Program addresses women's risk for heart disease and stroke by providing cardiovascular disease (CVD) health screenings and risk reduction lifestyle education for NBCCEDP clients.
NBCCEDP shares an established infrastructure with WISEWOMAN to provide integrated services including:

- Recruiting and working with women eligible for services
- Delivering screening services through an established health care delivery system
- Collecting and reporting minimum data elements (MDEs) used to track, monitor and evaluate program efforts
- Providing professional development opportunities for staff, providers and partners
- Providing public education to raise awareness about the need for women to receive program services
- Assuring that quality care is provided to women participating in the program

Contractual Agreements

The SMHW program utilizes contracts with service providers to deliver program services. Contracts are available for SMHW only services or for providers who choose to deliver both SMHW services.

What We Do

- Establish annual contracts for screening providers
- Provide an easily accessible program manual that describes screening, follow-up, education, and reporting guidelines based on national CDC guidelines
- Require providers to utilize the Clinical Laboratory Improvement Amendments of 1988 (CLIA) approved laboratories or assure laboratory equipment is CLIA waived
- Provide Regional Program Coordinators (RPCs) for each geographic region to assist providers with training, technical assistance, and tracking clients with abnormal values to ensure clients receive appropriate follow-up
- Provide training and technical assistance to provider staff
- Provide client recruitment targeting ethnically diverse program-eligible women
- Provide client educational materials and tools
- Provide required reporting forms and data system for submitting service reports
- Reimburse providers for allowable services according to the Medicare 01 region rates
- Monitor provider services to assure quality standards
- Maintain a central data system for tracking and reporting required data to CDC
- Assist the service providers with client case management/follow-up and annual evaluation screening efforts
- Provide promotional items, literature, and other public educational materials when available
Show Me Healthy Women Advisory Board

The SMHW Advisory Board strengthens the program’s activities in the state of Missouri through professional and policy development, public and clinical education, private partnerships, and coalition building.

Advisory Board Responsibilities

- Advise SMHW management on SMHW issues
- Assist SMHW in enhancing the breast and cervical cancer control knowledge and skills of Missouri’s health care professionals
- Assist SMHW in identifying appropriate breast and cervical cancer control legislation
- Establish task forces, as necessary, to assist SMHW in developing cancer control policies, such as cervical and breast cancer screening protocols and policies, diagnostic guidelines, and funding applications
- Assist SMHW in identifying partners who will extend and enhance the work of SMHW

The SMHW Advisory Board is composed of representatives of organizations that are, or potentially can be, involved in SMHW activities and of individuals with special expertise in breast and cervical cancers. The board has approximately 30 members. Board members are elected to serve a two-year term. The Board meets quarterly and meetings are open to the public.
Provider Contract Requirements

Provider Contract Requirements

All of the following provider contract requirements must be met.

Complete SMHW/WISEWOMAN Information Update Form

Complete and sign the SMHW-WISEWOMAN Information Update Form annually. The SMHW/WISEWOMAN Information Update Form is located at http://www.health.mo.gov/living/healthcondiseases/chronic/showmehealthywomen/forms.php

Recruit Clients

Recruit clients by the following activities:

- Utilize public education resources provided by DHSS to recruit eligible women
- Collaborate with American Cancer Society (ACS), National Cancer Institute (NCI), American Heart Association (AHA), local cancer control coalitions, and other local partners
- Display recruitment and educational information in waiting areas and examination rooms
- Provide materials on screening services to all eligible women attending clinics in the facility
- Coordinate recruitment activities with the DHSS staff and the designated area RPC
- Schedule women for annual screenings at a minimum of 10-month intervals following initial or annual screening
- Recruit WISEWOMAN clients from SMHW clients

Attend Training

- Attend SMHW/WISEWOMAN provider staff training
- New providers of SMHW/WISEWOMAN services must participate in an on-site training session by DHSS staff prior to providing services
- Ensure staff is well trained in program protocols prior to delivering services. Require at least one staff member to participate in an orientation training delivered by DHSS program staff upon initial contract application
- Facilitate attendance/participation of staff members responsible for submission of data forms and clinical services at annual trainings that provide policy and procedure updates and review
- Request DHSS training sessions when new staff are hired
Register Clients for Services

- Obtain clients’ signatures on the SMHW-WISEWOMAN Client Eligibility Agreement Form.
- Annually provide clients with the current DHSS patient privacy rights statement in accordance with Health Insurance Portability and Accountability Act (HIPAA) regulations prior to receiving services annually. The client must receive this information along with the HIPAA statement from the provider facility. The provider must retain documentation of this action.

Comply with HIPAA Regulations

- Comply with current HIPAA regulations (http://www.health.mo.gov/information/hipaa/) in delivering services.

Utilize Medical Staff

- Provision of services is dependent upon current license or certification with the State of Missouri.
- Utilize medical doctors, doctors of osteopathy, nurse practitioners, certified nurse midwives, clinical nurse specialists, certified physician assistants, and registered nurses (RNs) with specialized training within the registered nurse’s scope of practice to provide services.

Obtain Permission for RN to Provide Services

Obtain written approval from DHSS for the RN to provide breast and cervical screening services for SMHW clients. Submit the following information in a written request to SMHW:

- A letter documenting previous practice;
- A licensure or certification numbers; and
- Documentation of any of the following breast and/or cervical cancer screening training:
  - Length of the preceptorship;
  - Number of pap tests, CBEs, and pelvic examinations completed during the preceptorship. A minimum of 10 pap tests, CBEs, and pelvic examinations must be performed in order for the RN to be eligible to provide screening services; and
- The preceptor must verify that the nurse completed these examinations with minimal or no difficulty.

Laboratories

Utilize only laboratories that adhere to all applicable standards established under the Clinical Laboratory Improvement Amendments (CLIA) of 1988 or are CLIA waived. Laboratories must report pap test findings using the Bethesda System 2001.

MQSA

Comply with Mammography Quality Standards Act (MQSA). Prior authorization by SMHW and DHSS is required for MQSA-accredited mobile mammography vans based out-of-state.
Report Results-Mammography

Report mammography test results in the American College of Radiology BIRADS system.

On-Site Quality Assurance Reviews

Agree to on-site record reviews by qualified DHSS staff six months after initial services begin and every two years thereafter, or more frequently if requested by the DHSS.

Notify Clients

Notify clients of non-program-covered services. Notify the client in writing of any services not covered by the programs prior to providing any non-program-covered services.

Billing Clients

Ensure clients receive no bills (invoices) for services covered by the SHMW or WISEWOMAN programs.

Electronic Data and Reports

Enter all data and reports electronically with accompanying Current Procedural Terminology (CPT) codes into the SMHW central data management computer-tracking program, Missouri Health Strategic Architectures and Information Cooperative (MOHSAIC).

Reporting Form

Submit a fully completed reporting form within 60 days of the last date of service. An exception should be noted for end-of-grant-year services. The end-of-year billing deadline notification is sent to providers annually.

Electronic Reimbursement

Agree to receive SMHW/WISEWOMAN reimbursements through Electronic Fund Transfer (EFT). SMHW/WISEWOMAN reimbursement rates and CPT codes can be viewed in Section 9; Billing Guidelines.

Recording and Maintaining Documentation

Complete and maintain documentation on all client eligibility, screening, and case management services outlined in this manual. Maintain client records for at least seven years. All SMHW enrolled clients with an abnormal screening result must be assessed for their need of case management services and provided with such services accordingly. Examples of screening results which would require a case management assessment would be BIRADS 3, 4, 5 for mammograms; and Atypical Squamous Cells of Undetermined Significance (ASCUS), Low-grade Squamous Intraepithelial Lesion (LSIL), and high grade lesions for pap tests. Case management services conclude when a client initiates treatment, refuses
When a woman concludes her cancer treatment, and is released by her treating physician to return to a schedule of routine screening, she may return to the program and receive services if she meets eligibility requirements.

### Assure Follow-up

Assure all clients identified on screenings that have suspicious, abnormal, or alert test results receive appropriate follow-up services, including case management, rescreen, diagnostic evaluation, treatment referral and/or education services according to program protocols. These services may be provided directly by the contracted provider or by an established referral sub-contractor that meets SMHW/WISEWOMAN program requirements. All test results shall be maintained in the clients medical records for monitoring purposes.

### Communicating with Sub-contractors

Ensure that communications with sub-contractors include notification and approval from the SMHW/WISEWOMAN provider prior to the subcontractor’s provision of additional tests. This communication is necessary to be sure the subcontractor’s services and reimbursements will meet SMHW/WISEWOMAN program guidelines. Providers are also responsible for ensuring that clients understand why they are being referred and what services will be provided. It is the recommendation of DHSS that a written agreement between each sub-contractor and each SMHW/WISEWOMAN provider is complete.

### Subcontractor Requirements

Ensure subcontractors meet the requirements specified in these guidelines (i.e., MQSA, CLIA, etc.). Subcontracted services may include:

<table>
<thead>
<tr>

<td>Surgical incisional biopsy</td>
</tr>
<tr>
<td>* Refer to Cervical Section of Manual</td>
<td>Excisional breast biopsy</td>
</tr>
</tbody>
</table>

  * WISEWOMAN laboratory test
  * WISEWOMAN lifestyle education
  * WISEWOMAN diagnostic office visit
Refer Tobacco Users

Ensure that SMHW and WISEWOMAN clients who use tobacco products are referred to the Missouri Quitline 800-QUIT-NOW (800-784-8669) for free counseling. The Missouri Quitline is available free of charge to all Missouri SMHW and WISEWOMAN participants. Be sure to have the client complete a fax referral form and fax the form to the Quitline.

Submit Personnel Information

Submit written changes of clinical, administrative and personnel contact changes to DHSS within 30 days.

Collaborate

Collaborate with the Missouri Department of Social Services (DSS), Family Services Division (FSD) regarding clients diagnosed with breast/cervical cancer. These clients may be eligible for treatment through the Breast and Cervical Cancer Treatment (BCCT) Act.
Providers Who Terminate Participation

Submit Letter

Submit a letter to DHSS 30 days before the date of anticipated termination of services. The letter must include the date of termination of SMHW/WISEWOMAN services.

Continue to Report

Continue to report all diagnostic and/or treatment information after termination on the appropriate SMHW/WISEWOMAN forms to complete all outstanding follow-up cases. To accomplish this, a provider should work closely with the Regional Program Coordinator (RPC) in their area.

Work with RPC

Work with the RPC to inform clients where they may obtain SMHW/WISEWOMAN services in their area once the provider terminates participation.
Provider Application Approval Criteria

The DHSS approves or disapproves providers based on the following criteria:

Commitment
Commitment and ability to meet the contract requirements;

Accreditation
Accreditation or certification status of the site and clinical staff;

Capacity
Capacity to submit timely and accurate data and billing reports to DHSS via the MOHSAIC electronic reporting system;

Location
Located in area of need in relation to other SMHW/WISEWOMAN providers and to the population to be served;

Commitment to Clients
Commitment and ability to serve clients with special emphasis on priority-eligible populations, particularly women 35-64 years of age or older and women who have rarely or never been screened;

Experience
Successful experience in providing comprehensive breast and cervical cancer screening, education and referral services, either through existing on-site facilities or referral linkages. Access to CLIA-approved laboratory and/or MQSA accredited mammography facility;

Network
Ability to network with the ACS and NCI, and other educational state and regional resources;

Compliance
Compliance with current HIPAA regulations; and
Application Denial

If an application is denied, a contact list identifying other SMHW/WISEWOMAN providers in the same geographic area will be provided. Applicants may use this information to facilitate referrals for women in need of SMHW/WISEWOMAN services.

The Provider Application can be found at:
http://www.health.mo.gov/living/healthcondiseases/chronic/showmehealthywomen/forms.php

SMHW/WW Transportation Providers Fiscal Year 2019 (Map).............................................3.9
Client Eligibility Guidelines

SMHW eligibility has three primary criteria; income level, health insurance status, and age guidelines. Income guidelines are based on 200 percent of the federal poverty guidelines. The SMHW program reimburses only for services when there is no other funding source available. Women 35 to 64 years of age are eligible for services; some service restrictions apply by age categories.

SMHWWISEWOMAN Programs are the payers of last resort. Providers may call program RPC for guidance.

Age Eligibility Includes 35 to 64 Year-Old Women

Some exceptions pertain to guidelines for services available to clients older than 64 based on insurance. Please see page 3.3 for further information.

Transgender Clients

- Screening and diagnostic services are available for male-to-female transgender clients who have/are taking hormones as long as they meet program eligibility guidelines.
- Screening services are available for female - male transgender individuals who have not yet undergone complete hysterectomy or bilateral mastectomy because these individuals are genetically female.
- The CDC does not make a recommendation on routine screening with this population; transgender women are eligible under federal law to receive appropriate cancer screening.
- To determine medical necessity of screening, CDC recommends providers discuss the risks and benefits of screening with all eligible clients.

</tbody>
</table>

- Clients must have an income at or below 200 percent of the federal poverty income guidelines. Adjusted gross income on tax return or net amount on pay stub determines income eligibility.

Insurance Status of Uninsured or Underinsured

Health Insurance Status++

- No health insurance
- Health insurance does not cover services
- Client states she is unable to pay deductible
- Have MO HealthNet with Spend-down, but have not met Spend-down
- Income eligible for Medicare Part B, but unable to pay premium
- Clients eligible to receive Medicare benefits but not enrolled in Medicare should be encouraged to enroll

++ Women with full MO HealthNet (ME Code 05) Medicare Part B, POS or HMO health coverage are not eligible for services.

- Providers may use the Client Eligibility Agreement form to document insurance status of the client. Copies of these forms are located on pages 10.6-.7 or download a copy at: http://health.mo.gov/living/healthcondiseases/chronic/showmehealthywomen/forms.php.
Current Breast or Cervical Cancer

- Women who are currently diagnosed with a breast and/or cervical cancer are not eligible for SMHW services. Women being currently treated for breast or cervical cancer are also not eligible for SMHW services. However, once cancer treatment is completed the client may return to SMHW for routine screenings as long as eligibility guidelines are met.

MO HealthNet (Medicaid)

- Women with MO HealthNet Managed Care coverage may be eligible for SMHW services if they are enrolled in the Extended Women’s Health Services/EWHS, Uninsured Women’s Health Services/UWHS, or have an unaffordable MO HealthNet spend-down. These women are eligible for screening/diagnostic services through SMHW. Extended Women’s Health Services/EWHS and Uninsured Women’s Health Services does not cover diagnostic services. The woman must meet all SMHW/N eligibility guidelines.
- SMHW Clients who reach age 65 and older or women previously not enrolled age 65 and older do not qualify for BCCT.

Medicare

- Women enrolled in Medicare Part B are not eligible for SMHW services. Medicare Part B covers breast and cervical cancer screenings. Refer women with Medicare Part B coverage to providers who accept Medicare reimbursement.
- Women who meet SMHW/WISEWOMAN eligibility requirements and state they cannot pay the premium to enroll in Medicare Part B, or are not eligible to enroll in Medicare Part B, are eligible for SMHW/WISEWOMAN screening services. If women are eligible to receive Medicare Part B benefits and are not enrolled, encourage them to enroll.

Insurance

- The client’s insurance must be billed first; when billing DHSS, include the insurance payment amount on reporting forms in the “Comments” section. SMHW will only reimburse up to the total amount allowed for the procedure per program guidelines. The total amount allowed and reimbursed by SMHW for each CPT code includes any payments received from insurance companies, not in addition to insurance payments.
- SMHW and WISEWOMAN are the payers of last resort.
- Women enrolled in prepaid/managed care and health plans (such as Health Maintenance Organizations [HMOs], Point of Service Plans [POS] and MO HealthNet Managed Care [formerly MC+]) are not eligible for SMHW/WISEWOMAN services.

For further guidance regarding clients with insurance, please see page 9.3.
Documentation and Certification of Client Eligibility

The client must sign a SMHW Client Eligibility Agreement form that is retained in the client’s record each year. (Download a copy of this form at: http://health.mo.gov/living/healthcondiseases/chronic/showmehealthywomen/forms.php or pages 10.6 [English] and 10.7 [Spanish]).

Providers must obtain documentation of income, age eligibility and address, if available, on an annual basis and place a copy of the documentation in the client’s record. (Electronic or paper medical records are acceptable.)

The following may be used for proof of age and income.

<table>
<thead>
<tr>
<th>Age</th>
<th>Income</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Driver License</td>
<td>• Income tax forms (annual adjusted gross income)</td>
</tr>
<tr>
<td>• Medicare Card</td>
<td>• Food Stamps</td>
</tr>
<tr>
<td>• Birth Certificate</td>
<td>• WIC Voucher</td>
</tr>
<tr>
<td></td>
<td>• Social Security Award Letter</td>
</tr>
<tr>
<td></td>
<td>• Unemployment Insurance</td>
</tr>
<tr>
<td></td>
<td>• Pay Stub (net amount)</td>
</tr>
</tbody>
</table>

Once eligibility is determined, screening providers must verify eligibility on all reporting forms. To comply with the quality assurance policy, 50 percent of client records must contain proof of eligibility.

Provider must retain information in clients’ charts regarding the green history form, (pages 10.8 [English] and 10.9 [Spanish] or at: http://www.health.mo.gov/living/healthcondiseases/chronic/showmehealthywomen/forms.php), and review this information with each additional annual screening. Client records must be retained and available for seven years.
Free transportation is available for SMHW/WISEWOMAN clients. Providers can request a travel voucher booklet by contacting Show Me Healthy Women/WISEWOMAN staff or the Regional Program Coordinator (RPC) assigned to their area. All program services qualify for transportation services, including initial office visits, lab visits, follow-up diagnostic office visits, lifestyle education sessions, and annual evaluation screenings in the contracted counties.

Note:

Call the SMHW/WISEWOMAN office toll-free at 866-726-9926 or 573-522-2845, to receive a book of 48 vouchers.
Travel Voucher Instructions

Funds are available through SMHW and WISEWOMAN to cover the cost of transportation to help remove the barrier of access to care in receiving screening, diagnostic, and education services.

Transportation services are available in most counties. For counties without transportation services, call the RPC for assistance. See pages 3.8 and 3.9 for a complete list of transportation providers and their contact information. Services are available Monday through Friday, with charges based on urban or county trips and one-on-one or regular-route travel. When a client calls to make an appointment for a SMHW or WISEWOMAN screening or diagnostic, or education services, please ask her the following questions before making an appointment date and time for her:

**Does the client need transportation?**

If yes, explain that free transportation is available for SMHW participants. A transportation provider will pick her up at her home, take her to the clinic, and return her to her home.

Check with the transportation provider in your area for the transportation schedule. Ensure the clients appointment date and time coincides with the transportation provider’s schedule.

**Secure client address and telephone number.**

If the client does not have a telephone, ask for a neighbor's telephone number or for another number where she can be reached.

The transportation driver may not be familiar with the client’s address and may need directions to the residence.

**Does client need any special assistance?**

If the client needs an assistant or helper, SMHW will pay for transportation for one extra person. If necessary, the client may bring a child along. If a disabled client needs more than one assistant, call SMHW for approval. If the client has special medical equipment such as a wheelchair or oxygen, please inform the transportation provider at the time of scheduling.

**Travel Vouchers**

The provider can mail the travel voucher to the clients’ home address with the date and time of the appointment. Please give the transportation driver this voucher when he or she comes to your home. Each voucher is for a round-trip.

After you talk to the client, call the transportation office that is closest to your facility, and identify yourself as the SMHW/WISEWOMAN contact person. Give the transportation office the information you have obtained from the client.

Complete the travel voucher, and include your facility name and site code number. The client may be accompanied by one person, 17 years of age or greater.
Notification of cancellation to the transportation provider is required to avoid a penalty charge to SMHW/WISEWOMAN for the cost of a one-way trip.

Contact the transportation provider for questions related to transportation services. See page 3.8 and 3.9 for a complete list of transportation providers, service areas, and contact information. Address SMHW questions to the central office by calling toll-free at 866-726-9926 or 573-522-2845.
### SMHW/WISEWOMAN Transportation Providers
#### Fiscal Year 2019

SMHW Screening Recommendations

SMHW Screening Recommendations .......................................................................................... 4.1

Provider Responsibilities
Initial Screening
Annual Screening
Rescreening

Green History Form ............................................................................................................... 4.3

Clinical Requirements for SMHW Services ........................................................................... 4.4

Comprehensive Breast and Cervical Screening
Annual Screening Protocol
Breast Cancer Screening
Cervical Cancer Screening

Blue Screening Form ............................................................................................................. 4.9

SMHW Clinical Service Summary .......................................................................................... 4.10
Routine screening and early detection are vital to reducing morbidity and mortality from breast and cervical cancer. Regular screening and early detection decreases mortality and improves quality of life for all individuals. Regular clinical breast exams, mammography, pelvic exams, and pap tests are the best screening methods available for breast and cervical cancers and pre-cancerous conditions.

Provider Responsibilities

- Schedule annual breast and cervical cancer screenings appropriately for clients.
- Notify clients in advance of recommended screening dates. If the client does not schedule an appointment after the first notification, a second attempt shall be made.

Initial Screening

The initial screening is:

- The **first** screening performed on a woman by a SMHW provider.
- OR
- If a client has not been seen for five years for a SMHW screening by the same provider.

**NOTE:**
Initial clients need to complete a SMHW green history form (pages 10.8 [English] and page 10.9 [Spanish]) or download a copy at: [http://www.health.mo.gov/living/healthcondiseases/chronic/showmehealthywomen/forms.php](http://www.health.mo.gov/living/healthcondiseases/chronic/showmehealthywomen/forms.php)

Annual Screening

The annual screening is:

- The process of returning for an annual screening test at a predetermined interval. SMHW defines an annual screening to be 10 months or greater from the initial screening or previous annual screening.

**NOTE:**
Annual clients need to review and update the green history form at each annual visit either by completing a new form or by reviewing and initialing updates and initialing the new form with the date of the current visit.
Rescreening

Rescreening is:

- An additional screening visit resulting from an abnormal initial or abnormal annual screening that is less than 10 months from an initial or annual screen.

NOTE:

If there is a delay in the rescreening visit for 10 months or more from the date of the annual/initial visit, reimbursement occurs only after the rescreen meets breast/cervical criteria for an annual screening.
All forms are specific for each grant year. When submitting an electronic or a paper form, use the version of the form that is **dated correctly to correspond with the date of service**. At the beginning of each grant year there are multiple versions of this form in Missouri Health Strategic Architectures and Information Cooperative (MOHSAIC). Click on the correct version when entering electronic forms. If using paper forms, check for the year of the form in the lower left corner: example (3/14).

**NOTE:**
All clients who participate in SMHW **must** complete a Patient History Form also referred to as green history form at the initial screening. The green history form is available in English and Spanish. Assistance may be given to the client for completion of the form. To order blank forms from SMHW call toll-free at 866-726-9926 or 573-522-2845.

