# Overview of Show Me Healthy Women and WISEWOMAN Programs

Welcome to the Missouri Show Me Healthy Women (SMHW) and Well-Integrated Screening and Evaluation for Women Across the Nation (WISEWOMAN) programs offered through the Missouri Department of Health and Senior Services (DHSS). The purpose of the SMHW and WISEWOMAN Provider Manuals is to help participating health professionals understand program requirements and provide services to program-eligible women.

This manual is intended to offer an integrated approach in providing SMHW and WISEWOMAN services. It is designed to provide important information needed to enroll clients into the SMHW and WISEWOMAN programs, explain health professional roles and responsibilities, define reimbursable services, and provide necessary reimbursement and billing information. It also includes a framework for clinical guidelines to adhere to program standards. The SMHW and WISEWOMAN staff are available to assist providers on a regular basis using e-mail, telephone, and on-site visits as needed. Help is available from the SMHW and WISEWOMAN staff by calling toll-free at 866-726-9926 or 573-522-2845.

# Show Me Healthy Women Vision and Mission

### **Vision Statement**

Improve the quality of life in Missouri through the cure and elimination of breast and cervical cancers.

### **Mission Statement**

Support quality screening, diagnostic and treatment services, in accordance with current medical standards of care, for breast and cervical cancers for all women in Missouri. This is achieved by education, community outreach, and resource development in partnership with public and private entities, communities, and citizens.

# **WISEWOMAN** Vision and Mission

### **Vision Statement**

A world where any woman can access preventive health services and gain the wisdom to improve her health.

### **Mission Statement**

Provide low-income, underinsured or uninsured, 35 – 64-year-old women with the knowledge, skills and opportunities to improve their diet, physical activity and other life habits to prevent, delay or control cardiovascular and other chronic diseases.

History

## National Breast and Cervical Cancer Early Detection Program

### http://www.cdc.gov/cancer/nbccedp/

The United States Congress passed the Breast and Cervical Cancer Mortality Prevention Act of 1990 (Public Law 101-354) to establish the National Breast and Cervical Cancer Early Detection Program (NBCCEDP) in 1990. The Centers for Disease Control and Prevention (CDC) authorizes the NBCCEDP to provide grants to states, American Indian/Alaska Native tribes, and U.S. Territories to carry out cancer early detection activities.

### WISEWOMAN

### http://www.cdc.gov/wisewoman

Congress amended the NBCCEDP Public Law 101-354 in 1993 to create the WISEWOMAN Program. The WISEWOMAN Program addresses women's risk for heart disease and stroke by providing cardiovascular disease (CVD) health screenings and risk reduction lifestyle education for NBCCEDP clients.

# **NBCCEDP and WISEWOMAN Similarities**

NBCCEDP shares an established infrastructure with WISEWOMAN to provide integrated services including:

- Recruiting and working with women eligible for services
- Delivering screening services through an established healthcare delivery system
- Collecting and reporting minimum data elements (MDEs) used to track, monitor and evaluate program efforts
- Providing professional development opportunities for staff, providers and partners
- Providing public education to raise awareness about the need for women to receive program services
- Assuring that quality care is provided to women participating in the program

# At-A-Glance Comparison of NBCCEDP and WISEWOMAN

Торіс	NBCCEDP/SMHW	WISEWOMAN	
First state/tribal health agency was funded	1990	1995 Three demonstration projects were funded.	
Number of nation-wide funded programs	50 states, District of Columbia, Puerto Rico, 6 territories, and 13 tribal organizations	21 states and 3 tribal organizations	
Program administration	CDC's Division of Cancer Prevention and Control Program, Services Branch, National Center for Chronic Disease Prevention and Health Promotion (NCCDPHP)	CDC's Division for Heart Disease and Stroke Prevention, Program Development and Services Branch, NCCDPHP	
Services provided	Cancer screening: clinical breast exam (CBE), Pap test, HPV test and mammography. Diagnostic tests to identify breast and cervical problems Referral to health care providers for medical management of conditions for women with abnormal or suspicious test results Referral to the Missouri Tobacco Quitline for women who smoke	Heart Disease and Stroke Risk Factor Screenings: Cholesterol and high-density lipoprotein (HDL), A1C or glucose, high blood pressure (HBP), waist/hip circumference, height/weight for body mass index (BMI), Risk Counseling Diagnostic office visit to identify/confirm a new diagnosis of HBP, diabetes, elevated cholesterol Referral to community-based resources, Lifestyle Education	
		Programs, Missouri Tobacco Quitline, uncontrolled HBP medical follow-up	

# **Contractual Agreements**

The SMHW program utilizes contracts with service providers to deliver program services. Contracts are available for SMHW-only services or for providers who choose to deliver both SMHW and WISEWOMAN services.

### What We Do

- Establish annual contracts for screening providers
- Provide an easily accessible program manual that describes screening, follow-up, education, and reporting guidelines based on national CDC guidelines
- Require providers to utilize the Clinical Laboratory Improvement Amendments of 1988 (CLIA) approved laboratories or ensure laboratory equipment is CLIA-waived
- Provide Regional Program Coordinators (RPCs) for each geographic region to assist providers with training, technical assistance, and tracking clients with abnormal values to ensure clients receive appropriate followup
- Provide training and technical assistance to provider staff
- Provide client recruitment targeting ethnically diverse program-eligible women
- Provide client educational materials and tools
- Provide required reporting forms and data system for submitting service reports
- Reimburse providers for allowable services according to the Medicare 01 region rates
- Monitor provider services to assure quality standards
- Maintain a central data system for tracking and reporting required data to CDC
- Assist the service providers with client case management/follow-up and annual evaluation screening efforts
- Provide promotional items, literature, and other public educational materials when available

# Show Me Healthy Women Advisory Board

The SMHW Advisory Board strengthens the program's activities in the state of Missouri through professional and policy development, public and clinical education, private partnerships, and coalition building.

### **Advisory Board Responsibilities**

- Advise SMHW management on SMHW issues
- Assist SMHW in enhancing the breast and cervical cancer control knowledge and skills of Missouri's healthcare professionals
- Assist SMHW in identifying appropriate breast and cervical cancer control legislation
- Establish task forces, as necessary, to assist SMHW in developing cancer control policies, such as cervical and breast cancer screening protocols and policies, diagnostic guidelines, and funding applications
- Assist SMHW in identifying partners who will extend and enhance the work of SMHW

The SMHW Advisory Board is composed of representatives of organizations that are, or potentially can be, involved in SMHW activities and of individuals with special expertise in breast and cervical cancers. The board has approximately 30 members. Elected board members serve a two-year term. The Board meets quarterly and meetings are open to the public.

# **Provider Contract Requirements**

Provider Contract Requirements	2.1
Complete SMHW/WISEWOMAN Information Update Form Recruit Clients Attend Training Register Clients for Services Comply with HIPAA Regulations Utilize Medical Staff Obtain Permission for RN to Provide Services Laboratories MQSA	Notify Clients Billing Clients Electronic Data and Reports Reporting Form Electronic Reimbursement Recording and Maintaining Documentation Assure Follow-up Communicating with Sub- contractors Subcontractor Requirements

Providers Who Terminate Participation Submit Letter Continue to Report Work with RPC	2.6
Provider Application Approval Criteria	2.7
Commitment Accreditation Capacity Location Commitment to Clients	Experience Network Compliance Application Denial

# **Provider Contract Requirements**

### ALL of the following provider contract requirements must be met.

### Complete SMHW/WISEWOMAN Information Update Form

Complete and sign the SMHW-WISEWOMAN Information Update Form annually. The SMHW/WISEWOMAN Information Update Form is located at <a href="http://www.health.mo.gov/living/healthcondiseases/chronic/showmehealthywomen/forms.php">http://www.health.mo.gov/living/healthcondiseases/chronic/showmehealthywomen/forms.php</a>

### **Recruit Clients**

Recruit clients by the following activities:

- Utilize public education resources provided by DHSS to recruit eligible women
- Collaborate with the American Cancer Society (ACS), National Cancer Institute (NCI), American Heart Association (AHA), local cancer control coalitions, and other local partners
- Display recruitment and educational information in waiting areas and examination rooms
- Provide materials on screening services to all eligible women attending clinics in the facility
- Coordinate recruitment activities with the DHSS staff and the designated area RPC
- Schedule women for annual screenings at a minimum of 10-month intervals following the initial or annual screening
- Recruit WISEWOMAN clients from SMHW clients

### Attend Training

- Attend SMHW/WISEWOMAN provider staff training
- New providers of SMHW/WISEWOMAN services must participate in an on-site training session by DHSS staff prior to providing services
- Ensure staff is well trained in program protocols prior to delivering services. Require at least one staff member to participate in an orientation training delivered by DHSS program staff upon initial contract application
- Facilitate attendance/participation of staff members responsible for submission of data forms and clinical services at annual trainings that provide policy and procedure updates and review
- Request DHSS training sessions when new staff are hired

### **Register Clients for Services**

- Obtain clients' signatures on the SMHW-WISEWOMAN Client Eligibility Agreement Form.
- Annually provide clients with the current DHSS patient privacy rights statement in accordance with Health Insurance Portability and Accountability Act (HIPAA) regulations prior to receiving services annually. The client must receive this information along with the HIPAA statement from the provider facility. The provider must retain documentation of this action.

### **Comply with HIPAA Regulations**

• Comply with current <u>HIPAA regulations</u> (<u>http://www.health.mo.gov/information/hipaa/</u>) in delivering services.

### Utilize Medical Staff

- Provision of services is dependent upon current license or certification with the State of Missouri.
- Utilize medical doctors, doctors of osteopathy, nurse practitioners, certified nurse midwives, clinical nurse specialists, certified physician assistants, and registered nurses (RNs) with specialized training within the registered nurse's scope of practice to provide services.

### **Obtain Permission for RN to Provide Services**

Obtain written approval from DHSS for the RN to provide breast and cervical screening services for SMHW clients. Submit the following information in a written request to SMHW:

- A letter documenting previous practice;
- A licensure or certification numbers; and
- Documentation of any of the following breast and/or cervical cancer screening training:
  - Length of the preceptorship;
  - Number of pap tests, CBEs, and pelvic examinations completed during the preceptorship. A minimum of 10 pap tests, CBEs, and pelvic examinations must be performed in order for the RN to be eligible to provide screening services; and
  - The preceptor must verify that the nurse completed these examinations with minimal or no difficulty.

### Laboratories

Utilize only laboratories that adhere to all applicable standards established under the Clinical Laboratory Improvement Amendments (CLIA) of 1988 or are CLIA waived. Laboratories must report pap test findings using the Bethesda System 2001.

### MQSA

Comply with Mammography Quality Standards Act (MQSA). Prior authorization by SMHW and DHSS is required for MQSA-accredited mobile mammography vans based out-of-state.

### **Report Results-Mammography**

Report mammography test results in the American College of Radiology BIRADS system.

### **On-Site Quality Assurance Reviews**

Agree to on-site record reviews by qualified DHSS staff six months after initial services begin and every two years thereafter, or more frequently if requested by the DHSS.

### **Notify Clients**

Notify clients of non-program-covered services. Notify the client in writing of any services not covered by the programs prior to providing any non-program-covered services.

### **Billing Clients**

Ensure clients receive no bills (invoices) for services covered by the SHMW or WISEWOMAN programs.

### **Electronic Data and Reports**

Enter all data and reports electronically with accompanying Current Procedural Terminology (CPT) codes into the SMHW central data management computer-tracking program, Missouri Health Strategic Architectures and Information Cooperative (MOHSAIC).

### **Reporting Form**

Submit a fully completed reporting form within 60 days of the last date of service. An exception should be noted for end-of-grant-year services. The end-of-year billing deadline notification is sent to providers annually.

### **Electronic Reimbursement**

Agree to receive SMHW/WISEWOMAN reimbursements through Electronic Fund Transfer (EFT). SMHW/WISEWOMAN reimbursement rates and CPT codes can be viewed in Section 9; Billing Guidelines.

### **Recording and Maintaining Documentation**

**Complete and maintain documentation on all client eligibility, screening, and case management services outlined in this manual**. Maintain client records for at least seven years. All SMHW enrolled clients with an abnormal screening result must be assessed for their need of case management services and provided with such services accordingly. Examples of screening results which would require a case management assessment would be BIRADS 3, 4, 5 for mammograms; and Atypical Squamous Cells of Undetermined Significance (ASCUS), Low-grade Squamous Intraepithelial Lesion (LSIL), and

high grade lesions for pap tests. Case management services conclude when a client initiates treatment, refuses treatment, or is no longer eligible for the SMHW program. When a woman concludes her cancer treatment, and is released by her treating physician to return to a schedule of routine screening, she may return to the program and receive services if she meets eligibility requirements.

### Assure Follow-up

Assure all clients identified on screenings that have suspicious, abnormal, or alert test results receive appropriate follow-up services, including case management, rescreen, diagnostic evaluation, treatment referral and/or education services according to program protocols. These services may be provided directly by the contracted provider or by an established referral sub-contractor that meets SMHW/WISEWOMAN program requirements. All test results shall be maintained in the client's medical records for monitoring purposes.

### **Communicating with Sub-contractors**

Ensure that communications with sub-contractors include notification and approval from the SMHW/WISEWOMAN provider prior to the subcontractor's provision of additional tests. This communication is necessary to be sure the subcontractor's services and reimbursements will meet SMHW/WISEWOMAN program guidelines. Providers are also responsible for ensuring that clients understand why they are being referred and what services will be provided. It is the recommendation of DHSS that a written agreement between each sub-contractor and each SMHW/WISEWOMAN provider is complete.

### **Subcontractor Requirements**

Ensure subcontractors meet the requirements specified in these guidelines (i.e., MQSA, CLIA, etc.). Subcontracted services may include:

<ul> <li>Pap test processing and interpretation</li> <li>Cervical conization         <ul> <li>Loop Electrosurgical Excision Procedure (LEEP) (covered as diagnostic, not treatment)*</li> <li>Cold knife conization (covered as diagnostic, not treatment)*</li> </ul> </li> <li>Endocervical curettage (alone)</li> </ul>	<ul> <li>Mammography</li> <li>Specialist consultation</li> <li>Breast ultrasound</li> <li>Fine needle aspiration (FNA)</li> <li>Core needle biopsy</li> <li>Stereotactic biopsy</li> <li>Surgical incisional biopsy</li> </ul>
<ul> <li>Colposcopy with or without biopsy</li> <li>Endometrial biopsy with Atypical Glandular Cells (AGC)</li> <li>* Refer to Cervical Section of Manual</li> </ul>	<ul> <li>Excisional breast biopsy</li> <li>WISEWOMAN laboratory test</li> <li>WISEWOMAN lifestyle education</li> <li>WISEWOMAN diagnostic office visit</li> </ul>

### **Refer Tobacco Users**

Ensure that SMHW and WISEWOMAN clients who use tobacco products are referred to the Missouri Tobacco Quit Services 800-QUIT-NOW (800-784-8669) for free counseling. The Missouri Tobacco Quit Services is available free of charge to all Missouri SMHW and WISEWOMAN participants. Be sure to have the client complete a fax referral form and fax the form to the Quitline.

### Submit Personnel Information

Submit written changes of clinical, administrative and personnel contact changes to DHSS within 30 days.

### Collaborate

Collaborate with the Missouri Department of Social Services (DSS), Family Services Division (FSD) regarding clients diagnosed with breast/cervical cancer. These clients may be eligible for treatment through the Breast and Cervical Cancer Treatment (BCCT) Act.

# **Providers Who Terminate Participation**

### Submit Letter

Submit a letter to DHSS 30 days before the date of anticipated termination of services. The letter must include the date of termination of SMHW/WISEWOMAN services.

### **Continue to Report**

Continue to report all diagnostic and/or treatment information after termination on the appropriate SMHW/WISEWOMAN forms to complete all outstanding follow-up cases. To accomplish this, a provider should work closely with the Regional Program Coordinator (RPC) in their area.

### Work with RPC

Work with the RPC to inform clients where they may obtain SMHW/WISEWOMAN services in their area once the provider terminates participation.

# Provider Application Approval Criteria

### The DHSS approves or disapproves providers based on the following criteria:

### Commitment

Commitment and ability to meet the contract requirements

### Accreditation

Accreditation or certification status of the site and clinical staff

### Capacity

Capacity to submit timely and accurate data and billing reports to DHSS via the MOHSAIC electronic reporting system

### Location

Located in area of need in relation to other SMHW/WISEWOMAN providers and to the population to be served

### **Commitment to Clients**

Commitment and ability to serve clients with special emphasis on priority-eligible populations, particularly women 21-64 years of age or older and women who have rarely or never been screened

### Experience

Successful experience in providing comprehensive breast and cervical cancer screening, education and referral services, either through existing on-site facilities or referral linkages. Access to CLIA-approved laboratory and/or MQSA accredited mammography facility

### Network

Ability to network with the ACS and NCI, and other educational state and regional resources

### Compliance

Compliance with current HIPAA regulations; and

### **Application Denial**

If an application is denied, a contact list identifying other SMHW/WISEWOMAN providers in the same geographic area will be provided. Applicants may use this information to facilitate referrals for women in need of SMHW/WISEWOMAN services.

The Provider Application can be found at:

http://www.health.mo.gov/living/healthcondiseases/chronic/showmehealthywomen/forms.php.

# **Client Eligibility**

Client Eligibility Guidelines		
Age Eligibility Includes 21- to 64-Year-Old Women Transgender Clients Income Guidelines Insurance Status of Uninsured or Underinsured Current Breast or Cervical Cancer MO HealthNet (Medicaid) Medicare Insurance		
Documentation and Certification of Client Eligibility		
Free Transportation for Clients		
Travel Voucher Instructions		
Travel Vouchers Cancellation		
SMHW/WISEWOMAN Transportation Providers Fiscal Year 2025 (List)		
SMHW/WISEWOMAN Transportation Providers Fiscal Year 2025 (Map)		

# **Client Eligibility Guidelines**

SMHW eligibility has three primary criteria: income level, health insurance status and age guidelines. Income guidelines are based on 250 percent of the federal poverty guidelines. The SMHW program reimburses only for services when there is no other funding source available. Women 21 to 64 years of age are eligible for services; some service restrictions apply by age category.

SMHW/WISEWOMAN Programs are the payors of last resort. Providers may call the program RPC for guidance.

### Age Eligibility Includes 21 to 64-year-old Women

Some exceptions pertain to guidelines for services available to clients older than 64 based on insurance. Please see page 3.3 for further information.

### **Transgender Clients**

- Screening and diagnostic services are available for male-to-female transgender clients who have/are taking hormones as long as they meet program eligibility guidelines.
- Screening services are available for female-to-male transgender individuals who have not yet undergone a complete hysterectomy or bilateral mastectomy because these individuals are genetically female.
- The CDC does not make a recommendation on routine screening with this population; transgender women are eligible under federal law to receive appropriate cancer screening.
- To determine the medical necessity of screening, the CDC recommends providers discuss the risks and benefits of screening with all eligible clients.

Household Size	SMHW Annual	SMHW Monthly	SMHW Weekly	SMHW Hourly
1	\$37, 650	\$3,138	\$724	\$18.10
2	\$51,100	\$4,258	\$982	\$24.57
3	\$64,550	\$5,379	\$1,241	\$31.03
4	\$78,000	\$6,500	\$1,500	\$37.50
5	\$91,450	\$7,621	\$1,758	\$43.96
6	\$104,900	\$8,742	\$2017	\$50.43
7	\$118,350	\$9,863	\$2,275	\$56.89
8	\$131,800	\$10,983	\$2,534	\$63.36
Each additional person, add:	\$13,450	\$1,120	\$258	\$6.46

### **Income Guidelines**

• Clients must have an income at or below 250 percent of the federal poverty income guidelines. Adjusted gross income on tax return or net amount on pay stub determines income eligibility.

### Insurance Status of Uninsured or Underinsured

# Health Insurance Status++ No health insurance Health insurance does not cover services Client states she is unable to pay deductible Have MO HealthNet with Spend-down, but have not met Spend-down Income eligible for Medicare Part B, but unable to pay premium Clients eligible to receive Medicare benefits but not enrolled in Medicare should be encouraged to enroll ++ Women with full MO HealthNet (ME Code 05, ME Code E2) or Medicare Part B, POS or HMO health coverage are not eligible for services. Assess Mo HealthNet (ME Code 13) Permanently and Totally Disabled for level of coverage.

 Providers may use the Client Eligibility Agreement form to document the insurance status of the client. Copies of these forms are located on pages 10.6-.7, or download a copy at: <u>http:</u> <u>health.mo.gov/living/healthcondiseases/chronic/showmehealthywomen/forms.php</u>.

### **Current Breast or Cervical Cancer**

• Women who are currently diagnosed with a breast and/or cervical cancer are not eligible for SMHW services. Women being currently treated for breast or cervical cancer are also not eligible for SMHW services. However, once cancer treatment is completed the client may return to SMHW for routine screenings as long as eligibility guidelines are met.

### MO HealthNet (Medicaid)

- Women with MO HealthNet Managed Care coverage may be eligible for SMHW services if they are enrolled in the Extended Women's Health Services/EWHS, Uninsured Women's Health Services/UWHS, or have an unaffordable MO HealthNet spend-down. These women are eligible for screening/diagnostic services through SMHW. Extended Women's Health Services/EWH'S and Uninsured Women's Health Services does not cover diagnostic services. The woman must meet all SMHW eligibility guidelines.
- SMHW Clients who reach age 65 and older or women previously not enrolled age 65 and older do not qualify for BCCT.

### Medicare

- Women enrolled in Medicare Part B are not eligible for SMHW services. Medicare Part B covers breast and cervical cancer screenings. Refer women with Medicare Part B coverage to providers who accept Medicare reimbursement.
- Women who meet SMHW/WISEWOMAN eligibility requirements and state they cannot pay the premium to enroll in Medicare Part B, or are not eligible to enroll in Medicare Part B, are eligible for SMHW/ WISEWOMAN screening services. If women are eligible to receive Medicare Part B benefits and are not enrolled, encourage them to enroll.

### Insurance

- The client's insurance <u>must</u> be billed first; when billing DHSS, include the insurance payment amount on reporting forms in the "Comments" section. SMHW will only reimburse up to the total amount allowed for the procedure per program guidelines. The total amount allowed and reimbursed by SMHW for each CPT code includes any payments received from insurance companies, not in addition to insurance payments.
- SMHW and WISEWOMAN are the payors of last resort.
- Women enrolled in prepaid/managed care and health plans (such as Health Maintenance Organizations [HMOs], Point of Service Plans [POS] and MO HealthNet Managed Care [formerly MC+]) are not eligible for SMHW/WISEWOMAN services.

For further guidance regarding clients with insurance, please see page 9.3.

# **Documentation and Certification of Client Eligibility**

The client must sign a SMHW Client Eligibility Agreement form that is retained in the client's record each year. (Download a copy of this form at:

http: health.mo.gov/living/healthcondiseases/chronic/showmehealthywomen/forms.php or pages 10.6 [English] and 10.7 [Spanish]).

Providers must obtain documentation of income, age eligibility and address, if available, on an annual basis and place a copy of the documentation in the client's record. (Electronic or paper medical records are acceptable.)

The following may be used for proof of age and income.				
Age	Income			
<ul> <li>Driver License</li> <li>Medicare Card</li> <li>Birth Certificate</li> <li>U.S. Passport</li> </ul>	<ul> <li>Income tax forms (annual adjusted gross income)</li> <li>Food Stamps</li> <li>WIC Voucher</li> <li>Social Security Award Letter</li> <li>Unemployment Insurance</li> <li>Pay Stub (net amount)</li> </ul>			

Once eligibility is determined, screening providers must verify eligibility on all reporting forms. To comply with the quality assurance policy, 50 percent of client records must contain proof of eligibility.

Provider must retain information in clients' charts regarding the green history form, (pages 10.8 [English] and 10.9 [Spanish] or at:

<u>http: www.health.mo.gov/living/healthcondiseases/chronic/showmehealthywomen/forms.php</u>), and review this information with each additional annual screening. Client records must be retained and available for seven years.

# **Free Transportation for Clients**

Free transportation is available for SMHW/WISEWOMAN clients. Providers can request a travel voucher booklet by contacting Show Me Healthy Women/WISEWOMAN staff or the Regional Program Coordinator (RPC) assigned to their area. All program services qualify for transportation services, including initial office visits, lab visits, follow-up diagnostic office visits, lifestyle education sessions, and annual evaluation screenings in the contracted counties.

1 SHOW ME	Transportation Voucher
C lealthy Q	County:

FREE Breast and Cervical	Appointment Tinge <sup>1</sup> P
Cancer Screening Program	Client Signature:
Removing barriers to life saving cancer screenings for women.	Clinic Signature:

### Note:

Call the SMHW/WISEWOMAN office toll-free at 866-726-9926 or 573-522-2845, to receive a book of 48 vouchers.