- Information from the green history form is used to verify a client’s eligibility for screening, as well as statistics to evaluate the program. Some information from the green history form is also reported to the Centers for Disease Control and Prevention (CDC). Keep all information confidential.
- The information on the original form shall be entered electronically in the MOHSAIC system. File all reported information in the client’s record.
  - A copy of the green history form is located on page 10.8 [English] and page 10.9 [Spanish] or download a copy at: [http://health.mo.gov/living/healthcondiseases/chronic/showmehealthywomen/forms.php](http://health.mo.gov/living/healthcondiseases/chronic/showmehealthywomen/forms.php).
- If you have additional questions, please call SMHW toll-free at 866-726-9926 or 573-522-2845 for general assistance with central office staff.
- If you have questions or concerns regarding specific issues with MOHSAIC, contact the ITSD Help Desk by telephone at 800-347-0887 or by e-mail at support@health.mo.gov.
Clinical Requirements for SMHW Services

The screening services outlined in the following pages are clinical requirements and shall be completed by the provider of SMHW services in order to be considered for reimbursement. Age restrictions and income guidelines always apply. Providers must have the capability to provide or offer access to the following services:

Comprehensive Breast and Cervical Screening

- Clinical Breast Exam (CBE) provided annually for all women
- Client education on the importance of obtaining screenings for breast and cervical cancer according to the appropriate screening schedules
- Routine screening mammogram offered annually or every other year per clinician and client determination, beginning at age 50 and over. Special circumstances include (Table 1, page 4.6):
  - Offer a mammogram annually if a woman has a personal history of breast cancer
  - Any client, age 35 or older, who currently has abnormal breast exam results, can receive diagnostic mammograms and other necessary breast diagnostic services covered by the SMHW program
- Complete visual and manual pelvic examination
- Pap test, conventional or liquid-based, at appropriate intervals (Table 2, page 4.7)
- Documentation of providing screening examination results to clients per verbal report or in writing
- Appropriate and timely case management for all clients with suspicious or abnormal results, including rescreening, diagnostic procedures and/or treatment

Annual Screening Protocol

Age restrictions and income guidelines always apply to a client’s eligibility for the services described below.

Breast Cancer Screening

- A Clinical Breast Exam (CBE) is required by SMHW for a complete screening. Coordination of a full screening with health care providers is expected.
- CBE is required for reimbursement of a mammogram. Perform a CBE annually on all women, especially if they have had previous breast cancer surgery.
- Provide an annual mammogram to clients with a personal history of breast cancer ages 35 to 64 (diagnostic mammogram).
- SMHW will reimburse for an annual breast cancer screening after ten (10) months has lapsed from the previous annual breast cancer screening. This includes annual CBE for all SMHW women ages 35 to 64 and yearly or every other year screening mammogram for women ages 50 and older.
- Family history of breast cancer does not qualify a woman for routine mammograms.
A client with self-reporting abnormal breast self-exam (BSE) may be followed with a diagnostic breast work-up, with the exception of self-reporting pain and tenderness or family history. If pain and tenderness are self-reported, she may be followed with a rescreening CBE in two (2) weeks up to 10 months. If the client continues to report pain and tenderness, case management is at the clinician’s discretion.

♥ (Diagnostic workup may include services such as diagnostic mammogram, ultrasound, specialist consult and breast biopsy.)

Mammogram funding for the purpose of screening women 40 to 49 years of age without abnormal breast findings through SMHW may be available. Funding is dependent on availability of donated funds.

**NOTE:**
To reserve and schedule donated funding for the woman’s screening mammogram, obtain prior approval by calling toll-free 866-726-9926 or 573-522-2845.

Women 35 years of age and older qualify for diagnostic breast services if breast exam findings are abnormal.
Table 1

<table>
<thead>
<tr>
<th>Age</th>
<th>Recommendation</th>
</tr>
</thead>
<tbody>
<tr>
<td>Age 35 to 39</td>
<td>Complete breast exam by health care provider annually</td>
</tr>
</tbody>
</table>
| Age 40 to 49 | Complete breast exam by health care provider annually  
Screening mammogram every 1 to 2 years IF funding is available* |
| Age 50 and over | Complete breast exam by health care provider annually  
Mammogram every 1 to 2 years |

The Missouri SMHW program follows guidelines of the CDC and NCI. Clinically evaluate and schedule appropriate diagnostic procedures within 60 days, for symptomatic women.

Screening Mammograms for Women age 40 to 49 (dependent upon funding)
- For preauthorization, please call the DHSS toll-free at 866-726-9926 or 573-522-2845.
- Screening mammogram funding for this age group is only available if donations or other funding sources become obtainable during the current contract year.

Cervical Cancer Screening
- Pap test results of “inadequate specimen” are not reimbursable by SMHW.
- Pap test results initially indicating no endocervical cells should refer to 2013 ASCCP guidelines.
- For women who have a cervix, pap tests will be covered every three (3) years if no human papillomavirus (HPV) done, or screening with a combination of a pap test and HPV testing every five (5) years. See blue screening form (pages 10.10-.11).
- Hysterectomy:
  - SMHW will NOT fund pap testing for women who had a hysterectomy for benign (non-cervical neoplasia) conditions. A woman who has no cervix due to a reason other than cancer may have a pelvic exam to establish that there is no cervix.
  - Follow a woman annually for 10 years (conventional or liquid-based pap tests can be annually reimbursed) if reason for hysterectomy is unknown or if it was for cervical intraepithelial neoplasia (CIN) CIN 2, CIN 3, adenocarcinoma in situ (AIS) or cervical cancer in situ, which was biopsy-documented.
  - Women who had a hysterectomy for invasive cervical cancer should undergo an annual pap test (conventional or liquid-based) indefinitely as long as they are in good health.
  - Annual pap test may be done only for persons who meet specific high-risk guidelines for cervical cancer per CDC and/or SMHW Advisory Board approval.
### Table 2

<table>
<thead>
<tr>
<th>Age</th>

<tr>
<td></td>
<td>- Conventional or Liquid-based Pap test every 3 years</td>
</tr>
<tr>
<td></td>
<td>Or</td>
</tr>
<tr>
<td></td>
<td>- Combination pap test and human papillomavirus (HPV) test every 5 years</td>
</tr>
<tr>
<td><strong>Age 35 and over</strong></td>
<td>- Pap is <strong>NOT</strong> covered for those whom have undergone a hysterectomy <strong>unless</strong>: (Page 4.8, Table 3)</td>
</tr>
<tr>
<td></td>
<td>- They have a remaining cervix</td>
</tr>
<tr>
<td></td>
<td>Or</td>
</tr>
<tr>
<td></td>
<td>- They had surgery for CIN 2, CIN 3; CIS/AIS (eligible for annual pap for 10 years from date of hysterectomy).</td>
</tr>
<tr>
<td></td>
<td>- They have invasive cervical cancer (eligible for annual pap)</td>
</tr>
</tbody>
</table>

**NOTE:** Pap findings are reported using the 2001 Bethesda System Guidelines.

The Missouri SMHW program follows guidelines of the CDC and American Society for Colposcopy and Cervical Pathology (ASCCP) for screening and diagnostic recommendations.

*Intervals above are guidelines for asymptomatic women only. Evaluate and schedule appropriate diagnostic procedures quickly, preferably within 60 days, but within a maximum of 90 days for symptomatic women.*
### Cervical Cancer Risk Factors to Consider

**Women who warrant annual Pap test (conventional or liquid-based) must have a personal history of one of the following HIGH RISK factors:**

- Hysterectomy for invasive cervical cancer. Screenings may continue indefinitely, as long as they are in good health.
- CIN 2, CIN 3 or CIS/AIS lesions documented by tissue biopsy after hysterectomy (not based on Pap results). Follow routine pap intervals after the client has 10 years of annual pap test with negative results.
- Hysterectomy with reason unknown and not obtainable. Follow routine Pap intervals after the client has 10 years of annual pap test with negative results.

**If Pap test is performed due to one the following reasons, please note this in the comments section on the blue screening form:**

- Human immunodeficiency virus positive (HIV+)
- Kidney or other organ transplant
- Medication for severe arthritis or other collagen vascular disease
- Diethylstilbestrol exposure in utero

**Risk factors which are NOT adequate to warrant annual pap screening:**

- Smoking
- Low income
- Numerous sexual partners (known or suspected)
- HSIL unless histologically diagnosed with a biopsy
Blue Screening Form

All forms are specific for each grant year. When submitting an electronic or a paper form, use the version of the form that is dated correctly to correspond with the date of service. At the beginning of each grant year there are multiple versions of this form in MOHSAIC (page 10.10-.11). Be sure to click on the correct version when entering electronic forms. If using paper forms, check for the year of the form in the lower left corner.

NOTE:
The Screening Report Form, also referred to as blue screening form, must be completed for all clients participating in the SMHW program. Please order blank forms from SMHW by calling 573-522-2845 or toll-free at 866-726-9926.

- Information from the blue screening form is used to verify clients’ eligibility for screening, as well as diagnostic services that are recommended. Some information from the blue form is reported to the CDC. Keep all information confidential.
- The information on the original form shall be entered electronically in the MOHSAIC system. File all reported information in the client’s record.
- A copy of the blue screening form is located on pages 10.10-.11 or download a copy at: http://health.mo.gov/living/healthcondiseases/chronic/showmehealthywomen/forms.php
- If you have additional questions, please call SMHW toll-free 866-726-9926 or 573-522-2845 for general assistance with central office staff.
- If you have questions or concerns regarding specific issues with MOHSAIC, contact the ITSD Help Desk by telephone at 800-347-0887 or by e-mail at support@health.mo.gov.
## SMHW Clinical Service Summary

Alert Value Follow-Up ..........................................................................................................5.20
A mandatory component as a provider of the SMHW program is the responsibility for providing clinical case management of abnormal findings as well as reporting the abnormal findings, and the outcomes to the SMHW program on a timely basis.

The clinician, using current standards of practice and the established SMHW breast cancer screening protocols, determines abnormal findings clinical case management type and frequency.

**Provider Assurances**

**Providers must ensure the following**

**Suspicious or Abnormal Breast Results**

Clients with suspicious or abnormal breast results will receive the necessary case management as determined by the clinician based on current standards of practice for rescreening, diagnosis, and/or appropriate treatment. Clinicians will report data to SMHW. Two diagnostic tests must be completed after an abnormal CBE. Include a detailed comment on the form why a second diagnostic test was not completed.

**CDC:** 60 days or less from result of suspicious for cancer screening to diagnosis

**Standard:** 60 days or less from time of cancer diagnosis to start of treatment

**Breast Exception**

An exception in counting the number of days has been made for women referred into the program for diagnostic evaluation after an abnormal breast test result is received from a provider outside of the SMHW program. In this instance, the interval shall begin on the referral date for diagnostic testing rather than the date of the initial abnormal breast test.
Determination of Screening Results

Suspicious screening results will be determined as normal or abnormal through short-term rescreen or diagnostic procedures.

- Notify and explain to the client with abnormal findings the need for any additional diagnostic service(s).

Pending Abnormal Screening Results

If abnormal screening results are pending for ten (10) months or longer, client eligibility must be checked and a new annual screening test must be performed prior to the initiation of further diagnostic studies. SMHW will only reimburse for additional diagnostic services if the client continues to meet SMHW eligibility guidelines.

- For clients referred to direct billing diagnostic providers (page 9.5), continue to track that the client receives/attends the scheduled appointments.
- For a client diagnosed with cancer, SMHW providers must provide the following information to SMHW:
  - Date treatment started
  - Type of treatment initiated
  - Name of the facility where treatment occurred

Note:

Contact the RPC in your area (pages 13.1-.2) with questions.
CBE

For a first occurrence of breast pain and tenderness, SMHW will only reimburse for an office visit for the CBE. SMHW does not reimburse for breast diagnostics for a first occurrence of breast pain/tenderness.

A rescreen CBE can be performed after 14 days or within 10 months of an initial CBE with the first time reported pain/tenderness. Please see page 5.10, condition number four (4).

A repeat CBE is an option as a rescreen, performed 14 days to 10 months after a CBE deemed suspicious for cancer and after performance of appropriate diagnostic test confirmed non-cancer diagnosis. If no prior SMHW documentation is submitted, it is acceptable to enter the first occurrence of pain/tenderness in the comments section of MOHSAIC.

Mammogram

- SMHW will pay up to four consecutive probable benign mammograms within a two-year period. The standard recommendation of a probable benign mammogram is four consecutive six-month follow-ups (a complete cycle of two years). However, if during this follow-up cycle the test result is downgraded to a benign finding (Category II), additional follow-up is not required. **If the result remains probably benign or upgraded to a higher category, another type of additional diagnostic testing must be performed within 60 days.**

- A repeat mammogram is an option within ten (10) months if the previous mammogram reported to SMHW was a “Category 0, Assessment incomplete”. If “Category 0, Assessment incomplete” is the result reported on a mammogram, film comparison, additional mammography, or ultrasound images are needed within 60 days. **If possible, providers should not enter this result until the final result is available.** However, if “Category 0, Assessment incomplete” is noted on the blue screening form (pages 10.10-.11) providers should complete the film comparison or take additional images within 60 days. The film comparison result should be reported on the blue breast form if the blue screening form has already been submitted. Additional imaging would also be reported on the purple breast form (pages 10.12-.13).

Reporting Directions:

If a client receives breast diagnostic procedures that recommend a rescreen mammogram or rescreen ultrasound (typically in six months), the current purple breast form (pages 10.12-.13) should be entered as “Work-up complete”. When the rescreen mammogram is submitted it shall be on a blue screening form (pages 10.10-.11) entered as “Rescreen”. Refer to the flowchart on page 5.9 on selecting the correct form type for entering of mammograms.
New Breast Lump

- For clients who received an annual SMHW screening that was normal, but later notes a new breast lump, SMHW will not cover the cost of the office visit, but will pay for the diagnostic testing if the CBE is abnormal. If the clinician does not find a lump and chooses to complete diagnostic testing as a result of the breast self-examination, SMHW will cover the cost of the diagnostics.

Ultrasound

- Ultrasound may be used as a rescreening tool when a mammogram is not appropriate. Rescreen must be less than ten months from original abnormal ultrasound screening.

**Limitation:**

SMHW will not reimburse for more than two consecutive ultrasound tests with the result of “probably benign” without further diagnostic testing planned within 60 days (something other than ultrasound such as a specialist consult or biopsy).

**Reporting Directions:**

If a client receives breast diagnostic procedures that recommend a follow-up/rescreen mammogram or ultrasound in six months, enter as “Work-up complete” on the current purple breast form (pages 10.12-.13). Submit the rescreen ultrasound on a purple breast form with “Rescreen ultrasound” box checked.
Specialist Consultation Guidelines

A SMHW client may be referred for a specialist consultation following abnormal screening and diagnostic test results. Refer clients requiring a specialist consultation to a surgeon, OB/GYN specializing in breast and/or cervical health, or a physician or nurse practitioner who works for a cancer diagnostic or treatment center. Referral to the same screening examiner is not a specialist consult.

**Limitation:**
Reimbursement for breast and/or cervical specialist consultation following abnormal results is limited to one breast and one cervical referral per client in a contract year.

**Specialist Consultation Reminder**

- Retain a copy of the consult in the client’s chart. Do not submit a copy to SMHW.
**ATTENTION:**
Complete breast diagnostic services within **60 days** of an abnormal screen.

### LIMITATIONS FOR DIAGNOSTIC SERVICES

</table>

*Only one (1) anesthesia fee reimbursement paid for when performing multiple biopsies during the same operation.*

*Payment: Services are paid at an outpatient rate only. SMHW program reimburses for services as indicated on pages 9.7-9.12.*

*Protocols: The frequency and type of services is at the discretion of the clinician based on current standards of practice and on the protocols included on pages 5.10 – 5.18*
Guidelines for Breast Diagnostic Services

CBE Suspicious for Cancer

- Completely evaluate and appropriately refer women age 35 and older with a clinically suspicious lesion.

Non-palpable Mammography Abnormality

- Mammography results reported by a radiologist with reference to American Cancer Society (ACS) categories “Suspicious abnormality” (Category 4) or “Highly suggestive of malignancy” (Category 5) should be referred to a surgeon.
- “Assessment incomplete” (Category 0) should be followed by additional views, comparison of films and/or ultrasound within 60 days. If comparison of previous films is needed, only the final result of the comparison study should be reported. Providers who have already submitted reporting forms with the “Assessment incomplete” (Category 0) should enter results on the Breast Diagnosis and Treatment form in the film comparison section.

Ultrasound

- Ultrasound may be recommended when the CBE is suspicious for cancer and mammogram is not appropriate.
- Abnormal ultrasound requires additional diagnostic imaging.
- Refer women whose results are Category 4 or Category 5 to the BCCT program with or without a biopsy.

Magnetic Resonance Imaging (MRI)

- All MRIs MUST HAVE PRIOR AUTHORIZATION from the SMHW program manager. Contact your RPC with client information for approval from the manager.
- SMHW will pay for screening breast MRI when done with a mammogram and documented with one of the following:
  - BRCA mutation
  - A first-degree relative whom is a BRCA carrier
  - A lifetime risk of 20-25% or greater as defined by risk assessment models such as BRCAPRO (as they are highly dependent on family history)
- The CDC suggests providers discuss risk factors with all clients to determine if they are at high risk for breast cancer.
- MRI should NEVER be done alone as a breast cancer screening tool.
- Breast MRI cannot be reimbursed to assess the extent of disease in clients who have already been diagnosed with breast cancer.
- To be most effective, it is critical to complete MRIs at facilities equipped with breast MRI equipment and perform MRI-guided breast biopsies.
Breast Biopsies:
Fine Needle Aspiration, Core Needle, Stereotactic, Incisional or Excisional

- The BSE, CBE and/or imaging mammogram/ultrasound must be suspicious for cancer and information submitted to SMHW before the program will reimburse for breast biopsies.

3-D Mammography/Tomosynthesis

- For clients who undergo 3-D mammography, SMHW will reimburse at the rate for a standard digital 2-D mammography. Under the comments section of MOHSAIC, please enter that client had a 3-D mammogram.
Flowchart: Selecting the correct form when entering a mammogram

START

Was a Clinical Breast Exam (CBE) done at visit or by referring SMHW provider?

Was CBE abnormal? *(Abnormal meaning that a 60-day diagnostic work-up IS planned)*

Is this a routine or annual screening mammogram?

Is this diagnostic mamm. the first mamm. of a 6-month follow up or 6-month rescreen?

Is this diagnostic mamm. for re-imaging *(for example, to clarify a BI-RADS 0 result)*?

STOP! Must obtain CBE

Blue Screening Form

Call for guidance

Purple Diagnostic Form

NOTE: this flowchart provides direction for entering mammograms only. CBEs will always be entered on a blue screening form.
# Guidelines for the Management of Breast Self-Exam (BSE) Reported Symptoms

MOHSAIC Reporting Form: (Blue) Screening Form Section B1 and B2

## (1) Self-reported Lump

<table>
<thead>
<tr>
<th>Option 1</th>
<th>Clinician to perform CBE and it is their discretion to follow in less than 60 days with 2 diagnostic tests per program guidelines:</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>- Diagnostic mammogram, - Specialist consult, or - Ultrasound, - Breast biopsy</td>
</tr>
<tr>
<td>Option 2</td>
<td>Clinician to perform CBE and it is their discretion to follow in 14 days – 10 months with a rescreen CBE</td>
</tr>
</tbody>
</table>

## (2) Nipple Discharge
(Especially unilateral spontaneous clear or bloody drainage)

<table>
<thead>
<tr>
<th>Option 1</th>
<th>Clinician to perform CBE and it is their discretion to follow in less than 60 days with 2 diagnostic tests per program guidelines:</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>- Diagnostic mammogram, - Specialist consult, or - Ultrasound, - Breast biopsy</td>
</tr>
<tr>
<td>Option 2</td>
<td>Clinician to perform CBE and it is their discretion to follow in 14 days – 10 months with a rescreen CBE</td>
</tr>
</tbody>
</table>

## (3) Skin Changes
(dimpling, retraction, new nipple inversion, ulceration or Paget’s disease)

<table>
<thead>
<tr>
<th>Option 1</th>
<th>Clinician to perform CBE and it is their discretion to follow in less than 60 days with 2 diagnostic tests per program guidelines:</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>- Diagnostic mammogram, - Specialist consult, or - Ultrasound, - Breast biopsy</td>
</tr>
<tr>
<td>Option 2</td>
<td>Clinician to perform CBE and it is their discretion to follow in 14 days – 10 months with a rescreen CBE</td>
</tr>
</tbody>
</table>

## (4) Pain/Tenderness

If pain and tenderness are reported, client may be followed with a rescreen CBE in 14 days to 10 months. If client continues to report pain and tenderness twice, and breast cancer is a concern, it is the clinician’s discretion for additional follow-up or 2 diagnostic tests per program guidelines, insert statement in comment section at bottom of screening form that additional diagnostics are being done following a second rescreen. If the client comes with a recent previous history of a documented pain or tenderness complaint, make a note in the comments when the physician documented the issue, and report it as a second occurrence of pain on the blue screening form. Please consult the RPC for your area for clarification.

## (5) Other

Example: Personal history of treated breast cancer. In this case, client may receive a diagnostic mammogram annually.

Example: Known BRCA carrier. At this time, screening guidelines are not altered due to genetic predisposition for breast cancer.

## (6) Family History

At this time, screening guidelines are not altered due to family history of breast cancer.
### Guidelines for the Management of *Clinical Breast Exam (CBE) Results*

* Indicates suspicious for cancer and **requires** additional follow-up in less than 60 days from the date of the abnormal CBE result.

**MOHSAIC Reporting Form**: Blue screening Form Sections B3 and B4

<p>| | | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>(1) Benign Finding</td>
<td>Fibrocystic changes, diffuse lumpiness that is not clinically suspicious, clearly defined symmetrical thickening, tenderness, or nodularity palpated in the same location in both breasts. Examples include: fibroadenomas, multiple secretory calcifications, oil cysts, lipomas, galactoceles, mixed density hamartomas, intramammary lymph nodes, vascular calcification, implants, and architectural distortion related to previous surgery.</td>
<td>CBE may be repeated in 14 days to 10 months. <em>(NOT eligible for SMHW reimbursed diagnostics with these results)</em></td>
</tr>
<tr>
<td>(2) <em>Discrete Palpable Mass</em></td>
<td>Includes masses that may be diffuse, poorly defined thickening, asymmetric thickening/nodularity, cystic or solid.</td>
<td>2 diagnostic tests are to be performed per program guidelines (if something different is done, make a note in the comments section of the form). - Diagnostic Mammogram - Ultrasound - MRI (obtain preapproval) - Breast Consult - FNA - Biopsy</td>
</tr>
<tr>
<td>(3) <em>Nipple Discharge</em></td>
<td>Whether or not there is a palpable mass especially spontaneous unilateral, clear, serous, sanguineous or serosanguineous.</td>
<td></td>
</tr>
<tr>
<td>(4) <em>Nipple Excoriation, Areolar Scaliness, or Erythema</em></td>
<td>(Clinically suspicious of Paget's Disease)</td>
<td></td>
</tr>
<tr>
<td>(5) <em>Skin Changes</em></td>
<td>Dimpling; retraction; new nipple inversion/peau d'orange; ulceration; one breast lower than usual; prominent veins, unilateral; unusual increase in size, unilateral lymph nodes; also swelling of upper arm. (Clinically suspicious of Inflammatory Breast Cancer)</td>
<td>SMHW program does not reimburse for skin biopsy. Reassess clinical/pathology correlation if tissue biopsy results are benign. Also, consider repeating the biopsy.</td>
</tr>
<tr>
<td>(6) <em>Abnormal clavicular, or axillary lymph nodes, or swelling of upper arm.</em></td>
<td>Enlarged, tender, fixed or hard palpable supraclavicular, infraclavicular or axillary lymph nodes, also swelling of upper arm.</td>
<td></td>
</tr>
</tbody>
</table>
Guidelines for the Management of a “Suspicious for Cancer” CBE and First Follow-up Test is a Diagnostic Mammogram

*All diagnostic follow-up should be completed in less than 60 days from the date of the abnormal CBE.*

*If the first test following an abnormal CBE is a mammogram, no matter the mammogram result (Category 0-5), an additional, different type of diagnostic test should be completed within 60 days of the abnormal CBE result.

*Use a diagnostic mammogram, rather than a screening mammogram, if a mammogram is preferred following an abnormal CBE.

The typical standard of care following an abnormal (suspect for cancer) CBE when the first diagnostic test performed is a mammogram, is to complete another type of diagnostic test such as specialist consult, ultrasound, FNA, or tissue biopsy. If this protocol is not followed, justification of why a second test is not needed must be documented in the comment section at the bottom of the blue screening form.

### Mammogram Result Category 0
**Assessment Incomplete**

<table>
<thead>
<tr>
<th>Option 1</th>
<th>Option 2</th>
<th>Option 3</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Compare to Previous Films</strong>&lt;br&gt;(Enter Results on a Blue Screening Form)</td>
<td><strong>Additional Diagnostic Mammogram Views</strong>&lt;br&gt;(Enter Results on a Blue Screening Form)</td>
<td><strong>Ultrasound</strong>&lt;br&gt;(Enter Results on a Purple Diagnostic Form)</td>
</tr>
<tr>
<td>If comparison does not clinically clarify mammogram result to a specific category 1-5, should perform ultrasound or refer to specialist and progress using program guidelines for breast follow-up as clinically indicated. (Note: It is preferable to hold blue MOHSAIC reporting form submission until comparison results can be entered on the initial form)</td>
<td>If additional mammogram views do not clinically clarify result to a specific category 1-5, should perform ultrasound or refer to specialist and progress using program guidelines for breast follow-up as clinically indicated. (Note: Updates of the additional mammogram views should be submitted on a purple breast diagnostic MOHSAIC form)</td>
<td>If Ultrasound result does not clinically correlate to the CBE result, should refer to specialist and progress to other SMHW covered diagnostic tests and progress using program guidelines for breast follow-up as clinically indicated. (Note: Ultrasound result should be submitted on a purple breast diagnostic MOHSAIC form)</td>
</tr>
</tbody>
</table>

Once Mammogram Result is Clarified from Category 0 to a Specific Category 1-5, Refer to Next Page for Follow-up Guidelines:

SMHW staff note that at times, the original screening provider performs a diagnostic mammogram and when the client is referred to another direct biller for further diagnostics, the direct biller is repeating a mammogram. Please avoid this duplication of services when possible, to conserve funding, service and appointment efforts. If the original provider is highly suspicious of cancer, please consider where the woman would go for treatment if she is found to have breast cancer and refer for the diagnostic mammogram as appropriate. If the potential treating provider is located a significant distance away and it would create a hardship for the client to travel for the initial diagnostics please take that situation into consideration.

*(Follow-up Guidelines for Mammogram results Categories 1-5 is on page the next page.)*
**Guidelines for the Management of a “Suspicious for Cancer” CBE and First Follow-up Test is a Diagnostic Mammogram**

*All diagnostic follow-up should be completed in less than 60 days from the date of the abnormal CBE.*

*If the first test following an abnormal CBE is a mammogram, no matter what the mammogram result is (Category 0-5), an additional, different type of diagnostic test should be completed within 60 days of the abnormal CBE result.

*A diagnostic mammogram rather than a screening mammogram should be used if a mammogram is preferred following an abnormal CBE.*

The typical standard of care following an abnormal (suspicious for cancer) CBE when the first diagnostic test performed is a mammogram, is to complete another type of diagnostic test such as specialist consult, ultrasound, FNA, MRI (prior approval by SMHW Manager), or tissue biopsy. If this protocol is not followed, justification of why a second test is not needed must be documented in the comment section at the bottom of the blue screening form.

<tr>
<td></td>
<td>• Clinician's discretion to proceed to Ultrasound, Surgical Consult, FNA, MRI (prior approval obtained from SMHW manager), or Biopsy within 60 days or</td>
</tr>
<tr>
<td></td>
<td>• Designate work-up complete &amp; may rescreen at 6-month intervals for the next 6-24 months*</td>
</tr>
<tr>
<td></td>
<td>*If there are two consecutive “probably benign” results, client must have some other type of further diagnostic testing done such as surgical consult, FNA, or biopsy within 60 days of abnormal CBE result</td>
</tr>
<tr>
<td></td>
<td>• Must proceed to Ultrasound, Surgical consult, FNA, or Biopsy</td>
</tr>
<tr>
<td></td>
<td>• If Ultrasound result is a Category 4 or 5, complete and submit form on page 10.16 before proceeding with further diagnostics. With these ultrasound results, clients will be eligible to receive any further diagnostic and treatment services through the MO HealthNet program as well as health care for other medical issues that may occur. MO HealthNet requires prior authorization for many procedures, including ultrasound.</td>
</tr>
</tbody>
</table>

*If clinician has other clinical protocol to be considered, please contact your RPC. The above are considered to be typical guidelines and not definitive proactive standards for every situation. These guidelines are primarily to address protocols that are reimbursable by the SMHW program. See provider manual for more specific information regarding covered services.*
**Guidelines for the Management of Women Who Have Suspicious for Cancer CBE and First Follow-up Test Is NOT a Mammogram**

(Must offer 1 or more clinically appropriate tests below. Enter results on a purple breast form.)

### Specialist Consult

| Category 1 (Negative) or Category 2 (Benign) | • Work-up may be complete if another test result is not suspicious for cancer |
| **Category 3 (Probably Benign)** | • Clinician’s discretion to complete additional work-up if another test result is not suspicious for cancer OR  
• May designate work-up complete and may perform rescreen CBE within the next 6-10 months |
| **Category 4 (Suspicious Abnormality) or Category 5 (Highly Suggestive of Malignancy)** | • Typically determination is made to perform a FNA or Biopsy within 60 days of abnormal CBE result |

### Fine Needle Aspiration

| Negative | • When clearly benign or negative, work-up may be complete |
| Indeterminate | • Typically is followed by a surgical biopsy – or FNA may be repeated within 60 days of abnormal CBE result |
| Suspicious for Malignancy | • Typically is followed by a surgical biopsy within 60 days of abnormal CBE result |

| Malignancy | • When cancer is clearly identified, refer to BCCT for treatment and report initial breast cancer treatment to RPC within 30 days of diagnosis  
• Refer to full BCCT by submitting BCCT MO HealthNet Application form, (page 10.17) if not submitted previously. |

### Biopsy Pathology Findings

| Benign | • Work-up may be complete and/or clinician’s discretion to perform rescreen of any abnormal Mammogram/Ultrasound results in 6-12 months for 1-2 years |
| Benign Atypical or Indeterminate | • Refer to Specialist: Possible Excisional Biopsy per surgeon/radiologist recommendation |
| Malignant or Ductal Carcinoma In Situ (DCIS) | • Refer to BCCT for treatment and report initial breast cancer treatment to RPC.  
• Refer to full BCCT by submitting BCCT MO HealthNet Application form, (page 10.17) if not submitted previously. |

*If Clinician has other clinical protocol to be considered, please contact the central office staff. The above are considered to be typical guidelines and not definitive practice standards for every situation. These guidelines are primarily to address protocols that are reimbursable by the SMHW program. See provider manual for more specific information regarding covered services.*
# Diagnostic Breast Follow-up Algorithms

## ULTRASOUND Follow-Up

*Enter results on a purple breast form*

<table>
<thead>
<tr>
<th>Category 1</th>

</tr>
</thead>
<tbody>
<tr>
<td>Negative</td>
<td>Benign</td>
<td>Probably Benign</td>
<td>Suspicious Abnormality</td>
<td>Highly Suggestive of Malignancy</td>
</tr>
</tbody>
</table>

**Diagnostic Referral based on CBE result**

Clinician’s discretion:
- May complete additional diagnostic work-up within 60 days
- May designate work-up complete and return to routine screenings, or
- May designate work-up complete and may rescreen within the next 6-10 months.*

*If there are more than two consecutive "probably benign" results, clinician may follow-up with another type of diagnostic testing such as surgical consult, FNA, biopsy OR may continue a rescreening schedule at 6 month intervals.

**Qualifies for BCCT PE (temporary eligibility) referral**
- Tissue biopsy is typically performed through the BCCT/MO HealthNet program. Refer to Section 7. Please note: MO HealthNet prior authorization for procedures may be required.

## SPECIALIST CONSULT Follow-Up

*Enter results on a purple breast diagnostic form.*

<table>
<thead>
<tr>
<th>Category 1</th>
<th>Category 2</th>
<th>Category 3</th>
<th>Category 4</th>
<th>Category 5</th>
</tr>
</thead>
<tbody>
<tr>
<td>Negative</td>
<td>Benign</td>
<td>Probably Benign</td>
<td>Suspicious Abnormality</td>
<td>Highly Suggestive of Malignancy</td>
</tr>
</tbody>
</table>

(Examples include: Symmetrical thickening/thickened tissue/nodularity palpated in the same location in both breast; irregularity or lumpiness that is not clinically suspicious)

**Work-up may be complete if another test result is not suspicious for cancer**

Clinician’s discretion:
- May complete additional diagnostic work-up within 60 days,
- May designate work-up complete **and** return to routine screenings, or
- May designate work-up complete **and** may rescreen within the next 6-10 months.

Typically the determination is made to perform a Tissue Biopsy.
- If client is BCCT eligible prior to biopsy, MO HealthNet prior authorization for procedures may be required.
## Diagnostic Breast Follow-up Algorithms

### Diagnostic MAMMOGRAM Follow-Up

<table>
<thead>
<tr>
<th>Category 0</th>
<th>Category 1</th>

<tr>
<td>Incomplete</td>
<td>or</td>
<td></td>
<td>Examples include non-calcified mass, focal asymmetry, cluster of round calcifications and others.</td>
<td>or</td>
<td></td>
</tr>
</tbody>
</table>

- **Category 0**
  - Assessment
  - Incomplete

- **Category 1**
  - Negative
  - or
  - Category 2
  - Benign
  - Examples include calcified fibroadenomas, multiple secretory calcifications, fat containing lesions (oil cysts), lipomas, galactoceles, mixed density hematomas and others.

- **Clinician’s discretion:**
  - Work-up may be complete if another test result is not suspicious for cancer. If complete, return to routine screening: Annual CBE/Mammogram/Breast Awareness

  **Exception:** If CBE result was abnormal, additional diagnostic work-up within 60 days of date of abnormal CBE is required. Work-up may include any or all of the following: Ultrasound, Breast Consult, and Tissue Biopsy.

  If benign and CBE result was not abnormal, may rescreen at 3 to 5 months and then further follow-up may be done based on surgeon’s recommendations.

- **Category 3**
  - Probably Benign
  - Examples include non-calcified mass, focal asymmetry, cluster of round calcifications and others.

  **Clinician’s discretion:**
  - May proceed to Ultrasound, Surgical Consult, FNA, or Biopsy within 60 days, or
  - May designate work-up complete and return to routine screening, or
  - May rescreen every 6 to 12 months for 1 to 2 years*, or
  - If medically necessary, may rescreen at shorter intervals.

  - If there are two consecutive “probably benign” results, clinician may follow-up with another type of diagnostic testing such as surgical consult, FNA or biopsy, or continue rescreening schedule.

- **Category 4**
  - Suspicious Abnormality
  - or

- **Category 5**
  - Highly Suggestive of Malignancy

- **Should be referred** to a surgeon, and

- **Must proceed** to ANOTHER DIAGNOSTIC TEST such as Surgical Consult AND Tissue Biopsy.

Tissue biopsy includes Incisional, Core Needle, Ultrasound Guided, Stereotactic, or Excisional.
# Diagnostic Breast Follow-up Algorithms

**Diagnostic Breast Follow-up Algorithms**

## FINE NEEDLE ASPIRATION Follow-Up

*(Enter results on a purple breast diagnostic form)*

Breast cyst aspiration procedure is only to be done if the cyst is complex or suspicious for breast cancer on imaging. It is NOT approved for payment if the cyst is benign on imaging and is being aspirated for pain management or reduction of a benign cyst.

<table>
<thead>
<tr>
<th>Negative</th>
<th>Indeterminate</th>
<th>Suspicious for Malignancy or Malignancy</th>
</tr>
</thead>

| Work-up may be complete | Possible repeat or surgical biopsy per surgeon/radiologist recommendation | • If not already enrolled, enroll in BCCT  
• If client is BCCT eligible prior to biopsy, MO HealthNet prior authorization for procedures may be required  
• If breast cancer is diagnosed, remember to report to RPC date and type of first cancer treatment |

## BIOPSY Follow-Up

*(Enter results on a purple breast diagnostic form)*

<table>
<thead>
<tr>
<th>Benign</th>
<th>Benign Atypical</th>
<th>Indeterminate</th>
<th>Suspicious for Malignancy or Malignancy</th>
</tr>
</thead>
</table>
| Diagnostic Mammogram/US in 6-12 months for 1-2 years | Possible Excisional Biopsy per surgeon/radiologist recommendation | Refer to specialist | • If not already enrolled, enroll in BCCT  
• If client is BCCT eligible prior to biopsy, MO HealthNet prior authorization for procedures may be required  
• If breast cancer is diagnosed, remember to report to RPC date and type of first cancer treatment |
Purple Breast Form

All forms are specific for each grant year. When submitting an electronic or a paper form, use the version of the form that is dated correctly to correspond with the date of service. At the beginning of each grant year there are multiple versions of this form in MOHSAIC. Click on the correct version when entering electronic forms. If using paper forms, check for the year of the form in the lower left corner.

**NOTE:**
Breast Diagnosis and Treatment Form, also referred to as purple breast form, is to collect complete follow-up information for all clients with abnormal breast screening results. Please order blank forms from SMHW by calling toll-free at 866-726-9926 or 573-522-2845.

- The blue screening form must accompany or precede the purple breast form. A SMHW or a non-SMHW provider must base the diagnostic service on an abnormal screening result.
- Information from the purple breast form is required by CDC and is crucial for statistical reports and studies. All information received is confidential.
- The information on the original form shall be entered electronically in the MOHSAIC system. All reported information shall be filed in the client’s record.
- A copy of the purple breast form is located in Section 10 - Forms or download a copy at: http://health.mo.gov/living/healthcondiseases/chronic/showmehealthywomen/forms.php
- If you have additional questions, please call the RPC for the provider area or toll-free 866-726-9926 or 573-522-2845 for general assistance with central office staff.
- If you have questions or concerns regarding specific issues with MOHSAIC, contact the ITSD Help Desk by telephone at 800-347-0887 or by e-mail at support@health.mo.gov.

Refer to Section 10, Forms Section or follow link to forms: http://health.mo.gov/living/healthcondiseases/chronic/showmehealthywomen/forms.php.
Alert Value Follow-Up

The MOHSAIC electronic reporting system has been programmed to produce lists of clients and the SMHW providers who reported abnormal, suspicious for cancer results. These lists are forwarded at least weekly to the RPCs. The RPCs check the MOHSAIC reporting system to determine if follow-up is reported timely. If no information is entered into MOHSAIC regarding the necessary follow-up, the RPC will contact the provider to ensure that follow-up has occurred and that it will be reported by the provider; or, if the provider or client is experiencing difficulty in completing the follow-up, the RPC will assist in contacting the client or in finding appropriate resources.

SMHW Providers Shall

- Implement some form of internal tracking and reminder system to ensure that SMHW clients who have abnormal breast test results suspicious for cancer receive further medical evaluation and treatment within 60 days. This assures scheduling follow-up visits and procedures are completed timely. In addition, client attendance for appropriate follow-up needs to be monitored. If there is a missed appointment, reschedule the appointment and assist with removing barriers such as transportation difficulties.

- Implement some form of internal tracking and reminder system to ensure that women who have abnormal cervical test results receive further medical evaluation and treatment within 90 days. This ensures that scheduling follow-up visits and procedures are completed timely. In addition, client attendance for appropriate follow-up needs to be monitored. If there is a missed appointment, reschedule the appointment and assist with removing barriers to care, such as transportation.

- Promptly notify the RPC when a client is referred to BCCT in order to ensure timely and complete follow-up, complete and accurate tracking and documentation as such. Please report additional information to the RPC who can enter the information onto forms as needed, such as treatment of cancers found.

- SMHW requires two documented attempts for client follow-up, if needed.
  - Direct telephone communication is the most effective contact method.
  - If unable to reach client by telephone, a letter should be sent indicating there is need for additional diagnostic testing or treatment. For legal purposes, providers are encouraged to use a certified letter.
  - If no response after the second attempt or the client refuses further diagnostics and/or treatments, notify the RPC.
  - Schedule clients for follow-up if abnormal findings returned.
  - Utilize a tracking system to ensure that clients show up for scheduled visits and receive the appropriate diagnostic or treatment services.
  - If clients do not keep follow-up appointments, implement attempts to reach the client for rescheduling the appointment by telephone or by mail within 30 days.
  - If the client is no longer reachable or attempts to contact the client fail, please inform the RPC for the provider area within 30 days.

Alert Value Follow-up

SMHW providers shall Cervical situations that require follow-up within 90 days
Abnormal Cervical Screening Results

A mandatory component as a provider of the SMHW program is the responsibility for providing clinical case management of abnormal findings, as well as reporting the abnormal findings and the outcomes to the SMHW program on a timely basis.

The clinician, using current standards of practice and the established SMHW cervical cancer screening protocols, determines abnormal findings clinical case management type and frequency.

Providers must ensure the following

Suspicious or Abnormal Cervical Results

Clients with suspicious or abnormal cervical results will receive the necessary case management as determined by the clinician based on current standards of practice for rescreening, diagnosis and/or appropriate treatment, and clinicians will report data to SMHW.

**CDC Standard**

- **60 days** or less from a suspicious for cancer screening result to diagnosis.
- **90 days** or less from time of CIN 2 or CIN 3/CIS diagnosis to start of treatment.

**Pap Test Exceptions:**

- An exception to extend the diagnostic follow-up interval to **90 days** for women with an abnormal pap test result of ASC-H or worse, including ‘presumed abnormal’ is allowable.
- An exception in counting the number of days for women referred into the program for diagnostic evaluation after a received abnormal pap test result from a provider outside of the SMHW program is allowable. In this instance, the interval shall begin on the referral date for diagnostic testing rather than the date of the initial pap test.
Determination of Screening Results

Suspicious screening results will be determined as normal or abnormal through short-term rescreen or diagnostic procedures.

- Notify and explain to the client with abnormal findings the need for any additional diagnostic service(s).
- SMHW requires two documented attempts for client follow-up, if needed.
  - Direct telephone communication has been shown to be the most effective contact.
  - If unable to reach client by telephone, a letter should be sent indicating there is need for additional diagnostic testing or treatment. For legal purposes, providers are encouraged to use a certified letter.
  - If no response is received after the second attempt or the client refuses further diagnostics and/or treatments, notify your RPC.

Pending Abnormal Screening Results

If abnormal screening results are pending for ten (10) months or longer, client eligibility must be checked and a new annual screening test must be performed prior to the initiation of further diagnostic studies. SMHW will only reimburse for additional diagnostic services if the client continues to meet SMHW eligibility guidelines.

- For clients referred to direct billing diagnostic providers (Section 9 – Billing Guidelines), continue to track that the client receives/attends the scheduled appointments.
- For a client diagnosed with cancer, SMHW providers must provide the following information to SMHW:
  - Date treatment started
  - Type of treatment initiated
  - Name of the facility where treatment occurred
Protocol for Rescreen

Follow these guidelines in the instances where performance of a rescreen is needed.

Pelvic Examination

- A repeat pelvic exam is optional as a rescreen in less than ten (10) months if the previous abnormal pelvic exam reported to SMHW was not within normal limits due to an abnormal cervical finding.

Pap Test

- Reimbursement occurs only when pap test is in accordance with the ASCCP guidelines.
- SMHW does reimburse for HPV DNA genotyping.
- HPV DNA genotyping is not considered the same as HPV testing.
- HPV DNA specific genotyping 16/18 is an ASCCP option that recommends being done with normal pap/HPV positive results to determine if further diagnostic follow-up is needed.
- Or, the provider can choose not to do genotyping and co-test (pap/HPV) in one year.
- Both are acceptable ASCCP options.

Reporting Directions:

Report a rescreen pap test on a blue screening form (pages 10.10) with the category “Rescreen” marked in the “Visit type” box.

- See link to ASCCP Guidelines on page 6.7.
- If rescreen results are suspicious for cancer, proceed with diagnostic procedures as indicated by ASCCP guidelines.
Specialist Consultation Guidelines

A SMHW client may be referred for a specialist consultation following abnormal screening and/or diagnostic test results. Refer clients requiring a specialist consultation to a surgeon, OB/GYN specializing in breast and/or cervical health, or a physician or nurse practitioner who works for a cancer diagnostic or treatment center.

**Limitation:**

Reimbursement for cervical specialist consultation following abnormal results is limited to one cervical referral per client per contract year.

Specialist Consultation Reminder

- Retain a copy of the consult in the client’s chart. Do not submit a copy to SMHW.

Not Considered a Specialist Consultation

- Referral to the same screening examiner is not a specialist consultation.
- Referral for the standard/routine follow-up, such as a colposcopy by a nurse practitioner for a LSIL, is not eligible for a specialist consultation. (The appropriate follow-up is known; therefore, referral for a specialist consultation to determine the management of the problem is not required).

**Limitation:**

If the provider requests reimbursement for a specialist consult on the same day as the colposcopy, information must be included in the comments as to why the specialist consult is being billed (i.e., a “cervical wash” was done to verify pap test results prior to proceeding to colposcopy). SMHW will not reimburse for the specialist consult if a rationale is not included and no additional procedure completed.
**Diagnostic Services Available**

**ATTENTION:**
Complete cervical diagnostic services within **60 days** unless there is an exception.

### Pap Test Exceptions

- An allowable exception is to extend the diagnostic follow-up interval to **90 days** for women with an abnormal pap test result of ASC-H or worse, including “Presumed abnormal.”
- An exception in **counting the number** of days has been made for women referred into the program for diagnostic evaluation after an abnormal pap test result is received from a non-SMHW provider. In this instance, the interval shall begin on the referral date for diagnostic testing rather than the date of the initial pap test.