# **Travel Voucher Instructions**

Funds are available through SMHW and WISEWOMAN to cover the cost of transportation to help remove the barrier of access to care in receiving screening, diagnostic, and education services.

Transportation services are available in most counties and St. Louis City. Please call the RPC for assistance. See pages 3.8 and 3.9 for a complete list of transportation providers and their contact information. Services are available Monday through Friday, with charges based on urban or county trips and one-on-one or regular-route travel. When a client calls to make an appointment for a SMHW or WISEWOMAN screening or diagnostic, or education services, please ask her the following questions **before** making an appointment date and time for her:

### Does the client need transportation?

If yes, explain that free transportation is available for SMHW participants. A transportation provider will pick her up at her home, take her to the appointment, and return her to her home. Check with the transportation provider in your area for the transportation schedule. Ensure the client's appointment date and time coincide with the transportation provider's schedule.

### Secure client address and telephone number.

If the client does not have a telephone, ask for a neighbor's telephone number or for another number where she can be reached. The transportation driver may not be familiar with the client's address and may need directions to the residence.

### Does the client need any special assistance?

If the client needs an assistant or helper, SMHW will pay for transportation for one extra person. The assistant or helper should be 17 years of age or older. If a disabled client needs more than one assistant, call SMHW for approval. If the client has special medical equipment such as a wheelchair or oxygen, please inform the transportation provider at the time of scheduling.

### **Travel Vouchers**

Complete the travel voucher and include the facility name and site code number. The provider can mail or fax the completed travel voucher to the transportation provider including the date and time of the appointment. A copy of the voucher may be given to the client. The transportation provider will secure the client's signature on pickup.

### Cancellation

Notification of cancellation to the transportation provider is required to avoid a penalty charge to SMHW/WISEWOMAN for the cost of the round trip. Provide a **one** business-day notice to cancel a trip. Contact the transportation provider for questions related to transportation services. See page 3.8 and 3.9 for a complete list of transportation providers, service areas, and contact information. Address SMHW questions to the central office by calling toll-free at 866-726-9926 or 573-522-2845.

# SMHW Screening Recommendations

SMHW Screening Recommendations4.1
Provider Responsibilities Initial Screening Annual Screening Rescreening
Green History Form4.3
Clinical Requirements for SMHW Services4.4
Comprehensive Breast and Cervical Screening Annual Screening Protocol Breast Cancer Screening Magnetic Resonance Imaging (MRI) High Risk for Breast Cancer Cervical Cancer Screening High Risk for Cervical Cancer
Blue Screening Form4.9
SMHW Clinical Service Summary4.10

# **SMHW Screening Recommendations**

Routine screening and early detection are vital to reducing morbidity and mortality from breast and cervical cancer. Regular screening and early detection decreases mortality and improves quality of life for all individuals. Regular clinical breast exams, mammography, pelvic exams, and pap tests are the best screening methods available for breast and cervical cancers and pre-cancerous conditions.

### **Provider Responsibilities**

- Schedule annual breast and cervical cancer screenings appropriately for clients.
- Notify clients in advance of recommended screening dates. If the client does not schedule an appointment after the first notification, a second attempt shall be made.

### **Initial Screening**

The initial screening is:

• The <u>first</u> screening performed on a woman by a SMHW provider.

• If a client has not been seen for five years for a SMHW screening by the same provider.

### NOTE:

Initial clients need to complete a SMHW green history form (pages 10.8 [English] and page 10.9 [Spanish]) or download a copy at: http://www.health.mo.gov/living/healthcondiseases/chronic/showmehealthywomen/forms.php

### Annual Screening

The annual screening is:

• The process of returning for an annual screening test at a predetermined interval. SMHW defines an annual screening to be 10 months or greater from the initial screening or previous annual screening.

### NOTE:

Annual clients need to review and update the green history form at <u>each annual visit</u> either by completing a new form or by reviewing and initialing updates and initialing the new form with the date of the current visit.

### Rescreening

Rescreening is:

• An additional screening visit resulting from an <u>abnormal</u> initial or <u>abnormal</u> annual screening that is less than 10 months from an initial or annual screen.

### NOTE:

If there is a delay in the rescreening visit for 10 months or more from the date of the annual/initial visit, reimbursement occurs only after the rescreen meets breast/cervical criteria for an <u>annual</u> screening.

### Green History Form

All forms are annually associated with their specific grant year. When submitting an electronic or a paper form, use the version of the form that is the grant year which corresponds with the date of service. At the beginning of each grant year, there are multiple versions of this form available in Missouri Health Strategic Architectures and Information Cooperative (MOHSAIC). Click on the correct version when entering electronic forms. If using paper forms, check for the year of the form in the lower left corner: example (3/14).

#### NOTE:

All clients who participate in SMHW **must** complete a Patient History Form, also referred to as green history form, at the initial screening. The green history form is available in English and Spanish. Assistance may be given to the client for completion of the form. To order blank forms from SMHW call toll-free at 866-726-9926 or 573-522-2845.

- Information from the green history form is used to verify a client's eligibility for screening, as well as statistics to evaluate the program. Some information from the green history form is also reported to the Centers for Disease Control and Prevention (CDC). Keep all information confidential.
- The information on the original form shall be entered electronically in the MOHSAIC system. File all reported information in the client's record.
- Access MOHSAIC electronic forms at <a href="https://healthapps.dhss.mo.gov/smhw/">https://healthapps.dhss.mo.gov/smhw/</a>.
- A copy of the green history form is located on page 10.8 [English] and page 10.9 [Spanish] or download a copy at: <u>http://health.mo.gov/living/healthcondiseases/chronic/showmehealthywomen/forms.php.</u>
- If you have additional questions, please call SMHW toll-free at 866-726-9926 or 573-522-2845 for general assistance with central office staff.

If you have questions or concerns regarding specific issues with MOHSAIC, contact the ITSD Help Desk by telephone at 800-347-0887 or by e-mail at <a href="mailto:support@health.mo.gov">support@health.mo.gov</a>.

# **Clinical Requirements for SMHW Services**

The screening services outlined in the following pages are clinical requirements and shall be completed by the provider of SMHW services in order to be considered for reimbursement. Age restrictions and income guidelines always apply. Providers must have the capability to provide or offer access to the following services:

### **Comprehensive Breast and Cervical Screening**

- Clinical Breast Exam (CBE) provided annually for all women
- Assessment for High Risk for breast and cervical cancer
- Client education on the importance of obtaining screenings for breast and cervical cancer according to the appropriate screening schedules
- Routine screening mammogram offered annually or every other year per clinician and client determination, beginning at age 40 and over. (Table 1, page 4.6):
- Special circumstances include:
  - o Offer a mammogram annually if a woman has a personal history of breast cancer
  - Any client, age 21 or older, who currently has abnormal breast exam results, can receive diagnostic mammograms and other necessary breast diagnostic services covered by the SMHW program
- Complete visual and manual pelvic examination
- Pap test, conventional or liquid-based, HPV test at appropriate intervals (Table 2, page 4.7)
- Documentation of providing screening examination results to clients per verbal report or in writing
- Appropriate and timely case management for all clients with suspicious or abnormal results, including rescreening, diagnostic procedures and/or treatment

### **Annual Screening Protocol**

Age restrictions and income guidelines always apply to a client's eligibility for the services described below.

### **Breast Cancer Screening**

- A Clinical Breast Exam (CBE) is recommended by SMHW for a complete screening and is a reporting requirement of the grant. Coordination of a full screening with health care providers is expected. Perform a CBE annually, as needed, on all women, especially if they have had previous breast cancer surgery.
- CBE is not required for reimbursement of a mammogram. Provide an annual mammogram to clients with a personal history of breast cancer at the clinician's discretion.
- SMHW will reimburse for an annual breast cancer screening after ten (10) months have lapsed from the previous annual breast cancer screening. This includes annual CBE for all SMHW women ages 21 to 64 and yearly or every other year screening mammograms for women ages 40 and older. (Refer to Table 1, page 4.6)

- Family history of breast cancer does not qualify a woman for routine mammograms.
- A client with self-reporting abnormal breast self-exam (BSE) may be followed with a diagnostic breast work-up, except for self-reporting pain and tenderness or family history. If pain and tenderness are self-reported, she may be followed with a rescreening CBE in two (2) weeks up to 10 months. If the client continues to report pain and tenderness, case management is at the clinician's discretion.

(Diagnostic workup may include services such as diagnostic mammogram, ultrasound, specialist consult and breast biopsy.)

- Mammogram funding to screen women 40 to 49 years of age without abnormal breast findings through SMHW is available per clinician discretion.
- Women 21 years of age and older qualify for diagnostic breast services if breast exam findings are abnormal.

### Magnetic Resonance Imaging (MRI)

- ALL SCREENING MRIS MUST HAVE PRIOR AUTHORIZATION from the SMHW program manager. Contact your RPC with client information for approval from the manager.
- SMHW will pay for a screening breast MRI to alternate with a screening mammogram and documentation of **one of** the following:
  - BRCA mutation
  - A first-degree relative who is a BRCA carrier
  - A lifetime risk of 20-25% or greater as defined by risk assessment models such as BRCAPRO, Tyrer-Cuzick or the Gail Model (as they are highly dependent on family history)
- The CDC suggests providers discuss risk factors with all clients to determine if they are at high risk for breast cancer
- MRI should NEVER be done alone as a breast cancer screening tool
- Breast MRI cannot be reimbursed to assess the extent of disease in clients who have already been diagnosed with breast cancer
- To be most effective, it is critical to complete MRIs at facilities equipped with breast MRI equipment and perform MRI-guided breast biopsies

Annual Breast Recommendations for Women		
Age	Recommendation	
Age 21 to 39	Complete breast exam by health care provider annually	
Age 40 to 49	Complete breast exam by health care provider annually Screening mammogram every 1 to 2 years <b>per clinician</b> <b>discretion</b>	
Age 50 and over	Complete breast exam by health care provider annually Screening mammogram every 1 to 2 years	
The Missouri SMHW program follows guidelines of the CDC and NCI. Clinically evaluate and schedule appropriate diagnostic procedures within 60 days, for symptomatic women.		

#### Table 1

### **High Risk for Breast Cancer**

- BRCA mutation.
- A first-degree relative who is a BRCA carrier.
- A lifetime risk of 20-25% or greater as defined by risk assessment models such as BRCAPRO, Tyrer-Cuzick or the Gail Model as they are highly dependent on family history.

### **Cervical Cancer Screening**

- Pap test results of "inadequate specimen" are not reimbursable by SMHW.
- Pap test results initially indicating no endocervical cells should refer to ASCCP guidelines.
- For women who have a cervix, pap tests will be covered every three (3) years if no human papillomavirus (HPV) done, or screening with a combination of a pap test and HPV testing every five (5) years. See Screening Report Form (pages 10.10-.11).
- Hysterectomy:
  - SMHW will NOT fund pap testing for women who had a hysterectomy for benign (non-cervical neoplasia) conditions. A woman who has no cervix due to a reason other than cancer may have a pelvic exam to establish that there is no cervix.
  - Follow a woman annually for 10 years (conventional or liquid-based pap tests can be reimbursed) if reason for hysterectomy is unknown or if it was for cervical intraepithelial neoplasia (CIN) CIN 2, CIN 3, adenocarcinoma in situ (AIS) or cervical cancer in situ, which was biopsy-documented.

- Women who had a hysterectomy for invasive cervical cancer should undergo an <u>annual pap test</u> (conventional or liquid-based) annually; or perform HPV testing or Pap/HPV co-test every three years <u>indefinitely</u> as long as they are in good health.
- Annual pap test may be done only for persons who meet specific high-risk guidelines for cervical cancer per CDC and/or SMHW Advisory Board approval.

Annual Cervical Cancer Screening Recommendations for Women*		
Age	Recommendation	
Age 21 to 64	<ul> <li>Pelvic exam may be offered annually or with Pap testing schedule</li> <li>Conventional or Liquid-based Pap test every 3 years</li> <li>Or</li> <li>Combination pap test and human papillomavirus (HPV) test every 5 years</li> </ul>	
Age 21 and over AFTER HYSTERECTOMY	<ul> <li>Pap is NOT covered for those whom have undergone a hysterectomy <u>unless</u>: (Page 4.8 Table 3a and 3b)</li> <li>They have a remaining cervix</li> <li>Or</li> <li>They had surgery for CIN 2, CIN 3; CIS/AIS (eligible for annual pap or HPV testing or Pap/HPV co-test every three years for 10 years from date of hysterectomy).</li> <li>They have invasive cervical cancer (eligible for annual pap or HPV testing or</li> </ul>	
Pap/HPV co-test every three years)         The Missouri SMHW program follows guidelines of the CDC and American Society for Colposcopy and Cervical Pathology (ASCCP) for screening and diagnostic recommendations.         NOTE: * Intervals above are guidelines for asymptomatic women only. Evaluate and schedule appropriate diagnostic procedures quickly, within 60 days for symptomatic women.		

### Table 3a

	Cervical Cancer Risk Factors to Consider		
	Women who warrant annual Pap test (conventional or liquid-based) must have a personal history of one of the following HIGH RISK factors:		
•	Hysterectomy for invasive cervical cancer. Screenings may continue indefinitely, as long as they are in good health.		
•	CIN 2, CIN 3 or CIS/AIS lesions documented by tissue biopsy after hysterectomy (not based on Pap results). Follow routine pap intervals after the client has 10 years of annual pap test or HPV testing or Pap/HPV co-test every three years with negative results.		
•	Hysterectomy with reason unknown and not obtainable. Follow routine Pap intervals after the client has 10 years of annual pap test with negative results.		
	If Pap test is performed for one the following reasons, please note this in the comments section on the blue screening form.		
•	Human immunodeficiency virus positive (HIV+)/Immunocompromised from another health condition		
•	Kidney or other organ transplant		
•	Medication for severe arthritis or other collagen vascular disease		
•	Diethylstilbestrol exposure in utero		

### Table 3b

Risk factors which are NOT adequate to warrant annual pap screening:	

- Smoking
- Low income
- Numerous sexual partners (known or suspected)
- HSIL unless histologically diagnosed with a biopsy

# Blue Screening Form

All forms are annually associated with their specific grant year. When submitting an electronic or a paper form, use the version of the form that is the grant year, which corresponds with the **date of service**. At the beginning of each grant year there are multiple versions of this form in MOHSAIC (page 10.10-.11). Be sure to click on the correct version when entering electronic forms. If using paper forms, check for the year of the form in the lower left corner: example (3/14).

#### NOTE:

The Screening Report Form, also referred to as blue screening form, **must be completed** for all clients participating in the SMHW program. Please order blank forms from SMHW by calling 573-522-2845 or toll-free at 866-726-9926.

- Information from the blue screening form is used to verify clients' eligibility for screening, as well as diagnostic services that are recommended. Some information from the blue form is reported to the CDC. Keep all information confidential.
- The information on the original form shall be entered electronically in the MOHSAIC system. File all reported information in the client's record.
- Access MOHSAIC electronic forms at <a href="https://healthapps.dhss.mo.gov/smhw/">https://healthapps.dhss.mo.gov/smhw/</a>.
- A copy of the blue screening form is located on pages 10.10-.11 or download a copy at: http://health.mo.gov/living/healthcondiseases/chronic/showmehealthywomen/forms.php
- If you have additional questions, please call SMHW toll-free 866-726-9926 or 573-522-2845 for general assistance with central office staff.
- If you have questions or concerns regarding specific issues with MOHSAIC, contact the ITSD Help Desk by telephone at 800-347-0887 or by e-mail at <a href="mailto:support@health.mo.gov">support@health.mo.gov</a>.

# SMHW Clinical Service Summary

Provider Service	SMHW Client
Initial and Annual	SMHW Client:
Screening:	1. Provide verification of household income, date of birth
SMHW 20-minute office visit	<ol> <li>Sign eligibility agreement form to participate in SMHW/WISEWOMAN services</li> <li>Complete green history form (pages 10.89)</li> </ol>
	SMHW Provider:
	1. Verify client eligibility and retains a copy of the documentation in the chart
	2. Give a copy of HIPAA form to client
	<ol> <li>Review client history form with client; update or clarify information on subsequent annual visits</li> </ol>
	4. Perform CBE on women age 21 to 64 or older
	<ol> <li>Refer clients 40 years and older whose CBE is normal or benign for screening mammogram at one to two year intervals (Refer to Table 1, page 4.6)</li> </ol>
	<ol> <li>Perform pelvic exam on all women ages 21 to 49. Offer pelvic exam to women ages 50 to 64 or older</li> </ol>
	<ol> <li>Perform pap tests per SMHW/CDC protocols and intervals depending on age, previous screening cycle, presence of cervix, reason for hysterectomy, and previous pap result (page 4.7, Table 2 and 4.8 Table 3 guidelines)</li> </ol>
	<ol> <li>Schedule follow-up as needed. Refer clients with abnormal breast and cervical results for diagnostic exams as needed</li> </ol>
	9. Submit green history form and blue screening form

# Diagnostic Breast Services and Treatment Coordination

A mandatory component as a provider of the SMHW program is the responsibility for providing clinical case management of abnormal findings as well as reporting the abnormal findings, and the outcomes to the SMHW program on a timely basis.

The clinician, using current standards of practice and the established SMHW breast cancer screening protocols, determines abnormal findings clinical case management type and frequency.

#### **Provider Assurances**

### **Providers Must Ensure the Following**

#### **Suspicious or Abnormal Breast Results**

Clients with suspicious or abnormal breast results will receive the necessary case management as determined by the clinician based on current standards of practice for rescreening, diagnosis, and/or appropriate treatment. Clinicians will report data to SMHW. To meet the program requirements, two diagnostic tests must be completed after an abnormal CBE. In the event a second diagnostic test is not completed, include a detailed comment in the comment section of the breast (purple) form as to why a second diagnostic test was not completed.

# CDC60 days or less from result of suspicious for cancer screening to diagnosisStandard60 days or less from time of cancer diagnosis to start of treatment

#### **Breast Exception**

An exception in counting the number of days has been made for women referred into the program for diagnostic evaluation after an abnormal breast test result is received from a provider <u>outside</u> of the SMHW program. In this instance, the interval shall begin on the referral date for diagnostic testing rather than the date of the initial abnormal breast test.

#### **Determination of Screening Results**

Suspicious screening results will be determined as normal or abnormal through short-term rescreen or diagnostic procedures.

- Notify and explain to the client with abnormal findings the need for any additional diagnostic service(s).
- SMHW requires two documented attempts for client follow-up, if needed.
  - Direct telephone communication is the most effective contact.
  - If unable to reach client by telephone, a letter should be sent indicating there is need for additional diagnostic testing or treatment. For legal purposes, providers are encouraged to use a certified letter.
  - If no response is received after the second attempt or the client refuses further diagnostics and/or treatments, notify your RPC.

#### Pending Abnormal Screening Results

If abnormal screening results are pending for ten (10) months or longer, client eligibility must be re-checked and a new annual screening test must be performed before the initiation of further diagnostic studies. SMHW will only reimburse for additional diagnostic services if the client continues to meet SMHW eligibility guidelines.

- For clients referred to direct billing diagnostic providers (page 9.5), continue to track that the client receives/attends the scheduled appointments.
- For a client diagnosed with cancer, SMHW providers must provide the following information to SMHW:
  - Date treatment started
  - Type of treatment initiated
  - Name of the facility where treatment occurred

#### Note:

Contact the RPC in your area (pages 13.1-.2) with questions.

# **Rescreen Protocol**

#### CBE

- For the first occurrence of breast pain and tenderness, SMHW will only reimburse for an office visit for the CBE. SMHW does not reimburse for breast diagnostics for the first occurrence of breast pain/tenderness.
- A rescreen CBE can be performed after 14 days or within 10 months of an initial CBE with the first time reported pain /tenderness. Please see page 5.10, condition number four (4).
- A repeat CBE is an option as a rescreen, performed 14 days to 10 months after a CBE deemed suspicious for cancer and after the performance of appropriate diagnostic test confirms non-cancer diagnosis. If no prior SMHW documentation is submitted, it is acceptable to enter the first occurrence of pain/tenderness in the comments section of MOHSAIC.

#### Mammogram

- SMHW will pay up to four consecutive probable benign mammograms within two years. The standard recommendation for a probable benign mammogram is four consecutive six-month follow-ups (a complete cycle of two years). However, if during this follow-up cycle the test result is downgraded to a benign finding (Category II), additional follow-up is not required. If the result remains probably benign or upgraded to a higher category, another type of additional diagnostic testing must be performed within 60 days.
- A repeat mammogram is an option within ten (10) months if the previous mammogram reported to SMHW was a "Category 0, Need evaluation or film comparison". If "Category 0, Need evaluation or film comparison" is the result reported on a mammogram; film comparison, additional mammography, or ultrasound images are needed within 60 days. If possible, providers should not enter this result until the final result is available. However, if "Category 0, Need evaluation or film comparison" is noted on the blue screening form (pages 10.10-.11) providers should complete the film comparison or take additional images within 60 days. The film comparison result should be reported in the Comments section on the purple breast form (pages 10.12-.13) if the blue screening form has already been submitted. Additional imaging would also be reported on the purple breast form (pages 10.12-.13).

#### **Reporting Directions:**

If a client receives breast diagnostic procedures that recommend a rescreen mammogram or rescreen ultrasound (typically in six months), the current purple breast form (pages 10.12-.13) should be entered as "Work-up complete". When the rescreen mammogram is submitted it shall be on a blue screening form (pages 10.10-.11) entered as "Rescreen". Refer to the flowchart on page 5.9 on selecting the correct form type for entering of mammograms.

#### **New Breast Lump**

• For clients who received an annual SMHW screening that was normal, but later notes a new breast lump, SMHW will not cover the cost of the second office visit but will pay for the diagnostic testing if the CBE is abnormal. If the clinician does not find a lump and chooses to complete diagnostic testing as a result of the breast self-examination, SMHW will cover the cost of the diagnostics.

#### Ultrasound

• Ultrasound may be used as a rescreening tool when a mammogram is not appropriate. Rescreen must be less than ten months from original abnormal ultrasound screening.

#### Limitation:

SMHW will not reimburse for more than two consecutive ultrasound tests with the result of "probably benign" without further diagnostic testing planned within **60 days** (something other than ultrasound such as a specialist consult or biopsy). See page 5.16.

#### Reporting Directions:

If a client receives breast diagnostic procedures that recommend a follow-up/rescreen mammogram or ultrasound in six months, enter as "Work-up complete" on the current purple breast form (pages 10.12-.13). Submit the rescreen ultrasound on a purple breast form with "Rescreen ultrasound" box checked.

# **Specialist Consultation Guidelines**

A SMHW client may be referred for a specialist consultation following abnormal screening and diagnostic test results. Refer clients requiring a specialist consultation to a surgeon, OB/GYN specializing in breast and/or cervical health, or a physician or nurse practitioner who works for a cancer diagnostic or treatment center. Referral to the same screening examiner is not a specialist consult.

#### Limitation:

Reimbursement for breast and/or cervical specialist consultation following abnormal results is limited to one breast and one cervical referral per client in a contract year.

#### **Specialist Consultation Reminder**

• Retain a copy of the consult in the client's chart. Do not submit a copy to SMHW.

# Diagnostic Services Available

#### ATTENTION:

Complete breast diagnostic services within 60 days of an abnormal screen.

#### **DIAGNOSTIC SERVICES**

#### Breast Cancer

- Diagnostic mammogram (Digital or Conventional)
- Breast ultrasound
- Ductogram/Galactogram (single duct)
- FNA without pathology
- FNA clinical procedure plus pathology
- FNA deep tissue under guidance plus pathology
- Core needle biopsy
- Stereotactic biopsy
- Incisional biopsy
- Excisional biopsy
- Specialist consultation
- Facility fees
- General anesthesia\*

\*Only one (1) anesthesia fee reimbursement is paid for when performing multiple biopsies during the same operation.

\*Payment: Services are paid at an outpatient rate only. SMHW program reimburses for services as indicated on pages 9.7-9.12.

Protocols: The frequency and type of services are at the discretion of the clinician based on current standards of practice and on the protocols included on pages 5.10 - 5.18

# Guidelines for Breast Diagnostic Services

#### **CBE Suspicious for Cancer**

• Completely evaluate and appropriately refer women age 21 and older with a clinically suspicious lesion.

#### Non-palpable Mammography Abnormality

- Mammography results reported by a radiologist with reference to American Cancer Society (ACS) categories "Suspicious abnormality" (Category 4) or "Highly suggestive of malignancy" (Category 5) should be referred to a surgeon.
- "Additional Imaging Pending" (Category 0) should be followed by additional views, comparison of films and/or ultrasound within 60 days. If comparison of previous films is needed, only the final result of the comparison study should be reported. Providers who have already submitted reporting forms with the "Additional Imaging Pending" (Category 0) should enter results on the Breast Diagnosis and Treatment form in the Comments section.