### LIMITATIONS FOR DIAGNOSTIC SERVICES

#### Cervical Cancer

- Colposcopy without biopsy
- Colposcopy with cervical biopsy
- Colposcopy with endocervical curettage (ECC)
- Cervical biopsy (polypectomy)
- Endocervical Curettage (ECC)
- Endometrial biopsy
  
  **(NOTE: Colposcopy with endometrial biopsy can be reimbursed only if cervical and/or endocervical biopsies are performed during the colposcopy.)**
- Conization may be done by:
  - Cold knife *(refer client to BCCT/MO HealthNet if done as treatment)*
  - LEEP will only be reimbursed by SMHW if being performed for continued diagnostic work-up *(refer client to BCCT/MO HealthNet/ Medicaid if done as treatment)*
  - Specialist consultation

**Payment:** Paid services are at an outpatient rate only. SMHW program reimburses for services as indicated in Section 9 – Billing Guidelines.

**Protocols:** The frequency and type of services is at the discretion of the clinician based on current standards of practice and on the protocols included from ASCCP algorithms [http://www.asccp.org](http://www.asccp.org)
**Guidelines for Cervical Diagnostic Services**

If the repeat pap test is more than ten (10) months from the previous pap test, then the pap test should be part of a complete annual screening.

**NOTE:**

SMHW will not reimburse for more than two consecutive abnormal pap tests with a result of LSIL or ASC-US without further diagnostic testing, as recommended by the SMHW Advisory Board in July 2001.

**High-Risk Human Papillomavirus (HPV) Testing**

- For five (5) years, the SMHW program will not reimburse for additional HPV testing if the initial pap result is negative.
- If the HPV is positive, refer to the ASCCP guidelines.

**Cervical Conization**

- Conization by LEEP, or cold knife, is usually considered to be treatment and is covered by MO HealthNet BCCT. If colposcopy is inadequate, or the client is not eligible for BCCT, please call your RPC for additional instructions to meet the client’s need.
- All LEEP and cold knife procedures qualify for presumptive eligibility for Presumptive Eligibility BCCT with a pap test result of, HSIL, AGC or worse followed by a colposcopy or tissue pathology, even if the tissue pathology is benign/CIN I.

**NOTE:**

SMHW funding pays for the colposcopy; LEEP and cold knife are typically paid by BCCT funding.

Yellow Cervical Form

All forms are specific for each grant year. When submitting an electronic or a paper form, use the version of the form that is dated correctly and corresponds with the date of service. At the beginning of each grant year there are multiple versions of this form in MOHSAIC. Click on the correct version when entering electronic forms. If using paper forms, check for the year of the form in the lower left corner.

NOTE:
The Cervical Diagnosis and Treatment Form (yellow cervical form – pages 10.14-.15) is to collect complete follow-up information for all clients with abnormal cervical screening results. Please order blank forms from SMHW by calling toll-free at 866-726-9926 or 573-522-2845.

- A blue screening form must accompany or precede the yellow cervical form. A SMHW or a non-SMHW provider must base the diagnostic service on an abnormal screening result.
- The CDC requires information from the yellow cervical form and is crucial for statistical reports and studies. Keep all information confidential.
- Enter the information on the original form into the MOHSAIC system. File all reported information in the client’s record.
- A copy of the yellow cervical form is located on pages 10.14-.15 or download a copy at: http://health.mo.gov/living/healthcondiseases/chronic/showmehealthywomen/forms.php
- If you have questions or concerns regarding specific issues with MOHSAIC, contact the ITSD Help Desk by telephone at 800-347-0887 or by e-mail at support@health.mo.gov.

ASCCP Algorithms are available online in PDF format in English and Spanish. Visit http://www.asccp.org/asccp-guidelines.

The 2012 Updated Consensus Guidelines for the Management of Abnormal Cervical Cancer Screening Tests and Cancer Precursors are available online at http://www.asccp.org/asccp-guidelines. This is an additional reference tool when the ASCCP Algorithms directs you to “Manage per ASCCP Guidelines.”
ASCCP Mobile App, with Updated Consensus Guidelines, is available for download with Android, iPhone, or iPad
Alert Value Follow-up

The MOHSAIC electronic reporting system produces lists of clients and the SMHW providers who reported abnormal, suspicious for cancer results. The RPCs receive these lists at least weekly. The RPCs check the MOHSAIC reporting system to determine if follow-up is timely. If no information is entered into MOHSAIC regarding the necessary follow-up, the RPC will contact the provider to ensure that follow-up has occurred and that it will be reported by the provider; or, if the provider or client is experiencing difficulty in completing the follow-up, the RPC will assist in contacting the client or in finding appropriate resources.

SMHW providers shall

- Implement some form of internal tracking and reminder system to ensure that SMHW clients who have abnormal breast test results suspicious for cancer receive further medical evaluation and treatment within 60 days. This ensures that scheduling follow-up visits and procedures are complete and timely. In addition, client attendance for appropriate follow-up needs to be monitored. If there is a missed appointment, reschedule the appointment and assist with removing barriers such as transportation difficulties.

- Implement some form of internal tracking and reminder system to ensure that women who have abnormal cervical test results receive further medical evaluation and treatment within 90 days. This ensures that scheduling follow-up visits and procedures are complete and timely. In addition, monitor client attendance for appropriate follow-up. If there is a missed appointment, reschedule the appointment and assist with removing barriers such as transportation.

- Promptly notify the RPC via e-mail, telephone, or fax when a client is referred to Presumptive or Full BCCT in order to ensure timely and complete follow-up, complete and accurate tracking and documentation as such. Please report additional information to the RPC who can enter the information as needed, such as treatment of cancers found.

- SMHW requires two documented attempts for client follow-up.
  - Direct telephone communication is the most effective contact method.
  - If unable to reach client by telephone, a letter must be sent indicating there is need for additional diagnostic testing or treatment. For legal purposes, providers are encouraged to use a certified letter.
  - If no response after the second attempt or the client refuses further diagnostics and/or treatments, notify your RPC.
  - Utilize a tracking system to ensure that clients show up for scheduled visits and receive the appropriate diagnostic or treatment services.
  - If clients do not keep follow-up appointments, implement attempts to reach the client for rescheduling the appointment by telephone or by mail within 30 days.
  - If the client is no longer reachable or attempts to contact the client fail, please inform the RPC for that provider’s area within 30 days.
Cervical situations that require follow-up within 90 days include:

- “Diagnostic work-up planned” is marked on any of the reporting forms for abnormal cervical findings.
- “Referred for diagnostic testing” is marked on the blue screening form or the yellow cervical form for abnormal cervical findings.
- Yellow cervical forms that are marked with “abnormal suspicious for cancer results”, or are marked as “positive for cervical cancer", require the “Status of Final Diagnosis section B” to be completed.
  - Any diagnostic result on the diagnostic form that has an “*” in Section B requires a Final Diagnosis be marked in Section C.
  - Final Diagnostic Results in Section B or C that indicate malignancy need to have Section D Cervical Treatment completed with the status of treatment, type of treatment, treatment facility, and date treatment started inserted.
In October 2000, federal legislation was signed allowing funded programs in the NBCCEDP to participate in the MO HealthNet BCCT Act. In July 2001, Governor Bob Holden signed legislation authorizing matching funds for Missouri to participate in the Missouri Medicaid program, now known as the MO HealthNet program, effective August 28, 2001. (The legislation can be found at RSMo Section 208.151 [25]).

http://www.moga.mo.gov/mostatutes/stathtml/20800001511.html

Most women who receive a SMHW paid screening and/or diagnostic service, and are found to need treatment for breast and/or cervical cancer or a precancerous condition, may be eligible for BCCT in Missouri.

Once a client is enrolled into BCCT, they are qualified for full MO HealthNet benefits, as well as medical services for cancer care. Please note there is also transportation assistance available for the client enrolled in BCCT. Eligibility criteria for MO HealthNet are based on need. Details for BCCT are at http://dss.mo.gov/mhd/general/pages/about.htm.
Basic BCCT Act Eligibility Guidelines

Those who are eligible for the BCCT program must be enrolled in the SMHW program prior to tissue biopsy and have screening or diagnostic test paid by SMHW. NOTE: If the only service reimbursed by SMHW is a referral fee, the client will NOT be eligible for BCCT.

- A Missouri resident.
- A female.
- Under the age 65.
- Social Security Number; and
- Citizenship or Qualified Alien Status.

- Diagnosed with breast and/or cervical cancer or cervical precancerous condition through SMHW,
- Need treatment for breast and/or cervical cancers or precancerous conditions as listed below.

<table>
<thead>
<tr>
<th>BREAST CANCER DIAGNOSIS</th>
</tr>
</thead>
<tbody>
<tr>
<td>Requires a tissue biopsy diagnosed by a pathologist with one of the following</td>
</tr>
<tr>
<td>- Ultrasound result of “suspicious abnormality” (BI-RADS category 4) or “highly suggestive of malignancy” (BI-RADS category 5)</td>
</tr>
<tr>
<td>- Carcinoma in situ</td>
</tr>
<tr>
<td>- Invasive breast cancer</td>
</tr>
</tbody>
</table>

(If breast cancer is not diagnosed after a performed biopsy, the client will no longer be eligible for BCCT and will return to SMHW).
CERVICAL CANCER DIAGNOSIS

Requires a tissue biopsy diagnosed by a pathologist with one of the following to be eligible for BCCT:

- CIN 2/moderate dysplasia
- CIN 3/severe dysplasia
- CIS or AIS
- Invasive cancer
- ** * Clients with a pap result of High-grade squamous intraepithelial lesion (HSIL), Squamous Cell Cancer, or Atypical Glandular Cells (AGC) are eligible for Presumptive Eligibility. The tissue biopsy per colposcopy is still needed. The colposcopy shall be billed to SMHW and reimbursed by the program.

BCCT Temporary MO HealthNet Authorization Letter
Presumptive Eligibility

The BCCT Temporary MO HealthNet Authorization letter (page 10.16 or download at: http://www.health.mo.gov/living/healthcondiseases/chronic/showmehealthywomen/forms.php), also referred to as presumptive eligibility (PE), provides temporary and immediate full MO HealthNet benefits. Clients must meet basic BCCT eligibility guidelines (above) to qualify for PE.

MO HealthNet determines the date PE begins. Typically, PE coverage begins on the date of the procedure or diagnostic test that indicate either a precancerous condition or cancer of the breast and/or cervix by tissue pathology that determined the client is eligible for BCCT (pages 7.2-.3).

In order for a SMHW client to obtain PE, e-mail the completed BCCT Temporary MO HealthNet Application (page 10.16) to the MO HealthNet Service Center, Greene County Family Support Division (FSD) (page 7.4). The client receives a copy of the BCCT Temporary MO HealthNet Authorization Letter. An additional copy is retained for the client’s record. Notify the RPC of eligible clients. This procedure allows for minimal delays for women in receiving the necessary treatment indicated.

Submit the previously noted documentation for MO HealthNet to determine the date PE begins. PE coverage continues until the earlier of the following dates:

- The last day of the month following the PE decision, if the client does not submit an application for regular BCCT MO HealthNet coverage (page 10.17)

  ** OR **

- The date the client is determined ineligible or eligible for BCCT MO HealthNet.
BCCT MO HealthNet Application (Extended BCCT coverage)
Extending MO HealthNet Treatment Eligibility beyond the presumptive period

For evaluation of continued MO HealthNet coverage, submit the (extended) BCCT MO HealthNet Application form for medical assistance to the FSD’s MO HealthNet Service Center at time of cancer diagnosis.

The client must meet the basic BCCT guidelines (page 7.2) and:

- Have a Social Security number,
- Be uninsured or underinsured for breast or cervical cancer treatment,
- Show proof of citizenship/alien status, and
- Submit a completed, signed (extended) BCCT MO HealthNet Application form to the MO HealthNet Service Center via Greene County FSD.

MO HealthNet Service Center
FSD Customer Relations Unit
101 Park Central Square
Springfield, MO  65806

E-mail: Greene.CoDFSIM@dss.mo.gov
Fax: 417-895-6098

It is important for providers to assist clients in completing and e-mailing the Missouri BCCT MO HealthNet Application for medical assistance as soon as possible (refer to page 10.17). SMHW providers e-mail a copy of the application/temps/etc. to Greene.CoDFSIM@dss.mo.gov. The forms will then be forwarded to the appropriate person. E-mailing the forms are preferable, if unable to utilize e-mail, please fax the form to 417-895-6098 and mail the paper copies to 101 Park Central Square, Springfield, MO  65806. Please see the address listed to the right. Application related questions can be addressed by calling 888-275-5908.

Upon review of the application, and if the client is determined eligible for BCCT MO HealthNet coverage, full MO HealthNet benefits will continue until the treating physician determines treatment for the breast or cervical cancer is complete.

Copies of the BCCT forms are located in Section 10 or downloadable at:
http://www.health.mo.gov/living/healthcondiseases/chronic/showmehealthywomen/forms.php

**NOTE:**
Routine monitoring by a physician does not qualify as treatment.

Clients determined ineligible for BCCT medical assistance may receive, with prior authorization from SMHW, a cervical conization by LEEP or cold knife.
Instructions to Transfer a client from another state BCCT Program:

- The client should complete the Full BCCT MO HealthNet Application Form (page 10.17)
- Complete the Certification of Need for Treatment Form (pages 10.18-.19)
- Provide the clinic's name and telephone number as contact information to MO HealthNet. Information is used to verify enrollment in the Breast and Cervical Program of that state.
- E-mail all documentation to MO HealthNet Service Center at Greene.CoDFSIM@dss.mo.gov.

OR

- Fax, if necessary, to 417-895-6098, and mail all paper copies to:

  FSD Customer Relations Unit
  101 Park Central Square
  Springfield, MO 65806
MO HealthNet Treatment Services Covered

Covered Services

- Cervical conization
- LEEP or cold knife - if a client received a pap test diagnosis of HSIL or worse, or colposcopy test diagnosis of moderate dysplasia or worse
- Incisional and/or Excisional breast biopsy - if ultrasound result is category 4 (suspicious abnormality) or category 5 (highly suggestive of malignancy)
- Incisional and/or Excisional breast biopsy - if fine needle aspiration, core needle, or stereotactic biopsy result is malignant
- Breast Cancer Treatment is indicated including chemotherapy, surgery, radiation, and breast reconstruction
- All other MO HealthNet covered medical services, including services not related to the breast or cervical cancer

**NOTE:**
MO HealthNet services may be subject to prior authorization procedures and limitations. Full MO HealthNet benefits will continue until the treating physician determines treatment for cancer is complete.
SMHW Provider Responsibilities

- Notify client of diagnosis and recommended follow-up (preferably in person). If a specialist is treating the client, ensure that the client received the diagnosis and recommended follow-up.
- Explain the BCCT program and application processes to the client.
- Determine client’s presumptive eligibility; complete the BCCT Temporary MO HealthNet Authorization letter.(page 10.16)
- E-mail the letter to the FSD’s MO HealthNet Service Center within five days of BCCT qualifying test results or diagnosis.
- When MO HealthNet coverage is needed beyond the temporary PE period, assist the client in completing and signing the (extended) Missouri BCCT MO HealthNet Application (page 10.17 or download at: http://www.health.mo.gov/living/healthcondiseases/chronic/showmehealthywomen/forms.php). Ensure:
  - The client receives a copy of the completed application form.
  - A copy of the completed form is retained in the client’s medical record.
  - Verify dates included on eligibility documents are correct before sending to MO HealthNet Service Center.
  - Submit the application to the MO HealthNet Service Center for application evaluation as soon as possible after cancer diagnosis.
  - FSD’s MO HealthNet Service Center shall evaluate the application of each client for other MO HealthNet programs the client may be eligible to receive.
- Notify the SMHW RPC of clients who become eligible for the BCCT MO HealthNet Treatment program. The RPC will track the treatment provider’s name, date that the client’s treatment regimen started and the type of treatment initiated.
- Ensure that the client’s history and abnormal screening forms are entered into the MOHSAIC reporting system prior to submitting the BCCT application forms. Utilize the Department Client Number (DCN) assigned to the client when entering the SMHW green history form (page 10.8-.9) into MOHSAIC.
  - This number serves as the MO HealthNet client number for the temporary PE letter and the full BCCT application for benefits.
- Submit date treatment was initiated, type of treatment that was started, and name of treatment provider by completing Section D on the purple breast form, and/or Section D on the yellow cervical form.
- Check the “yes” box in Section A of the SMHW purple breast or yellow cervical form(s) when BCCT services initiated.
Regional Program Coordinators will:

- Check with client to assess status of the client’s cancer treatment upon request from FSD’s MO HealthNet.
- Assure treatment initiated and documented in MOHSAIC.
- Inform FSDs MO HealthNet of the following:
  - Follow-up biopsy result that does not document cancer diagnosis. In these cases, typically the PE BCCT has been issued for results of ultrasound category 4, category 5, or for HGSIL Pap smear result and the biopsy obtained during the PE timeframe is benign. No treatment is needed, so the extended full BCCT application does not need to be approved,
  - Continue to track client’s BCCT treatment status and plan of care for breast and/or cervical cancer. MO HealthNet eligibility ends when treatment for the breast and/or cervical cancer is completed. After the MO HealthNet eligibility end date is documented, SMHW annual services can be offered to the client if all areas of eligibility are met,
  - Date client gains insurance coverage,
  - Date client moves out of state,
  - Date client is determined lost to follow-up after documented attempts by the provider and RPC to inform and assist client with barriers to care, or
  - Date client refuses care (signed waiver form or certified letter returned).
Family Support Division Responsibilities

- Enter BCCT Temporary MO HealthNet Authorization letter for presumptive eligibility in the FSD system upon receipt from SMHW provider.
- Enter Missouri BCCT MO HealthNet Application for medical assistance into the FSD system upon receipt from client or the SMHW provider.
- Determine MO HealthNet eligibility for breast and/or cervical cancer treatment and other MO HealthNet programs.
- Report eligibility determination result to the client and the appropriate SMHW provider or RPC.
- After establishment of MO HealthNet approvals for breast and/or cervical treatment, track client’s need for continued treatment and continued enrollment in MO HealthNet.
  - Request the treating physician’s plan of care for breast and/or cervical cancer treatment.
  - Utilize SMHW RPC for assistance, if needed.
- Terminate breast and/or cervical cancer treatment eligibility after treatment is completed.
- Notify client and SMHW provider or RPC of termination of breast and/or cervical cancer MO HealthNet treatment eligibility.
- Provide tracking for initial treatment type and date to the SMHW RPC.

Performance Indicators

The CDC evaluates the SMHW program’s ability to meet established core program performance indicators. Performance indicators are evaluated from the Minimum Data Elements (MDEs) submitted by DHSS every October and April. MDEs are standardized data elements that provide consistent information on patient demographics, screening results, education, diagnostic procedures, and treatment information. MDEs are collected on women screened, and/or diagnosed with program funds. Obtain MDE data from the history, assessment, screening, and diagnostic reports entered into the MOHSAIC system.

Quality Assurance

The goal of the Quality Assurance (QA) program component is to assure that appropriate services are provided to each client and that program funds are utilized as required by program protocols. QA activities ensure high-quality medical standards of care are provided to women receiving SMHW and WISEWOMAN screenings, diagnostic and education services, as well as referrals for treatment when appropriate.

DHSS monitors and evaluates the quality and appropriateness of client care using the following QA activities:

- Incorporating data edits in the MOHSAIC electronic reporting system that limit the reporting of inappropriate and inaccurate client service records.
- Reviewing electronically submitted client service reports for compliance to standards of care prior to approval for reimbursement.
- Tracking alert values (abnormal testing results) to assure clients receive appropriate diagnostic services and access to treatment, if needed.
- Performing initial on-site QA monitoring at each new SMHW and WISEWOMAN provider six months after first client is served and every two years thereafter. Scheduled QA monitoring occurs at any time deemed necessary by DHSS staff because of questionable reports (page 8.5).
- Providing training and technical assistance to providers to improve quality of care based on results of QA monitoring.
- Evaluating client and provider expectations.

Quality Assurance Follow-up

At the time of the provider’s on-site review, technical assistance is provided by the RPC to clarify or demonstrate any points of confusion. The on-site review is followed by a post-review letter describing any areas needing improvement. Follow-up may be conducted to review success in instituting the recommended improvements. If the RPC determines a provider has consistently not met the program clinical standards, the provider is asked to complete a corrective action plan. Typically, the RPC conducts another review in six (6) months to ensure implementation of the corrective plan and the provider is working to resolve the problem.
Quality Assurance Provider Expectations

QA monitoring will monitor providers’ compliance with the following expectations:

**Client Rights**

- Privacy
- Confidentiality
- Access to test results
- Follow-up of medical problems through referrals, diagnosis and treatment
- Client will not be held financially responsible if identified as a SMHW client
- Access to an interpreter
- Treatment per Civil Rights Act
- Treatment per Americans with Disabilities Act

**Intake and Eligibility Guidelines**

- Staff knowledge of SMHW/WISEWOMAN eligibility guidelines
- Procedure to screen and identify clients
- Annual review of clients for continued eligibility

**Screening and Diagnostic Protocols**

- Screening includes pelvic exam, pap test, CBE, and mammogram, if appropriate
- Standards and protocols for follow-up
- Procedure to track clients with abnormal results, including:
  - Name of client
  - Test
  - Date test completed or missed appointments rescheduled
  - Results and that client is notified of results
  - Referrals including tracking that appointments were kept or rescheduled
  - Follow-up visit dates, if needed
  - Documentation of complete Plan of Care/Treatment to include facility, treatment start dates and treatment type
  - Disposition of client status regarding follow-up, refusals of treatment or diagnostic testing recommended. Report to the RPC problems with missed appointments, lost to follow-up or refusals, in a timely manner
Clinic Management

- Staff is trained and familiar with provider guidelines
- Policy and procedures are in place for billing and filing forms
- Procedure to track amount of program funds is in place
- Maintain professionally licensed or certified staff to perform program activities
- Notify SMHW Central Office including RPC of staffing changes promptly regarding need for provider or rescinding clinic staff MOHSAIC access and to schedule SMHW trainings for new hires
- Track clients who receive screening and diagnostic results to provide complete case management from the initiation of care to the end of the plan of care
- If missed appointments or refusals of follow-up recommendations occur, make attempts to contact the client to reschedule and let the RPC know about situations regarding missed or refused follow-up
- The facility is clean with appropriate space for screening
- There is an in-house plan for quality checks at regular intervals
- Possible Navigation Criteria

Billing Guidelines

Provider Reimbursement Guidelines
Reasons for Denial
Providers will not receive reimbursement under the following circumstances

Insurance Guidelines
Administrative Referral Fee
Direct Billing Diagnostic Providers
Screening/Referring Provider Responsibilities
Direct Billing Diagnostic Provider Responsibilities
Breast & Cervical Reimbursement Rates by CPT Codes
The billing guidelines for the DHSS SMHW and providers outlined in this section are effective June 30, 2017

**ATTENTION:**
Providers are responsible for tracking their funding amounts. When 80 percent of the provider total for SMHW funds is expended, contact the SMHW office to request an amendment to increase funding.