#### Ultrasound

- Ultrasound may be recommended when the CBE is suspicious for cancer and mammogram is not appropriate.
- Abnormal ultrasound requires additional diagnostic imaging.
- Refer women whose results are Category 4 or Category 5 to the BCCT program with or without a biopsy.

#### **Breast Biopsies:**

#### Fine Needle Aspiration, Core Needle, Stereotactic, Incisional or Excisional

• The BSE, CBE and/or imaging mammogram/ultrasound must be suspicious for cancer and information submitted to SMHW before the program will reimburse for breast biopsies.

#### 3-D Mammography/Tomosynthesis

• SMHW will reimburse for clients who undergo 3-D mammography (Tomosynthesis).

### Guidelines for the Management of *Breast Self-Exam (BSE)* Reported Symptoms

	MOHSAIC Reporting Form: (Blue) Screening Form Section B1 and B2		
(1) Self-reported Lump	Option 1) Clinician to perform CBE and it is their discretion to follow in less than 60 days with 2 diagnostic tests per program guidelines:-Diagnostic mammogram, Specialist consult, or Ultrasound,-Breast biopsy		
	Option 2) Clinician to perform CBE and it is their discretion to follow in 14 days – 10 months with a rescreen CBE		
(2) Nipple Discharge (Especially unilateral spontaneous clear or	Option 1) Clinician to perform CBE and it is their discretion to follow in less than 60 days with 2 diagnostic tests per program guidelines:-Diagnostic mammogram,Ultrasound,Breast biopsy		
bloody drainage)	Option 2) Clinician to perform CBE and it is their discretion to follow in 14 days - 10 months with a rescreen CBE		
(3) Skin Changes (dimpling, retraction, new nipple inversion, ulceration or Paget's	Option 1) Clinician to perform CBE and it is their discretion to follow in less than 60 days with 2 diagnostic tests per program guidelines: - Diagnostic mammogram, - Specialist consult, or - Ultrasound, - Breast biopsy		
disease)	Option 2) Clinician to perform CBE and it is their discretion to follow in 14 days – 10 months with a rescreen CBE		
(4) Pain/Tenderness	If pain and tenderness are reported, the client may be followed with a rescreen CBE in 14 days to 10 months. If the client continues to report pain and tenderness twice, and breast cancer is a concern, it is the clinician's discretion for additional follow-up or 2 diagnostic tests per program guidelines, insert a statement in the comment section at the bottom of the screening form that additional diagnostics are being done following a second rescreen. If the client comes with a recent previous history of a documented pain or tenderness complaint, make a note in the comments when the physician documented the issue, and report it as a second occurrence of pain on the blue screening form. Please consult the RPC for your area for clarification.		
(5)	Example: Personal history of treated breast cancer. In this case, the client may receive a diagnostic mammogram annually.		
Other	Example: Known BRCA carrier. At this time, screening guidelines are not altered due to genetic predisposition for breast cancer.		
(6) Family History	At this time, screening guidelines are not altered due to a family history of breast cancer.		

# Guidelines for the Management of Clinical Breast Exam (CBE) Results

\*Indicates suspicious for cancer and requires additional follow-up in less than 60 days from the date of the abnormal CBE result.

MOHSAIC Reporting Form: Blue screening Form Sections B3 and B4		
(1) Benign Finding	Fibrocystic changes, diffuse lumpiness that is not clinically suspicious, clearly defined symmetrical thickening, tenderness, or nodularity palpated in the same location in both breasts Examples include: fibroadenomas, multiple secretory calcifications, oil cysts, lipomas, galactoceles, mixed-density hamartomas, intra- mammary lymph nodes, vascular calcification, implants, and architectural distortion related to previous surgery	CBE may be repeated in 14 days to 10 months. ( <b>NOT</b> eligible for SMHW reimbursed diagnostics with these results)
(2) *Discrete Palpable Mass	includes masses that may be diffuse, poorly defined thickening, asymmetric thickening/nodularity, cystic or solid	
(3) *Nipple Discharge	whether or not there is a palpable mass especially spontaneous unilateral, clear, serous, sanguineous or serosanguineous	Focal pain and tenderness can be evaluated at the clinician discretion. 2 diagnostic tests are to be performed per program guidelines (if something different is done, make a note in the comments section
(4) *Nipple Excoriation, Areolar Scaliness, or Erythema	(clinically suspicious of Paget's Disease)	of the form). <ul> <li>Diagnostic Mammogram</li> <li>Ultrasound</li> <li>MRI (SMHW does not reimburse for diagnostic MRI)</li> </ul>
(5) *Skin Changes	<ul> <li>dimpling; retraction; new nipple inversion/peau d'orange; ulceration; one breast lower than usual; prominent veins, unilateral; unusual increase in size, unilateral lymph nodes; also swelling of the upper arm.</li> <li>(clinically suspicious of Inflammatory Breast Cancer)</li> </ul>	<ul> <li>Breast Consult</li> <li>FNA</li> <li>Biopsy</li> <li>SMHW program does not reimburse for skin biopsy.</li> <li>Reassess clinical/pathology correlation if tissue biopsy results are benign. Also, consider repeating the biopsy.</li> </ul>
(6) *Abnormal clavicular, or axillary lymph nodes, or swelling of upper arm.	Enlarged, tender, fixed or hard palpable supraclavicular, infraclavicular or axillary lymph nodes, also swelling of upper arm.	

### Guidelines for the Management of a "Suspicious for Cancer" CBE and First Follow-up Test is a Diagnostic Mammogram

\*All diagnostic follow-up should be completed in less than 60 days from the date of the abnormal CBE page 1 of 2

\*If the <u>first</u> test following an abnormal CBE is a mammogram, no matter the mammogram result (Category 0-5), an additional, <u>different</u> type of diagnostic test <u>should</u> be completed within 60 days of the abnormal CBE result.

\*Use a diagnostic mammogram, rather than a screening mammogram, if a mammogram is preferred following an abnormal CBE.

The typical standard of care following an abnormal (suspicious for cancer) CBE when the first diagnostic test performed is a mammogram, is to complete another type of diagnostic test such as specialist consult, ultrasound, FNA, or tissue biopsy. If this protocol is not followed, justification of why a second test is not needed must be documented in the comment section at the bottom of the breast (purple) diagnostic form.

Mammogram Result Category 0 Assessment Incomplete		
Option 1 <b>Compare to Previous Films</b> (Enter Results on a Purple Diagnostic Form) If the comparison does not clinically clarify mammogram result to a specific category 1-5, should perform ultrasound or refer to a specialist and progress using program guidelines for breast follow-up as clinically indicated. (Note: It is preferable to hold purple MOHSAIC reporting form submission until comparison results can be entered on the initial form)	Option 2 Additional Diagnostic Mammogram Views (Enter Results on a Purple Diagnostic Form) If additional mammogram views do not clinically clarify result to a specific category 1-5, should perform ultrasound or refer to specialist and progress using program guidelines for breast follow-up as clinically indicated. (Note: Updates of the additional mammogram views should be submitted on a purple breast diagnostic MOHSAIC form) in the Comments section.	Option 3 Ultrasound (Enter Results on a Purple Diagnostic Form) If Ultrasound result does not clinically correlate to the CBE result, should refer to specialist and progress to other SMHW covered diagnostic tests and progress using program guidelines for breast follow-up as clinically indicated. (Note: Ultrasound result should be submitted on a purple breast diagnostic MOHSAIC form)
SMHW staff note that at times, the original screening pro	ram Result is Clarified from Category 0 to a Specerity Refer to Next Page for Follow-up Guidelines:	referred to another direct biller for further diagnostics, the
highly suspicious of cancer, please consider where the v	is duplication of services, when possible, to conserve funding, ser voman would go for treatment if she is found to have breast cance istance away and it would create a hardship for the client to travel	er and refer for the diagnostic mammogram as appropriate.

(Follow-up Guidelines for Mammogram results Categories 1-5 is on the next page.)

consideration.

# Guidelines for the Management of a "Suspicious for Cancer" CBE and First Follow-up Test is a Diagnostic Mammogram

\*All diagnostic follow-up should be completed in less than 60 days from the date of the abnormal CBE. page 2 of 2

\*If the <u>first</u> test following an abnormal CBE is a mammogram, no matter what the mammogram result is (Category 0-5), an **additional, different type of diagnostic test should be completed** within 60 days of the abnormal CBE result.

\* A diagnostic mammogram rather than a screening mammogram should be used if a mammogram is preferred following an abnormal CBE.

The typical standard of care following an abnormal (suspicious for cancer) CBE when the first diagnostic test performed is a mammogram, is to complete another type of diagnostic test such as specialist consult, ultrasound, FNA, screening MRI (prior approval by SMHW Manager), or tissue biopsy. If this protocol is not followed, justification of why a second test is not needed must be documented in the comment section at the bottom of the breast (purple) diagnostic form.

Mammogram Result Category 1 or 2 Negative or Benign	<b>Mammogram Result Category 3</b> Probably Benign Examples include non-calcified mass, focal asymmetry and cluster of round calcifications.	Mammogram Result Category 4 or 5 Suspicious Abnormality or Highly Suggestive of Malignancy
<ul> <li><u>Should</u> Perform Another type of Breast Diagnostic Testing (as clinically indicated) such as:</li> <li>Ultrasound</li> <li>Surgical Consult</li> <li>FNA</li> <li>Tissue Biopsy</li> <li>Screening MRI (obtain prior approval from SMHW manager)</li> </ul>	<ul> <li><u>Should</u> Perform Another type of Breast Diagnostic Testing (as clinically indicated) such as:</li> <li>Ultrasound</li> <li>Surgical Consult</li> <li>FNA</li> <li>Tissue Biopsy</li> <li>Screening MRI (obtain prior approval from SMHW manager)</li> </ul>	<ul> <li>Perform Ultrasound (if clinically appropriate) to quality client for BCCT <u>OR</u></li> <li>If Ultrasound is not clinically appropriate or US result is Category 1-3; perform a Breast Consult <u>AND</u> FNA or Tissue Biopsy as clinically indicated.</li> <li>(Note: It is preferable to qualify client for BCCT services by obtaining abnormal Ultrasound results of 4 or 5 rather than SMHW reimbursement for a biopsy – but if necessary, biopsy is payable by SMHW)</li> </ul>

Perform Follow-up per Guidelines as Listed Below:

Please Note: If clinician recommends other clinical protocol to be considered, please contact the SMHW RPC or the central office SMHW staff at toll-free 866-726-9926. The above are considered to be typical guidelines and not definitive practice standards appropriate for every situation. These guidelines address protocols that are reimbursable by the SMHW program. See provider manual for more specific information regarding covered services.

## Guidelines for the Management of Women Who Have Suspicious for Cancer CBE and First Follow-up Test Is NOT a Mammogram

	1	(Must offer 1 or more clinically appropriate tests below) Page 1 of 2		
	Category 1 (Negative) or Category 2 (Benign)	Diagnostic Referral based on CBE result.		
Ultrasound	Category 3 (Probably Benign)	<ul> <li>Clinician's discretion</li> <li>May proceed to Surgical Consult, FNA, or Biopsy within 60 days,</li> <li>May designate work-up complete and return to routine screening,</li> <li>May rescreen every 6 to 12 months for 1 to 2 years*</li> <li>May rescreen at shorter intervals if medically necessary</li> <li>*If there are more than two consecutive "probably benign" results, client must have follow-up with another type of diagnostic testing such as surgical consult, FNA or biopsy, or continue rescreening schedule.</li> </ul>		
	Category 4 (Suspicious Abnormality) or Category 5 (Highly Suggestive of Malignancy)	<ul> <li>Qualifies for BCCT (temporary eligibility) (SMHW should pay for the US.) Then the specialist consult and tissue biopsy can be performed through the BCCT program. Refer to Section 7 BCCT and complete and submit form on page 10.16.</li> <li>If tissue biopsy is positive for breast cancer, client qualifies for the BCCT MO HealthNet application for treatment eligibility. See Sectio 7. Complete and submit form on page 10.17.</li> </ul>		
	Category 0 (Assessment Incomplete)	Compare to previous films, complete additional mammogram views, or perform Ultrasound		
	Category 1 (Negative) or Category 2 (Benign)	Work-up may be complete if another test result is not suspicious for cancer		
Mammogram (Mammogram is <u>NOT</u> the first test following on observed CRE)	Category 3 (Probably Benign)	Clinician's discretion to proceed to Ultrasound, Surgical Consult, FNA, screening MRI (prior approval obtained from SMHW manage or Biopsy within 60 days <u>or</u> Designate work-up complete & may rescreen at 6-month intervals for the next 6-24 months* *If there are two consecutive "probably benign" results, client must have some other type of further diagnostic testing done such as surgical consult, FNA, or biopsy within 60 days of abnormal CBE result		
an abnormal CBE)	Category 4 (Suspicious Abnormality) or Category 5 (Highly Suggestive of Malignancy)	<ul> <li>Must proceed to Ultrasound, Surgical consult, FNA, or Biopsy</li> <li>If Ultrasound result is a Category 4 or 5, complete and submit form on page 10.16 before proceeding with further diagnostics. With these ultrasound results, clients will be eligible to receive any further diagnostic and treatment services through the MO HealthNet program as well as health care for other medical issues that may occur. MO HealthNet requires prior authorization for many procedures, including ultrasound.</li> </ul>		
		l, please contact your RPC. The above are typical guidelines and not definitive proactive standards for every situation. These guidelines ar y the SMHW program. <b>See provider manual for more specific information regarding covered services.</b>		

### Guidelines for the Management of Women Who Have Suspicious for Cancer CBE and First Follow-up Test Is NOT a Mammogram

		or more clinically appropriate tests below. Enter results on a purple breast form.) Page 2 of 2				
Specialist Consult	Category 1 (Negative) or Category 2 (Benign)	• Work-up may be complete if another test result is not suspicious for cancer				
	Category 3 (Probably Benign)	<ul> <li>Clinician's discretion to complete additional work-up if another test result is not suspicious for cancer <u>OR</u></li> <li>May designate work-up complete and may perform rescreen CBE within the next 6 -10 months</li> </ul>				
	Category 4 (Suspicious Abnormality) or Category 5 (Highly Suggestive of Malignancy)	• Typically determination is made to perform a FNA or Biopsy within 60 days of abnormal CBE result				
Fine Needle Aspiration	Negative	When clearly benign or negative, workup may be complete				
	Indeterminate	• Typically is followed by a surgical biopsy – or FNA may be repeated within 60 days of abnormal CBE result				
	Suspicious for Malignancy	Typically is followed by a surgical biopsy within 60 days of abnormal CBE result				
	Malignancy	<ul> <li>When cancer is clearly identified, refer to BCCT for treatment and report initial breast cancer treatment to RPC within days of diagnosis</li> <li>Refer client to full BCCT by submitting BCCT MO HealthNet Application form, (page 10.17) if not submitted previous</li> </ul>				
Biopsy Pathology Findings	Benign	<ul> <li>Work-up may be complete and/or clinician's discretion to perform a rescreen of any abnormal Mammogram/Ultrasouresults in 6-12 months for 1-2 years</li> </ul>				
	Benign Atypical or Indeterminate	Refer to Specialist: Possible Excisional Biopsy per surgeon/radiologist recommendation				
	Malignant or Ductal Carcinoma In Situ (DCIS)	<ul> <li>Refer to BCCT for treatment and report initial breast cancer treatment to RPC.</li> <li>Refer client to full BCCT by submitting the BCCT MO HealthNet Application form, (page 10.17) if not submitted previously.</li> </ul>

# Purple Breast Form

All forms are specific for each grant year. When submitting an electronic or a paper form, use the version of the form that is dated correctly to correspond with the date of service. At the beginning of each grant year there are multiple versions of this form in MOHSAIC. Click on the correct version when entering electronic forms. If using paper forms, check for the year of the form in the lower left corner.

#### NOTE:

Breast Diagnosis and Treatment Form, also referred to as purple form, is to collect complete follow-up information for all clients with abnormal breast screening results. **Please order blank forms from SMHW by calling toll-free at 866-726-9926 or 573-522-2845.** 

- The blue screening form must accompany or precede the purple breast form. A SMHW or a non-SMHW provider must base the diagnostic service on an abnormal screening result.
- Information from the purple breast form is required by CDC and is crucial for statistical reports and studies. All information received is confidential.
- The information on the original form shall be entered electronically in the MOHSAIC system. All reported information shall be filed in the client's record.
- MOHSAIC electronic forms can be accessed at <u>https://healthapps.dhss.mo.gov/smhw/</u>.
- A copy of the purple breast form is located in Section 10 Forms or download a copy at: http://health.mo.gov/living/healthcondiseases/chronic/showmehealthywomen/forms.php
- If you have additional questions, please call the RPC for the provider area or toll-free 866-726-9926 or 573-522-2845 for general assistance with central office staff.
- If you have questions or concerns regarding specific issues with MOHSAIC, contact the ITSD Help Desk by telephone at 800-347-0887 or by e-mail at <a href="mailto:support@health.mo.gov">support@health.mo.gov</a>.

#### Refer to Section 10, Forms Section or follow link to forms:

http://health.mo.gov/living/healthcondiseases/chronic/showmehealthywomen/forms.php.

# Alert Value Follow-Up

The MOHSAIC electronic reporting system has been programmed to produce lists of clients and the SMHW providers who reported abnormal, suspicious for cancer results. These lists are forwarded at least weekly to the RPCs. The RPCs check the MOHSAIC reporting system to determine if follow-up is reported timely. If no information is entered into MOHSAIC regarding the necessary follow-up, the RPC will contact the provider to ensure that follow-up has occurred and that it will be reported by the provider; or, if the provider or client is experiencing difficulty in completing the follow-up, the RPC will assist in contacting the client or in finding appropriate resources.

#### **SMHW Providers Shall**

- Implement some form of internal tracking and reminder system to ensure that SMHW clients who have abnormal breast test results suspicious for cancer receive further medical evaluation and treatment within **60 days**. This assures scheduling follow-up visits and procedures are completed timely. In addition, client attendance for appropriate follow-up needs to be monitored. If there is a missed appointment, reschedule the appointment and assist with removing barriers such as transportation difficulties.
- Implement some form of internal tracking and reminder system to ensure that women who have abnormal cervical test results receive further medical evaluation and treatment within 60 days. This ensures that scheduling follow-up visits and procedures are completed timely. In addition, client attendance for appropriate follow-up needs to be monitored. If there is a missed appointment, reschedule the appointment and assist with removing barriers to care, such as transportation.
- Promptly notify the RPC when a client is referred to BCCT in order to ensure timely and complete followup, complete and accurate tracking and documentation as such. Please report additional information to the RPC who can enter the information onto forms as needed, such as treatment of cancers found.
- SMHW requires two documented attempts for client follow-up, if needed.
  - Direct telephone communication is the most effective contact method.
  - If unable to reach client by telephone, a letter should be sent indicating there is need for additional diagnostic testing or treatment. For legal purposes, providers are encouraged to use a certified letter.
  - If no response after the second attempt or the client refuses further diagnostics and/or treatments, notify the RPC.
  - Utilize a tracking system to ensure that clients show up for scheduled visits and receive the appropriate diagnostic or treatment services.
  - If clients do not keep follow-up appointments, implement attempts to reach the client for rescheduling the appointment by telephone or by mail within **30 days**.
  - If the client is no longer reachable or attempts to contact the client fail, please inform the RPC for the provider area within **30 days**.

# **Abnormal Cervical Screening Results**

A mandatory component as a provider of the SMHW program is the responsibility for providing clinical case management of abnormal findings, as well as reporting the abnormal findings and the outcomes to the SMHW program on a timely basis.

The clinician, using current standards of practice and the established SMHW cervical cancer screening protocols, determines abnormal findings clinical case management type and frequency.

### **Providers must ensure the following**

### **Suspicious or Abnormal Cervical Results**

Clients with suspicious or abnormal cervical results will receive the necessary case management as determined by the clinician based on current standards of practice for rescreening, diagnosis and/or appropriate treatment, and clinicians will report data to SMHW.

# CDC60 days or less from a suspicious for cancer screening result to diagnosis.Standard60 days or less from time of CIN 2 or CIN 3/CIS diagnosis to start of treatment.

#### Pap Test Exceptions:

An exception to extend the diagnostic follow-up interval to 60 days for women with an abnormal pap test result of ASC-H or worse, including 'presumed abnormal' is allowable.

An exception in counting the number of days for women referred into the program for diagnostic evaluation after a received abnormal pap test result from a provider <u>outside</u> of the SMHW program is allowable. In this instance, the interval shall begin on the referral date for diagnostic testing rather than the date of the initial pap test.

### **Determination of Screening Results**

Suspicious screening results will be determined as normal or abnormal through short-term rescreening or diagnostic procedures.

- Notify and explain to the client with abnormal findings the need for any additional diagnostic service(s).
- SMHW requires two documented attempts for client follow-up, if needed.

Direct telephone communication has been shown to be the most effective contact.

If unable to reach the client by telephone, a letter should be sent indicating there is a need for additional diagnostic testing or treatment. For legal purposes, providers are encouraged to use a certified letter.

If no response is received after the second attempt or the client refuses further diagnostics and/or treatments, notify your RPC.

### Pending Abnormal Screening Results

If abnormal screening results are pending for ten (10) months or longer, client eligibility must be checked and a new annual screening test must be performed before the initiation of further diagnostic studies. SMHW will only reimburse for additional diagnostic services if the client continues to meet SMHW eligibility guidelines.

- For clients referred to direct billing diagnostic providers (Section 9 Billing Guidelines), continue to track that the client receives/attends the scheduled appointments.
- For a client diagnosed with cancer, SMHW providers must provide the following information to SMHW: Date treatment started

Type of treatment initiated

Name of the facility where the treatment occurred

# **Protocol for Rescreen**

Follow these guidelines in the instances where performance of a rescreen is needed.

### **Pelvic Examination**

• A repeat pelvic exam is optional as a rescreen in less than ten (10) months if the previous abnormal pelvic exam reported to SMHW was not within normal limits due to an abnormal <u>cervical</u> finding.

### Pap Test

- Reimbursement occurs only when pap test is following the ASCCP guidelines.
- SMHW does reimburse for HPV DNA genotyping.
- HPV DNA genotyping is not considered the same as HPV testing.
- HPV DNA-specific genotyping 16/18 is an ASCCP option that recommends being done with normal pap/HPV positive results to determine if further diagnostic follow-up is needed.
- Or, the provider can choose not to do genotyping and co-test (pap/HPV) in one year.
- Both are acceptable ASCCP options.

#### **Reporting Directions:**

Report a rescreen pap test on a blue screening form (pages 10.10) with the category "Rescreen" marked in the "Visit type" box.

- See link to ASCCP Guidelines on page 6.7.
- If rescreen results are suspicious for cancer, proceed with diagnostic procedures as indicated by ASCCP guidelines.

# **Specialist Consultation Guidelines**

A SMHW client may be referred for a specialist consultation following abnormal screening and/or diagnostic test results. Refer clients requiring a specialist consultation to a surgeon, OB/GYN specializing in breast and/or cervical health, or a physician or nurse practitioner who works for a cancer diagnostic or treatment center.

#### Limitation:

Reimbursement for cervical specialist consultation following abnormal results is limited to one cervical referral per client per contract year.

### **Specialist Consultation Reminder**

• Retain a copy of the consult in the client's chart. Do not submit a copy to SMHW.

### Not Considered a Specialist Consultation

- Referral to the same screening examiner **is not** a specialist consultation.
- Referral for the standard/routine follow-up, such as a colposcopy by a nurse practitioner for a LSIL, is not eligible for a specialist consultation. (The appropriate follow-up is known; therefore, referral for a specialist consultation to determine the management of the problem is not required).

#### Limitation:

If the provider requests reimbursement for a specialist consult on the same day as the colposcopy, information **must be** included in the comments as to why the specialist consult is being billed (i.e., a "cervical wash" was done to verify pap test results prior to proceeding to colposcopy). SMHW will not reimburse for the specialist consult if a rationale is not included and no additional procedure **is** completed.

# Diagnostic Services Available

#### ATTENTION:

Complete cervical diagnostic services within 60 days unless there is an exception.

### **Pap Test Exceptions**

- An allowable exception is to extend the diagnostic follow-up interval to **60 days** for women with an abnormal pap test result of ASC-H or worse, including "Presumed abnormal."
- An exception in counting the number of days has been made for women referred into the program for diagnostic evaluation after an abnormal pap test result is received from a non-SMHW provider. In this instance, the interval shall begin on the referral date for diagnostic testing rather than the date of the initial pap test.

#### LIMITATIONS FOR DIAGNOSTIC SERVICES

#### **Cervical Cancer**

- Colposcopy without biopsy
- Colposcopy with cervical biopsy
- Colposcopy with endocervical curettage (ECC)
- Cervical biopsy (polypectomy)
- Endocervical Curettage (ECC)
- Endometrial biopsy (NOTE: Colposcopy with endometrial biopsy can be reimbursed only if cervical and/or endocervical biopsies are performed during the colposcopy.)
- Conization may be done by:
  - Cold knife (refer client to BCCT/MO HealthNet if done as treatment)
  - LEEP will only be reimbursed by SMHW if being performed for continued diagnostic work-up (refer client to BCCT/MO HealthNet/ Medicaid if done as treatment)
- Specialist consultation

**Payment:** Paid services are at an outpatient rate only. SMHW program reimburses for services as indicated in Section 9 – Billing Guidelines.