Fax Request To: 573-522-2898
E-mail To: SMHW Manager

**Provider Reimbursement Guidelines**

The guidelines for provider reimbursement are in accordance with the Breast and Cervical Cancer Mortality Prevention Act of 1990, Public Law 101-354. Congress amended the NBCCEDP Public Law 101-354 in 1993 to create the WISEWOMAN Program. The conditions and requirements are:

- DHSS/SMHW is the payer of last resort,
- DHSS reimbursements are considered payment in full,
- Service providers and their subcontractors shall not charge the client for any screening/diagnostic services reimbursable by DHSS,
- DHSS clients shall not be charged any administrative fees,
- When services other than the breast and cervical cancer screenings/diagnostics are performed, and/or the WISEWOMAN cardiovascular risk assessment, documentation shall be provided that verifies the client was notified in advance of these services and their cost, and
- DHSS will cover only outpatient services.

**Reasons for Denial**

Resubmission for denied service will only be considered one time. Submit questions pertaining to client's data reporting form for service denied/adjusted to the DHSS by telephone toll-free at 866-726-9926 or 573-522-2845, or fax to 573-522-2898. Denial will be explained or reconsidered.

No further resubmission will be accepted after the second denial.
Mammography Van Billing

- A Clinical Breast Exam (CBE) is required by SMHW for a complete screening. Coordination of a full screening with health care providers is expected. On the blue screening form, when the mammogram is performed in a mammography van, mark the “Mammogram Van” box and complete “Section B5 Mammography provider facility” field. Include the name of the facility providing the van and include the word “Van” by the facility name. Example: Ellis Fischel Van. SMHW will reimburse the office visit of the provider performing the CBE for clients’ who have or had a mammogram on a mammography van.

Providers will not receive reimbursement under the following circumstances:

- Services are provided to ineligible women
- Standards outlined in the Provider Manual as stated in Sections 4 and 5 are not met
  Example:
  Rescreen CBE after diagnostic work-up will not be reimbursed unless the original screening CBE was abnormal.
  Example:
  Rescreen pap test follows ASCCP guidelines
- Breast and cervical screening services are incomplete
- Mammography and/or pap test results are reported as unsatisfactory. In the case of unsatisfactory results, the test must be repeated and the results reported to SMHW
- Required client and completed reporting forms are not submitted to SMHW within 90 days of service, with the exception of filing with client's insurance, which must be submitted within 30 days from receipt of the Explanation of Benefits (EOB)
- If information is submitted after the closing date for grant year, it cannot be reimbursed by SMHW/WISEWOMAN or billed to client
Insurance Guidelines

- If the client has insurance, the provider shall first bill the client’s insurance company for services received.
- Women who meet the SMHW guidelines and have private insurance or enrolled in PPOs, but who are financially unable to pay the deductible or co-payment, are eligible for SMHW.
- The client’s insurance must be billed first; then include the insurance payment amount made to the facility for the covered procedures in the “Comments” section on reporting forms when billing DHSS. SMHW will only reimburse up to the total amount allowed for the procedure per program guidelines. **The total amount allowed and reimbursed by SMHW for each CPT includes any payments received from insurance, not in addition to insurance payments.**
- In MOHSAIC, under comments, please indicate what insurance provider paid for each procedure in detail by SMHW Approved CPT Code and descriptive line item. For example, $50.00 for pathology (CPT 88305), $40.00 for mammogram, (CPT 77067) and $250 for percutaneous breast biopsy with stereotactic guidance (CPT 19081). Show Me Healthy Women procedures will only reimburse at the contracted program amount which is based on current MEDICARE reimbursement rates (Missouri 01).
- Provider must retain a copy of documentation of the EOB, deductibles or co-payment requirements in the client’s chart along with a copy of the client’s insurance card. It is the responsibility of the provider to keep a copy of the insurance EOB in the clients’ files for quality monitoring.
- The payment received by Show Me Healthy Women is based on Show Me Healthy Women contract rates, not the rate of a commercial insurance company, or public. Show Me Healthy Women payment is NOT based on the clients’ out-of-pocket responsibility as stated in the insurance EOB. SMHW payment is determined based on the amount the insurance carrier pays the provider for each procedure/CPT code.
- SMHW Providers and their subcontractors cannot bill a SMHW client for any SMHW/WW services.
- Women enrolled in prepaid/managed care and health plans (such as HMOs, POS and MO HealthNet Managed Care [formerly MC+]) are not eligible for SMHW services.
- For additional information about clients with insurance, refer to page 3.2.

**NOTE:**
SMHW will only reimburse up to the total allowed by SMHW for that procedure. The total amount allowed and reimbursed by SMHW for each CPT includes any payments received from insurance, not in addition to payment received.
Administrative Referral Fee

An administrative referral fee can be billed for the following:

- When a SMHW client receives a screening from a clinician that is not a SMHW provider, the SMHW provider must submit to the program the patient history and screening forms containing the screening results from the non-SMHW provider as "Reporting Only."
- Administrative referral fee will be paid one time per client, per provider, during an annual screening cycle,
- Direct billing providers may bill an administrative referral fee if the client was referred from another provider for a screening mammogram or diagnostic services, and
- Bill the administrative referral fee on the blue screening form (pages 10.10-.11) or diagnostic forms.

**NOTE:**
If your facility bills SMHW for the screening, you cannot bill for the administrative referral fee. The reimbursement fees for SMHW office visits include the fee to complete paperwork and reimbursable once per annual screening cycle.
Direct Billing Diagnostic Providers

SMHW has agreements with the following medical entities, referred to as direct billing diagnostic providers, to provide diagnostic services:

- Barnes Jewish Hospital, St. Louis—St. Louis City
- Barnes Jewish Hospital, St. Peters—St. Charles County
- Bothwell Regional Health Center, Sedalia—Pettis County
- Bothwell Diagnostic Center Winchester, Sedalia—Pettis County
- Bothwell Health Center Truman Lake, Warsaw—Benton County
- Breast Healthcare Center (Missouri Baptist Hospital), St. Louis—St. Louis County
- Golden Valley Memorial Hospital, Clinton—Henry County
- Hannibal Clinic Operations LLC, Hannibal—Marion County
- Mercy Hospital Jefferson, Crystal City—Jefferson County
- Missouri Delta Medical Center, Sikeston—Scott County
- SSM DePaul Hospital, Bridgeton—St. Louis County
- SSM Health St. Clare Hospital, Fenton—St. Louis County
- SSM St. Joseph Health Center (breast only), St. Charles—St. Charles County
- SSM St. Mary’s Health Center, Richmond Heights—St. Louis County
- SSM Health St. Mary’s Hospital-Audrain, Mexico—Audrain County
- Mercy Hospital, St. Louis (David C. Pratt Cancer Center) (breast only)—St. Louis County
- Southeast Foundation/Southeast Hospital
- St. Louis University Cancer Center, St. Louis—St. Louis City
- Ste. Genevieve County Memorial Hospital, Ste. Genevieve—Ste. Genevieve County
- Truman Medical Center-Hospital Hill, Kansas City—Jackson County
- Truman Medical Center-Lakewood, Kansas City—Jackson County
- University of Missouri Hospital and Clinics-Ellis Fischel Cancer Center, Columbia—Boone County
Screening/Referring Provider Responsibilities

The screening/referring provider shall:

- Verify the client's eligibility for SMHW services according to the SMHW guidelines to include a signed and dated eligibility form (page 10.6).
- Assure that new SMHW clients complete a green history form (pages 10.8 [English] -10.9 [Spanish]).
- Complete/enter the blue screening form (pages 10.10-.11) with the screening results.
- Call and make the appointment for the client with the direct billing diagnostic provider. Transmit copies of the enrollment history, eligibility form, and screening forms to the direct billers.
- Submit the green history and blue screening form information to SMHW as soon as possible with the appropriate billing or reporting-only information. If not, delayed payment for both screening and diagnostic services may occur.
- Assure copies of the client's notations and procedures are shared with the referring practitioner. Consider Rewording To: Share copies of the client's notations and procedures with the referring practitioner.---okay

Direct Billing Diagnostic Provider Responsibilities

The direct billing/diagnostic provider shall:

- Retain copies of the screening provider's information in their files. The copies should include the screening results, client eligibility form, and history form.
- Provide the necessary diagnostic services.
- Complete a purple breast form (pages 10.12-.13), or a yellow cervical form (pages 10.14-.15), or a blue screening form (pages 10.10-.11), if a screening mammogram was performed. Submit data to SMHW.
- Send copies of the medical and pathology reports back to the referring screening provider. To ensure appropriate follow up, document the client has been notified of their results and maintain this information in the clients medical record.

The direct billing and screening provider shall coordinate case management services of SMHW clients. Interruption of timely diagnostic services occurs with missed appointments. Reschedule missed appointments promptly.
# Breast & Cervical Reimbursement Rates by CPT Code

**June 30, 2018 to June 29, 2019**

A CPT code followed by TC indicates technical component. A CPT code followed by the number 26 indicates professional fee. All payments based on Missouri Medicare 01 Rates.

Addendum:
HPV DNA testing is a reimbursable procedure if used in conjunction with pap testing or for follow-up of an abnormal pap result or surveillance as per ASCCP guidelines. It is not reimbursable as a primary screening test for women of all ages or as an adjunctive screening test to the pap for women under 30 years of age. **Providers should specify the high-risk HPV DNA panel only.** No reimbursement provided for low-risk HPV types.

The CDC will allow for reimbursement of Cervista HPV HR at the same rate as the Digene Hybrid-Capture 2 HPV DNA Assay. The CDC funds cannot be used for reimbursement of genotyping (e.g., Cervista HPV 16/18).

<td>$1,650.00*</td>
</tr>
</tbody>
</table>

Revised 6/2018
Criteria:
Breast MRI can be reimbursed by the NBCCEDP in conjunction with a mammogram when a client has a breast cancer gene (BRCA) mutation, a first-degree relative who is a BRCA carrier, or a lifetime risk of 20 to 25 percent or greater as defined by risk assessment models such as BRCAPRO that are largely dependent on family history. Breast MRI **should never be done alone** as a breast cancer screening tool. Breast MRI will not be reimbursed by the NBCCEDP to assess the extent of disease in a woman who is already diagnosed with breast cancer. **An MRI must be authorized in advance of the procedure. Authorization is determined on an individual basis.**

**NOTE:**
Facility fees include $120.00 for supplies and miscellaneous costs.
* This amount applies when performed service is in an outpatient facility setting and an additional facility fee is charged.

CLIENT AGREEMENT

I have not supplied documentation of household income. I declare my household income is within SMHW present income guidelines. ______ (If applicable, please initial)

I have received the income guidelines and I qualify for the SMHW.

A staff person has informed me which tests the SMHW program covers.

I understand that the SMHW services will be available to me at no cost.

I understand that my health is my responsibility. I am responsible for keeping my appointments.

I need to contact this clinic for my test results.

I understand that no test is 100% accurate.

I have read or had the above read to me. I agree that all the information above is correct.

As a client receiving services funded by SMHW, your protected health care information will be shared with appropriate staff at the Department of Health and Senior Services and other agencies as required by the federal funding source. I acknowledge that I have been given a copy of the Missouri Department of Health and Senior Services Notice of Privacy Policies and have been told where I can obtain any subsequent revisions to this Notice. If this document is signed by the guardian or Durable Power of Attorney for Health Care (DPOA-HC), attach a copy of the Letters Appointing the Guardian or a copy of the Durable Power of Attorney for Health Care.

¿Ha aplicado para recibir Medicaid? ☐

¿Tiene usted Seguro de Salud? Sí ☐ No ☐
¿Tiene usted un deducible en su seguro? Sí ☐ No ☐
¿Puede usted pagar el deducible? Sí ☐ No ☐
¿Tiene usted el Seguros llamado HMO? Sí ☐ No ☐

Acuerdo del Cliente

No he presentado documentación sobre mis ingresos. Declaro que mis ingresos no sobrepasan los límites salariales de la guía del programa Mujeres Saludables de Missouri. ______(su inicial) He recibido los requisitos del programa Mujeres Saludables de Missouri y califico para este proyecto.
Personal del proyecto me ha informado cuáles exámenes paga el Mujeres Saludables de Missouri.
Entiendo que los servicios disponibles a través del programa Mujeres Saludables de Missouri son gratuitos. Entiendo que es mi responsabilidad cuidar mi salud. Soy responsable de cumplir y mantener las citas médicas. Entiendo que personas asociadas con el programa Mujeres Saludables de Missouri me pueden entregar en contacto para recibir servicios médicos y aconsejar.
Entiendo que necesito contactarme con la clínica para saber los resultados de mis exámenes.
Entiendo que ningún examen es 100% exacto.
Confiero que he leído o se me ha leído la información anterior.
Confiero que toda información antes mencionada es correcta.

Como cliente que esta recibiendo servicios financiados por el programa Muéstrame Mujeres Saludables, su información protegida del cuidado médico será compartida con el personal apropiado en el Departamento de Salud y de Servicios para Personas de Edad Avanzada y de otras agencias según los requisitos de la fuente del financiamiento federal. Yo reconozco que me han dado una copia de las Políticas de Privacidad del Departamento de Salud y Servicios para Personas de Edad Avanzada de Missouri y que me han dicho a dónde puedo obtener revisiones subsiguientes a este aviso. Si este documento es firmado por el Tutor (Custodio) del poder duradero para atención médica, por favor adjunte una copia de las cartas de nombramiento del Tutor o una copia del Poder Duradero (Poder Notarial).

### C. CERVICAL CANCER SCREENING

| Section 10 | Forms |

#### C1. Pelvic Exam Results
- **Pelvic Exam WNL?**
  - Yes
  - No
  - (Additional information required in "No" selected, see C2.)
- **Hysterectomy?**
  - Yes
  - No
  - Cervix absent
  - Cervix absent due to cervical cancer
  - (previous abnormal Pap test)
  - Cervix present
  - Reason for hysterectomy unknown

#### C2. Pelvic Exam Findings
- **Findings Present at Pelvic Exam (check only one)**
  1. *Cervix*
     - a) Polyp
     - b) Leukoplakia (white lesions)
     - c) Fissure
     - d) Uterine fibroids
     - e) Exophytic growth

  2. *Exam Complicated by Obesity*
     - Rescreening planned
     - Yes
     - No

- **Diagnostic planned**
  - (must be requested by clinician)
  - Yes
  - No

#### C3. Pap Test Results
- **Previous Pap test**
  - Yes
  - No
  - Unknown

- **Specimen adequacy**
  - Satisfactory
  - Unsatisfactory due to ____________
  - Unknown

- **Specimen type**
  - Conventional smear
  - Liquid based
  - Annual Pap due to previous treatment for cervical cancer

- **Pap test result**
  - (check one) (Results with *') require additional follow-up)
    - Normal
      - (1) Negative for intraepithelial lesion or malignancy
    - Abnormal
      - (2) Atypical Squamous Cells of Undetermined Significance
        (ASC-US) (may have viral test)
      - (3) Low-grade SIL (HPV/MiDysplasia/CIN 1*)
      - (4) Atypical Squamous Cells, cannot exclude HSIL (ASC-H*)
      - (5) High-grade SIL (with lesions suspicious for invasive CIN 2 or 3) (SIL-CIS+)
      - (6) Squamous Cell Cancer
  - (7) Other

#### C4. HPV Test Date
- **HPV Test Result**
  - (1) Positive (High Risk)
  - (3) Negative
  - HPV DNA Genotype 16 or 18 Positive (only report if PAP negative and HPV High Risk Group Positive)
  - Yes
  - No
  - No Test Performed

- **Rescreen Pap planned**
  - (less than 10 months)
  - Yes
  - No

- **Diagnostic work-up planned**
  - (must be less than 90 days)
  - Yes
  - No

Dear [Name]

You are eligible for Temporary MO HealthNet based upon your Missouri Show Me Healthy Women program screening results. Your temporary coverage will continue until a decision is made on your eligibility for on-going MO HealthNet coverage. MO HealthNet can pay for medical services only when the medical provider you use accepts MO HealthNet payments.

An application for the MO HealthNet Breast & Cervical Cancer Treatment (BCCT) program based upon your need for breast or cervical cancer treatment is enclosed. Please complete the application and mail it to the St. Joseph Customer Service Center listed on the back of the application as quickly as possible. If you fail to complete and return the enclosed application by the last day of next month, your MO HealthNet coverage will end.

You will receive a MO HealthNet card in approximately five days. Until you receive your MO HealthNet card, use this letter as proof of eligibility when you go to your doctor, pharmacy or other medical service provider. If you have questions about MO HealthNet providers or how to get MO HealthNet services, please call the MO HealthNet Participant Services Unit toll free number at 1-800-392-2161.

If you have any questions pertaining to continuing MO HealthNet eligibility, please call the Family Support Division Information Center toll free at 1-855-373-4636.

Breast & Cervical Cancer Control Project (BCCCP) Contracted Provider: [Provider Name]

C. PLEASE READ CAREFULLY AND SIGN BELOW:  

- I agree to provide Social Security Numbers of all persons applying for Medicaid as required by law. The social security number is used to determine eligibility and verify information.  
- I agree that my statements and information provided may be verified.  
- I will report any changes in circumstances within TEN DAYS of when they happen.  
- I know that it is against the law to obtain benefits to which I am not entitled. Any false claim, statement or concealment of any material fact whatsoever, in whole or in part, may subject me to criminal and/or civil prosecution.  
- I agree that medical information about me can be released if needed to administer this program.  
- I understand healthcare benefits based on a person being blind, disabled, age 65 or over, pregnant women, child or parent, is not determined by completing this application. If I want eligibility for healthcare benefits explored on the basis of one of these, I must complete a different application for these benefits.  
- Provided I am found to be eligible for Medicaid, I know the state of Missouri will pay for covered services on my behalf and agree the state may collect payments from any third party (i.e., insurance, estate, etc.) for services paid by the state.  
- I understand the decision on my eligibility will be released to the State of Missouri BCCCP Program for tracking purposes.  
- I understand that if I disagree with the decision concerning my eligibility, I may request a fair hearing within 90 days of the date of the decision.  
- I understand I am entitled to fair and equal treatment regardless of my age, sex, race, color, handicap, religion, creed, national origin or political belief.  

I agree that the signature below certifies under penalty of perjury that all declarations made in this eligibility statement are true, accurate, and complete, to the best of my knowledge.

Revised 6/2018
CERTIFICATION OF NEED FOR TREATMENT – BREAST/CERVICAL CANCER

I certify that the above patient:

☐ Was diagnosed as having ☐ breast or ☐ cervical cancer on _______; and,
   (CHECK ONE) DATE (MM/DD/YYYY)

☐ Is in need of treatment for breast or cervical cancer; OR

☐ Is currently receiving treatment for breast or cervical cancer. The estimated date when
   the current course of treatment will end is _______; and,
   DATE (MM/DD/YYYY)

Note: Eligibility Specialist must set a priority for follow-up based on estimated treatment completion date.

PHYSICIAN’S SIGNATURE

DATE

TYPE OR PRINT NAME OF PHYSICIAN

PHYSICIAN SPECIALTY

MO HEALTHNET PROVIDER NUMBER

MO HEALTHNET MANAGED CARE PROVIDER NUMBER

PLEASE SEND THIS FORM TO THE FOLLOWING AGENCY:
CERTIFICATION OF NEED FOR TREATMENT – BREAST/CERVICAL CANCER

**Purpose:** To provide a signed statement from the diagnosing/treating physician as to the date of the diagnosis and/or the length of time treatment will be for breast or cervical cancer. This form is used to tell the eligibility specialist the date of diagnosis and the time limit the treatment will last for the claimant.

**Number of Copies and Distribution:** Complete one copy of the form in ink or type and file in the case record.

**Instructions for Completion:**

The following parts of this form are to be completed by the eligibility specialist prior to sending to the treating physician:

- Patient Name
- Patient's Date of Brth
- Patient's MO HealthNet Number (DCN)
- Address of where to send the completed form

The form is then sent to be completed by the diagnosing/treating physician.

If initially applying for BCCT through a county office, the physician must certify the following:

- Date of diagnosis, and either
- Need for treatment, or
- If currently receiving treatment, the estimated date the current course of treatment will end.

Upon receiving the completed BCC-2, the eligibility specialist will set a priority based on the patient status:

- Initial application with diagnosis only-Set priority to check on treatment status in three (3) months; or
- Active case-Set priorities as needed to redetermine whether treatment is still needed for breast or cervical cancer. Priorities are based on the date the current course of treatment is expected to end.

Revised 6/2018
Forms for MOHSAIC Entry

Overview of Client Forms for MOHSAIC Entry ................................................................. 11.1

- Green Patient History Form
- Blue Screening Report
- Purple Breast Diagnosis and Treatment Form
- Yellow Cervical Diagnosis and Treatment Form

MOHSAIC Access .................................................................................................................. 11.3

Navigating MOHSAIC ......................................................................................................... 11.8

- Lesson 1: The CLIENT
- Lesson 2: Financial
Overview of Client Forms for MOHSAIC Entry

Providers entering on-line information are not required to fill out paper forms but must have documentation of the information submitted in the Missouri Health Strategic Architectures and Information Cooperative (MOHSAIC) in client files for quality assurance (QA) review.

The Patient History, Screening Report, Breast Diagnosis and Treatment, Cervical Diagnosis and Treatment, forms can be accessed online at:

All forms contain a ‘Comment’ section at the bottom of the form. This is used for additional notes on the client or procedures entered by provider or DHSS staff. Explanations should be kept brief as space is limited. Comments are not mandatory, but helpful to retain information not covered in the form.

Complete client forms must be submitted within 60 days of service.

If waiting for insurance reimbursement/approval forms, do not submit complete billing until the amount insurance paid is available. See page 9.3 for Insurance Guidelines.

Green Patient History Form

The Patient History form (green form, pages 10.8-.9) shall be completed by each client at the initial screening visit and at every annual screening thereafter. The provider shall enter the green history form into MOHSAIC when reporting the initial screening visit and update the information each year, as needed. Enter the green history form into MOHSAIC before entering any other form.

Blue Screening Report

A completed Screening Report form (blue form, pages 10.10-.11) shall be submitted at the initial, rescreen, and annual screening for all clients participating in SMHW. Document the first mammogram a client receives on the screening report.

Purple Breast Diagnosis and Treatment Form

Breast Diagnosis and Treatment form (purple form, pages 10.12-.13) shall be fully completed for all clients with abnormal breast cancer screening results that require further diagnostic procedures and/or treatment. If needed, diagnostic service(s), date of service(s), results of diagnostic service(s), final diagnosis, and treatment (date, type and place) are also required on the purple form. This information is crucial for the successful follow-up and/or treatment of all clients with abnormal screening results.
Yellow Cervical Diagnosis and Treatment Form

Cervical Diagnosis and Treatment form (yellow form, pages 10.14-.15) shall be fully completed for all clients with abnormal cervical cancer screening results that require further diagnostic procedures and/or treatment. If needed, diagnostic service(s), date of service(s), results of diagnostic service(s), final diagnosis, and treatment (date, type, and place) are also required on the purple form. This information is crucial for the successful follow-up and/or treatment of all clients with abnormal screening results.
MOHSAIC is an online data system used to collect and manage client service records for the SMHW and WISEWOMAN programs.