**Protocols:** The frequency and type of services is at the discretion of the clinician based on current standards of practice and on the protocols included from ASCCP algorithms <u>http://www.asccp.org.</u>

# **Guidelines for Cervical Diagnostic Services**

If the repeat pap test is more than ten (10) months from the previous pap test, then the pap test should be part of a complete annual screening.

#### NOTE:

SMHW will not reimburse for more than two consecutive abnormal pap tests with a result of LSIL or ASC-US without further diagnostic testing, as recommended by the SMHW Advisory Board in July 2001.

### High-Risk Human Papillomavirus (HPV) Testing

- For five (5) years, the SMHW program will not reimburse for additional HPV testing if the initial pap result is negative.
- If the HPV is positive, refer to the ASCCP guidelines.

### **Cervical Conization**

- Conization by LEEP, or cold knife, is usually considered to be treatment and is covered by MO HealthNet BCCT. If colposcopy is inadequate, or the client is not eligible for BCCT, please call your RPC for additional instructions to meet the client's needs.
- All LEEP and cold knife procedures qualify for presumptive eligibility for Presumptive Eligibility BCCT with a pap test result of, HSIL, AGC or worse followed by a colposcopy or tissue pathology, even if the tissue pathology is benign/CIN I.

#### NOTE:

SMHW funding pays for the colposcopy; LEEP and cold knife are typically paid by BCCT funding.

Algorithms for Cervical Diagnostic Services are available for viewing at <u>http://www.asccp.org/Default.aspx</u>.

# Yellow Cervical Form

All forms are specific for each grant year. When entering an electronic or a paper form, use the version of the form that is dated correctly and corresponds with the date of service. At the beginning of each grant year there are multiple versions of this form in MOHSAIC. Click on the correct version when entering electronic forms. If using paper forms, check for the year of the form in the lower left corner.

#### NOTE:

The Cervical Diagnosis and Treatment Form (yellow cervical form – pages 10.14-.15) is to collect complete follow-up information for all clients with abnormal cervical screening results. Please order blank forms from SMHW by calling toll-free at 866-726-9926 or 573-522-2845.

- A blue screening form must accompany or precede the yellow cervical form. A SMHW or a non-SMHW provider must base the diagnostic service on an abnormal screening result.
- The CDC requires information from the yellow cervical form and is crucial for statistical reports and studies. Keep all information confidential.
- Enter the information on the original form into the MOHSAIC system. File all reported information in the client's record.
- Access MOHSAIC electronic forms at <a href="https://healthapps.dhss.mo.gov/smhw/">https://healthapps.dhss.mo.gov/smhw/</a>.
- A copy of the yellow cervical form is located on pages 10.14-.15 or download a copy at: <u>http://health.mo.gov/living/healthcondiseases/chronic/showmehealthywomen/forms.php</u>
- If you have questions or concerns regarding specific issues with MOHSAIC, contact the ITSD Help Desk by telephone at 800-347-0887 or by e-mail at support@health.mo.gov.

# ASCCP Algorithms are available online in PDF format in English and Spanish. Visit <a href="http://www.asccp.org/screening-guidelines">http://www.asccp.org/screening-guidelines</a>.

The 2019 ASCCP Risk-Based Management Consensus Guidelines for the Management of Abnormal Cervical Cancer Screening Tests and Cancer Precursors are available online at <a href="http://www.asccp.org/guidelines">http://www.asccp.org/guidelines</a>. This is an additional reference tool when the ASCCP Algorithms directs you to "Manage per ASCCP Guidelines."

# Alert Value Follow-up

The MOHSAIC electronic reporting system produces lists of clients and the SMHW providers who reported abnormal, suspicious for cancer results. The RPCs receive these lists at least weekly. The RPCs check the MOHSAIC reporting system to determine if follow-up is timely. If no information is entered into MOHSAIC regarding the necessary follow-up, the RPC will contact the provider to ensure that follow-up has occurred and that it will be reported by the provider; or, if the provider or client is experiencing difficulty in completing the follow-up, the RPC will assist in contacting the client or in finding appropriate resources.

### SMHW providers shall

- Implement some form of internal tracking and reminder system to ensure that SMHW clients who have abnormal <u>breast</u> test results suspicious for cancer receive further medical evaluation and treatment within 60 days. This ensures that scheduling follow-up visits and procedures are complete and timely. In addition, client attendance for appropriate follow-up needs to be monitored. If there is a missed appointment, reschedule the appointment and assist with removing barriers such as transportation difficulties.
- Implement some form of internal tracking and reminder system to ensure that women who have abnormal <u>cervical</u> test results receive further medical evaluation and treatment within 60 days. This ensures that scheduling follow-up visits and procedures are complete and timely. In addition, monitor client attendance for appropriate follow-up. If there is a missed appointment, reschedule the appointment and assist with removing barriers such as transportation.
- Promptly notify the RPC via e-mail, telephone, or fax when a client is referred to Presumptive or Full BCCT in order to ensure timely and complete follow-up, complete and accurate tracking and documentation as such. Please report additional information to the RPC who can enter the information as needed, such as treatment of cancers found.
- SMHW requires **two** documented attempts for client follow-up.

Direct telephone communication is the most effective contact method.

If unable to reach client by telephone, a letter **must** be sent indicating there is need for additional diagnostic testing or treatment. For legal purposes, providers are encouraged to use a certified letter. If no response after the second attempt or the client refuses further diagnostics and/or treatments, notify your RPC.

Utilize a tracking system to ensure that clients show up for scheduled visits and receive the appropriate diagnostic or treatment services.

If clients do not keep follow-up appointments, implement attempts to reach the client for rescheduling the appointment by telephone or by mail within **30 days**.

If the client is no longer reachable or attempts to contact the client fail, please inform the RPC for that provider's area within **30 days**.

### Cervical situations that require follow-up within 60 days include:

- "Diagnostic work-up planned" is marked on any of the reporting forms for abnormal <u>cervical</u> findings.
- "**Referred for diagnostic testing**" is marked on the blue screening form or the yellow <u>cervical</u> form for abnormal cervical findings.
- Yellow cervical forms that are marked with "**abnormal suspicious for cancer results**" or are marked as "**positive for <u>cervical</u> cancer**", require the "Status of Final Diagnosis section B" to be completed.

Any diagnostic result on the diagnostic form that has an "\*" in Section B requires a Final Diagnosis be marked in Section C.

Final Diagnostic Results in Section B or C that indicate malignancy need to have Section D Cervical Treatment completed with the status of treatment, type of treatment, treatment facility, and date treatment started inserted.

#### NOTE:

If clinician recommends other clinical protocol to be considered, please contact the SMHW RPC or the central office SMHW staff toll-free at 866-726-9926. ASCCP guidelines are considered to be typical guidelines and not definitive practice standards appropriate for every situation.

# MO HealthNet BCCT Act

MO HealthNet Breast and Cervical Cancer Treatment Act	7.1
Basic BCCT Act Eligibility Guidelines	7.2
<ul> <li>BCCT Temporary MO HealthNet Authorization Letter (Presumptive Eligibility)</li> <li>BCCT MO HealthNet Application (Extended BCCT coverage) Extending MO HealthNet Treatment Eligibility beyond the presumptive period</li> <li>Instructions to Transfer a client from another state BCCT Program</li> </ul>

Covered Services	
SMHW Provider Responsibilities	7.7
SMHW Regional Program Coordinator BCCT Responsibilities	7.8
Family Support Division Responsibilities	7.9

## MO HealthNet Breast and Cervical Cancer Treatment Act

Beginning in October 2000, signed federal legislation allows funded programs in the NBCCEDP to participate in the MO HealthNet BCCT Act. In July 2001, Governor Bob Holden signed legislation authorizing matching funds for Missouri to participate in the Missouri Medicaid program, now known as the MO HealthNet program, effective August 28, 2001. (State Statute RSMo Section 208.151 [25] is available at <a href="https://revisor.mo.gov/main/OneSection.aspx?section=208.151&bid=47992&hl=208.151.%u2044">https://revisor.mo.gov/main/OneSection.aspx?section=208.151&bid=47992&hl=208.151.%u2044</a>.)

Most women who receive a SMHW paid screening and/or diagnostic service, and are found to need treatment for breast and/or cervical cancer or a precancerous condition, may be eligible for BCCT in Missouri.

Once a client is enrolled into BCCT, they are qualified for full MO HealthNet benefits, as well as medical services for cancer care. Please note there is also transportation assistance available for the client enrolled in BCCT. Eligibility criteria for MO HealthNet are based on need. Details for BCCT are at <a href="http://dss.mo.gov/mhd/general/pages/about.htm">http://dss.mo.gov/mhd/general/pages/about.htm</a>.

# **Basic BCCT Act Eligibility Guidelines**

Those who are eligible for the BCCT program **must be enrolled** in the SMHW program prior to tissue biopsy and have screening or diagnostic test paid by SMHW.

- A Missouri resident.
- A female.
- Under the age 65.
- Social Security Number; and
- Citizenship or Qualified Alien Status.
- Diagnosed with breast and/or cervical cancer or cervical precancerous condition through SMHW,
- Need treatment for breast and/or cervical cancers or precancerous conditions as listed below.

#### NOTE:

Routine monitoring by a physician does not qualify as treatment.

#### **BREAST CANCER DIAGNOSIS**

Requires a tissue biopsy diagnosed by a pathologist with one of the following

- Ultrasound result of "suspicious abnormality" (BI-RADS category 4) or "highly suggestive of malignancy" (BI-RADS category 5)
- Carcinoma in situ
- Invasive breast cancer

**NOTE:** If there is not a breast cancer diagnosis after a performed biopsy, the client will no longer be eligible for BCCT and will return to SMHW.

#### **CERVICAL CANCER DIAGNOSIS**

Requires a tissue biopsy diagnosed by a pathologist with one of the following to be eligible for BCCT:

- CIN 2/moderate dysplasia
- CIN 3/severe dysplasia
- CIS or AIS
- Invasive cancer

*Note:* Clients with a pap result of High-grade Squamous Intraepithelial Lesion (HSIL), Squamous Cell Cancer, or Atypical Glandular Cells (AGC) are eligible for Presumptive Eligibility, and requires a colposcopy tissue biopsy. Bill the colposcopy to SMHW for reimbursement.

### BCCT Temporary MO HealthNet Authorization Letter Presumptive Eligibility

The BCCT Temporary MO HealthNet Authorization letter (page 10.16 or download at: <u>http://www.health.mo.gov/living/healthcondiseases/chronic/showmehealthywomen/forms.php</u>), also referred to as presumptive eligibility (PE), provides temporary and immediate full MO HealthNet benefits. Clients must meet basic BCCT eligibility guidelines (above) to qualify for PE.

MO HealthNet determines the date PE begins. Typically, PE coverage begins on the date of the procedure or diagnostic test that indicate either a precancerous condition or cancer of the breast and/or cervix by tissue pathology that determined the client is eligible for BCCT (pages 7.2-.3).

In order for a SMHW client to obtain PE, e-mail the completed BCCT Temporary MO HealthNet Application (page 10.16) to the MO HealthNet Service Center, Greene County Family Support Division (FSD) (page 7.4). The client receives a copy of the BCCT Temporary MO HealthNet Authorization Letter. An additional copy is retained for the client's record. Notify the RPC of eligible clients. This procedure allows for minimal delays for women in receiving the necessary treatment indicated.

Submit the previously noted documentation for MO HealthNet to determine the date PE begins. PE coverage continues until the earlier of the following dates:

• The last day of the month following the PE decision, if the client does not submit an application for regular BCCT MO HealthNet coverage (page 10.17)

OR

• The date the client is determined ineligible or eligible for BCCT MO HealthNet.

### BCCT MO HealthNet Application (Extended BCCT coverage) Extending MO HealthNet Treatment Eligibility beyond the presumptive period

For evaluation of continued MO HealthNet coverage, submit the (extended) BCCT MO HealthNet Application form for medical assistance to the FSD's MO HealthNet Service Center at time of cancer diagnosis.

The client must meet the basic BCCT guidelines (page 7.2) and:

- Have a Social Security number,
- Be uninsured or underinsured for breast or cervical cancer treatment,
- Show proof of citizenship/alien status, and
- Submit a completed, signed (extended) BCCT MO HealthNet Application form to the MO HealthNet Service Center via Greene County FSD.

#### **MO HealthNet Service Center**

FSD Customer Relations Unit 101 Park Central Square Springfield, MO 65806

E-mail: <u>MRT.ProcessingCenter@dss.mo.gov</u> Fax: 573-526-9400

It is important for providers to assist clients in completing and e-mailing the Missouri BCCT MO HealthNet Application for medical assistance as soon as possible (refer to page 10.17). SMHW providers e-mail a copy of the application/temps/etc. to <u>MRT.ProcessingCenter@dss.mo.gov.</u> The forms will then be forwarded to the appropriate person. E-mailing the forms are preferable, if unable to utilize e-mail, please fax the form to 573-526-9400 and mail the paper copies to 101 Park Central Square, Springfield, MO 65806. Please see the address listed to the right. Application related questions can be addressed by calling 888-275-5908.

Upon review of the application, and if the client is determined eligible for BCCT MO HealthNet coverage, full MO HealthNet benefits will continue until the treating physician determines treatment for the breast or cervical cancer is complete.

#### **Copies of the BCCT forms are located in Section 10 or downloadable at:** http://www.health.mo.gov/living/healthcondiseases/chronic/showmehealthywomen/forms.php

NOTE:

Routine monitoring by a physician does not qualify as treatment.

Clients determined ineligible for BCCT medical assistance may receive, with prior authorization from SMHW, a cervical conization by LEEP or cold knife.

### Instructions to Transfer a client from another state BCCT Program:

- The client should complete the Full BCCT MO HealthNet Application Form (page 10.17)
- Complete the Certification of Need for Treatment Form (pages 10.18-.19)
- Provide the clinic's name and telephone number as contact information to MO HealthNet. Information is used to verify enrollment in the Breast and Cervical Program of that state.
- E-mail all documentation to MO HealthNet Service Center at <u>MRT.ProcessingCenter@dss.mo.gov.</u>

#### OR

• Fax, if necessary, to 573-526-9400, and mail all paper copies to:

FSD Customer Relations Unit 101 Park Central Square Springfield, MO 65806

# MO HealthNet Treatment Services Covered

### **Covered Services**

- Cervical conization
- LEEP or cold knife if a client received a pap test diagnosis of HSIL or worse, or colposcopy test diagnosis of moderate dysplasia or worse
- Incisional and/or Excisional breast biopsy if ultrasound result is category 4 (suspicious abnormality) or category 5 (highly suggestive of malignancy)
- Incisional and/or Excisional breast biopsy if fine needle aspiration, core needle, or stereotactic biopsy result is malignant
- Breast Cancer Treatment is indicated including chemotherapy, surgery, radiation, and breast reconstruction
- All other MO HealthNet covered medical services, including services not related to the breast or cervical cancer

#### NOTE:

MO HealthNet services may be subject to prior authorization procedures and limitations. Full MO HealthNet benefits will continue until the treating physician determines treatment for cancer is complete.

# **SMHW Provider Responsibilities**

### **SMHW Providers will:**

- Notify client of diagnosis and recommended follow-up (preferably in person). If a specialist is treating the client, ensure that the client received the diagnosis and recommended follow-up.
- Explain the BCCT program and application processes to the client.
- Determine the client's presumptive eligibility; complete the BCCT Temporary MO HealthNet Authorization letter (page 10.16).
- E-mail the letter to the FSD's MO HealthNet Service Center within five days of BCCT qualifying test results or diagnosis.
- When MO HealthNet coverage is needed beyond the temporary PE period, assist the client in completing and signing the (extended) Missouri BCCT MO HealthNet Application (page 10.17) or download at:

http://www.health.mo.gov/living/healthcondiseases/chronic/showmehealthywomen/forms.php. Ensure:

- The client receives a copy of the completed application form.
- A copy of the completed form is retained in the client's medical record.
- Verify dates included on eligibility documents are correct before sending to MO HealthNet Service Center.
- Submit the application to the MO HealthNet Service Center for application evaluation as soon as possible after cancer diagnosis.
- FSD's MO HealthNet Service Center shall evaluate the application of each client for other MO HealthNet programs the client may be eligible to receive.
- Notify the SMHW RPC of clients who become eligible for the BCCT MO HealthNet Treatment program. The RPC will track the treatment provider's name, date that the client's treatment regimen started and the type of treatment initiated.
- Ensure entry of the client's history and abnormal screening forms into the MOHSAIC reporting system prior to submitting the BCCT application forms. Utilize the Department Client Number (DCN) assigned to the client when entering the SMHW green history form (page 10.8-.9) into MOHSAIC.
  - This number serves as the MO HealthNet client number for the temporary PE letter and the full BCCT application for benefits.
- Submit date treatment was initiated, type of treatment that was started, and name of treatment provider by completing Section D on the purple breast form, and/or Section D on the yellow cervical form.
- Check the "yes" box in Section A of the SMHW purple breast or yellow cervical form(s) when BCCT services initiated.

#### NOTE:

A FSD Certification of Need for Treatment Form (BCC-2, page 10.18) may be given to a treating clinician by the patient for additional information. This form is necessary for the continued coverage of the patient by the BCCT program.

# SMHW Regional Program Coordinator BCCT Responsibilities

### **Regional Program Coordinators will:**

- Check with client to assess status of the client's cancer treatment upon request from FSD's MO HealthNet.
- Assure treatment initiated and documented in MOHSAIC.
- Inform FSDs MO HealthNet of the following:
- Follow-up biopsy result that does not document cancer diagnosis. In these cases, typically the PE BCCT has been issued for results of ultrasound category 4, category 5, or for HGSIL Pap smear result and the biopsy obtained during the PE timeframe is benign. No treatment is needed, so the extended full BCCT application does not need to be approved,
- Continue to track client's BCCT treatment status and plan of care for breast and/or cervical cancer. MO HealthNet eligibility ends when treatment for the breast and/or cervical cancer is completed. After the MO HealthNet eligibility end date is documented, SMHW annual services can be offered to the client if all areas of eligibility are met,
- Date client gains insurance coverage,
- Date client moves out of state,
- Date client is determined lost to follow-up after documented attempts by the provider and RPC to inform and assist client with barriers to care, or
- Date client refuses care (signed waiver form or certified letter returned).

# Family Support Division Responsibilities

### Family Support Division will:

- Enter BCCT Temporary MO HealthNet Authorization letter for presumptive eligibility in the FSD system upon receipt from SMHW provider.
- Enter Missouri BCCT MO HealthNet Application for medical assistance into the FSD system upon receipt from client or the SMHW provider.
- Determine MO HealthNet eligibility for breast and/or cervical cancer treatment and other MO HealthNet programs.
- Report eligibility determination result to the client and the appropriate SMHW provider or RPC.
- After establishment of MO HealthNet approvals for breast and/or cervical treatment, track client's need for continued treatment and continued enrollment in MO HealthNet.
- Request the treating physician's plan of care for breast and/or cervical cancer treatment.
- Utilize SMHW RPC for assistance, if needed.
- Terminate breast and/or cervical cancer treatment eligibility after treatment is completed.
- Notify client and SMHW provider or RPC of termination of breast and/or cervical cancer MO HealthNet treatment eligibility.
- Provide tracking for initial treatment type and date to the SMHW RPC.

Direct questions concerning MO HealthNet treatment for SMHW to SMHW toll-free 866-726-9926 or 573-522-2845 OR State of Missouri FSD MO HealthNet Service Center Toll-free 888-275-5908 http://dss.mo.gov/fsd/

# **Performance Indicators**

uality Assurance	2
Quality Assurance Follow-Up	
Quality Assurance Provider Expectations	
Client Rights	
Intake and Eligibility Guidelines	
Screening and Diagnostic Protocols	
Clinic Management	
MHW Quality Assurance Form8.	5

# **Performance Indicators**

The CDC evaluates the SMHW program's ability to meet established core program performance indicators. Performance indicators are evaluated from the Minimum Data Elements (MDEs) submitted by DHSS every October and April. MDEs are standardized data elements that provide consistent information on patient demographics, screening results, education, diagnostic procedures, and treatment information. Collect MDEs on women screened and/or diagnosed with program funds. Obtain MDE data from the history, assessment, screening, and diagnostic reports entered into the MOHSAIC system.

SMHW CORE PROGRAM PERFORMANCE INDICATORS									
Indicator Type	Program Performance Indicator								
Screening	Initial program pap/HPV tests for never screened or not screened in the last 10 years	≥ 35%							
	Abnormal screening results with complete follow-up	$\geq 90\%$							
	Abnormal pap screening results (ASC-H or worse, including 'presumed abnormal'); time from screening to diagnoses > 60 days	≤ <b>25%</b>							
Cervical Cancer Diagnostic Indicators	Treatment started for diagnosis of high-grade squamous intraepithelial lesion (HSIL), cervical intraepithelial neoplasia (CIN) CIN 2, CIN 3, carcinoma in situ (CIS), Invasive	≥ 90%							
	HSIL, CIN 2, CIN 3, CIS; time from diagnosis to treatment > 60 days	≤ 20%							
	Invasive carcinoma; time from diagnosis to treatment > 60 days	≤ 20%							
	Abnormal screening results with complete follow-up	$\geq 90\%$							
Breast Cancer	Abnormal screening results of clinical breast exam (CBE), mammogram or ultrasound; time from screening to diagnosis > 60 days	≤ <b>25%</b>							
Diagnostic Indicators	Treatment started for breast cancer	$\geq 90\%$							
	Breast cancer; time from diagnosis to treatment > 60 days	≤ 20%							

# Quality Assurance

The goal of the Quality Assurance (QA) program component is to ensure that appropriate services are provided to each client and that program funds are utilized as required by program protocols. QA activities ensure high-quality medical standards of care are provided to women receiving SMHW and WISEWOMAN screenings, diagnostic and education services, as well as referrals for treatment when appropriate.

DHSS monitors and evaluates the quality and appropriateness of client care using the following QA activities:

- Incorporating data edits in the MOHSAIC electronic reporting system that limit the reporting of inappropriate and inaccurate client service records.
- Reviewing electronically submitted client service reports for compliance to standards of care prior to approval for reimbursement.
- Tracking alert values (abnormal testing results) to ensure clients receive appropriate diagnostic services and access to treatment, if needed.
- Performing initial on-site QA monitoring at each new SMHW and WISEWOMAN provider six months after first client is served and every two years thereafter. Scheduled QA monitoring occurs at any time deemed necessary by DHSS staff because of questionable reports (page 8.5).
- Providing training and technical assistance to providers to improve quality of care based on results of QA monitoring.
- Evaluating client and provider expectations.

### **Quality Assurance Follow-up**

At the time of the provider's on-site review, technical assistance is provided by the RPC to clarify or demonstrate any points of confusion. After the on-site review, follow up with a post-review letter describing any areas needing improvement. Follow-up may be conducted to review success in instituting the recommended improvements. If the RPC determines a provider has consistently not met the program's clinical standards, the provider is asked to complete a corrective action plan. Typically, the RPC conducts another review in six (6) months to ensure implementation of the corrective plan and the provider is working to resolve the problem.

### **Quality Assurance Provider Expectations**

QA monitoring will monitor providers' compliance with the following expectations:

### **Client Rights**

- Privacy
- Confidentiality
- Access to test results
- Follow-up of medical problems through referrals, diagnosis and treatment
- Client will not be held financially responsible if identified as a SMHW client
- Access to an interpreter
- Treatment per Civil Rights Act
- Treatment per Americans with Disabilities Act

### Intake and Eligibility Guidelines

- Staff knowledge of SMHW/WISEWOMAN eligibility guidelines
- Procedure to screen and identify clients
- Annual review of clients for continued eligibility

### **Screening and Diagnostic Protocols**

- Screening includes pelvic exam, pap test, CBE, and mammogram, if appropriate
- Standards and protocols for follow-up
- Procedure to track clients with abnormal results, including:
  - Name of client
  - Test
  - Date test completed or missed appointments rescheduled
  - Results and that client is notified of results
  - Referrals including tracking that appointments were kept or rescheduled
  - Follow-up visit dates, if needed
  - Documentation of complete Plan of Care/Treatment to include facility, treatment start dates and treatment type
  - Disposition of client status regarding follow-up, refusals of treatment or diagnostic testing recommended. Report to the RPC problems with missed appointments, lost to follow-up or refusals, promptly

### **Clinic Management**

- Staff is trained and familiar with provider guidelines
- Policy and procedures are in place for billing and filing forms
- Procedure to track amount of program funds is in place
- Maintain professionally licensed or certified staff to perform program activities
- Notify SMHW Central Office including RPC of staffing changes promptly regarding the need for provider or rescinding clinic staff MOHSAIC access and to schedule SMHW training for new hires
- Track clients who receive screening and diagnostic results to provide complete case management from the initiation of care to the end of the plan of care
- If missed appointments or refusals of follow-up recommendations occur, make attempts to contact the client to reschedule and let the RPC know about situations regarding missed or refused follow-up
- The facility is clean with appropriate space for screening
- There is an in-house plan for quality checks at regular intervals
- Provide Navigation Services for women who have not been screened.
  - A minimum of two documented client visits, and
  - A completed navigation form in the record is required.

# Billing Guidelines June 30, 2024

The billing guidelines for the DHSS SMHW and providers outlined in this section are effective June 30, 2024.

ATTENTION:						
Providers are responsible for tracking their funding amounts. When 80 percent of the provider total for SMHW funds is expended, contact the SMHW office to request an amendment to increase funding.						
Fax Request To:	573-522-3023					
E-mail To:	SMHW Manager					

### **Provider Reimbursement Guidelines**

The guidelines for provider reimbursement are in accordance with the Breast and Cervical Cancer Mortality Prevention Act of 1990, Public Law 101-354. Congress amended the NBCCEDP Public Law 10-354 in 1993 to create the WISEWOMAN Program. The conditions and requirements are:

- DHSS/SMHW is the payor of last resort,
- DHSS reimbursements are considered payment in full,
- Service providers and their subcontractors shall not charge the client for **any** screening/diagnostic services reimbursable by DHSS,
- DHSS clients shall not be charged any administrative fees,
- When services other than the breast and cervical cancer screenings/diagnostics are performed, and/or the WISEWOMAN cardiovascular risk assessment, documentation shall be provided that verifies the client was notified in advance of these services and their cost, and
- DHSS will cover only outpatient services.

### **Reasons for Denial**

**Resubmission for denied service will only be considered one time.** Submit questions pertaining to client's data reporting form for service denied/adjusted to the DHSS by telephone toll-free at 866-726-9926 or fax to 573-522-3023. Denial will be explained or reconsidered.

No further resubmission will be accepted after the second denial.

### Providers will not receive reimbursement under the following circumstances:

- Services are provided to ineligible women
- Standards outlined in the Provider Manual as stated in Sections 4, 5 and 6 are not met Examples:
  - Rescreen CBE after diagnostic work-up will not be reimbursed unless the original screening CBE was abnormal.
  - Rescreen pap test does not follow ASCCP guidelines.
- Breast and/or cervical screening services are incomplete
- Mammography, ultrasound and/or pap test results are reported as unsatisfactory. In the case of unsatisfactory results, the test must be repeated and the results reported to SMHW
- Required client and completed reporting forms are not submitted to SMHW within **90 days** of service, with the exception of filing with client's insurance, which must be submitted within 30 days from receipt of the Explanation of Benefits (EOB)
- If information is submitted after the closing date for grant year, it cannot be reimbursed by SMHW/WISEWOMAN or billed to client

### **Insurance Guidelines**

- If the client has insurance, the provider shall first bill the client's insurance company for services received.
- Women who meet the SMHW guidelines and have private insurance or enrolled in PPOs, but who are financially unable to pay the deductible or co-payment, are eligible for SMHW.
- The client's insurance **must** be billed first; then include the insurance payment amount made to the facility for the covered procedures in the "Comments" section on reporting forms when billing DHSS. SMHW will only reimburse up to the total amount allowed for the procedure per program guidelines. The total amount allowed and reimbursed by SMHW for each CPT includes any payments received from insurance, not in addition to insurance payments.
- In MOHSAIC, under comments, please indicate what insurance provider paid for each procedure in detail by SMHW Approved CPT Code and descriptive line item. For example, \$68.23 for pathology (CPT 88305), \$120.97 for mammogram, (CPT 77067) and \$468.54 for percutaneous breast biopsy with stereotactic guidance (CPT 19081). Show Me Healthy Women procedures will only reimburse at the contracted program amount which is based on current MEDICARE reimbursement rates (Missouri 01).
- Provider must retain a copy of documentation of the EOB, deductibles or co-payment requirements in the client's chart along with a copy of the client's insurance card. It is the responsibility of the provider to keep a copy of the insurance EOB in the clients' files for quality monitoring.
- The payment received by Show Me Healthy Women is based on Show Me Healthy Women contract rates, **not** the rate of a commercial insurance company, or public. Show Me Healthy Women payment is NOT based on the clients' out- of -pocket responsibility as stated in the insurance EOB. SMHW payment is determined based on the amount the insurance carrier pays the provider for each procedure/CPT code.
- SMHW Providers and their subcontractors **cannot bill** a SMHW client for any SMHW/WW services.
- Women enrolled in prepaid/managed care and health plans (such as HMOs, POS and MO HealthNet Managed Care [formerly MC+]) are not eligible for SMHW services.
- For additional information about clients with insurance, refer to page 3.2.

#### NOTE:

SMHW will only reimburse up to the total allowed by SMHW for that procedure. The total amount allowed and reimbursed by SMHW for each CPT includes any payments received from insurance, not in addition to payment received.

## Administrative Referral Fee

An administrative referral fee is billable for the following:

- When a SMHW client receives a screening from a clinician that is not a SMHW provider, the SMHW provider must submit to the program the patient history and screening forms containing the screening results from the non-SMHW provider as "Reporting Only"
- Administrative referral fee will be paid one time per client, per provider, during an annual screening cycle
- Direct billing providers may bill an administrative referral fee if the client was referred from another provider for a screening mammogram or diagnostic services

 Bill the administrative referral fee on the blue screening form (pages 10.10-.11) or diagnostic forms (pages 10.12-13).

#### NOTE:

If your facility bills SMHW for the screening, you cannot bill for the administrative referral fee. The reimbursement fees for SMHW office visits include the fee to complete paperwork and reimbursable once per annual screening cycle.

# **Direct Billing Diagnostic Providers**

SMHW has agreements with the following medical entities, referred to as direct billing diagnostic providers, to provide diagnostic services:

- Barnes Jewish Hospital, St. Louis—St. Louis City
- Barnes Jewish Hospital, St. Peters-St. Charles County
- Bothwell Regional Health Center—Pettis County
- Breast Healthcare Center (Missouri Baptist Hospital), St. Louis—St. Louis County
- Golden Valley Memorial Hospital, Clinton—Henry County
- Missouri Delta Medical Center, Sikeston—Scott County
- SSM DePaul Hospital, Bridgeton—St. Louis County
- SSM Health St. Clare Hospital, Fenton—St. Louis County
- SSM St. Joseph Health Center (breast only), St. Charles—St. Charles County
- SSM St. Mary's Health Center, Richmond Heights-St. Louis County
- Mercy Hospital, St. Louis (David C. Pratt Cancer Center) (breast only)—St. Louis County
- Saint Louis University Cancer Center, St. Louis—St. Louis City
- Ste. Genevieve County Memorial Hospital, Ste. Genevieve—Ste. Genevieve County
- University Health Truman Medical Center—Hospital Hill, Kansas City—Jackson County
- University Health Lakewood Medical Center—Lakewood, Kansas City—Jackson County
- University of Missouri Hospital and Clinics—Ellis Fischel Cancer Center, Columbia—Boone County

# Mammography Van Billing Guidelines

Mammography van screen should coordinate with a clinical breast exam performed by a SMHW provider in order to meet quality care guidelines and program requirements. When billing for a mammogram only performed on a mammogram van, select the visit type as "Mammogram Only", mark the "Mammogram Van" box and complete "Section B5 Mammography provider facility" field. Include the name of the facility providing the van and include the word "Van" by the facility name. Example: Ellis Fischel Van.

Note: SMHW program reimburses the office visit of the provider performing the CBE for clients who have or had a mammogram on a mammography van. Each SMHW client should be referred to a primary care physician (PCP) for a CBE. (See Direct Billing Diagnostic Provider Responsibilities on page 9.6).

# Screening/Referring Provider Responsibilities

The screening/referring provider shall:

- Verify the client's eligibility for SMHW services according to the SMHW guidelines to include a signed and dated eligibility form (page 10.6).
- Assure that new SMHW clients complete a green history form (pages 10.8 [English] -10.9 [Spanish]).
- Complete/enter the blue screening form (pages 10.10-.11) with the screening results.
- Mammography Van, if a client presents at the mammography van and has not had a clinical breast exam (CBE) continue with screening services but refer them for primary care services so a CBE can be obtained. Document in Section D of the screening form.
- Call and make the appointment for the client with the direct billing diagnostic provider. Transmit copies of the enrollment history, eligibility form, and screening forms to the direct billers.
- Submit the green history and blue screening form information to SMHW as soon as possible with the appropriate billing or reporting-only information. If not, delayed payment for both screening and diagnostic services may occur.
- Share copies of the client's notations and procedures with the referring practitioner.

# **Direct Billing Diagnostic Provider Responsibilities**

The direct billing/diagnostic provider shall:

- Retain copies of the screening provider's information in their files. The copies should include the screening results, client eligibility form, and history form.
- Provide the necessary diagnostic services.
- Complete a purple breast form (pages 10.12-.13), or a yellow cervical form (pages 10.14-.15), or a blue screening form (pages 10.10-.11), if a screening mammogram was performed. Submit data to SMHW.
- Send copies of the medical and pathology reports back to the referring screening provider. To ensure appropriate follow up, document the client has been notified of their results and maintain this information in the client's medical record.

The direct billing and screening provider shall coordinate case management services of SMHW clients. Interruption of timely diagnostic services occurs with missed appointments. Reschedule missed appointments promptly.

# Breast & Cervical Reimbursement Rates by CPT Code

### June 30, 2024 to June 29, 2025

A CPT code followed by TC indicates technical component. A CPT code followed by the number 26 indicates professional fee component. All payments are based on Missouri Medicare 01 Rates.

### PATIENT NAVIGATION FORM

Patient Navigation	G9012	\$ 60.00	Other specified case management service not elsewhere classified. <i>Must follow CDC guidelines as an individualized intervention for eligible patients.</i> <i>Follow SMHW guidelines for navigation in the SMHW</i>
Nuvigation			Follow SMHW guidelines for navigation in the SMHW
			Provider Manual, Section 12.

### SCREENING REPORT FORM

	CPT Codes	SN	IHW Rate	Description
<b>Referral Fee</b>		\$	30.00	Only one per client, per year, when office visit not paid
Office Visits	99203	\$	107.16	New patient – office visit – <i>detailed</i> history, detailed exam, decision-making; 30-44 minutes (initial)
	99202	\$	69.22	New patient – office visit – <b>expanded</b> problem-focused history, and expanded problem-focused exam, straightforward-decision-making; 15-29 minutes, (initial-CBE only)
	99212	\$	54.18	Established patient–office visit – <b>expanded</b> problem history and exam, straightforward decision-making; 10- 19 minutes (for repeat pap test and CBE)
	99212A	\$	54.18	Established patient – office visit – 10-19 minutes (CBE only annual)
	99213	\$	87.28	Established patient – office visit – <b>expanded</b> history, exam, straightforward decision-making; 20-29 minutes (annual screening that includes CBE and pelvic exam)
Mammography	77067	\$	120.97	Screening mammogram, bilateral (2 view film study of each breast with computer aided detection) (#77067TC \$86.36/ #7706726 \$34.60)
	77066	\$	150.05	Mammography, diagnostic follow-up, bilateral with computer aided detection (#77066TC \$104.77/ #7706626 \$45.28)
	77065	\$	118.55	Mammography, diagnostic, digital, unilateral with computer aided detection (#77065TC \$81.69/ #7706526 \$36.86)
Tomosynthesis	77063	\$	49.61	Screening digital breast tomosynthesis, bilateral. Must be listed separately in conjunction with CPT code #77067 (#77063TC \$22.44, #7706326 \$27.17)

	G0279	\$	45.25	Diagnostic digital breast tomosynthesis unilateral or bilateral. Must be listed separately in conjunction with either code #77065 or code #77066 (G0279TC \$18.082, G027926 \$27.17)
Pap Smear & HPV	88164	·		Cytopathology (conventional pap test) slides, cervical, or vaginal reported in Bethesda System, manual screening under physician supervision
	88142	\$	20.26	Cytopathology (liquid-based pap test), cervical or vaginal, collected in preservative fluid, automate thin layer preparation; manual screening under physician supervision
	87624	\$	35.09	Infectious agent detection by nucleic acid (DNA/RNA) Human Papilloma Virus (HPV), high risk type
	87625	\$	40.55	HPV, types 16 and 18 only. Reflex test

**Addendum**: HPV DNA testing is a reimbursable procedure if used in conjunction with pap testing or for follow-up of an abnormal pap result or surveillance as per ASCCP guidelines.

The CDC will allow for reimbursement of Cervista HPV HR at the same rate as the Digene Hybrid-Capture 2 HPV DNA Assay. The CDC funds cannot be used for reimbursement of genotyping (e.g., Cervista HPV 16/18).

#### Screening MRI: High Risk\* Only

# An MRI *must be* authorized in advance of the procedure. Authorization is determined on an individual basis.

Breast MRI can be reimbursed by the NBCCEDP in conjunction with a screening mammogram when a client has a breast cancer gene (BRCA) mutation, a first-degree relative who is a BRCA carrier, or a lifetime risk of 20 to 25 percent or greater as defined by risk assessment models such as BRCAPRO. Breast MRI **should never be done alone** as a breast cancer screening tool. Breast MRI will not be reimbursed by the NBCCEDP to assess the extent of disease in a woman who is already diagnosed with breast cancer.

Magnetic Resonance Imaging (MRI)	77048	\$ 326.44	MRI, breast, with and/or without contrast, unilateral (Reimbursement for breast MRI only in conjunction with a mammogram when a client meets the criteria.) See criteria listed below. <i>Must be preauthorized on an</i> <i>individual basis in advance of the procedure.</i> (#77048TC \$231.03/ #7704826 \$95.41)
	77049	\$ 333.31	MRI, breast, with and/or without contrast, bilateral (Reimbursement for breast MRI only in conjunction with a mammogram when a client meets the criteria.) See criteria listed below. <i>Must be preauthorized on an individual</i> <i>basis in advance of the procedure.</i> (#77049TC \$228.85/ #7704926 \$104.47)

### **BREAST FORM**

	CPT Codes	SN	IHW Rate	Description
Referral Fee		\$	30.00	Only once per client, per year, when office visit not paid (Can be on any form – but one time, per client, per year)
Mammography	77065	\$	118.55	Mammography, diagnostic, digital, unilateral with computer aided detection (#77065TC \$81.69/ #7706526 \$36.86)
	77066	\$	150.05	Mammography, diagnostic follow-up, bilateral with computer aided detection (#77066TC \$104.77/ #7706626 \$45.28)
Tomosynthesis	G0279	\$	45.25	Diagnostic digital breast tomosynthesis unilateral or bilateral. Must be listed separately in conjunction with either code #77065 or code #77066 (G0279TC \$18.08, G027926 \$27.17)
Ultrasound	76641	\$	97.23	Ultrasound, complete examination of breast including axilla unilateral (#76641TC \$63.92/ #7664126 \$33.31)
	76642	\$	80.63	Ultrasound, limited examination of breast including axilla unilateral (76642TC \$49.58/ #7664226 \$31.05)
Ductogram	77053	\$	51.11	Mammary ductogram or galactogram, single duct (#77053TC \$34.62/ #7705326 \$16.49)
Specialist Consultation	99204	\$	160.90	Specialist consultation for breast; (New patient: <i>detailed</i> history, exam, straightforward decision-making; 45-59 minutes)
Fine Needle Aspiration	10021	\$	96.58	Fine needle aspiration biopsy without imaging guidance first lesion
	10005	\$	128.14	Fine needle aspiration biopsy with Ultrasound guidance first lesion
	10007	\$	287.13	Fine needle aspiration biopsy with Fluoroscopic guidance first lesion
	10009	\$	402.55	Fine needle aspiration biopsy with CT guidance first lesion
	10011	\$	402.55	Fine needle aspiration biopsy with MRI guidance first lesion
	10004	\$	50.38	Fine needle aspiration biopsy without guidance each additional lesion
	10006	\$	57.62	Fine needle aspiration biopsy with Ultrasound guidance each additional lesion
	10008	\$	133.92	Fine needle aspiration biopsy Fluoroscopic guidance each additional lesion
	10010	\$	222.65	Fine needle aspiration biopsy with CT guidance each additional lesion

	10012	\$ 222.65	Fine needle aspiration biopsy with MRI guidance each additional lesions
	88172	\$ 53.17	Cytopathology, evaluation of fine needle aspirate; immediate cytohistologic study to determine adequacy of specimen(s) (#88172TC \$20.28/ #8817226 \$32.89
	88173	\$ 158.74	Cytopathology, evaluation of fine needle aspirate; interpretation and report (#88173TC \$93.56/ #8817326 \$65.18)
Percutaneous Biopsy (Core Needle & Stereotactic)	19100	\$ 142.08	Breast biopsy, percutaneous, needle core, not using imaging guidance
	19100	\$ 66.64	Outpatient facility setting
	19081	\$ 468.54	Breast biopsy, with placement of localization device and imaging of biopsy specimen, percutaneous; stereotactic guidance; first lesion
	19081	\$ 154.94	Outpatient facility setting
	19082	\$ 358.51	Breast biopsy, with placement of localization device and image of biopsy specimen, percutaneous; stereotactic guidance; each additional lesion
	19082	\$ 77.64	Outpatient facility setting
	19083	\$ 466.68	Breast biopsy, with placement of localization device and image of biopsy specimen, percutaneous; ultrasound guidance; first lesion
	19083	\$ 146.54	Outpatient facility setting
	19084	\$ 352.72	Breast biopsy, with placement of localization device and image of biopsy specimen, percutaneous; ultrasound guidance; each additional lesion
	19084	\$ 73.11	Outpatient facility setting
	88305	\$ 68.23	Surgical pathology, gross and microscopic examination (#88305TC \$33.37/ #8830526 \$34.86)
		\$ 525.00*	Facility fee, core needle biopsy when done in an outpatient facility setting
		\$ 735.00*	Facility fee, stereotactic breast biopsy when done in an outpatient facility setting
		\$ 735.00*	Facility fee, ultrasound guided breast biopsy when done in an outpatient facility setting
Incisional Breast Biopsy	19101	\$ 314.15	Breast biopsy, open, incisional (no guidance)
	19101	\$ 216.27	Outpatient facility setting
	76098	\$ 40.43	Radiological examination, surgical specimen (#76098TC \$25.89/ #7609826 \$14.54)

		<b>-</b>		
	88305	\$	68.23	Surgical pathology, gross and microscopic examination (#88305TC \$33.37/ #8830526 \$34.86)
		\$	288.75	General anesthesia (loss of ability to perceive pain associated with loss of consciousness produced by intravenous or inhalation anesthetic agents)
		\$	1,155.00*	Facility fee, incisional breast biopsy, when done in an outpatient facility setting
Excisional Breast Biopsy	19120	\$	501.67	Excision of cyst, fibroadenoma or other benign or malignant tumor, aberrant breast tissue, duct lesion, nipple or areolar lesion; open; one or more lesions
	19120	\$	405.97	Outpatient facility setting
	19125	\$	553.06	Excision of breast lesion identified by preoperative placement of radiological marker; open; single lesion
	19125	\$	449.25	Outpatient facility setting
	19126	\$	154.32	Excision of breast lesion identified by preoperative placement of radiological marker, open; each additional lesion, separately identified by a preoperative radiological marker
	19281	\$	228.14	Placement of breast localization device, percutaneous; mammographic guidance; first lesion
	19281	\$	93.48	Outpatient facility setting
	19282	\$	160.68	Placement of a breast localization device, percutaneous; mammographic guidance; each additional lesion
	19282	\$	46.90	Outpatient facility setting
	19283	\$	244.40	Placement of breast localization device, percutaneous; stereotactic guidance; first lesion
	19283	\$	94.46	Outpatient facility setting
	19284	\$	177.85	Placement of a breast localization device; percutaneous; stereotactic guidance; each additional lesion
	19284	\$	47.23	Outpatient facility setting
	19285	\$	343.00	Placement of breast localization device, percutaneous; ultrasound guidance; first lesion
	19285	\$	79.90	Outpatient facility setting
	19286	\$	279.21	Placement of a breasts localization device, percutaneous; ultrasound guidance; each additional lesion
	19286	\$	40.11	Outpatient facility setting
	76098	\$	40.43	Radiological examination, surgical specimen (#76098TC \$25.89/ #7609826 \$14.54)
	88307	\$	271.93	Surgical pathology, gross and microscopic examination; requiring microscopic evaluation of surgical margins (#88307TC \$195.51/ #8830726 \$76.42)

	\$ 288.75	General anesthesia (loss of ability to perceive pain associated with loss of consciousness produced by intravenous or inhalation anesthetic agents)
	1,732.50*	Facility fee, excisional breast biopsy, when done in an outpatient facility setting
88341	\$ 85.68	Immunohistochemistry or immunocytochemistry, per specimen; each additional single antibody stain procedure (#88341TC \$59.54/ #8834126 \$ 26.14)
88342	\$ 100.26	Immunohistochemistry or immunocytochemistry, per specimen; initial single antibody stain procedure. (#88342TC \$67.66/#8834226 \$32.60)

#### NOTE:

Facility fees include \$125.00 for supplies and miscellaneous costs.

\* This amount applies when performed service is in an outpatient facility setting and an additional facility fee is charged.

### **CERVICAL FORM**

CPT Codes	SMHW Rate		Description	
	\$	30.00	Only once per client, per year, when office visit not paid (Can be on any form – but one time per client per year)	
99204	\$	160.90	Specialist consultation for cervix; (New patient: <i>detailed</i> history, exam, straightforward decision-making; 45-59 minutes)	
57452	\$	122.08	Colposcopy of the cervix	
57454	\$	163.18	Colposcopy of cervix, with biopsy and endocervical curettage (Endometrial biopsy can only be paid as pathology.)	
57500	\$	146.49	Cervical biopsy, single or multiple, or local excision of lesion, with or without fulguration (separate procedure)

The Missouri Department of Health and Senior Services invites you to take part in the Show Me Healthy Women Project (SMHW). If you qualify, you will receive your breast and cervical cancer examinations free. If your test results are not normal, this clinic will work with SMHW and/or Department of Social Services to help you obtain additional tests and, if needed, treatment.

#### **Income/Insurance Information** (*Please check all that apply.*)

Are you receiving: Unemployment insurance  $\square$  WIC  $\square$  TANF  $\square$  Food stamps  $\square$  Mcdicare Part A  $\square$  and/or Part B  $\square$  Mcdicaid  $\square$  Have you applied for Mcdicaid  $\square$ 

Do you have health insurance?	Yes □ No□
Does your insurance have a deductible?	Yes 🗆 No 🗋
Can you pay the deductible?	Yes 🗆 No
Is your health insurance an HMO?	Yes 🗆 No 🗆

#### **CLIENT AGREEMENT**

I have not supplied documentation of household income. I declare my household income is within SMHW present income guidelines. (If applicable, please initial)

I have received the income guidelines and I qualify for the SMHW.

A staff person has informed me which tests the SMHW program covers.

I understand that the SMHW services will be available to me at no cost.

I understand that my health is my responsibility. I am responsible for keeping my appointments.

- I need to contact this clinic for my test results.
- I understand that no test is 100% accurate.

I have read or had the above read to me. I agree that all the information above is correct.

As a client receiving services funded by SMHW, your protected health care information will be shared with appropriate staff at the Department of Health and Senior Services and other agencies as required by the federal funding source. I acknowledge that I have been given a copy of the Missouri Department of Health and Senior Services Notice of Privacy Policies and have been told where I can obtain any subsequent revisions to this Notice. If this document is signed by the guardian or Durable Power of Attorney for Health Care (DPOA-HC), attach a copy of the Letters Appointing the Guardian or a copy of the Durable Power of Attorney for Health Care.

MISSOURI DEPARTMENT OF SOCIAL SERVICES FAMILY SUPPORT DIVISION BCCT TEMPORARY MO HEALTHNET AU DO NOT mail to address on form. DO MAIL the application as quickly as possible to: FSD Customer Relations Unit 101 Park Central Square Springfield, Missouri 65806 FAX: 573-526-9400
You are eligible for Tempor HealthNet based upon your Missouri Show Me Healthy Women program screening result our temporary coverage will continue until a decision is made on your eligibility for on-going HealthNet coverage. MO HealthNet can pay for medical services only when the medical provine you use accepts MO HealthNet payments.
An application for MO HealthNet based upon your need for breast or cervical cancer treatment is enclosed. Please complete the application and mail it to the Family Support Division's (FSD) Buchanan County office as quickly as possible. If you fail to complete and return the enclosed application by the last day of next month, your MO HealthNet coverage will end.
You will receive a white MO HealthNet card in approximately five days. Until you receive your white card, use this letter when you go to your doctor, pharmacy or other medical service provider. If you have questions about MO HealthNet providers or how to get MO HealthNet services, please contact the county FSD office of your residence.
If you have any questions pertaining to continuing medical eligibility, please contact the county FSD office of your residence or Missouri Family Support Division's MO HealthNet Service Center, toll free number at 1-888-275-5908.