MOHSAIC also tracks funding allocations and expenditures and is linked to the Statewide Advantage for Missouri (SAM II) accounting system for reimbursing providers. Prior to reimbursement, SMHW and WISEWOMAN staff review all submitted forms to ensure client services meet program standards.

SMHW must submit Minimum Data Elements (MDE) reports to the Centers for Disease Control and Prevention (CDC) from the MOHSAIC reporting data forms.

How to apply for access to MOHSAIC

To apply for access to MOHSAIC, applicants will need to follow the instructions in the following pages.

AUTOMATED SECURITY ACCESS PROCESSING (A.S.A.P)

REQUESTING ACCESS TO SHOW ME HEALTHY WOMEN

STEP A. Creating A.S.A.P User profile

(This step is to be completed only once per user.)

Please read.

- If you have an ASAP profile already and know your login credentials, please skip to Step B (submitting the request)

- If you are unsure you have an ASAP profile, here are a few steps to determine that

  o If you already have an LPHA e-mail account, DHSS health applications and/or DSS prod/mainframe access, you mostly likely have an ASAP profile.

  o If you try to create an ASAP profile and you receive a red message indicating that first name and last name is already in use, please contact the ITSD Call Center at 800.347.0887 for assistance. This most likely means you have an ASAP profile and the call center can assist with profile updates, password resets, logging into ASAP, and/or submitting requests.
Creating A.S.A.P User profile

- Open Internet Browser and enter address
  http://webapp02.dhss.mo.gov/asap_web/ASAPLogin.aspx
- Click “Yes” to any security messages

<table>
<thead>
<tr>
<th>Steps</th>
<th>Screen Print</th>

<tr>
<td>6. Type your work street number; it will provide a drop-down list. Click your address</td>
<td>![Image of Address search]</td>
</tr>
<tr>
<td>7. Enter your e-mail address, telephone number, and fax number</td>
<td>![Image of User profile information]</td>
</tr>
</tbody>
</table>
8. Enter a password
   Retype your password
   Enter a challenge question. This should be a question only you know the answer to.
   Type the response or answer to the challenge question
   Retype the response or answer to the challenge questions

   **If ASAP did not prompt you to create a password, your password was automatically set to first initial of first name, first initial of last name, and last four digits of your social security number.**

9. Click the CREATE PROFILE button

10. You should see a message about the profile being successfully created. Make note of your User ID

---------------------------------------- Please continue to Step B --------------------------------------
### STEP B. Request SMHW access

- Open Internet Browser and enter address [http://webapp02.dhss.mo.gov/asap_web/ASAPLogin.aspx](http://webapp02.dhss.mo.gov/asap_web/ASAPLogin.aspx)
- Click Yes to any security messages

<table>
<thead>
<tr>
<th>Step</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.</td>
<td>Type the <strong>User ID</strong> and <strong>Password</strong> you created in Step A.</td>
</tr>
</tbody>
</table>
| 2.   | Click the **SIGN IN** button.  
   **If ASAP did not prompt you to create a password, your password was automatically set to first letter of first name, first letter of last name, and last four digits of your social security number.** |
| 3.   | Choose the ‘Completing for Self’ option. |
| 4.   | Click the **NEXT** button. |
| 5.   | Choose ‘**HEALTH APPLICATIONS**’ for Area Type. |
| 6.   | Choose ‘**SHOWMEHEALTHYWOMEN**’ for Health Area Type. |
| 7.   | Choose ‘**ADD ACCESS**’ for Request Type. |
| 8.   | Choose appropriate role from the Role drop down list.  
   *Hold the Ctrl key to select multiple role(s). As roles are selected, they will become highlighted. (Use the scroll bars to scroll up and down to view the complete list).* |
| 9.   | Choose appropriate role from the Other Role/Report Type dropdown list. **Choose SMHWPROVIDER (****For Use By SMHW Provider) ONLY.** |
| 10.  | **Optional:** Type in any comments |
| 11.  | Type in the Effective Date |
12. If not entering data for additional agencies, leave defaulted to ‘NO’.

13. To select other agencies, select ‘YES’ and pick the county and the agency from the dropdown list.

14. Click the ‘I Agree’ button.

15. Click the ‘Submit Form’ button.

A message should appear stating the request was successfully completed.

Print a copy of the completed form for agency records.

If you experience any problems or have questions while using the ASAP system, please notify the DHSS ITSD Call Center using one of the following methods:

Telephone: 573.751.6388 or 1.800.347.0887
E-mail: Support@health.mo.gov
Navigating MOHSAIC

Lesson 1: The CLIENT

This is for the Provider or MOHSAIC Customer. In this lesson, learn how to:

- Develop a new password
- Log onto the SMHW application
- Search for existing clients
- View Medicaid information
- Register new clients

MOHSAIC HELPFUL TIPS:

1. Use Internet Explorer
2. Check Compatibility setting
3. Check text size for screens with overlapping words or adjust zoom setting if needed
4. Turn off Pop-Up Blockers (MOHSAIC uses pop-up screens for data information)

Steps to Access the MOHSAIC Application and Log onto the SMHW Application

Log-in Process

Open the Internet browser and enter the Web address on the address line: https://webapp01.dhss.mo.gov/SMHW/Default.aspx or https://webapp02.dhss.mo.gov/SMHW/Default.aspx.

- If this is the first time to login, a password must be established:
  
  ♥ Use the username and assigned password provided to you by e-mail from SMHW, when approved. User name is usually the first five letters of last name and first name initial. Initial password is first and last name initials and last four digits of SSN.

  ♥ Click on ‘Change Password.’

  ♥ If you do not login to MOHSAIC for 30 days, the system will ‘lock out.’ You must call the ITSD Help Desk at 800-347-0887 to unlock and enter new password.
After a password is established, the program will ask to change your password every 30 to 60 days. This can be numbers, letters, or a combination, as desired. Password requires six (6) to eight (8) characters and one numeric value.

- Once logged in, your agency name will appear and stay constant throughout the application.
- Click the ‘Login’ button to proceed.
Entering or Viewing a Client

The main screen for the SMHW program appears. To enter or view a client:

- Click on the ‘Client’ link on the menu bar
- Choose ‘Submit New Forms/Billing’
Client Search

In ‘Submit New Forms/Billing’ screen under the ‘Client Information’ section, choose either to ‘Search and Select’ or ‘Register a New Client.’

Type the Social Security Number (SSN) with no spaces or hyphens; the Departmental Client Number (DCN) or the last and first name of the client separated by a comma (Example: Doe, Jane). **Do not click return – wait until drop down menu appears.**

If the screen returns more names than the screen will hold, use the scroll down bar to see the full screen. If there are more than 15 names on the screen use the double arrow at the bottom of the screen to proceed to the next search result screen.
Searching for Current Client

If the client name appears, then select the correct name by clicking on it. Verify the name by checking the date of birth (DOB) and DCN number, if available. The client may be in the system with multiple names. Choose the name of the client as she presents to you. If not available, select one and then correct with 'Update Client Information.'

The client information screen will display the client demographic information. If any information is missing, add the correct information in the 'Update Client Information' screen.

If the client name is not in the database, this screen will say 'No Results Found'. Press the tab key to continue.
Adding a New Client

If the client name does not appear, then hit the ‘enter’ or ‘tab’ key and the message to add a new client appears. Click the ‘OK’ button and proceed to the ‘Add Person’ screen.

The search will check the MOHSAIC and DSS databases. If the client name is not in the system, the screen appears with the ‘No results found matching search criteria.’ Click the ‘Create New Client on MOHSAIC’ link.
Adding new client, continued

The ‘Client Information’ screen is displayed. The next step is to enter the address and telephone number. Then proceed to the ‘Provider Information’ section or view Medicaid information.
Address Verification

If the system does not recognize the address, ‘Address Verification’ will pop up. If the address is correct, enter the county and click “save.” Or, change the address to a valid address and click save.

If the county and address match the database, the pop-up box will turn orange. If not, and both fields are correct, call SMHW at 866-726-9926 to request an address fix. Normally this fix will be done overnight.
Checking for Medicare/Medicaid

If the client name is not on Medicaid, the screen will be empty. The ‘View Medicaid Information’ is transferred from the DSS database. This screen is ‘read only’. The screen will display the current client at the top of the screen.

If a client name is displayed at the top of the screen and is on Medicaid, the screen will be filled in.
Checking for Medicare/Medicaid, continued

This screen shows all of the client and guardian (if applicable) information as well as the managed care information. If there is an open date but no close date, the client is on some sort of assistance.

Please remember when pulling up or entering another client under client demographics, verify the client address and other personal information is correct. We have encountered several forms that were entered for a different client, but only the client name was changed. This leads to duplicate records in the system and results in errors on the data submitted to CDC. Until a software programming change is complete, please make sure the date of birth and SSN are correct for the client form being entered.
Entering Provider and Form Type Information

On the ‘Provider Information’ section, select either ‘Regular’ or ‘Direct Billing’. If ‘Direct Billing’ is selected, a referring provider must be entered. Type in the provider’s name and select the appropriate provider. If ‘Regular Billing’ is selected, a referring provider is not necessary.

When entering information in this section is complete, proceed to the next section – ‘Form Type/Version.’

This section has two parts: a) when one of the forms is selected, the version will be filled in and b) during the first few months of the new grant year, there could be multiple versions. By default, the software automatically selects the version based on the present date. To enter a form with a different date of service, select a different version from the drop down box.
Entering Provider and Form Type Information continued

Under the gray heading, ‘Form Type/Version’, click on the correct form ‘Type’ for the submitted information:

- Breast Diagnosis and Treatment (purple)
- Cervical Diagnosis and Treatment (yellow)
- Patient History (green)
- Screening Reporting Form (blue)
- WISEWOMAN Form (pink)
Entering Provider and Form Type Information continued

Click on the correct form ‘Version’: (‘Forms for Services Provided On or After June 30, 20__’). Dates must correspond with the service dates being submitted. Click on the correct form ‘Version’ for the submitted information:

- Forms for Services Provided On or After June 30, 2018
Filling Out a Form

The name is displayed before entering the data. The form on the screen is the same as the paper form. Fill in the form and click the ‘Submit’ button at the bottom of the screen to submit/save.

To fill in the forms use the mouse, tab key, or the space bar. To use the mouse, click on the drop down arrow and then select the appropriate choice. If using the mouse for buttons, just click inside the circle. All forms work the same way.

- If content of the drop down box is known, then tab to the empty field and type the first letter. The word will appear.
- Tab to the next field.
- When tabbing and encountering a square radio button, hit the space bar to fill it in.
- Tabbing to a radio button will automatically fill in the circle when highlighted.
How to Complete ‘Reporting Only’ Process

EXAMPLE: A client who is eligible for SMHW diagnostic services is referred from an outside provider. The client has had a breast or cervical screening/diagnostic that is suspicious for cancer. Cancer diagnosis by a tissue biopsy is unconfirmed.

- Verify client eligibility
- Have client sign SMHW Client Eligibility Agreement form
- Complete green History form
- Enter data into MOHSAIC from green History form
Screening Report Form

If a SMHW provider performs additional breast/cervical procedures, enter the data and check the appropriate visit type.

If no SMHW screening services are provided by a SMHW provider, check the appropriate ‘Visit Type’ and check the ‘Referral Fee’ box if requesting the $20 referral fee. Provider reimbursement is for the referral fee only, not an office visit.

Report any other outside diagnostic procedures completed prior to enrollment on the appropriate diagnostic form as ‘Reporting Only’ and report SMHW follow-up procedures as usual.
Screening Report Form, continued

An error message may appear at the bottom of the screen after the ‘Submit’ button is clicked. If this happens, the system will require form correction before proceeding. Upon form correction, click the ‘Submit’ button again and the system will proceed to the next screen.

After the successful submission of the form the ‘Submit Form’ screen will again be displayed. If you wish to continue with this client for additional forms, return to ‘Submit New Form/Billing.’

To search for another client, type over the current name and the new search result screen will appear. Select the new SSN and the screen will refresh with the new client name and information.
Lesson 2: Financial

In Lesson 2, learn how to:

- Check provider contract information
- Check daily summary of forms submitted
- Review pay status of forms

Provider Contract Information

When clicking the ‘Provider Contract Information’ the financial information is automatically displayed. This screen tracks and displays the amount of funding given, amount billed, amount paid, and amount available. The billed amount subtracts from the amount available upon submission.

If this information does not correspond with your records, contact the SMHW billing coordinator at 866-726-9926. SHMW encourages you to monitor/track your funds through your internal system.

Daily Summary of Forms Submitted

Click on the ‘Daily Summary of Forms Submitted’ and then click on the month and day to display. Click the arrows on the month bar to change the month and then select the day to display. This will display the client’s financial information by type, date and amount.

Clicking on ‘Display Full List to Print’ will display the screen for sending to the default printer. Clicking on the ‘Print Listing’ button will generate a print job. Choose the printer on the print screen and click print. If a printout is not needed, click the ‘Close’ button to return to the main screen.
Review Pay Status of Forms

Searching for all records submitted or for a specific client is possible. There are four form status types:

- Submitted by Provider,
- Approved,
- Released to Finance for Payment, and
- Check Mailed.

Each indicates a different step in the review and payment process.

Searching for a client will display all forms submitted for that client and the pay status. Click on ‘Form Status’ to view all clients under the criteria or click multiple items to display all the selections. (Example: ‘Check Mailed’)

Entering the date range will display all forms status for the range. Click the ‘Search’ button to display results.
Review Pay Status of Forms, continued

The ‘Form Type’ and ‘Total Amount Paid’ columns show in blue. Clicking on either one brings up the form or the claim screen to review. **The claim screen form is ‘read only’**.
Review Pay Status of Forms, continued

Clicking on the ‘Amount Billed’ link will display the detailed information for that client and date. This form is ‘read only’.

Address questions and general assistance requests to the central office staff by calling SMHW/WISEWOMAN at 866-726-9926.

Direct specific questions or concerns with MOHSAIC to the ITSD Help Desk 800-347-0887 or by e-mail at support@health.mo.gov.
Client Navigation

Client Navigation

Navigation
Case Management
Terminating Patient Navigation and Case Management
Lost to Follow-up Cases
Reporting of Navigation Services

SMHW Cancer Resources

12.1

12.4
Navigation

Patient navigation is an individualized intervention and time intensive; therefore, navigation focuses on clients who otherwise would not complete the screening or diagnostic processes.

Non-clinical professionals may provide required patient navigation activities. Although patient navigation services vary based on an individual client’s needs, **at a minimum, patient navigation must include** the following activities:

- Written assessment and resolution of barriers to screening services. Examples of barriers include, but are not limited to, obtaining healthcare coverage, transportation, language, and health literacy.
- Client education and support.
- Monitor client progress in completing screenings.
- A minimum of two contacts with the client over the course of the screening and diagnostic cycle.

Resources that may assist navigating clients through obtaining healthcare coverage include Missouri Department of Social Services’ Medicaid Program (https://mydss.mo.gov/healthcare).

Case Management

Clients who have abnormal screening results receive follow-up services, up to the point of a final diagnosis. This is achieved through case management. The goal of case management is to ensure clients enrolled in the program receive timely and appropriate diagnostic and treatment services. An abnormal screening result is determined based on nationally recognized screening guidelines identified in the Provider Manual Chapters 5 and 6.

Non-clinical professionals may provide required case management activities, **and a qualified health care professional** (Registered Nurse, Nurse Practitioner, Physician Assistant or Physician in good standing to provide health care in Missouri) **must have oversight**. Although case management services vary based on an individual client’s needs, at a minimum case management must include the following activities:

- Notify the client of an abnormal result within a reasonable period of time (i.e., two (2) weeks of the date the procedure was performed).
- Assessment and resolution of barriers to diagnostics services.
- Assessment and resolution of barriers to initiation of cancer treatment, if treatment is indicated.
- Client education and support.
- Arrange diagnostic appointments on the client’s behalf.
- Clients may not be given a referral list and asked to schedule their own appointment.
- Client tracking and follow-up to monitor client progress in completing diagnostics and initiating treatment
- A minimum of two contacts with the client over the course of the screening and diagnostic cycle.
Terminating Patient Navigation and Case Management

Depending on screening and diagnostic outcomes, patient navigation or case management services are terminated when a client (1) completes screening and has a normal result; (2) completes diagnostic testing and has normal results; (3) initiates cancer treatment or refuses treatment.

When a client concludes her cancer treatment and has been released by her treating physician to return to a schedule of routine screening, and continues to meet SMHW eligibility requirements, she may return to the program and receive all its services, including patient navigation or case management.

Clients screened through SMHW clinical services who are subsequently insured may continue to receive patient navigation services. In such instances, agencies are encouraged to continue navigating clients to ensure diagnostic procedures are completed, and if cancer is diagnosed, that treatment is initiated.

Lost to Follow-up Cases

Funding received from the CDC is contingent upon SMHW meeting or exceeding several quality assurance parameters of the CDC Core Performance Indicators. Case managers must ensure the following indicators are met for all SMHW clients with abnormal screening results:

- Ninety (90) percent or more of SMHW clients with abnormal findings achieve a definitive diagnosis.
- Seventy-five (75) percent or more of SMHW clients with an abnormal finding achieve a definitive diagnosis within 60 days or less.

A SMHW client contact and tracking system must be in place to notify clients of abnormal results. Contacts with a client should be clearly documented in a client’s medical record and should include what type of follow-up is needed, the recommended timeframe for follow-up, and the clinical implications if the follow-up does not occur. Contact with the client should continue until one of the following occurs and is documented in the medical record:

- Recommended follow-up evaluation has been completed and the client has been referred for treatment (if indicated).
- Two documented attempts in contacting the client have been made. If the client has a valid address, one of these attempts must either be in writing and sent as a certified letter or sent via client portal/email with a read receipt confirmation. Use of certified letters or read receipt emails early in the course of follow-up can expedite the notification process.
- If no response, Notification of the Regional Program Coordinator.
- An informed refusal is documented in the client’s medical record.
- A client may be considered lost to follow-up when at least three contact attempts have been made and documented in the client’s medical record.
- This documentation should include the type of contact attempted, the date and the outcome.
- If the client has a valid address, at least one of the contact attempts should be a certified letter with a return receipt. A copy of the certified letter and the return receipt should be kept in the client’s medical record.
Every client has the right to elect or refuse treatment. A client is considered to have refused service when one of the following has been carefully documented in the client’s medical record:

- She has verbally refused the follow-up care recommended.
- She has refused in writing the follow-up care recommended.

Documentation of the informed refusal should be kept in the client’s medical record. Documentation should include what is being refused and that the client has been informed of the risks involved if recommended follow-up is not completed.

The elimination of cancer disparities is critically important for lessening the burden of cancer. Patient navigator programs have been shown to improve clinical outcomes.

In response to Missouri women and providers reaching out to Show Me Healthy Women (SMHW) to inquire about additional cancer navigational resources, SMHW developed a list of Cancer Navigational Resources to assist in filling a gap in the current health care system. The following pages contain the SMHW Cancer Resources to help navigate Missouri women and families to help at many points along the health care journey: insurance problems, identification of available cancer screening programs, medication assistance, financial assistance, housing assistance during travels, etc. Link to the SMHW Navigation Form: https://health.mo.gov/living/healthcondiseases/chronic/showmehealthywomen/pdf/client-patient-navigation-form.pdf

**Reporting of Navigation Services**

In order to account for CDC funding supporting patient navigation, and to more accurately capture the reach of the National Breast and Cervical Cancer Early Detection Program, reporting of patient navigation services will be required in the future.

Beginning in 2019, CDC reporting will include women receiving “navigation only” services in its total number of women served. The SMHW program will provide additional information in the future related to navigation.

Patient navigation must be delivered consistent with CDC policy with the woman meeting age and income requirements. Clinical services can be paid by a source other than SMHW, but the patient must complete screening/diagnostics. If criteria met, the woman can be enrolled in the SMHW program with an abbreviated record.

To qualify for enrollment into a SMHW abbreviated record, six (6) requirements must be met.

1. Assessment of individual patient barriers to cancer screening/diagnostics/initiation of treatment
2. Provision of education and support for the patient
3. Resolution of barriers to obtaining cancer screening/diagnostics/initiation of treatment
4. Tracking of the patient to assure completed screening/diagnostics/initiation of treatment
5. A minimum of two (2), preferably more, patient contacts
6. Review in aggregate, data to evaluate primary outcomes of patient navigation—which are cancer screening and/or diagnostic testing, final diagnosis and treatment initiation if needed

Most Commonly Asked Questions

Q. **We have several patients who have had an abnormal clinical breast exam reported as “discrete palpable mass, suspicious for cancer”, followed by a mammogram with a result of “negative”. The providers deemed this adequate follow-up and no further evaluation was scheduled or completed. Is this acceptable practice even though the NBCCEDP guidelines recommend further testing?**

A. A negative mammogram does not rule out cancer for a patient with suspicious breast mass found on physical exam. Additional evaluations should be done such as an ultrasound or a needle biopsy to determine if the mass is malignant or not. When providers identify a suspicious mass, they are obligated to follow-up with a complete evaluation and obtain a definitive diagnosis.

Q. **Since breast ultrasound CPT codes 76641 and 76642 are both unilateral, should we expect to see two CPT codes billed if a bilateral ultrasound exam is needed?**

A. Yes. If complete examination is performed on both breasts, you should receive two ultrasound codes of 76641. If a limited exam is performed bilaterally, you should receive two 76642 codes.

Q. **Does CDC ever allow payment for services that exceed Medicare reimbursement rates?**

A. No. As stated in the Breast and Cervical Cancer Mortality Prevention Act of 1990 that authorized the NBCCEDP, the program cannot provide reimbursements that are higher than Medicare reimbursement rates.

Q. **Is it appropriate to reimburse for an ultrasound prior to 6 months for BI-RADS 3 due to fat necrosis?**

A. Yes, they should reimburse based on the findings; an earlier ultrasound is appropriate.

Q. **Would SMHW pay for HPV testing if the client has paid for the Pap and the results were ASC-US?**

A. SMHW can cover the diagnostic work-up.

Q. **Is it appropriate to screen women with “Dense Breast” with an ultrasound alone without clinical risk assessment? And, to screen with ultrasound for dense breast tissue for women who are deemed high risk by a recognized clinical risk assessment tool?**

A. Currently, there are no guidelines that recommend screening breast ultrasound. Use of ultrasound as a tool for breast cancer screening is still in an investigational phase. Inefficient use of any tool may provide the patient with false degree of relief or concern. Provider held accountable for any inappropriate use of BI-RADS results or testing.
Q. How does the CDC address transgender-identified individuals in the health care setting?

A. Following the Breast and Cervical Cancer Mortality Prevention Act that authorized the NBCCEDP and specifically states “women”. The focus of the NBCCEDP is women who are at risk for breast and cervical cancer. The federal funds may only be used to cover screening for female-to-male transgender individuals who have not yet undergone complete hysterectomy or bilateral mastectomy because these individuals are genetically female. We do not use federal funds for male-to-female individuals who are genetically males.