#### CERTIFICATION OF NEED FOR TREATMENT - BREAST/CERVICAL CANCER

<u>Purpose</u>: To provide a signed statement from the diagnosing/treating physician as to the date of the diagnosis and/or the length of time treatment will be for breast or cervical cancer. This form is used to tell the eligibility specialist the date of diagnosis and the time limit the treatment will last for the claimant.

Number of Copies and Distribution: Complete on copy of the form in ink or type and file in the case record.

#### Instructions for Completion:

The following parts of this form are to be completed by the eligibility specialist prior to sending to the treating physician:

- Patient Name
- · Patient's Date of Birth
- Patient's MO HealthNet Number (DCN)
- · Address of where to send the completed form

The form is then sent to be completed by the diagnosing/treating physician.

If initially applying for BCCT through a county office, the physician must certify the following:

- · Date of diagnosis, and either
- Need for treatment, or
- · If currently receiving treatment, the estimated date the current course of treatment will end.

Upon receiving the completed BCC-2, the eligibility specialist will set a priority based on the patient status:

- · Initial application with diagnosis only-Set priority to check on treatment status in three (3) months; or
- Active case-Set priorities as needed to redetermine whether treatment is still needed for breast or cervical cancer. Priorities are based on the date the current course of treatment is expected to end.

Yellow Cervical Diagnosis and Treatment Form	
MOHSAIC Access	11.3
Navigating MOHSAIC	11.8
Lesson 1: The CLIENT	
Lesson 2: Financial	

## **Overview of Client Forms for MOHSAIC Entry**

Providers entering on-line information are not required to fill out paper forms but must have documentation of the information submitted to the Missouri Health Strategic Architectures and Information Cooperative (MOHSAIC) in the client files for quality assurance (QA) review.

Access the Patient History, Screening Report, Breast Diagnosis and Treatment, Cervical Diagnosis and Treatment, and Client Navigation forms online at:

https://health.mo.gov/living/healthcondiseases/chronic/showmehealthywomen/forms.php. Alternatively, call 866-726-9926.

All forms contain a 'Comment' section at the bottom of the form. This is used for additional notes on the client or procedures entered by the provider or DHSS staff. Explanations should be kept brief as space is limited. Comments are not mandatory, but helpful to retain information not covered in the form. Providers **must submit** completed client forms within 60 days of service.

If waiting for insurance reimbursement/approval forms, do not submit complete billing until the amount insurance paid is available. See page 9.3 for Insurance Guidelines.

### **Green Patient History Form**

The Patient History form (**green form**, pages 10.8-.9) shall be completed by each client at the initial screening visit and at every annual screening thereafter. The provider shall enter the green history form into MOHSAIC when reporting the initial screening visit and update the information each year, as needed. Enter **the green history form into MOHSAIC** <u>before</u> entering any other form.

### **Blue Screening Report**

A completed Screening Report form (**blue form**, pages 10.10-.11) shall be submitted at the initial, rescreen, and annual screening for all clients participating in SMHW. Document the first mammogram a client receives on the screening report.

### **Purple Breast Diagnosis and Treatment Form**

The Breast Diagnosis and Treatment form (**purple form**, pages 10.12-.13) shall be fully completed for all clients with abnormal breast cancer screening results that require further diagnostic procedures and/or treatment. If needed, diagnostic service(s), date of service(s), results of diagnostic service(s), final diagnosis, and treatment (date, type and place) are also required on the purple form. This information is crucial for the successful follow-up and/or treatment of all clients with abnormal screening results.

### Yellow Cervical Diagnosis and Treatment Form

The cervical Diagnosis and Treatment form (**yellow form**, pages 10.14-.15) shall be fully completed for all clients with abnormal cervical cancer screening results that require further diagnostic procedures and/or treatment. If needed, diagnostic service(s), date of service(s), results of diagnostic service(s), final diagnosis, and treatment (date, type, and place) are also required on the yellow form. This information is crucial for the successful follow-up and/or treatment of all clients with abnormal screening results.

## **MOHSAIC** Access

MOHSAIC is an online data system used to collect and manage client service records for the SMHW and WISEWOMAN programs.

MOHSAIC also tracks funding allocations and expenditures and is linked to the Statewide Advantage for Missouri (SAM II) accounting system for reimbursing providers. Prior to reimbursement, SMHW and WISEWOMAN staff review all submitted forms to ensure client services meet program standards.

SMHW must submit Minimum Data Elements (MDE) reports to the Centers for Disease Control and Prevention (CDC) from the MOHSAIC reporting data forms.

### How to apply for access to MOHSAIC

To apply for access to MOHSAIC, applicants will need to follow the instructions on the following pages.

# AUTOMATED SECURITY ACCESS PROCESSING (A.S.A.P)

# REQUESTING ACCESS TO SHOW ME HEALTHY WOMEN

# **STEP A. Creating A.S.A.P User profile**

(This step is to be completed only once per user.)

#### Please read.

- If you have an ASAP profile already and know your login credentials, please skip to Step B (submitting the request)
- If you are unsure you have an ASAP profile, here are a few steps to determine that
  - If you already have an LPHA e-mail account, DHSS health applications and/or DSS prod/mainframe access, you mostly likely have an ASAP profile.
  - If you try to create an ASAP profile and you receive a red message indicating that first name and last name is already in use, please contact the ITSD Call Center at 800.347.0887 for assistance. This most likely means you have an ASAP profile and the call center can assist with profile updates, password resets, logging into ASAP, and/or submitting requests.

#### Creating A.S.A.P User profile

- Open Internet Browser and enter address <u>http://webapp02.dhss.mo.gov/asap\_web/ASAPLogin.aspx</u>
- Click "Yes" to any security messages

Steps	Screen Print
1. Click the <b>NEW USER</b> option	Defails from 1       Fast Born 1       Ask and 1         State Howard       DEPARTMENT OF HEALTH AND SENIOR SERVICES         a.s.a.p.       automated security access processing         DHSS Home >> asap_oreb >> ASAPLogin

# Navigating MOHSAIC

### Lesson 1: The CLIENT

This is for the Provider or MOHSAIC Customer. In this lesson, learn how to:

- Develop a new password
- Log onto the SMHW application
- Search for existing clients
- View Medicaid information
- Register new clients

### Steps to Access the MOHSAIC Application and Log onto the SMHW Application

#### Log-in Process

Open the Internet browser and enter the Web address on the address line: <u>https://healthapps.dhss.mo.gov/smhw/</u>.

- If this is the first time to login, a password must be established:
  - Use the username and assigned password provided to you by e-mail from SMHW, when approved. User name is usually the first five letters of last name and first name initial. Initial password is first and last name initials and last four digits of SSN.
  - Click on 'Change Password.'
  - If you do not login to MOHSAIC for 30 days, the system will 'lock out.' You must call the ITSD Help Desk at 800-347-0887 to unlock and enter new password.
  - After a password is established, the program will ask to change your password every 30 to 60 days. This can be numbers, letters, or a combination, as desired. Password requires six (6) to eight (8) characters and one numeric value.
- Once logged in, your agency name will appear and stay constant throughout the application.
- Click the 'Login' button to proceed.

## **Entering or Viewing a Client**

The main screen for the SMHW program appears. To enter or view a client:

- Click on the 'Client' link on the menu bar
- Choose 'Submit New Forms/Billing'

Current Client: None Selected Current: N	User:	BETA08
WELCOME TO MOHSLIC		
🗿 Done	ntranet	

### **Client Search**

In 'Submit New Forms/Billing' screen under the 'Client Information' section, choose either to 'Search and Select' or 'Register a New Client.'

Type the Social Security Number (SSN) with no spaces or hyphens; the Departmental Client Number (DCN) or the last and first name of the client separated by a comma (Example: Doe, Jane). **Do not click return –** wait until drop down menu appears.

If the screen returns more names than the screen will hold, use the scroll down bar to see the full screen. If there are more than 15 names on the screen use the double arrow at the bottom of the screen to proceed to the next search result screen.

## Searching for Current Client

If the client name appears, then select the correct name by clicking on it. Verify the name by checking the date of birth (DOB) and DCN number, if available. The client may be in the system with multiple names. Choose the name of the client as she presents to you. If not available, select one and then correct with 'Update Client Information.'

The client information screen will display the client demographic information. If any information is missing, add the correct information in the 'Update Client Information' screen.

If the client name is not in the database, this screen will say 'No Results Found'. Press the tab key to continue.

# **Address Verification**

If the system does not recognize the address, 'Address Verification' will pop up. If the address is correct, enter the county and click "save." Or change the address to a valid address and click save.

If the county and address match the database, the pop-up box will turn orange. If not, and both fields are correct, call SMHW at 866-726-9926 to request an address fix. Normally this fix will be done overnight.

Please remember when pulling up or entering another client under client demographics, **verify** the client address and other personal information is correct. We have encountered several forms that were entered for a different client, but only the client name was changed. This leads to duplicate records in the system and results in errors on the data submitted to CDC. **Until a software programming change is complete, please make sure the date of birth and SSN are correct for the client form being entered.** 

## **Entering Provider and Form Type Information**

On the 'Provider Information' section, select either 'Regular' or 'Direct Billing'. If 'Direct Billing' is selected, a referring provider must be entered. Type in the provider's name and select the appropriate provider. If 'Regular Billing' is selected, a referring provider is not necessary.

When entering information in this section is complete, proceed to the next section - 'Form Type/Version.'

This section has two parts: a) when one of the forms is selected, the version will be filled in and b) during the first few months of the new grant year, there could be multiple versions. By default, the software automatically selects the version based on the present date. To enter a form with a different date of service, select a different version from the drop down box.

#### **Filling Out a Form**

The name is displayed before entering the data. The form on the screen is the same as the paper form. Fill in the form and click the 'Submit' button at the bottom of the screen to submit/save.

To fill in the forms use the mouse, tab key, or the space bar. To use the mouse, click on the drop down arrow and then select the appropriate choice. If using the mouse for buttons, just click inside the circle. All forms work the same way.

- If content of the drop down box is known, then tab to the empty field and type the first letter. The word will appear.
- Tab to the next field.
- When tabbing and encountering a square radio button, hit the space bar to fill it in.
- Tabbing to a radio button will automatically fill in the circle when highlighted.

## How to Complete 'Reporting Only' Process

EXAMPLE: A client who is eligible for SMHW diagnostic services is referred from an outside provider. The client has had a breast or cervical screening/diagnostic that is suspicious for cancer. Cancer diagnosis by a tissue biopsy is unconfirmed.

- Verify client eligibility
- Have client sign SMHW Client Eligibility Agreement form
- Complete green History form
- Enter data into MOHSAIC from green History form
- Enter the abnormal screening information on the blue Screening form as Reporting Only.

#### Screening Report Form

If a SMHW provider performs additional breast/cervical procedures, enter the data and check the appropriate visit type.

If no SMHW screening services are provided by a SMHW provider, check the appropriate 'Visit Type' and check the 'Referral Fee' box if requesting the \$20 referral fee. Provider reimbursement is for the referral fee only, not an office visit.

Report any other outside diagnostic procedures completed prior to enrollment on the appropriate diagnostic form as 'Reporting Only' and report SMHW follow-up procedures as usual.

#### Lesson 2: Financial

In Lesson 2, learn how to:

- Check provider contract information
- Check daily summary of forms submitted
- Review pay status of forms

#### **Provider Contract Information**

When clicking the 'Provider Contract Information' the financial information is automatically displayed. This screen tracks and displays the amount of funding given, amount billed, amount paid, and amount available. The billed amount subtracts from the amount available upon submission.

If this information does not correspond with your records, contact the SMHW billing coordinator at 866-726-9926. SHMW encourages you to monitor/track your funds through your internal system.

#### **Daily Summary of Forms Submitted**

Click on the 'Daily Summary of Forms Submitted' and then click on the month and day to display. Click the arrows on the month bar to change the month and then select the day to display. This will display the client's financial information by type, date and amount.

Clicking on 'Display Full List to Print' will display the screen for sending to the default printer. Clicking on the 'Print Listing' button will generate a print job. Choose the printer on the print screen and click print. If a printout is not needed, click the 'Close' button to return to the main screen.

#### **Review Pay Status of Forms**

Searching for all records submitted or for a specific client is possible. There are four form status types:

- Submitted by Provider,
- Approved,
- Released to Finance for Payment, and
- Check Mailed.

Each indicates a different step in the review and payment process.

Searching for a client will display all forms submitted for that client and the pay status. Click on 'Form Status' to view all clients under the criteria or click multiple items to display all the selections. (Example: 'Check Mailed')

Entering the date range will display all forms status for the range. Click the 'Search' button to display results.

# **Patient Navigation**

#### **Patient Navigation**

The CDC's National Breast and Cervical Cancer Early Detection Program (NBCCEDP), defines Patient Navigation as individualized assistance provided to women to overcome barriers and facilitate timely access to quality screening and diagnostic services, as well as initiation of timely treatment for those diagnosed with cancer.

Navigation focuses on clients who otherwise would not complete recommended screening or diagnostic testing because of personal barriers, limited access to health services and other significant barriers to completing screening and diagnostic services. For clinic guidance on navigation services see Patient Navigation Services Guidance later in this section.

All women enrolled in the SMHW program must be assessed for their need for patient navigation services and provided with such services accordingly. SMHW providers complete the MOHSAIC Patient Navigation form for women enrolled in the SMHW program to reflect the assessment of barriers and actions taken for barrier reduction to achieve completed screenings.

Patient navigation must meet the CDC's following six (6) requirements:

- 1. Written assessment of individual patient barriers to cancer screening diagnostics/initiation of treatment
- 2. Provision of education and support for the patient
- 3. Resolution of barriers to obtaining cancer screening/diagnostics/initiation of treatment
- 4. Tracking of the patient to assure completed screening/diagnostics/initiation of treatment
- 5. A minimum of two (2), preferably more, patient contacts
- 6. Data collection and data review in aggregate to evaluate outcomes of patient navigation (the delivery of cancer screening and/or diagnostic testing, final diagnosis and treatment initiation if needed).

CDC considers case management for women with abnormal screening results a type of patient navigation, as long as the aforementioned activities are performed.

<u>Patient Navigation services are not limited to enrolled SMHW clients</u>. Women who meet age and income requirements who have insurance to pay for screening and diagnostic services but need assistance with resolving barriers to completing screening or diagnostic services can be enrolled.

#### **Navigation Service Eligibility**

Patients with Navigation Service Eligibility					
	Patient Types				
SMHW Eligible	Females Age 21-64 Cervical and CBE				
SMHW Eligible	Females Age 21-64 with a Breast or Cervical Abnormality				
SMHW Eligible	Females Age 40-64 Screening Breast Mammogram				
Non-Eligible SMHW	'Navigation-Only' females Age 21-64 Cervical and CBE				
Non-Eligible SMHW	'Navigation-Only' females Age 21-64 with a Breast or Cervical Abnormality				
Non-Eligible SMHW	'Navigation-Only' Females Age 40-64 Screening Breast Mammogram				

This additional enrollment status within SMHW is called 'Navigation-Only'.

#### 'Navigation-Only' Enrollment Status

SMHW's enrollment status for Non-SMHW eligible women in MOHSAIC is called 'Navigation-Only'. The enrollment status of 'Navigation-Only' allows payment to SMHW providers for navigation services provided to a woman who meets age and income requirements and has group or private insurance to pay for the screening and diagnostic services. 'Navigation-Only' enrollment is prioritized for populations that are predominantly low-income (<250% FPL) and are of appropriate age per screening guidelines. Women receiving 'Navigation-Only' services will be included in CDC's reporting of women served through NBCCEDP.

Payer Sources Eligible for 'Navigation Only' Services						
Payer Source	Eligibility					
Private or Group Insurance	Yes					
Medicaid	Yes					
MO HealthNet	Yes					
Medicare Part B	No					
Title X	Yes					

MDE data are required for women who receive NBCCEDP-funded 'Navigation-Only'. The abbreviated record will include data on patient demographics, screening test type, date of test, test results, and final diagnosis.

The 'Navigation-Only' client abbreviated record includes the SMHW Patient History form (green) and the Patient Navigation Form (gray) and a Screening Report Form or Diagnostic form as applicable. Select Visit Type 'Navigation-Only' and 'Reporting Only' on the screening or diagnostic forms as applicable.

SMHW providers complete the Patient 'Navigation-Only' form for women in order to reflect the assessment of barriers and actions taken for barrier reduction to achieve completed screenings.

To qualify for enrollment into 'Navigation-Only' with an SMHW abbreviated record, **the following six (6) requirements must be met**.

- 1. Assessment of individual patient barriers to cancer screening/diagnostics/initiation of treatment
- 2. Provision of education and support for the patient
- 3. Resolution of barriers to obtaining cancer screening/diagnostics/initiation of treatment
- 4. Tracking of the patient to ensure completed screening/diagnostics/initiation of treatment
- 5. A minimum of two (2), preferably more, patient contacts
- 6. Data collection and data review in aggregate to evaluate outcomes of patient navigation (the delivery of cancer screening and/or diagnostic testing, final diagnosis and treatment initiation if needed).

Access to clinical information is necessary to complete the MDE record. MDE data for 'Navigated-Only' clients are analyzed separately and included in calculating the NBCCEDP core indicators.

A process for report/result sharing between health care agencies is required, as is informing each patient of their test result. Reporting the results of the screening or diagnostic services on the appropriate forms counts the woman as 'Served' by the program. To complete billing for Patient Navigation Services, reporting results of the screening and/or diagnostic test is required in MOHSAIC. The table below outlines the required forms by Navigation Service Type.

#### **Navigation Service Type**

	Appropriate Form						
Navigation Service Type	Eligibility Agreement	Patient History Form	Navigation Form	Screening Form	Diagnostic Form (as applicable)		
SMHW Navigation	Х	Х	Х	Х	X		
Non-Eligible SMHW 'Navigation-Only'		Х	Х	Х	x		

#### **MOHSAIC Navigation Form**

The MOHSAIC Navigation form is located in Section 10: Forms. The Navigation Form includes the following sections:

Personal Data and Client Assessment

```
Barrier Identification (e.g. financial, communication)
```

Action Plan

Outcomes

The SMHW Navigation Online Form can be located at this link:

https://health.mo.gov/living/healthcondiseases/chronic/showmehealthywomen/pdf/client-patient-navigationform.pdf.

Resources that may assist navigating clients through obtaining healthcare coverage include the Missouri Department of Social Services' Medicaid Program (<u>https://mydss.mo.gov/healthcare</u>).

#### **Terminating Patient Navigation**

Depending on screening and diagnostic outcomes, patient navigation services terminate when a client:

- 1. Completes screening and has a normal result,
- 2. Completes diagnostic testing and has normal results,
- 3. Initiates cancer treatment, or
- 4. Refuses treatment.

#### **Case Management**

Clients who have abnormal screening results receive follow-up services, up to the point of a final diagnosis and treatment start date. Achieve this through case management. The goal of case management is to ensure clients enrolled in the program receive timely and appropriate diagnostic and treatment services. An abnormal screening result is determined based on nationally recognized screening guidelines identified in the Provider Manual Chapters 5 and 6.

Non-clinical professionals may provide required case management activities, and a qualified health care professional (Registered Nurse, Nurse Practitioner, Physician Assistant or Physician in good standing to provide health care in Missouri) must have oversight. Although case management services vary based on an individual client's needs, at a minimum, case management must include the following activities:

- Notify the client of an abnormal result within a reasonable period of time (i.e., two (2) weeks from the date the procedure was performed),
- Assessment and resolution of barriers to diagnostics services,
- Assessment and resolution of barriers to initiation of cancer treatment, if treatment is indicated,
- Client education and support,
- Arrange diagnostic appointments on the client's behalf,
- Clients may not be given a referral list and asked to schedule their appointment,
- Client tracking and follow-up to monitor client progress in completing diagnostics and initiating treatment, and
- A minimum of two contacts with the client over the course of the screening and diagnostic cycle.

#### **Terminating Case Management**

When a client concludes cancer treatment, the treating physician releases the client to return to a schedule of routine screening, and the client continues to meet SMHW eligibility requirements, the client may return to the program and receive all services, including patient navigation or case management.

Clients screened through SMHW clinical services who are subsequently insured may continue to receive patient navigation services. In such instances, agencies are encouraged to continue navigating clients to ensure diagnostic procedures are completed, and if a diagnosis of cancer, that treatment is initiated.

#### Lost to Follow-up Cases

Funding received from the CDC is contingent upon SMHW meeting or exceeding several quality assurance parameters of the CDC Core Performance Indicators. Case managers must ensure and meet the following indicators for all SMHW clients with abnormal screening results:

- Ninety (90) percent or more of SMHW clients with abnormal findings achieve a definitive diagnosis.
- Seventy-five (**75**) percent or more of SMHW clients with an abnormal finding achieve a definitive diagnosis within **60 days or less**.

A SMHW client **contact and tracking system must be in place** to notify clients of abnormal results. Contacts with a client should be clearly documented in a client's medical record and should include what type of follow-up is needed, the recommended timeframe for follow-up, and the clinical implications if the follow-up does not occur. Client contact continues until one of the following occurs and is documented in the medical record:

- Recommended follow-up evaluation complete and the client referred for treatment (if indicated),
- Made two documented attempts to contact the client. If the client has a valid address, one of these attempts must either be in writing and sent as a certified letter or sent via the client portal/email with a read receipt confirmation. Use of certified letters or read receipt emails early in the course of follow-up can expedite the notification process,
- Notified the Regional Program Coordinator after no response,
- Documented informed refusal in the client's medical record, or
- Documented in the client's medical record at least two contact attempts made (considered lost to follow-up).
  - a. This documentation should include the dates, types of contact attempted, and the outcomes.
  - b. If the client has a valid address, at least one of the contact attempts should be a certified letter with a return receipt. Keep a copy of the certified letter and the return receipt in the client's medical record.

Every client has the right to elect or refuse treatment. A client is considered to have refused service when one of the following has been carefully documented in the client's medical record:

- Client has verbally refused the follow-up care recommended.
- Client has refused in writing the follow-up care recommended.

Keep documentation of the informed refusal in the client's medical record. Include refused service or treatment and when the client was informed of the risks involved if recommended follow-up is not completed.

# **Quality Assurance/Quality Improvement**

Documentation of Patient Navigation Services will be reviewed during the regular monitoring visits every two years and as necessary. Verification of eligibility for navigation services will be assessed. Notation of the assessment and appropriate interventions to assist with barrier reduction will be reviewed. Please refer to Section 8, Quality Assurance, for more information.

#### **Patient Navigation Services Guidance**

Patient navigation assists a patient so they can move through health care promptly without the road stops of a complex healthcare environment. This includes moving the patient through distinct healthcare settings such as primary care (clinic) and tertiary care (hospital). The goal is to eliminate barriers to timely health care through a one-to-one relationship between a navigator and the patient. No matter what phase of health care, the patient should benefit from an appropriately trained navigator at the phase of health care.

A patient navigator works with patients to reduce real and perceived barriers to health care. The services provided depend on barriers identified and actions taken to alleviate the barriers. Common barriers include:

- the inability to schedule and keep appointments,
- English as a second language,
- confusing medical information,
- lack of insurance,
- limited finances, and
- lack of or limited transportation to and from home.

Other barriers may emerge and must be recognized and addressed as the navigation plan develops.

Navigation is an early phase of health care and includes education about cancer prevention, cancer risk factors and the need for screening for those patients not engaged with obtaining health care or not a part of a health care system. It may also include educating patients already within a healthcare organization who have not received screening services. For patients already engaged with a healthcare organization, navigation may include education regarding timely follow-up appointments for further studies or beginning treatment.

Healthcare organizations must assess their capacity to support increased patient activity and anticipate an increase in screening rates.

# Healthcare organizations with patient navigation involving medical record review and required documentation know exactly who is due for breast or cervical cancer screening and subsequently, contact those patients to encourage them to come in for the screening.

In managing navigation services, the organization asks the following in their capacity assessment:

- What setting -- primary care clinic, community-based affiliate, or regional-based tertiary care?
- Who is the target audience and priority population?
- How to provide services in person, by phone, or both?
- Who will serve as navigator—lay person, nurse, or other?
- Who will all the partners be and how will they work together?

These organizations dedicate staff time to the appropriate phase of healthcare navigation for their patients.

Effectiveness evaluation components are "no-show" rates, completion of screening exams, and timely follow-up.

A successful navigation program will see a reduction in "no-show" rates, an increase in the completion of screening exams, and consistent timely follow-up of abnormal test results.

Assigning responsibility for specific tasks increases an organizat patient navigation. Consider these tasks for patient r <b>Navigation Services Tasks</b>	
In Reach/Outreach	Person Responsible
Identify clinic patients in need of screening	
Contact and educate eligible patients about screening	
Educate individuals in the community about breast and/or cervical cancer screening	
Obtain Release of Information documentation	
Financial	
Verify income and insurance status	
Help patient apply for financial assistance programs as applicable to reduce out-of-pocket costs	
Education	
Explain screening procedures and what preparation may be required	
Explain anatomy	
Emphasize the medical need for screening services	
Provide printed and verbal information at an appropriate level of understanding for the patient	
Provide printed and verbal information in the appropriate language	
Barrier Reduction	
Assure patient has transportation to and from screening services; schedule transportation services as necessary	
Work with the patient to overcome perceived barriers and actual common barriers	
Provide language translation services	
Optimize clinic visits to limit the number, as applicable	
Dependency care (children, elderly)	
Recognize health information can be complicated and therefore intimidating in all phases of health care	
Reminders	
Place reminder calls to decrease no-show rates	
Keep a tickler system for follow-up	
Provide reminders in the appropriate language	

Care Coordination	
Obtain reports/results from diagnostic agencies. Provide Release of Information form obtained from the patient	
Follow-up with patients about results of testing; be sure they understand results; when they should be re-screened; how to access further care as necessary	
Assist with setting up medical and transportation appointments	
Provide a primary contact for questions	
Program Reporting	
Maintain files/records for fiscal and quality improvement evaluation	
Participate in program updates	

The elimination of cancer disparities is critically important for lessening the burden of cancer. Patient navigator programs improve clinical outcomes.

In response to Missouri women and providers reaching out to SMHW to inquire about additional cancer navigational resources, SMHW developed a list of Cancer Navigational Resources to assist in filling a gap in the current healthcare system. The following pages contain the SMHW Cancer Resources to help navigate Missouri women and families to help at many points along the health care journey: insurance problems, identification of available cancer screening programs, medication assistance, financial assistance, housing assistance during travels, etc.

### **Most Commonly Asked Questions**

- Q. We have several patients who have had an abnormal clinical breast exam reported as "discrete palpable mass, suspicious for cancer", followed by a mammogram with a result of "negative". The providers deemed this adequate follow-up and no further evaluation was scheduled or completed. Is this acceptable practice even though the NBCCEDP guidelines recommend further testing?
  - A. A negative mammogram does not rule out cancer for a patient with suspicious breast mass found on physical exam. To determine if the mass is malignant or not, complete additional evaluations such as an ultrasound or a needle biopsy. When providers identify a suspicious mass, they are obligated to follow-up with a complete evaluation and obtain a definitive diagnosis.
- Q. Since breast ultrasound CPT codes 76641 and 76642 are both unilateral, should we expect to see two CPT codes billed if a bilateral ultrasound exam is needed?
  - A. Yes. If complete examination is performed on both breasts, you should receive two ultrasound codes of 76641. If a limited exam is performed bilaterally, you should receive two 76642 codes.
- Q. Does CDC ever allow payment for services that exceed Medicare reimbursement rates?
  - A. No. As stated in the Breast and Cervical Cancer Mortality Prevention Act of 1990 that authorized the NBCCEDP, the program cannot provide reimbursements that are higher than Medicare reimbursement rates.
- Q. Is it appropriate to reimburse for an ultrasound prior to 6 months for BI-RADS 3 due to fat necrosis?
  - A. Yes, they should reimburse based on the findings; an earlier ultrasound is appropriate.
- Q. Would SMHW pay for HPV testing if the client has paid for the Pap and the results were ASC-US?
  - A. SMHW can cover the diagnostic work-up.
- Q. Is it appropriate to screen women with "Dense Breast" with an ultrasound alone without clinical risk assessment? Is it appropriate to use an ultrasound screening for women with dense breast tissue deemed high risk by a recognized clinical risk assessment tool?
  - A. Currently, there are no screening guidelines recommended for breast ultrasound. Use of ultrasound as a tool for breast cancer screening is still in an investigational phase. Inefficient use of any tool may provide the patient with false degree of relief or concern. The provider is accountable for any inappropriate use of BI-RADS results or testing.

#### Q. How does the CDC address transgender-identified individuals in the health care setting?

A. Following the Breast and Cervical Cancer Mortality Prevention Act that authorized the NBCCEDP and specifically states "women". The focus of the NBCCEDP is women who are at risk for breast and cervical cancer. **Use the federal funds only to cover** screening for female-to-male transgender individuals who have not yet undergone complete hysterectomy or bilateral mastectomy because these individuals are genetically female. We do not use federal funds for male-to-female individuals who are genetically males.

#### Q. What if a physician, who does not participate in the SMHW program, refers a woman with a BI-RADS IV or V ultrasound to a SMHW provider; can that woman be enrolled into SMHW and be eligible for Breast and Cervical Cancer Treatment (BCCT) services?

A. If a client has a BI-RADS IV or V ultrasound prior to enrolling into SMHW, the non-participating provider should refer the client to a SMHW participating provider. The client must meet SMHW eligibility requirements and complete enrollment forms. Then the SMHW provider should submit the woman's screening and diagnostic test results completed by the non-participating provider to SMHW by completing the MOHSAIC forms and submitting them as "reporting only". The SMHW provider may then proceed with performing additional diagnostic services such as a biopsy and submit results to SMHW for reimbursement. If the biopsy is positive for cancer, the client can be qualified for BCCT services. (SMHW must have reimbursed at least one screening or diagnostic service in order for a client to be eligible to receive BCCT services. Please note that if the only SMHW reimbursement is for a SMHW administrative referral fee for reporting only screening and diagnostic services, the client will not qualify for BCCT services).

### Q. What happens when Show Me Healthy Women (SMHW) has covered the screening and/or diagnostic services, but the client needs treatment?

A. Most women who receive SMHW-paid screening and/or diagnostic services and are in need of treatment for breast and/or cervical cancer will be eligible for a special MO HealthNet (Medicaid) BCCT program.

### Q. How much of the reimbursement for services from SMHW must be paid to the subcontractor?

A. SMHW does not require service providers to pay any specific rate to the subcontractors. The service providers can negotiate a reimbursement rate with the subcontractor, as they feel appropriate. SMHW will only pay the established reimbursement rate to the service provider.

#### Q. Can our facility funding amount be increased?

A. Yes. SMHW can increase the funding amount based on the availability of funds and if 80% of the facilities existing funds have been expended. Request an increase by calling SMHW at 573-522-2845, or sending an e-mail to the program manager with the amount of increase needed. The SMHW program must be in receipt of the letter or e-mail 14 business days prior to the end of the contract period for consideration for a funding increase.

## Q. If a woman under 35 contacts us reporting that she feels a lump in her breast, can we enroll her in SMHW program?

A. Yes. On October 1, 2024, SMHW lowered the age eligibility to women 21 years or older for services. If a provider needs assistance locating services for women under 21 years of age, please contact the Regional Program Coordinator assigned to your area.

# Q. What do I do when the client does not keep her mammogram appointment and her breast screening is now over 60 days?

A. Continue to schedule the mammogram appointment and repeat the clinical breast examination (CBE), if recommended by the examiner. Client may have her screening mammogram any time before the ten (10) months have elapsed for her next annual screening. If the CBE was negative, she does not have to have a repeat CBE within the ten (10)-month period.

### Q. Is a client with no Social Security number and no proof of income and residency eligible for SMHW?

A. Yes. The client must sign the client eligibility agreement form found in Section 10. The English version is on page 10.6 and the Spanish version is on page 10.7.

## Q. How do I report when a SMHW client has surgery after I have sent in the reporting of her diagnostic services?

A. Contact your assigned RPC first. If the RPC is not available, call the SMHW central office tollfree at 866-726-9926, call 573-522-2845, or fax inquires to the SMHW office at 573-522-3023.

### Q. Whom do I call if I have questions?

A. Contact your assigned RPC first. If the RPC is not available, call the SMHW central office tollfree at 866-726-9926, call 573-522-2845, or fax inquires to the SMHW office at 573-522-3023.

### Q. I am waiting for lab results to complete paperwork. What should I do?

A. Hold paperwork until results are available. If it is close to the 60-day cutoff, contact the lab and express your need to have the results in order to be paid. Contact your RPC and document the lab contacts in the comments section.

### Q. What should I submit for reimbursement?

A. The clients' reporting form(s).

### Q. Who establishes subcontracts?

A. The service providers may establish subcontracts with different facilities. SMHW does not play any role in establishing or assisting to establish subcontracts.

### Q. What happens if we submit our forms after 60 days?

A. Payment may be denied. If there are unusual circumstances, contact the billing coordinator at SMHW. Providers must file all forms in a timely manner.

### Q. What is the MO HealthNet Breast and Cervical Treatment (BCCT) program?

A. Beginning on October 2000, federal legislation allowed funded programs in the National Breast and Cervical Cancer Early Detection Program (NBCCEDP) to participate in the new BCCT program. In July 2001, Governor Bob Holden signed legislation authorizing matching funds for Missouri to participate in the Medicaid Program, effective August 28, 2001.

#### Q. Who is eligible for BCCT?

A. Women screened and/or diagnosed with breast and/or cervical cancer, or certain precancerous conditions, through SMHW who are under 65 years of age and have a Social Security number or state identification number. SMHW works closely with Department of Social Services (DSS) FSD staff to enroll a client into the BCCT program.

#### Q. How do SMHW clients enroll in BCCT?

A. SMHW providers establish presumptive eligibility, which entitles a client to temporary full MO HealthNet benefits through BCCT by completing the BCCT Temporary MO HealthNet Authorization letter. Give the client a copy of the letter. The SMHW provider submits the BCCT Temporary Authorization letter to the DSS FSD office following the directions found in the Provider Manual on page 7.4. The client and provider must also complete the BCCT Medical Assistance Application. The SMHW provider submits the completed application to the Green Co DSS FSD office after a cancer diagnosis from a tissue biopsy. Refer to Section 7: MO HealthNet for guidance and pages 10.16 and 10.17 for the appropriate forms.

### Q. A client received an annual SMHW screening that was normal. She contacts her SMHW provider because she has found a lump in her breast. What will SMHW cover?

A. SMHW will not cover the cost of the office visit but will pay for diagnostic testing if the CBE is abnormal. If the clinician does not find a lump and chooses to complete diagnostic testing as a direct result of the breast self-examination, SMHW will cover the cost of diagnostics.

### Acronyms/Abbreviations

- 5 A's assess, advise, agree, assist, and arrange
- A1C test glycosylated hemoglobin test
- ACS American Cancer Society
- ADA American Diabetes Association
- AGC atypical glandular cells
- AGUS atypical glandular cells of undetermined significance
- AHA American Heart Association
- AIS adenocarcinoma in situ
- ASCCP American Society for Colposcopy and Cervical Pathology
- ASC-H atypical squamous cells, cannot exclude high-grade squamous intraepithelial lesion
- ASCUS atypical squamous cells of undetermined significance
- BCCCP Breast and Cervical Cancer Control Project is the former name of SMHW
- BCCT Breast and Cervical Cancer Treatment (through MO HealthNet)
- BMI body mass index
- BSE breast self-examination
- CBE clinical breast examination
- CDC Centers for Disease Control and Prevention
- CHD coronary heart disease
- CIN cervical intraepithelial neoplasia
- CIS Cancer Information Service; carcinoma in situ
- CLIA Clinical Laboratory Improvement Amendments of 1988
- CPT current procedural technology (code)
- CVD-cardiovascular disease
- CVH cardiovascular health
- DBP diastolic blood pressure
- DCN departmental client number
- DHSS Missouri Department of Health and Senior Services
- DNA deoxyribonucleic acid
- DOB date of birth
- DSS Missouri Department of Social Services
- ECC endocervical curettage
- EOB explanation of benefits

- EFT electronic funds transfer
- **FDA** Food and Drug Administration

**OATS** – Older Adults Transportation Service

Pap Stain – Papanicolaou stain

Pap Test - Papanicolaou smear

PHNPAT - Public Health Nurses Physical Assessment Training

RN – Registered Nurse

RPC – Regional Program Coordinator

SBP - systolic blood pressure

**SMHW** – Show Me Healthy Women – The current name of Missouri Breast and Cervical Cancer Control Project (BCCCP).

SMTS - Southeast Missouri Transportation Service

SSN - social security number

TC - total cholesterol

TLC - therapeutic lifestyle changes

WIC - Woman, Infants and Children Program

**WISEWOMAN** – Well-Integrated Screening and Evaluation for Women Across the Nation - A heart health risk assessment and education program for women receiving a Show Me Healthy Women cervical and breast cancer screening service.

**WNL** – within normal limits

### **Glossary of Terms**

adenocarcinoma - A cancer that develops from the glandular epithelium.

- adenoma A benign growth starting in the glandular tissue. (Also, refer to *fibroadenoma*.)
- advanced cancer A stage of cancer in which the disease has spread from the primary site to other parts of the body, directly or by traveling through the network of lymph glands (lymphatic) or in the bloodstream. Locally advanced means the cancer has spread only to the surrounding areas.
- alert value A screening result that is abnormal and requires tracking by the provider and/or Show Me Healthy Women Regional Program Coordinators to assure appropriate follow-up care is documented.
- American College of Radiology Accreditation A voluntary mammography accreditation program that is one of the standards for quality assurance and assesses the following major areas:
  - Personnel qualifications and experience
  - Equipment specification and technical procedures
  - Quality assurance practices
  - Evaluations of mammograms from the applicant's practice and through the use of phantom images
- **anesthesia -** A state characterized by loss of sensation, caused by a drug or gas. General anesthesia causes loss of consciousness. Local anesthesia is numbress in only a specified area.
- antibiotics Chemical substances, produced by living organisms or synthesized (created) in laboratories, for the purpose of killing other organisms that cause disease. Some cancer therapies interfere with the body's ability to fight off infection, so antibiotics may be needed along with the cancer treatment to protect against or kill infectious diseases. The word means "destructive of life."
- areola The dark area of flesh that encircles the nipple of the breast.
- aspirate Removal of fluid or cells from a breast lump.
- **aspiration biopsy** A procedure in which the specimen for biopsy is removed by aspirating it through an appropriate needle that pierces the skin and penetrates into the underlying tissue to be examined. (Also, refer to *fine needle aspiration*.)
- **asymptomatic** Without noticeable signs or symptoms of disease. Many cancers can develop and grow without producing symptoms, especially in the early stages. Detection tests, such as mammography, try to discover developing cancers at the asymptomatic stage, when the chances for cure are usually high.
- **atypia (also atypical) -** The condition of being irregular or not conforming to type not usual, abnormal. Cancer is the result of atypical cell division.

axilla - Also known as the armpit.

#### Breast and Cervical Cancer Control Project (BCCCP) – See Show Me Healthy Women.

- **benign -** Not malignant, not recurrent, favorable for recovery, not cancer. The main types of benign breast problems are fibroadenoma, fibrocystic changes, and cysts.
- **Bethesda System -** A comprehensive system for the reporting and classification of Pap smear specimens, developed in December 1988. The Clinical Laboratory Improvement Act (CLIA) regulations mandate the use of the Bethesda System for laboratory reporting and proficiency testing.
- **bilateral** Affecting both sides of the body, for example bilateral breast cancer is cancer occurring in both breasts at the same time (synchronous) or at different times (metachronous).
- **biopsy** The removal and examination (by a pathologist) of tissue samples, cells or fluids from a living body. An examination of the appearance of the tissue under a microscope determines if cancer or other abnormal cells are present. Complete the biopsy with a needle or by surgery.
- breast augmentation Surgery to increase the size of the breast (also known as breast implants).
- **breast cancer** Cancer that begins in the breast. The main types of breast cancer are ductal carcinoma in situ, infiltrating ductal carcinoma, lobular carcinoma in situ, medullary carcinoma, and Paget's disease of the nipple.
- Breast Imaging Reporting and Data System (BIRADS) A uniform reporting system for reporting mammography results.
- **breast self-examination (BSE) -** A technique of checking your own breasts for lumps or suspicious changes.
- breast specialist A term describing health professionals who have dedicated interest in breast health.
- **calcifications –** Also called microcalcifications. Tiny calcium deposits within the breast, singularly or in clusters, often found by mammography, which indicate a change within the breast.
- **cancer** A general term for more than 100 diseases in which abnormal or malignant cells develop. Some exist quietly within the body for years without causing a problem. Others are aggressive, rapidly forming tumors that may invade and destroy surrounding tissue. If cancer spreads, it usually travels through the lymph system or bloodstream to distant areas of the body.
- cancer cell A cell that divides and reproduces abnormally and can spread throughout the body.
- **capsule formation** Scar tissue that may form around a breast implant as the body tries to "wall off" or encapsulate the foreign object; a contracture.
- **carcinoma** A malignant tumor that begins in the lining (epithelial) cells of organs. Epithelial cells are those that cover the surfaces of tissue. It can occur in any part of the body. Eighty percent or more of cancers, and all breast cancers, receive carcinoma classification.
- **carcinoma in situ (CIS)** An early stage of cancer in which the cancer is still only in the structures of the organ where it developed and the disease has not invaded other parts of the organ or spread; cancer in situ or pre-invasive. This classification of most cancers is curable.

- **case manager -** The member of the medical care team who acts as a liaison. This person coordinates all of the services needed by the client throughout diagnosis, treatment and recovery.
- clinical breast examination (CBE) A physical examination of the breasts performed by a physician, registered or advanced practice nurse or physician's assistant.
- **cell** The basic unit of which all living things are made. Cells carry out basic life processes. Organs are clusters of cells that have developed specialized tasks. Cells replace themselves by splitting and forming new cells; cancer disrupts this process.
- **cervical intraepithelial neoplasia (CIN)** A cellular change to the mouth of the cervix that may include severe dysplasia and CIS. CIN 3 is the most severe of the three-category classification system.
- **cervical precancerous lesions -** Cervical tissue biopsy results of CIN (CIN 1, 2, or 3) and AIS lesions are considered precancerous lesions. Treatment of many CIN 1 and 2 lesions is through simple excisional procedures. However, CIN 3 or AIS may require a hysterectomy.
- cervix The narrow outer end of the uterus that opens into the vagina.
- **chemotherapy** A drug treatment program that destroys cancer cells. This method often accompanies surgery or radiation, or to treat recurring cancer.
- **clinical** Description of information that pertains to or is founded on actual observation and treatment of patients, as distinguished from theoretical or basic sciences.
- **clinical trials -** Research studies to test new drugs or procedures, or to compare to current standard treatments with others that may be better or equal.
- **coalition building -** The process of organizing individuals, groups or organizations for the purpose of furthering a common goal or ideal.
- **colposcope** A magnifying, lighted optical instrument, which allows for the direct observation and study of vaginal and cervical cells.
- **colposcopy** Diagnostic procedure performed with a colposcope. Cervical biopsies are usually conducted by colposcopic examination.
- **Comprehensive Cancer Control Program (CCCP)** A statewide strategic plan, which includes the interaction of a cancer surveillance system, public and professional education, and a screening and follow-up system.
- **cone biopsy -** The removal of a cone-shaped piece of tissue from the cervix. This is a more definitive procedure than a cervical biopsy. It is used when abnormal cells extend up into the cervical opening (Os) or through the tissue. This process also used to treat and cure carcinoma in situ and dysplasia.
- **conization** The process of removing a cone of tissue, as in partial excision of the cervix uteri. To better preserve the histologic elements cold conization is performed with a cold knife.
- **consensus statements -** Recommendations for the management of a problem, in this case a disease or health problem, formulated by a group of experts based on scientific and clinical information.
- **cryosurgery** The destruction of tissue by exposure to extreme cold in order to produce welldemarcated areas of cell injury and destruction. Used to treat malignant tumors, control pain, reduce lesions in the brain and control bleeding.

cyst - A fluid-filled mass that is usually benign. The fluid can be removed for analysis.

- **cytology** Comes from "cyte" which means cell, the study or examination of cells, their origin, structure, function and pathology. The study determines whether cells are cancerous or benign.
- **detection -** The finding of a case of a disease. Early detection means that the disease is found at an early stage, before it has grown large or spread to other sites. Mammography and Pap tests are the principal ways to detect breast and cervical cancer early.
- **diagnosis** Identifying a disease by its signs, symptoms and laboratory findings. The earlier a cancer is diagnosed, the better chance for cure.
- **diagnostic breast services -** Refers to specialist consultation; additional mammography views; ultrasound; fine needle aspiration; needle, incisional and excisional biopsies relating to breast cancer.
- **diagnostic cervical services -** Refers to specialist consultation, colposcopy with/without biopsy and diagnostic LEEP relating to cervical cancer.
- **diagnostic mammogram -** Defined by the American College of Radiology as "mammography performed on women who, by virtue of symptoms or physical findings, are considered to have a substantial likelihood of having breast disease."
- dimpling A pucker or indentation of the skin on the breast. It may be a sign of cancer.
- dissemination In health education, the dispersal of information, products or services to a population.
- **duct** A pathway. In the breast, a duct is a passage through which milk passes from the lobule (which makes the milk) to the nipple.
- **ductal carcinoma in situ -** Cancer cells that started in the milk ducts and has not penetrated the duct walls into the surrounding tissue. Surgery is the treatment option for this highly curable form of breast cancer.
- **ductal papilloma -** Small, finger-like, noncancerous growth in the breast ducts that causes bloody discharge and often found in women 45-50 years of age. When they exist, breast cancer risk is slightly higher.
- **dysplasia** An abnormality in size, appearance and organization of adult cells that requires a biopsy for diagnosis.
- ectocervix The outside, visible portion of the cervix.
- endocervical curettage (ECC) The surgical scraping of the lining of the uterine cervix.
- endocervix The mucous membrane lining the canal of the cervix, sometimes referred to as the endocervical canal.
- endocrine glands Glands that release hormones into the bloodstream. The ovaries are examples of endocrine glands.

endocrine therapy - Manipulation of hormones for therapeutic purposes.

- endometrium The membrane lining of the uterus.
- epidemiology The collection and statistical analysis of data relating to the factors that have an impact on health and how they relate to one another. In the study of people who get cancer, the analysis of specific types of cancer and the factors that play a part in the development of that cancer.
- **estrogen** A female sex hormone produced primarily in the ovaries, possibly in the adrenal cortex. In men it is produced in the testes (in much smaller amounts than in women). In women, levels of estrogen fluctuate on nature's schedule, influencing the development of secondary sex characteristics, including breast size, regulation of the monthly cycle of menstruation and preparing the body for fertilization and reproduction. In breast cancer, estrogen may feed the growth of cancer cells.
- **etiology -** The study of the cause of disease. In cancer, there are many etiologies, although research shows that genetics is a major factor in many cancers.
- false negative Negative results of a screening test, when in reality the result should be positive.
- **false positive -** Positive results of a screening test that mistakenly identifies a disease when one is not present.
- **federal poverty level (FPL)** A measure of income determined annually by the U.S. Census Bureau based on the last calendar year's increase in prices as measured by the Consumer Price Index. For some programs, it helps determine a person's eligibility. A woman is eligible for SMHW if her income is at or below 250 percent of the FPL.
- **fibroadenoma -** A type of benign breast tumor composed of fibrous tissue and glandular tissue. On clinical examination or breast self-examination, it usually feels like a firm, round, smooth lump. These usually occur in young women.
- **fibrocystic changes -** A term that describes certain benign changes in the breast. Symptoms are breast swelling or pain. Signs are nodules, lumpiness and nipple discharge. Not cancerous.
- fibrocystic condition The presence of single or multiple benign cysts in the breasts.
- fibrosis Formation of fibrous (scar) tissue, which can occur anywhere in the body.
- **five-year survival -** Survival of cancer for five years after treatment of the disease. This is a milestone for most cancer patients, indicating treatment was successful.
- **genes -** Segments or units of DNA that contain information on hereditary characteristics such as hair or eye color and height. Women who have the BRCA1 gene have inherited a tendency to develop breast cancer.
- genetic Something related to the genes.
- **glands -** Organs that produce and release chemicals used locally or elsewhere in the body. Often, this term refers, incorrectly, to mean lymph nodes.
- grade The classification of the severity of a disease.