Q. What if a physician who does not participate in the SMHW program refers a woman with a BI-RADS IV or V ultrasound to a SMHW provider? Can that woman be enrolled into SMHW and eligible for Breast and Cervical Cancer Treatment (BCCT) services?

A. If a client has a BI-RADS IV or V ultrasound prior to enrolling into SMHW, the non-participating provider should refer the client to a SMHW participating provider. The client must meet SMHW eligibility requirements and complete enrollment forms. Then the SMHW provider should submit the woman’s screening and diagnostic test results completed by the non-participating provider to SMHW by completing the MOHSAIC forms and submitting them as “reporting only”. The SMHW provider may then proceed with performing additional diagnostic services such as a biopsy and submit results to SMHW for reimbursement. If the biopsy is positive for cancer, the client can be qualified for BCCT services. (SMHW must have reimbursed at least one screening or diagnostic service in order for a client to be eligible to receive BCCT services. Please note that if the only SMHW reimbursement is for a SMHW administrative referral fee for reporting only screening and diagnostic services, the client will not qualify for BCCT services).

Q. What happens when Show Me Healthy Women (SMHW) has covered the screening and/or diagnostic services, but the client needs treatment?

A. Most women who receive SMHW-paid screening and/or diagnostic services and are in need of treatment for breast and/or cervical cancer will be eligible for a special MO HealthNet (Medicaid) BCCT program.

Q. How much of the reimbursement for services from SMHW must be paid to the subcontractor?

A. SMHW does not require service providers to pay any specific rate to the subcontractors. The service providers can negotiate a reimbursement rate with the subcontractor, as they feel appropriate. SMHW will only pay the established reimbursement rate to the service provider.

Q. Can our facility funding amount be increased?

A. Yes. SMHW can increase the funding amount based on the availability of funds and if 80% of the facilities existing funds have been expended. Call SMHW at 573-522-2845. Or, e-mail the increase funding request and the amount of increase needed to the program manager. The SMHW program must be in receipt of the letter or e-mail 14 business days prior to the end of the contract period for consideration for a funding increase.
Q. **If a woman under 30 contacts us reporting that she feels a lump in her breast, can we enroll her in SMHW program?**

A. No. On June 30, 2003, SMHW raised the age eligibility to women 35 years or older for all services. If a provider needs assistance locating services for women under 30 years of age, please contact the Regional Program Coordinator assigned to your area.

Q. **What do I do when the client does not keep her mammogram appointment and her breast screening is now over 90 days?**

A. Continue to schedule the mammogram appointment and repeat the clinical breast examination (CBE), if recommended by the examiner. Client may have her screening mammogram any time before the ten (10) months have elapsed for her next annual screening. If the CBE was negative, she does not have to have a repeat CBE within the ten (10)-month period.

Q. **Is a client with no Social Security number and no proof of income and residency eligible for SMHW?**

A. Yes, if the client signs the client eligibility agreement form in Section 12. The English version is on page 12.8 and the Spanish version is on page 12.9.

Q. **How do I report when a SMHW client has surgery after I have sent in the reporting of her diagnostic services?**

A. Call the SMHW central office at the toll-free number 866-726-9926 or 573-522-2845, and provide the additional information. Or, contact your local Regional Program Coordinator (RPC).

Q. **Who do I call if I have questions?**

A. First contact your assigned RPC. If the RPC is not available, contact SMHW central office at the toll-free number 866-726-9926 or 573-522-2845, or fax inquires to the SMHW office at 573-522-2898.

Q. **What if I do not have all the paperwork together while I am waiting for lab results?**

A. Hold paperwork until results are available. If it is close to the 60-day cutoff, contact the lab and express your need to have the results in order to be paid. Contact your RPC and document the contacts in the comments section.

Q. **What should I submit for reimbursement?**

A. The clients' reporting form(s).

Q. **Who establishes subcontracts?**

A. The service providers may establish subcontracts with different facilities. SMHW does not play any role in establishing or assisting to establish subcontracts.

Q. **What happens if we submit our forms after 60 days?**

A. Payment may be denied. If there are unusual circumstances, contact the billing coordinator at SMHW. Providers must file all forms in a timely manner.
Q. What is the MO HealthNet Breast and Cervical Treatment (BCCT) program?

A. In October of 2000, federal legislation was signed allowing funded programs in the National Breast and Cervical Cancer Early Detection Program (NBCCEDP) to participate in the new BCCT program. In July 2001, Governor Bob Holden signed legislation authorizing matching funds for Missouri to participate in the Medicaid Program, effective August 28, 2001.

Q. Who is eligible for BCCT?

A. Women screened and/or diagnosed with breast and/or cervical cancer, or certain precancerous conditions, through SMHW who are under 65 years of age and have a Social Security number or state identification number. SMHW works closely with Department of Social Services (DSS) FSD staff to enroll a client into the BCCT program.

Q. How is a SMHW client enrolled in BCCT?

A. SMHW providers establish presumptive eligibility, which entitles a client to temporary full MO HealthNet benefits through BCCT by completing the BCCT Temporary MO HealthNet Authorization letter. The client must also complete the Missouri BCCT MO HealthNet Application. Submit application to the local DSS FSD office after cancer is diagnosed from a tissue biopsy. Refer to Section 7: MO HealthNet for guidance.

Q. A client received an annual SMHW screening that was normal. She contacts her SMHW provider because she has found a lump in her breast. What will SMHW cover?

A. SMHW will not cover the cost of the office visit, but will pay for diagnostic testing if the CBE is abnormal. If the clinician does not find a lump and chooses to complete diagnostic testing as a direct result of the breast self-examination, SMHW will cover the cost of diagnostics.
Acronyms/Abbreviations

5 A’s – assess, advise, agree, assist, and arrange

A1C test – glycosylated hemoglobin test

ACS – American Cancer Society

ADA – American Diabetes Association

AGC – atypical glandular cells

AGUS – atypical glandular cells of undetermined significance

AHA – American Heart Association

AIS – adenocarcinoma in situ

ASCCP – American Society for Colposcopy and Cervical Pathology

ASC-H – atypical squamous cells, cannot exclude high-grade squamous intraepithelial lesion

ASCUS – atypical squamous cells of undetermined significance

BCCCP – Breast and Cervical Cancer Control Project is the former name of SMHW

BCCT – Breast and Cervical Cancer Treatment (through MO HealthNet)

BMI – body mass index

BSE – breast self-examination

CBE – clinical breast examination

CDC – Centers for Disease Control and Prevention

CHD – coronary heart disease

CIN – cervical intraepithelial neoplasia

CIS – Cancer Information Service; carcinoma in situ

CLIA – Clinical Laboratory Improvement Amendments of 1988

CPT – current procedural technology (code)

CVD – cardiovascular disease

CVH – cardiovascular health

DBP – diastolic blood pressure
**DCN** – departmental client number

**DHSS** – Missouri Department of Health and Senior Services

**DNA** – deoxyribonucleic acid

**DOB** – date of birth

**DSS** – Missouri Department of Social Services

**ECC** – endocervical curettage

**EOB** – explanation of benefits

**EFT** – electronic funds transfer

**FDA** – Food and Drug Administration

**FLP** – fasting lipid panel

**FNA** – fine needle aspiration

**FPL** – federal poverty level

**FSD** – Family Support Division

**HBP** – high blood pressure

**HDL** – high density lipoproteins

**HDL-C** – high-density lipoprotein cholesterol

**HIPAA** – Health Insurance Portability and Accountability Act

**HPV** – human papillomavirus

**HSIL** – high-grade squamous intraepithelial lesion

**HTN** – hypertension

**IFG** – impaired fasting glucose

**ITSD** – Information Technology Services Division

**Kg** – kilograms

**LDL-C** – low-density lipoprotein cholesterol

**LEEP** – loop electrosurgical excision procedure

**LSP** – lifestyle program

**LSIL** – low-grade squamous intraepithelial lesion
MDEs – minimum data elements
MI – motivational interviewing
MOAP – Missouri Arthritis & Osteoporosis Program
MOHSAIC – Missouri Health Strategic Architectures and Information Cooperative
MQSA – Mammography Quality Standards Act of 1992
NBCCEDP – National Breast and Cervical Cancer Early Detection Program
NCCDPHP – National Center for Chronic Disease Prevention and Health Promotion
NCEP – National Cholesterol Education Program
NCI – National Cancer Institute
NHLBI – National Heart, Lung, and Blood Institute
NIH – National Institutes of Health
NMR – nuclear magnetic resonance
OATS – Older Adults Transportation Service
Pap Stain – papanicolaou stain
Pap Test – papanicolaou smear
PHNPAT – Public Health Nurses Physical Assessment Training
RN – Registered Nurse
RPC – Regional Program Coordinator
SBP – systolic blood pressure
SMHW – Show Me Healthy Women – The current name of Missouri Breast and Cervical Cancer Control Project (BCCCP).
SMTS – Southeast Missouri Transportation Service
SSN – social security number
TC – total cholesterol
TLC – therapeutic lifestyle changes
WIC – Woman, Infants and Children Program
WISEWOMAN – Well-Integrated Screening and Evaluation for Women Across the Nation - A heart health risk assessment and education program for women receiving a Show Me Healthy Women cervical and breast cancer screening service.
WNL – within normal limits
**Glossary of Terms**

**adenocarcinoma** - A cancer that develops from the glandular epithelium.

**adenoma** - A benign growth starting in the glandular tissue. (Also, refer to fibroadenoma.)

**advanced cancer** - A stage of cancer in which the disease has spread from the primary site to other parts of the body, directly or by traveling through the network of lymph glands (lymphatic) or in the bloodstream. Locally advanced means the cancer has spread only to the surrounding areas.

**alert value** - A screening result that is abnormal and requires tracking by the provider and/or Show Me Healthy Women Regional Program Coordinators to assure appropriate follow-up care is documented.

**American College of Radiology Accreditation** - A voluntary mammography accreditation program that has become one of the standards for quality assurance and assesses the following major areas:

- Personnel qualifications and experience
- Equipment specification and technical procedures
- Quality assurance practices
- Evaluations of mammograms from the applicant’s practice and through the use of phantom images

**anesthesia** - A state characterized by loss of sensation, caused by a drug or gas. General anesthesia causes loss of consciousness. Local anesthesia is numbness in only a specified area.

**antibiotics** - Chemical substances, produced by living organisms or synthesized (created) in laboratories, for the purpose of killing other organisms that cause disease. Some cancer therapies interfere with the body’s ability to fight off infection, so antibiotics may be needed along with the cancer treatment to protect against or kill infectious diseases. The word means “destructive of life.”

**areola** - The dark area of flesh that encircles the nipple of the breast.

**aspirate** - Removal of fluid or cells from a breast lump.

**aspiration biopsy** - A procedure in which the specimen for biopsy is removed by aspirating it through an appropriate needle that pierces the skin and penetrates into the underlying tissue to be examined. (Also, refer to fine needle aspiration.)

**asymptomatic** - Without noticeable signs or symptoms of disease. Many cancers can develop and grow without producing symptoms, especially in the early stages. Detection tests, such as mammography, try to discover developing cancers at the asymptomatic stage, when the chances for cure are usually high.

**atypia (also atypical)** - The condition of being irregular or not conforming to type not usual, abnormal. Cancer is the result of atypical cell division.

**axilla** - Also known as the armpit.
Breast and Cervical Cancer Control Project (BCCCP) – See Show Me Healthy Women.

**benign** - Not malignant, not recurrent, favorable for recovery, not cancer. The main types of benign breast problems are fibroadenoma, fibrocystic changes, and cysts.

**Bethesda System** - A comprehensive system for the reporting and classification of Pap smear specimens, developed in December 1988. The Clinical Laboratory Improvement Act (CLIA) regulations mandate the use of the Bethesda System for laboratory reporting and proficiency testing.

**bilateral** - Affecting both sides of the body, for example bilateral breast cancer is cancer occurring in both breasts at the same time (synchronous) or at different times (metachronous).

**biopsy** - The removal and examination (by a pathologist) of tissue samples, cells or fluids from a living body. An examination of the appearance of the tissue under a microscope is done to find out if cancer or other abnormal cells are present. Complete the biopsy with a needle or by surgery.

**breast augmentation** - Surgery to increase the size of the breast (also known as breast implants).

**breast cancer** - Cancer that begins in the breast. The main types of breast cancer are ductal carcinoma in situ, infiltrating ductal carcinoma, lobular carcinoma in situ, medullary carcinoma, and Paget’s disease of the nipple.

**Breast Imaging Reporting and Data System (BIRADS)** - A uniform reporting system for reporting mammography results.

**breast self-examination (BSE)** - A technique of checking your own breasts for lumps or suspicious changes.

**breast specialist** - A term describing health professionals who have dedicated interest in breast health.

**calcifications** – Also called microcalcifications. Tiny calcium deposits within the breast, singularly or in clusters, often found by mammography, which indicate a change within the breast.

**cancer** - A general term for more than 100 diseases in which abnormal or malignant cells develop. Some exist quietly within the body for years without causing a problem. Others are aggressive, rapidly forming tumors that may invade and destroy surrounding tissue. If cancer spreads, it usually travels through the lymph system or bloodstream to distant areas of the body.

**cancer cell** - A cell that divides and reproduces abnormally and can spread throughout the body.

**capsule formation** - Scar tissue that may form around a breast implant as the body tries to “wall off” or encapsulate the foreign object; a contracture.

**carcinoma** - A malignant tumor that begins in the lining (epithelial) cells of organs. Epithelial cells are those that cover the surfaces of tissue. It can occur in any part of the body. Eighty percent or more of cancers, and all breast cancers, receive carcinoma classification.

**carcinoma in situ (CIS)** - An early stage of cancer in which the cancer is still only in the structures of the organ where it developed and the disease has not invaded other parts of the organ or spread; cancer in situ or pre-invasive. Most cancers with this classification are highly curable.
case manager - The member of the medical care team who acts as a liaison. This person coordinates all of the services needed by the client throughout diagnosis, treatment and recovery.

clinical breast examination (CBE) - A physical examination of the breasts performed by a physician, registered or advanced practice nurse or physician’s assistant.

cell - The basic unit of which all living things are made. Cells carry out basic life processes. Organs are clusters of cells that have developed specialized tasks. Cells replace themselves by splitting and forming new cells; cancer disrupts this process.

cervical intraepithelial neoplasia (CIN) - A cellular change to the mouth of the cervix that may include severe dysplasia and CIS. CIN 3 is the most severe of the three-category classification system.

cervical precancerous lesions - Cervical tissue biopsy results of CIN (CIN 1, 2, or 3) and AIS lesions are considered precancerous lesions. Many CIN 1 and 2 lesions are treated with simple excisional procedures. However, CIN 3 or AIS may require a hysterectomy.

cervix - The narrow outer end of the uterus that opens into the vagina.

chemotherapy - A drug treatment program that destroys cancer cells. This method often accompanies surgery or radiation, or to treat recurring cancer.

clinical - Description of information that pertains to or is founded on actual observation and treatment of patients, as distinguished from theoretical or basic sciences.

clinical trials - Research studies to test new drugs or procedures, or to compare to current standard treatments with others that may be better or equal.

coalition building - The process of organizing individuals, groups or organizations for the purpose of furthering a common goal or ideal.

colposcope - A magnifying, lighted optical instrument, which allows for the direct observation and study of vaginal and cervical cells.

colposcopy - Diagnostic procedure performed with a colposcope. Cervical biopsies are usually conducted by colposcopic examination.

Comprehensive Cancer Control Program (CCCP) - A statewide strategic plan, which includes the interaction of a cancer surveillance system, public and professional education, and a screening and follow-up system.

cone biopsy - The removal of a cone-shaped piece of tissue from the cervix. This is a more definitive procedure than a cervical biopsy. It is used when abnormal cells extend up into the cervical opening (Os) or through the tissue. This process also used to treat and cure carcinoma in situ and dysplasia.

conization - The process of removing a cone of tissue, as in partial excision of the cervix uteri. To better preserve the histologic elements cold conization is performed with a cold knife.

consensus statements - Recommendations for the management of a problem, in this case a disease or health problem, formulated by a group of experts based on scientific and clinical information.

cryosurgery - The destruction of tissue by exposure to extreme cold in order to produce well-demarcated areas of cell injury and destruction. Used to treat malignant tumors, control pain, reduce lesions in the brain and control bleeding.
cyst - A fluid-filled mass that is usually benign. The fluid can be removed for analysis.

cytology - Comes from “cyte” which means cell, the study or examination of cells, their origin, structure, function and pathology. The study determines whether cells are cancerous or benign.

detection - The finding of a case of a disease. Early detection means that the disease is found at an early stage, before it has grown large or spread to other sites. Mammography and Pap tests are the principal ways to detect breast and cervical cancer early.

diagnosis - Identifying a disease by its signs, symptoms and laboratory findings. The earlier a cancer is diagnosed, the better chance for cure.

diagnostic breast services - Refers to specialist consultation; additional mammography views; ultrasound; fine needle aspiration; needle, incisional and excisional biopsies relating to breast cancer.

diagnostic cervical services - Refers to specialist consultation, colposcopy with/without biopsy and diagnostic LEEP relating to cervical cancer.

diagnostic mammogram - Defined by the American College of Radiology as “mammography performed on women who, by virtue of symptoms or physical findings, are considered to have a substantial likelihood of having breast disease.”

dimpling - A pucker or indentation of the skin on the breast. It may be a sign of cancer.

dissemination - In health education, the dispersal of information, products or services to a population.

duct - A pathway. In the breast, a duct is a passage through which milk passes from the lobule (which makes the milk) to the nipple.

ductal carcinoma in situ - Cancer cells that started in the milk ducts and has not penetrated the duct walls into the surrounding tissue. Surgery is the treatment option for this highly curable form of breast cancer.

ductal papilloma - Small, a finger-like noncancerous growth in the breast ducts that causes bloody discharge. Most often found in women 45-50 years of age. When they exist, breast cancer risk is slightly higher.

dysplasia - An abnormality in size, appearance and organization of adult cells requires a biopsy for diagnosis.

docervix - The outside, visible portion of the cervix.

endocervical curettage (ECC) - The surgical scraping of the lining of the uterine cervix.

endocervix - The mucous membrane lining the canal of the cervix, sometimes referred to as the endocervical canal.

endocrine glands - Glands that release hormones into the bloodstream. The ovaries are examples of endocrine glands.
endocrine therapy - Manipulation of hormones for therapeutic purposes.

endometrium - The membrane lining of the uterus.

epidemiology - The collection and statistical analysis of data relating to the factors that have an impact on health and how they relate to one another. In the study of people who get cancer, the analysis of specific types of cancer and the factors that play a part in the development of that cancer.

estrogen - A female sex hormone produced primarily in the ovaries, possibly in the adrenal cortex. In men it is produced in the testes (in much smaller amounts than in women). In women, levels of estrogen fluctuate on nature’s schedule, influencing the development of secondary sex characteristics, including breast size, regulation of the monthly cycle of menstruation and preparing the body for fertilization and reproduction. In breast cancer, estrogen may feed the growth of cancer cells.

etiology - The study of the cause of disease. In cancer there are many etiologies, although research shows that genetics is a major factor in many cancers.

false negative - Negative results of a screening test, when in reality the result should be positive.

false positive - Positive results of a screening test that mistakenly identifies a disease when one is not present.

federal poverty level (FPL) - A measure of income determined annually by the U.S. Census Bureau based on the last calendar year’s increase in prices as measured by the Consumer Price Index. It is used to determine a person’s eligibility for certain programs. A woman is eligible for SMHW if her income is at or below 200 percent of the FPL.

fibroadenoma - A type of benign breast tumor composed of fibrous tissue and glandular tissue. On clinical examination or breast self-examination, it usually feels like a firm, round, smooth lump. These usually occur in young women.

fibrocystic changes - A term that describes certain benign changes in the breast. Symptoms are breast swelling or pain. Signs are nodules, lumpiness and nipple discharge. Not cancerous.

fibrocystic condition - The presence of single or multiple benign cysts in the breasts.

fibrosis - Formation of fibrous (scar) tissue, which can occur anywhere in the body.

five-year survival - Survival of cancer for five years after treatment of the disease. This is a milestone for most cancer patients, indicating treatment was successful.

genes - Segments or units of DNA that contain information on hereditary characteristics such as hair or eye color and height. Women who have the BRCA1 gene have inherited a tendency to develop breast cancer.

genetic - Something related to the genes.

glands - Organs that produce and release chemicals used locally or elsewhere in the body. This term is often used incorrectly to mean lymph nodes.

grade - The classification of the severity of a disease.
gynecological consultation - A referral to a gynecologist for an abnormal screening examination follow-up.

health education - Any combination of learning experiences designed to facilitate voluntary adaptations of behavior conducive to health.

health promotion - Activities directed toward developing the resources of clients that maintain or enhance well-being.

hereditary cancer syndrome - One or several types of conditions associated with cancers that occur within multiple family members, because they have an inherited, mutated gene.

high-grade squamous intraepithelial lesion (HSIL) - The Bethesda System classification for a Pap smear result that includes cellular changes of moderate to severe dysplasia (CIN 2 and 3/CIS).

high risk - A higher risk of developing cancer compared with the general population. Some factors that place a person at a higher risk are a family medical history, lifestyle choices and the exposure to environmental influences.

hormone - Chemical substance released into the body by the endocrine glands, such as thyroid or ovaries. The substance travels through the bloodstream and sets in motion various body functions. For example, prolactin, produced by the pituitary gland, begins and sustains the production of milk in the breast after childbirth.

human papillomavirus (HPV) - A sexually transmitted virus implicated in the pathogenesis of cervical cancer and its precursor lesions. HPV infections of the genital tract are thought to be the most common sexually transmitted viral disease. The manifestations of HPV are variable, ranging from occult infection to overt disease in which there is clinical and pathological evidence of HPV infection. Of the approximately 70 types of HPV, 20 types are detectable in the female genital tract and 15 types have been found in the majority of invasive carcinomas.

hyperplasia - An abnormal increase in the number of cells in a specific area, such as the lining of the breast ducts. This overgrowth may be due to hormonal stimulation, injury or continuous irritation. It is not cancerous by itself, but when the proliferating cells are atypical, the risk of cancer developing is greater.

hysterectomy - The surgical removal of the uterus. Types include a total hysterectomy, in which the uterus and cervix are removed, and radical hysterectomy, in which ovaries, oviducts, lymph nodes and lymph channels are removed with the uterus and cervix.

imaging - Any method used to produce an image of internal body structures. Some methods used to detect cancer are x-rays, magnetic resonance imaging (MRI), bone scans, scintigraphy, computerized axial tomography (CAT scans), and ultrasonography.

immune system - The complex system by which the body resists invasion by a foreign substance such as a bacterial infection or a transplanted organ.

incidence - The number of new cases of a disease or condition diagnosed during a specified time.

incisional biopsy - The surgical removal of a portion of an abnormal area of tissue for microscopic examination.

indicated but not performed (refused) - An examination result that applies to the field used to record examination results. This entry is marked when a client does not want the recommended examination or when a client has periodically missed appointments.
infiltrating ductal carcinoma - A cancer that starts in the milk passages of the breasts (ducts) and then breaks through the duct wall, where it invades the fatty tissue of the breast. When it reaches this point, it has the potential to spread or metastasize elsewhere in the breast, as well as to other parts of the body through the bloodstream and lymphatic system. Infiltrating ductal carcinoma is the most common type of breast cancer, accounting for about 80 percent of breast malignancies.

inflammation - A local response to cellular injury to the immune system that is marked by capillary dilatation, redness, heat, pain, swelling, or infiltration by cells.

inflammatory breast cancer - A rare cancer, where the breast looks as if it is inflamed because of its red appearance and warmth. The skin shows signs of ridges and wheals or may have a pitted appearance, and the cancer tends to spread quickly.

infraclavicular nodes - Lymph nodes located beneath the clavicle (collarbone). They are part of the network of axillary (armpit) nodes.

internal mammary nodes - Lymph nodes beneath the breast bone on each side. The lymph glands of the breast drain into the internal mammary nodes.

intervention - A strategy incorporating methods and techniques that interact with a patient or population.

intraductal papilloma - A benign tumor that starts in the ductal system of the breast. It can cause discharge from the nipple. A woman with papillomatosis (multiple intraductal papillomas) is at increased risk of developing breast cancer.

invasive cancer - A cancer that has invaded surrounding tissue and spread to distant parts of the body.

invasive cervical carcinoma - Infiltration of cancer cells into the tissue beyond the epithelium of the cervix. This term indicates that a malignant growth extends deeper than 3 mm into the stroma.

lobes, lobules, acini - Milk-producing tissues of the breast. Each of the breast’s 15 to 20 lobes branches into smaller lobules, and each lobule ends in scores of tiny acini. Milk originates in the acini and is carried by ducts to the nipple.

lobular carcinoma (infiltrating or invasive) - A type of breast cancer that starts within the lobules. It may be multicentric (occurring in multiple lobules). Compared with other types of breast cancer, this type has a higher chance of occurring in the opposite breast as well. It can often be difficult to diagnose, even with careful physical examination or mammography.

lobular carcinoma in situ - A very early type of breast cancer developing within the milk-producing glands (lobules) of the breast. It does not penetrate through the wall of the lobules. Researchers think that lobular carcinoma in situ does not eventually become an invasive lobular cancer. They believe, instead, that it places women at an increased risk of developing an invasive breast cancer later in life. This condition makes it important for women with lobular carcinoma in situ to have a physical examination three to four times per year and an annual mammogram.

local excision - The removal of a lesion or tumor confined to the breast.

localized breast cancer - A cancer that arose in the breast and is confined to the breast.
loop electrosurgical excision procedure (LEEP) - A surgical procedure used on the cervix by which an electrical current generating a radio frequency is passed through a wire loop, which is then drawn around the cervical opening (Os) to excise the tissue. The procedure can usually be performed in an outpatient setting with the use of local anesthesia. Depending on the size of the loop and of the lesion, either the transformation zone or a cone-like specimen can be obtained. LEEP and large loop excision of transformation zone (LLETZ) are terms used for this procedure.

low-grade squamous intraepithelial neoplasia (LSIL) - The Bethesda System classification for a Pap smear result, which includes cellular changes of HPV, mild dysplasia (CIN 1) or koilocytotic atypia.

lump - Any kind of mass that can be felt in the breast or elsewhere in the body.

lumpectomy - Removal of the breast lump plus a margin of normal tissue around it. If tissue is found to be malignant, radiation therapy or mastectomy often follows. Also called limited breast surgery.

lymph - Clear fluid that passes within the lymphatic system and contains cells known as lymphocytes. These cells fight infections. They have a lesser role in fighting cancer.

lymph nodes (lymph glands) - Small masses of bean-shaped tissue located along the lymphatic vessels that remove waste fluids from lymph and acts as filters of impurities in the body.

malignant tumor - A mass of cancer cells that may invade surrounding tissues or spread to distant areas of the body.

mammogram - An x-ray of the breast.

mammography facility - An entity that has met SMHW requirements to become an approved provider or provides mammography services for other SMHW-approved providers.

Mammography Quality Standards Act of 1992 (MQSA) - The national accreditation of mammography units through the FDA.

mastectomy - Surgical removal of the breast(s): (1) Modified radical mastectomy: removal of the breast, skin, nipple, areola and most of the auxiliary lymph nodes on the same side, leaving the chest muscle intact. (2) Halstead radical mastectomy: removal of the breast, skin, both pectoral muscles, and all auxiliary lymph nodes on the same side. (3) Extended radical mastectomy: removal of the breast, skin, pectoral muscles (major and minor), and all auxiliary and internal mammary lymph nodes on the same side. (4) Partial mastectomy: removal of less than the whole breast, taking only part of the breast in which the cancer occurs and a margin of healthy breast tissue surrounding the tissue. (5) Prophylactic mastectomy: removal of the interior of one or both breasts. This procedure is done before any evidence can be found, for the purpose of preventing cancer. It is recommended for a woman at a very high risk of breast cancer; its efficacy is not proven. (6) Quadrantectomy: partial mastectomy in which the quarter of the breast that contains tumor is removed. (7) Segmental mastectomy: partial mastectomy. (8) Total mastectomy: removal of only the breast.

medical professional/clinician - Physician, physician’s assistant, certified nurse practitioner, certified nurse midwife, or registered nurse.

medullary carcinoma - A specific histology of infiltrating breast cancer in which the tumor appears well defined, with obvious boundaries between tumor tissue and normal tissue. Medullary carcinoma accounts for five percent of breast cancer.

menarche - The first menstrual period. Early menarche (before age 12) is a risk factor for breast cancer, possibly because the earlier a woman’s periods begin the longer the exposure to estrogen.
menopause - The time in a woman's life when monthly cycles of menstruation cease forever and the level of hormones produced by the ovaries decreases. Menopause usually occurs in the late 40s or early 50s, but surgical removal of the ovaries (oophorectomy) or the ovaries and uterus (total hysterectomy) can also induce it, as can some chemotherapy that destroys ovarian function. Among such chemotherapies are some that are used for breast cancer.

metaplasia - Abnormal replacement of cells of one type by cells of another type. It does not represent a malignant or premalignant condition.

metastasis - The spread of cancer cells to distant areas of the body by way of direct extension, lymph system, or bloodstream.

minimum data elements (MDE) - Clinical data items submitted to CDC two times a year.

needle aspiration - Removal of fluid from a cyst or cells from a tumor. In this procedure, a needle and syringe (like those used to give injections) are used to pierce the skin, reach the cyst or tumor, and with suction, draw up (aspirate) specimens for biopsy analysis. If the needle is thin, the procedure is called fine needle aspiration (FNA).

needle localization - A procedure used to do a breast needle biopsy, when the lump is difficult to locate or in areas that look suspicious in the x-ray but do not have a distinct lump. After an injection of local anesthesia to numb the area, a thin needle is inserted into the breast. X-rays are taken and used to guide the wire to the area to be biopsied. A tiny hook on the end of the wire holds it in place. Then a hypodermic needle (like the type used to give injections) is inserted, using the path of the wire as a guide, and the biopsy is completed. (Also see needle aspiration.)

neoplasia - The pathologic process that results in the formation and growth of a neoplasm.

neoplasm - Any abnormal growth; neoplasms may be benign or malignant. Cancer is a malignant neoplasm.

nipple - The tip of the breast; the pigmented projection in the middle of the areola. The nipple contains the opening of milk ducts from the breast.

nipple discharge - Any fluid coming from the nipple. It may be clear, milky, bloody, tan, gray or green.

nodal status - A count of the number of lymph nodes in the armpit (axillary nodes) to which cancer has spread (node-positive) or has not spread (node-negative). The number and site of positive axillary nodes help forecast the risk of breast cancer recurrence.

node - A lymph gland.

nodule - A small, solid lump that can be located by touch.

Nolvadex - Trade name for tamoxifen, an antiestrogen drug commonly used in breast cancer therapy. (Also see tamoxifen.)

noncancerous - Benign; not malignant; no cancer is present.

normal hormonal changes - Changes in breast and other tissues that are caused by fluctuations in levels of female hormones during the menstrual cycle.
not needed (omitted) - A category used to record examination results when it is not appropriate to perform a screening test on that particular woman. This choice might be marked under mammography results, if a woman had a mastectomy of one breast. Or, under the Pap smear results if she had a recent Pap smear at her provider’s office, is pregnant, or has had a hysterectomy.

nucleus - The powerhouse at the center of a cell where the cell’s important activities are carried out. DNA resides and replicates in the nucleus.

nurse practitioner - A nurse who is licensed as a registered nurse (RN) and has taken additional highly specialized training and is nationally certified and recognized by the Missouri State Board of Nursing as an Advanced Practice Registered Nurse. Nurse practitioners must have written collaborative agreements with a physician. They take on additional duties in diagnosis and treatment of patients, and in many states they may write prescriptions. (Also, refer to oncology nurse specialist.)

oncologist - A physician who is specially trained in the diagnosis and treatment of cancer. Medical oncologists specialize in the use of drugs and chemotherapy to treat cancer. Radiologic oncologists specialize in the use of x-rays (radiation) to kill tumors. Surgical oncologists specialize in the use of surgery to treat cancer. Medical and radiation oncologists often cooperate in giving complicated treatments.

oncology nurse specialist - A nurse who has taken highly specialized training in the field of cancer after being licensed as a RN (registered nurse). Oncology nurse specialists may mix and administer treatments, monitor patients, prescribe and provide aftercare (only if they are recognized by the Missouri State Board of Nursing as an Advanced Practice Registered Nurse), and teach and counsel patients and their families. Many oncology nurse specialists are also certified nurse practitioners. (Also see case manager, nurse practitioner.)

oncology social worker - A person who has a master’s degree in social work and has specialized in the field of cancer. This person provides counseling and assistance to people with cancer and their families, especially in dealing with the crises that can result from cancer but are not medical, such as financial problems, housing when treatments must be taken at a facility far away from home, and childcare.

ovary - A reproductive organ in the female pelvic region. Normally a woman has two ovaries. They contain the eggs (ova) that joined with sperm, result in pregnancy. Ovaries are also the primary site of production of estrogen. (Also, refer to estrogen.)

Paget’s disease of the nipple - A form of breast cancer that begins in the milk passages (ducts) and involves the skin of the nipple and areola. A sign of Paget’s disease is a crusting, scaly, red inflamed tissue (dermatitis) lesion on the nipple. With true Paget’s disease, cancer is usually also present within the breast. This is a rare type of breast cancer that occurs in only 1 percent of cases. There is generally a good outcome or prognosis, if no lump is felt.

cell’s main purpose is to improve the quality of life.

palliative treatment - Therapy that relieves symptoms, such as pain, but does not cure the disease. Its main purpose is to improve the quality of life.

palpation - A simple technique in which a health care provider presses on the surface of the body to feel organs or tissues underneath. One can feel a palpable mass in the breast.
Papanicolaou smear (Pap test) - A screening test of the cells of the cervix used to detect early signs of cervical cancer.

Papanicolaou stain (Pap stain) - A multichromatic staining process that is used primarily on gynecological specimens. It provides great transparency and delicacy of detail, which is important in cancer screening, especially of gynecologic screens.

Pathologist - A physician who specializes in the identification of abnormalities and disease by examining body tissue under a microscope and organs. The pathologist determines whether a lump is benign or cancerous.

Pathology - A study of disease through examination of body tissues and organs under a microscope for evidence of disease. Diagnosis of any tumor thought to be cancer by examination under a microscope.

Pectoral muscles - Muscles attached to the front of the chest wall and upper arms. The larger group is called pectoralis major, and a smaller group is called pectoralis minor. Because these muscles are in close proximity to the breast, they may become involved in breast cancer or surgery to treat it.

Pelvic examination - An internal physical examination used to detect a variety of gynecological disorders. The pelvic examination is performed by a physician, nurse or physician's assistant, and includes a visual inspection of the vagina and cervix, as well as palpation of the uterus and ovaries.

Pigment - A class of substances that provide color, including in the human body. The areola and nipple of the breast are pigmented with melanin. Normally a brownish tint, melanin, in these areas of the breast can range from pale pink to deep brown.

Predisposition - Susceptibility to a disease that can be triggered under certain conditions. For example, some women have a family history of breast cancer and are therefore predisposed (but not necessarily destined) to develop breast cancer.

Premalignant - Abnormal changes in cells that may, but not always, become cancer; also known as precancerous. Most of these early lesions respond well to treatment and result in cure.

Prevalence - A measure of the proportion of persons in the population with a particular disease at a specified time.

Prevention - Avoiding the occurrence of an event, such as development of cancer, by avoiding things known to cause cancer and participating in activities that can or might prevent cancer. For example, avoiding smoking may prevent lung cancer, and taking tamoxifen may prevent breast cancer in women who are at high risk for the disease.

Preventive services - Programs or products that are developed and provided for the purpose of health promotion and maintenance.

Primary site - The site where cancer begins. Usually, the cancer is named after the organ in which it begins; for example, breast cancer.

Progesterone - A female sex hormone released by the ovaries to prepare the uterus for pregnancy and the breasts for milk production (lactation).

Prognosis - A prediction of the course of disease, including the prospects for a cure. For example, women with early detected breast cancer and receive prompt treatment have a good prognosis.
prosthesis (breast) - An artificial form that can be worn under the clothing after a mastectomy to simulate the shape and form of a natural breast. (Plural: prostheses.)

protocol - A formalized outline or plan.

public health district - Missouri is divided into six public health districts. In the manual, the word regions is used.

quality assurance - The overall process of assessing and maintaining the highest possible quality in the acquisition and interpretation of results.

radiologic technologist - A health professional (not a physician) trained to properly position patients for x-rays, to load film and take the images, and to develop and check the images for quality. Since mammograms (breast x-rays) are done on a machine that is used only for mammograms, the technologist must have special training in mammography. A radiologist reads the films taken by the technologist.

radiologist - A physician who has taken additional years of training to produce and read x-rays and other types of images (for example, ultrasound or magnetic resonance imaging) for the purpose of diagnosing abnormalities.

radiology - A branch of medicine concerned with the use of radiant energy in the diagnosis and treatment of disease.

radiotherapy - Treatment with radiation to destroy cancer cells. Methods used include linear accelerators, x-rays, cobalt, and betatrons. This type of treatment may be used to reduce the size of a cancer before surgery or to destroy any remaining cancer cells after surgery. Also called irradiation and radiation therapy.

Reach to Recovery - A visitation program of the American Cancer Society for women who have a personal concern about breast cancer. Carefully selected and trained volunteers, who have successfully adjusted to breast cancer and its treatment, provide information and support to women newly diagnosed with the disease.

reactive changes - Normal changes in tissue as a result of the body's reaction to an irritation or infectious agent.

recurrence - Cancer that has re-occurred or reappeared after treatment. Local recurrence is at the same site as the original cancer. Metastasis means that the disease has recurred at a distant site. Regional recurrence is in the tissue or lymph nodes near the site.

regimen - A strict, regulated plan of diet, exercise, or other activity designed to reach certain goals. In cancer treatment, it is a plan to treat cancer.

regional involvement - The spread of cancer from its original site to nearby areas such as muscles or lymph nodes, but not distant sites such as other organs.

Regional Program Coordinator (RPC) - SMHW staff persons located in several regions of the state who assist with referrals for diagnosis and treatment and provide service coordination/case management services for women enrolled in SMHW.
rehabilitation - Activities to adjust, heal, and return to a full, productive life after injury or illness. This may involve physical restoration (such as the use of prostheses, exercises and physical therapy), counseling and emotional support.

risk factor - Anything that increases a person’s chance of getting a disease such as cancer. The known risk factors for breast cancer are: being a woman over the age of 50; family history of the disease, especially in one’s mother or sister; beginning menstrual periods at a young age (before age 12); obesity; never having completed a pregnancy; first pregnancy after age 30.

saline solution - A saltwater solution.

scan - A study using either x-rays or radioactive isotopes to produce images of internal body organs.

scant cellularity - An unsatisfactory Pap smear with inadequate cellularity.

scirrhouus cancer - A breast cancer with a hard, firm, fibrous texture; usually an infiltrating ductal carcinoma.

screening - The search for disease, such as cancer, in people without symptoms. Screening may refer to coordinated programs in large populations. The principal screening measure for breast cancer is mammography.

screening guidelines - Recommendations for the application of screening procedures, which are formulated by professional and governmental agencies.

screening mammogram - American College of Radiology defines a screening mammogram as “an x-ray breast examination of asymptomatic women in an attempt to detect breast cancer, when it is small, nonpalpable and confined to the breast.”

screening provider(s) - Health departments, primary care facilities, and/or any other entities under contract with Missouri’s SMHW program to provide breast and cervical cancer screening services.

screening services - Refers to clinical breast examination, Pap smear, pelvic examination, mammography, instruction in breast self-examination, and informational and educational services relating to breast and cervical cancer by providers of SMHW services.

secondary tumor - A tumor that forms as a result of spread (metastasis) of cancer from its site of origin.

shall/must/should - Reference to the words "shall" and "must" indicate mandatory program policy. "Should" indicates recommended program policy relating to program management and patient care that the provider is urged to follow.

Show Me Healthy Women (SMHW) - The functional entity created within the Missouri Department of Health and Senior Services, Division of Community and Public Health, Section for Community Health Services & Initiatives, Bureau of Cancer and Chronic Disease Control, to implement and manage all components of the grant.

silicone gel - Synthetic gel compound used in breast implants because of its flexibility, strength, and texture, which is similar to the texture of the natural breast. Silicone gel breast implants are available for women who have had breast cancer surgery. (See breast augmentation.)
sonogram - An image produced by using high-frequency sound waves. This technique is used to examine and measure internal body structures and detect bodily abnormalities, but does not utilize radiation or x-rays.

speculum - A metal or plastic instrument that permits visual inspection of the cervix and performance of a Pap smear.

staging - A method of determining and describing the extent of cancer, based on the size of the tumor, whether regional axillary lymph nodes are involved, and whether distant spread (metastasis) has occurred. Knowing the stage at diagnosis determines the best treatment and the prognosis.

stages of breast cancer:
- **Stage 0**: The earliest stage of breast cancer; the disease is in situ.
- **Stage I**: The tumor is 2 cm or less and has not spread beyond the breast.
- **Stage II**: The tumor is more than 2 cm and spread to regional lymph nodes, such as the lymph nodes under the arm, or the tumor is more than 5 cm in diameter and no regional nodes are involved.
- **Stage III**: The tumor is any size and has spread to several regional lymph nodes and/or other tissues near the breast.
- **Stage IV**: The cancer has spread to other organs and/or tissues by way of direct extension, lymph system and/or bloodstream.

stages of cervical cancer:
- **Stage 0**: The earliest stage of cervical cancer; the disease is in situ.
- **Stage I**: Cancer has not spread beyond the cervix and uterus.
- **Stage II**: Cancer has spread beyond the uterus, but not to the pelvic wall or to the lower third of the vagina.
- **Stage III**: Cancer has spread to the pelvic wall and/or involves the lower third of the vagina and/or regional lymph nodes.
- **Stage IV**: The cancer has spread to other organs and/or tissues by way of direct extension, lymph system and/or bloodstream.

stereotactic biopsy - A diagnostic procedure that combines the technology of radiological imaging with surgical biopsy. In a stereotactic biopsy, images of the area surrounding a lesion are taken from different angles and a computer precisely calculates the location of the lesion. An automatic biopsy needle obtains samples of the tissue at the exact spot calculated by the computer.

subcutaneous mastectomy - A surgery to remove internal breast tissue, yet the nipple and skin are left intact.

supraclavicular nodes - Lymph nodes that are above the collarbone (clavicle).

surgery - An operation, a procedure performed by a surgeon to repair or remove a part of the body or to find out if disease is present.
surgical or specialist consultation - A referral of a woman to a surgical specialist for additional diagnostic evaluation, following detection of a breast or cervical abnormality.

survival rate - A way of expressing how long, on average, people may live after diagnosis of disease or after treatment of the disease. It is expressed as the percentage of people who live a certain period of time, as opposed to the percentage of those who die. For example, the five-year survival rate for women with localized breast cancer (including all women living five years after diagnosis, whether the patient was in remission, disease-free, or under treatment) was 78 percent in the 1940’s, but in the 1990’s it was 93 percent.

suspicious abnormality - A finding on a test that indicates cancer might be present.

synchronous - At once or at the same time.

systemic disease - In breast cancer, a tumor that originated in the breast has spread to distant sites, such as the liver, chest, brain, bones, or lungs.

tamoxifen (brand name: Nolvadex) - A drug that blocks estrogen; an antiestrogen drug. Blocking estrogen is desirable in some cases of breast cancer because estrogen feeds the growth of certain types of tumors.

target population - The desired or intended audience, in this case for SMHW interventions.

therapy - Any of the measures taken to treat a disease. Alternative therapy is any therapy that has not been approved. Some alternative therapies are used along with standard therapy. Some are harmless, some may be helpful, and others can be dangerous, especially if they divert a person with cancer from receiving standard therapy. Also called questionable methods or unproven methods. Some people use alternative therapies along with standard therapy; in this approach, the health care team should be informed of the alternative method used. Experimental therapy is any new, as-yet-unproven method that is being tested for specific purposes in a scientific clinical trial. Standard therapy is any method that has been scientifically tested and proven useful for specific purposes and is the standard treatment.

tissue - A collection of similar cells, united to perform a particular function. There are four basic types of tissue in the body: epithelial, connective, muscle, and nerve.

tomosynthesis – An optional method of performing high-resolution mammogram with three-dimensional images of the breast.

transformation - A multistep process by which normal cells change into neoplastic cells.

tumor - Tissue growth in which the cells multiply uncontrollably, also called neoplasm. It can be either benign or malignant. Benign tumor is a noncancerous tumor (i.e., does not invade and destroy adjacent normal tissue). Malignant tumor is a tumor that is cancerous and likely to cause death unless adequately treated.

ultrasonography (ultrasound) - An imaging method in which high-frequency sound waves are used to outline a part of the body. High-frequency sound waves are transmitted through the area of the body being studied. The sound wave echoes are picked up and displayed on a television screen. This painless method is used mainly to find out if a structure is solid or liquid. It is useful in detecting breast cysts in young women with firm, fibrous breasts. No radiation exposure occurs.
underinsured - A patient is considered underinsured if she has medical insurance that does not cover SMHW screening services, or if she has an unmet deductible or required copayment for services covered by SMHW.

underserved - Groups of individuals who chronically lack access to health care for a variety of reasons.

unilateral - Affecting one side of the body. For example, unilateral breast cancer occurs in one breast only. (Also see bilateral.)

unproven methods of cancer management - Any therapy that has not been subjected to traditional scientific study and proved effective in clinical trials. Such methods range from harmless to life threatening, especially if they are used in place of medically sound methods of treatment. The American Cancer Society maintains a reference file on proven methods of cancer management. Information is available by request from the society's toll-free cancer information hotline, 1-800-ACS-2345. (Also see therapy.)

x-rays - One form of radiation that can, at low levels, produce an image of cancer on film, and at high levels can destroy cancer cells.