- gynecological consultation A referral to a gynecologist for an abnormal screening examination followup.
- **health education -** Any combination of learning experiences designed to facilitate voluntary adaptations of behavior conducive to health.
- **health promotion -** Activities directed toward developing the resources of clients that maintain or enhance well-being.
- **hereditary cancer syndrome** One or several types of conditions associated with cancers that occur within multiple family members, because they have an inherited, mutated gene.
- **high-grade squamous intraepithelial lesion (HSIL) -** The Bethesda System classification for a Pap smear result that includes cellular changes of moderate to severe dysplasia (CIN 2 and 3/CIS).
- **high risk** A higher risk of developing cancer compared with the general population. Some factors that place a person at a higher risk are a family medical history, lifestyle choices and the exposure to environmental influences.
- **hormone** Chemical substance released into the body by the endocrine glands, such as thyroid or ovaries. The substance travels through the bloodstream and sets in motion various body functions. For example, prolactin, produced by the pituitary gland, begins and sustains the production of milk in the breast after childbirth.
- **human papillomavirus (HPV) -** A sexually transmitted virus implicated in the pathogenesis of cervical cancer and its precursor lesions. HPV infections of the genital tract are often thought to be the most common sexually transmitted viral disease. The manifestations of HPV are variable, ranging from occult infection to overt disease in which there is clinical and pathological evidence of HPV infection. Of the approximately 70 types of HPV, 20 types are detectable in the female genital tract and 15 types are evident in the majority of invasive carcinomas.
- **hyperplasia** An abnormal increase in the number of cells in a specific area, such as the lining of the breast ducts. This overgrowth may be due to hormonal stimulation, injury or continuous irritation. It is not cancerous by itself, but when the proliferating cells are atypical, the risk of cancer developing is greater.
- **hysterectomy** The surgical removal of the uterus. Types include a total hysterectomy, removal of the uterus and cervix, and radical hysterectomy, the removal of ovaries, oviducts, lymph nodes, lymph channels, uterus and cervix.
- **imaging -** Any method used to produce an image of internal body structures. Some methods used to detect cancer are x-rays, magnetic resonance imaging (MRI), bone scans, scintigraphy, computerized axial tomography (CAT scans), and ultrasonography.
- **immune system -** The complex system by which the body resists invasion by a foreign substance such as a bacterial infection or a transplanted organ.
- incidence The number of new cases of a disease or condition diagnosed during a specified time.
- **incisional biopsy -** The surgical removal of a portion of an abnormal area of tissue for microscopic examination.
- **indicated but not performed (refused) -** An examination result that applies to the field used to record examination results. This entry is marked when a client does not want the recommended examination or when a client has periodically missed appointments.

- infiltrating ductal carcinoma A cancer that starts in the milk passages of the breasts (ducts) and then breaks through the duct wall, where it invades the fatty tissue of the breast. When it reaches this point, it has the potential to spread or metastasize elsewhere in the breast, as well as to other parts of the body through the bloodstream and lymphatic system. Infiltrating ductal carcinoma is the most common type of breast cancer, accounting for about 80 percent of breast malignancies.
- **inflammation -** A local response to cellular injury to the immune system that is marked by capillary dilatation, redness, heat, pain, swelling, or infiltration by cells.
- **inflammatory breast cancer** A rare cancer, where the breast looks as if it is inflamed because of its red appearance and warmth. The skin shows signs of ridges and wheals or may have a pitted appearance, and the cancer tends to spread quickly.
- infraclavicular nodes Lymph nodes located beneath the clavicle (collarbone). They are part of the network of axillary (armpit) nodes.
- **internal mammary nodes -** Lymph nodes beneath the breast bone on each side. The lymph glands of the breast drain into the internal mammary nodes.
- intervention A strategy incorporating methods and techniques that interact with a patient or population.
- intraductal papilloma A benign tumor that starts in the ductal system of the breast. It can cause discharge from the nipple. A woman with papillomatosis (multiple intraductal papillomas) is at increased risk of developing breast cancer.
- invasive cancer A cancer that has invaded surrounding tissue and spread to distant parts of the body.
- **invasive cervical carcinoma -** Infiltration of cancer cells into the tissue beyond the epithelium of the cervix. This term indicates that a malignant growth extends deeper than 3 mm into the stroma.
- **lobes, lobules, acini -** Milk-producing tissues of the breast. Each of the breast's 15 to 20 lobes branches into smaller lobules, and each lobule ends in scores of tiny acini. Milk originates in the acini and is carried by ducts to the nipple.
- **lobular carcinoma (infiltrating or invasive)** A type of breast cancer that starts within the lobules. It may be multicentric (occurring in multiple lobules). Compared with other types of breast cancer, this type has a higher chance of occurring in the opposite breast as well. It can often be difficult to diagnose, even with careful physical examination or mammography.
- **Iobular carcinoma in situ** A very early type of breast cancer developing within the milk-producing glands (lobules) of the breast. It does not penetrate through the wall of the lobules. Researchers think that lobular carcinoma in situ does not eventually become an invasive lobular cancer. They believe, instead, that it places women at an increased risk of developing an invasive breast cancer later in life. This condition makes it important for women with lobular carcinoma in situ to have a physical examination three to four times per year and an annual mammogram.

local excision - The removal of a lesion or tumor confined to the breast.

localized breast cancer - A cancer that arose in the breast and is confined to the breast.

- **loop electrosurgical excision procedure (LEEP) -** A surgical procedure used on the cervix by which an electrical current generating a radio frequency is passed through a wire loop, which is then drawn around the cervical opening (Os) to excise the tissue. The procedure, usually performed in an outpatient setting, uses local anesthesia. Either the transformation zone or a cone-like specimen can be obtained and depends on the size of the loop and lesion. Terms used for this procedure are LEEP and LLETZ (large loop excision of transformation zone).
- **low-grade squamous intraepithelial neoplasia (LSIL) -** The Bethesda System classification for a Pap smear result, which includes cellular changes of HPV, mild dysplasia (CIN 1) or koilocytotic atypia.
- **lump** Any kind of mass that can be felt in the breast or elsewhere in the body.
- **lumpectomy** Removal of the breast lump plus a margin of normal tissue around it. If malignant tissue is found, radiation therapy or mastectomy often follows. Also known as limited breast surgery.
- **lymph** Clear fluid that passes within the lymphatic system and contains cells known as lymphocytes. These cells fight infections. They have a lesser role in fighting cancer.
- **lymph nodes (lymph glands) -** Small masses of bean-shaped tissue located along the lymphatic vessels that remove waste fluids from lymph and acts as filters of impurities in the body.
- **malignant tumor** A mass of cancer cells that may invade surrounding tissues or spread to distant areas of the body.
- mammogram An x-ray of the breast.
- **mammography facility** An entity that has met SMHW requirements to become an approved provider or provides mammography services for other SMHW-approved providers.
- Mammography Quality Standards Act of 1992 (MQSA) The national accreditation of mammography units through the FDA.
- mastectomy Surgical removal of the breast(s): (1) Modified radical mastectomy: removal of the breast, skin, nipple, areola and most of the auxiliary lymph nodes on the same side, leaving the chest muscle intact. (2) Halstead radical mastectomy: removal of the breast, skin, both pectoral muscles, and all auxiliary lymph nodes on the same side. (3) Extended radical mastectomy: removal of the breast, skin, pectoral muscles (major and minor), and all auxiliary and internal mammary lymph nodes on the same side. (4) Partial mastectomy: removal of less than the whole breast, taking only part of the breast in which the cancer occurs and a margin of healthy breast tissue surrounding the tissue. (5) Prophylactic mastectomy: removal of the interior of one or both breasts. For cancer prevention, this procedure is done before any evidence can be found. It is a recommendation for a woman at a very high risk of breast cancer; its efficacy is unproven. (6) Quadrantectomy: a partial mastectomy that removes the quarter of the breast that contains the tumor. (7) Segmental mastectomy: partial mastectomy. (8) Total mastectomy: removal of only the breast.
- **medical professional/clinician -** Physician, physician's assistant, certified nurse practitioner, certified nurse midwife, or registered nurse.
- **medullary carcinoma -** A specific histology of infiltrating breast cancer in which the tumor appears well defined, with obvious boundaries between tumor tissue and normal tissue. Medullary carcinoma accounts for five percent of breast cancer.
- **menarche** The first menstrual period. Early menarche (before age 12) is a risk factor for breast cancer, possibly because the earlier a woman's periods begin the longer the exposure to estrogen.

- menopause The time in a woman's life when monthly cycles of menstruation cease forever and the level of hormones produced by the ovaries decreases. Menopause usually occurs in the late 40s or early 50s, but surgical removal of the ovaries (oophorectomy) or the ovaries and uterus (total hysterectomy) can induce it, as can some chemotherapy that destroys ovarian function. Some breast cancer chemotherapies are among those that can cause menopause.
- **metaplasia** Abnormal replacement of cells of one type by cells of another type. It does not represent a malignant or premalignant condition.
- **metastasis** The spread of cancer cells to distant areas of the body by way of direct extension, lymph system, or bloodstream.
- minimum data elements (MDE) Clinical data items submitted to CDC two times a year.
- **needle aspiration -** Removal of fluid from a cyst or cells from a tumor. In this procedure, a needle and syringe (like those used to give injections) are used to pierce the skin, reach the cyst or tumor, and with suction, draw up (aspirate) specimens for biopsy analysis. If the needle is thin, the procedure is called fine needle aspiration (FNA).
- **needle localization -** A procedure used to do a breast needle biopsy, when the lump is difficult to locate or in areas that look suspicious in the x-ray but do not have a distinct lump. During the procedure, and after local anesthesia numbs the area, an X-ray guides a thin needle and wire to the area to be biopsied. A tiny hook on the end of the wire holds it in place. Then, using the wire path as a guide, the physician inserts a hypodermic needle (as the type used to give injections) and takes a sample of the tissue. The biopsy is complete. (Also see *needle aspiration*.)
- **neoplasia** The pathologic process that results in the formation and growth of a neoplasm.
- **neoplasm -** Any abnormal growth; neoplasms may be benign or malignant. Cancer is a malignant neoplasm.
- **nipple -** The tip of the breast; the pigmented projection in the middle of the areola. The nipple contains the opening of milk ducts from the breast.
- nipple discharge Any fluid coming from the nipple. It may be clear, milky, bloody, tan, gray or green.
- **nodal status -** A count of the number of lymph nodes in the armpit (axillary nodes) to which cancer has spread (node-positive) or has not spread (node-negative). The number and site of positive axillary nodes help forecast the risk of breast cancer recurrence.
- **node -** A lymph gland.
- **nodule -** A small, solid lump that can be located by touch.
- **Nolvadex -** Trade name for tamoxifen, an antiestrogen drug commonly used in breast cancer therapy. (Also see *tamoxifen*.)
- noncancerous Benign; not malignant; no cancer is present.
- **normal hormonal changes -** Changes in breast and other tissues that are caused by fluctuations in levels of female hormones during the menstrual cycle.

- **not needed (omitted) -** A category used to record examination results when it is not appropriate to perform a screening test on that particular woman. This choice might be marked under mammography results, if a woman had a mastectomy of one breast. Or, under the Pap smear results if she had a recent Pap smear at her provider's office, is pregnant, or has had a hysterectomy.
- **nucleus -** The powerhouse at the center of a cell where the cell's important activities are carried out. DNA resides and replicates in the nucleus.
- **nurse practitioner -** A nurse who is licensed as a registered nurse (RN) and has taken additional highly specialized training and is nationally certified and recognized by the Missouri State Board of Nursing as an Advanced Practice Registered Nurse. Nurse practitioners must have written collaborative agreements with a physician. They take on additional duties in diagnosis and treatment of patients, and in many states they may write prescriptions. (Also, refer to *oncology nurse specialist*.)
- **oncologist** A physician who is specially trained in the diagnosis and treatment of cancer. *Medical oncologists* specialize in the use of drugs and chemotherapy to treat cancer. *Radiologic oncologists* specialize in the use of x-rays (radiation) to kill tumors. *Surgical oncologists* specialize in the use of surgery to treat cancer. Medical and radiation oncologists often cooperate in giving complicated treatments.
- oncology nurse specialist A nurse who has taken highly specialized training in the field of cancer after being licensed as a RN (registered nurse). Oncology nurse specialists may mix and administer treatments, monitor patients, prescribe and provide aftercare (only if the Missouri State Board of Nursing as an Advanced Practice Registered Nurse recognizes them), and teach and counsel patients and their families. Many oncology nurse specialists are also certified nurse practitioners. (Also see *case manager, nurse practitioner.*)
- **oncology social worker -** A person who has a master's degree in social work and has specialized in the field of cancer. This person provides counseling and assistance to people with cancer and their families, especially in dealing with the crises that can result from cancer but are not medical, such as financial problems, housing when treatments must be at a facility far away from home, and childcare or eldercare.
- **ovary -** A reproductive organ in the female pelvic region. Normally a woman has two ovaries. They contain the eggs (ova) that joined with sperm, result in pregnancy. Ovaries are also the primary site of production of estrogen. (Also, refer to *estrogen*.)
- **Paget's disease of the nipple -** A form of breast cancer that begins in the milk passages (ducts) and involves the skin of the nipple and areola. A sign of Paget's disease is a crusting, scaly, red inflamed tissue (dermatitis) lesion on the nipple. With true Paget's disease, cancer is usually also present within the breast. This rare breast cancer type occurs in only 1 percent of cases. If no lump felt, there is generally a good outcome or prognosis.
- **palliative treatment -** Therapy that relieves symptoms, such as pain, but does not cure the disease. Its main purpose is to improve the quality of life.
- **palpation** A simple technique in which a health care provider presses on the surface of the body to feel organs or tissues underneath. One can feel a palpable mass in the breast.

- Papanicolaou smear (Pap test) A screening test of the cells of the cervix used to detect early signs of cervical cancer.
- Papanicolaou stain (Pap stain) A multichromatic staining process used primarily on gynecological specimens. It provides great transparency and delicacy of detail, which is important in cancer screening, especially of gynecologic screens.
- pathologist A physician who specializes in the identification of abnormalities and disease by examining body tissue under a microscope and organs. The pathologist determines whether a lump is benign or cancerous.
- pathology A study of disease through examination of body tissues and organs under a microscope for evidence of disease. Diagnosis of any tumor thought to be cancer by examination under a microscope.
- **Patient navigation (PN)** Individualized assistance provided to women to overcome barriers and facilitate timely access to quality screening and diagnostic services, as well as initiation of timely treatment for those diagnosed with cancer.
- **pectoral muscles -** Muscles attached to the front of the chest wall and upper arms; the larger muscle group is known as pectoralis major, and the smaller muscle group is known as pectoralis minor. Because these muscles are in close proximity to the breast, they may become involved in breast cancer or surgery to treat it.
- **pelvic examination -** An internal physical examination used to detect a variety of gynecological disorders. Performed by a physician, nurse or physician's assistant, the pelvic examination is, and includes, a visual inspection of the vagina and cervix, as well as palpation of the uterus and ovaries.
- **pigment -** A class of substances that provide color, including in the human body. The areola and nipple of the breast are pigmented with melanin. Normally a brownish tint, melanin, in these areas of the breast can range from pale pink to deep brown.
- predisposition Susceptibility to a disease that can be triggered under certain conditions. For example, some women have a family history of breast cancer and are therefore predisposed (but not necessarily destined) to develop breast cancer.
- **premalignant -** Abnormal changes in cells that may, but not always, become cancer; also known as precancerous. Most of these early lesions respond well to treatment and result in cure.
- **prevalence -** A measure of the proportion of persons in the population with a particular disease at a specified time.
- **prevention** Avoiding the occurrence of an event, such as development of cancer, by avoiding things known to cause cancer and participating in activities that can or might prevent cancer. For example, avoiding smoking may prevent lung cancer, and taking tamoxifen may prevent breast cancer in women who are at high risk for the disease.
- **preventive services -** Programs or products that are developed and provided for the purpose of health promotion and maintenance.
- **primary site -** The site where cancer begins; usually named after the organ in which it begins; for example, breast cancer.

- **progesterone** A female sex hormone released by the ovaries to prepare the uterus for pregnancy and the breasts for milk production (lactation).
- **prognosis** A prediction of the course of disease, including the prospects for a cure. For example, women with early detected breast cancer and receive prompt treatment have a good prognosis.
- **prosthesis (breast)** An artificial form that can be worn under the clothing after a mastectomy to simulate the shape and form of a natural breast. (Plural: prostheses.)
- protocol A formalized outline or plan.
- **public health district -** Missouri is divided into six public health districts. In the manual, the word regions is used.
- **quality assurance -** The overall process of assessing and maintaining the highest possible quality in the acquisition and interpretation of results.
- radiologic technologist A health professional (not a physician) trained to properly position patients for x-rays, to load film and take the images, and to develop and check the images for quality. For mammograms (breast x-rays) machines, the technologist must have special training in mammography. A radiologist reads the films taken by the technologist.
- **radiologist** A physician who has taken additional years of training to produce and read x-rays and other types of images (for example, ultrasound or magnetic resonance imaging) to diagnose abnormalities.
- **radiology** A branch of medicine concerned with the use of radiant energy in the diagnosis and treatment of disease.
- **radiotherapy** Treatment with radiation to destroy cancer cells. Methods used include linear accelerators, x-rays, cobalt, and betatrons. Radiation treatment may reduce the size of a cancer before surgery, or destroy any remaining cancer cells after surgery; also known as *irradiation* and *radiation therapy*.
- **Reach to Recovery -** A visitation program of the American Cancer Society for women who have a personal concern about breast cancer. Carefully selected and trained volunteers, who have successfully adjusted to breast cancer and its treatment, provide information and support to women newly diagnosed with the disease.
- **reactive changes -** Normal changes in tissue as a result of the body's reaction to an irritation or infectious agent.
- recurrence Cancer that has re-occurred or reappeared after treatment. Local recurrence is at the same site as the original cancer. Metastasis means that the disease has recurred at a distant site. Regional recurrence is in the tissue or lymph nodes near the site.
- **regimen -** A strict, regulated plan of diet, exercise, or other activity designed to reach certain goals. In cancer treatment, it is a plan to treat cancer.
- **regional involvement -** The spread of cancer from its original site to nearby areas such as muscles or lymph nodes, but not distant sites such as other organs.
- **Regional Program Coordinator (RPC) -** SMHW staff persons located in several regions of the state who assist with referrals for diagnosis and treatment and provide service coordination/case management services for women enrolled in SMHW.

- **rehabilitation -** Activities to adjust, heal, and return to a full, productive life after injury or illness. This may involve physical restoration (such as the use of prostheses, exercises and physical therapy), counseling and emotional support.
- **risk factor -** Anything that increases a person's chance of getting a disease such as cancer. The known risk factors for breast cancer include being a woman over the age of 50; family history of the disease, especially in one's mother or sister; beginning menstrual periods at a young age (before age 12); obesity; never having completed a pregnancy; first pregnancy after age 30.

saline solution - A saltwater solution.

- scan A study using either x-rays or radioactive isotopes to produce images of internal body organs.
- scant cellularity An unsatisfactory Pap smear with inadequate cellularity.
- **scirrhous cancer -** A breast cancer with a hard, firm, fibrous texture; usually an infiltrating ductal carcinoma.
- screening The search for disease, such as cancer, in people without symptoms. Screening may refer to coordinated programs in large populations. The principal screening measure for breast cancer is mammography.
- **screening guidelines -** Recommendations for the application of screening procedures, which are formulated by professional and governmental agencies.
- screening mammogram American College of Radiology defines a screening mammogram as "an x-ray breast examination of asymptomatic women in an attempt to detect breast cancer, when it is small, nonpalpable and confined to the breast."
- **screening provider(s)** Health departments, primary care facilities, and/or any other entities under contract with Missouri's SMHW program to provide breast and cervical cancer screening services.
- screening services Refers to clinical breast examination, Pap smear, pelvic examination, mammography, instruction in breast self-examination, and informational and educational services relating to breast and cervical cancer by providers of SMHW services.
- secondary tumor A tumor that forms as a result of spread (metastasis) of cancer from its site of origin.
- shall/must/should Reference to the words "shall" and "must" indicate mandatory program policy. "Should" indicates recommended program policy relating to program management and patient care that the provider is urged to follow.
- Show Me Healthy Women (SMHW) The functional entity created within the Missouri Department of Health and Senior Services, Division of Community and Public Health, Section for Community Health Services & Initiatives, Bureau of Cancer and Chronic Disease Control, to implement and manage all components of the grant.
- **silicone gel -** Synthetic gel compound used in breast implants because of its flexibility, strength, and texture, which is similar to the texture of the natural breast. Silicone gel breast implants are available for women who have had breast cancer surgery. (See *breast augmentation*.)

- **sonogram** An image produced by using high-frequency sound waves. This technique is used to examine and measure internal body structures and detect bodily abnormalities but does not utilize radiation or x-rays.
- **speculum -** A metal or plastic instrument that permits visual inspection of the cervix and performance of a Pap smear.
- staging A method of determining and describing the extent of cancer, based on the size of the tumor, whether regional axillary lymph nodes are involved, and whether distant spread (metastasis) has occurred. Knowing the stage at diagnosis determines the best treatment and the prognosis.

#### stages of breast cancer:

- **Stage 0**: The earliest stage of breast cancer; the disease is in situ.
- **Stage I**: The tumor is 2 cm or less in size and contained within the breast tissue; not spread beyond the breast.
- **Stage II**: The tumor is more than 2 cm and spreads to regional lymph nodes, such as the lymph nodes under the arm, or the tumor is more than 5 cm in diameter and no regional nodes are involved.
- **Stage III**: The tumor, any size, has spread to several regional lymph nodes and/or other tissues near the breast.
- **Stage IV**: The cancer has spread to other organs and/or tissues by way of direct extension, lymph system and/or bloodstream.

#### stages of cervical cancer:

- **Stage 0:** The earliest stage of cervical cancer; the disease is in situ.
- **Stage I:** Cancer has not spread beyond the cervix and uterus.
- **Stage II:** Cancer has spread beyond the uterus, but not to the pelvic wall or to the lower third of the vagina.
- **Stage III:** Cancer has spread to the pelvic wall and/or involves the lower third of the vagina and/or regional lymph nodes.
- **Stage IV:** The cancer has spread to other organs and/or tissues by way of direct extension, lymph system and/or bloodstream.
- **stereotactic biopsy** A diagnostic procedure that combines the technology of radiological imaging with surgical biopsy. Images taken at different angles of the area surrounding a lesion and a computer precisely calculates the lesion's location. An automatic biopsy needle obtains samples of the tissue at the exact spot calculated by the computer.
- **subcutaneous mastectomy -** A surgery to remove internal breast tissue, yet the nipple and skin are left intact.

supraclavicular nodes - Lymph nodes that are above the collarbone (clavicle).

**surgery -** An operation, a procedure performed by a surgeon to repair or remove a part of the body or to find out if disease is present.

- **surgical or specialist consultation -** A referral of a woman to a surgical specialist for additional diagnostic evaluation, following detection of a breast or cervical abnormality.
- **survival rate** A way of expressing how long, on average, people may live after diagnosis of disease or after treatment of the disease and expressed as the percentage of people who live a certain period, as opposed to the percentage of those who die. For example, the five-year survival rate for women with localized breast cancer (including all women living five years after diagnosis, whether the patient was in remission, disease-free, or under treatment) was 78 percent in the 1940's, but in the 1990's it was 93 percent.
- suspicious abnormality A finding on a test that indicates cancer might be present.
- synchronous At once or at the same time.
- **systemic disease -** In breast cancer, a tumor that originated in the breast has spread to distant sites, such as the liver, chest, brain, bones, or lungs.
- **tamoxifen (brand name: Nolvadex) -** A drug that blocks estrogen; an antiestrogen drug. Blocking estrogen is desirable in some cases of breast cancer because estrogen feeds the growth of certain types of tumors.
- target population The desired or intended audience, in this case for SMHW interventions.
- **therapy** Any of the measures taken to treat a disease. *Alternative therapy* is any unapproved therapy and sometimes called *questionable methods* or *unproven methods*. Sometimes alternative and standard therapies are used together. Some are harmless, some may be helpful, and others can be dangerous, especially if they divert a person with cancer from receiving standard therapy. Some people use alternative therapies along with standard therapy; in this approach, the healthcare team should be informed of the alternative method used. *Experimental therapy* is any new, as-yetunproven method that is undergoing testing for specific purposes in a scientific clinical trial. *Standard therapy* is any method that has been scientifically tested and proven useful for specific purposes and is the standard treatment.
- **tissue -** A collection of similar cells, united to perform a particular function. There are four basic types of tissue in the body: epithelial, connective, muscle, and nerve.
- **tomosynthesis –** An optional method of performing high-resolution mammogram with three-dimensional images of the breast.
- transformation A multistep process by which normal cells change into neoplastic cells.
- tumor Tissue growth in which the cells multiply uncontrollably, also called *neoplasm*. It can be either benign or malignant. *Benign tumor* is a noncancerous tumor (i.e., does not invade and destroy adjacent normal tissue). *Malignant tumor* is a tumor that is cancerous and likely to cause death unless adequately treated.
- ultrasonography (ultrasound) An imaging method in which high-frequency sound waves, transmitted through the area of the body being studied, are used to outline a part of the body; the echoes are read, displayed and transmitted to a television screen. The painless procedure mainly determines if a structure is solid or liquid. It is useful in detecting breast cysts in young women with firm, fibrous breasts. No radiation exposure occurs.

- **underinsured** A patient is considered underinsured if she has medical insurance that does not cover SMHW screening services, or if she has an unmet deductible or required copayment for services covered by SMHW.
- underserved Groups of individuals who chronically lack access to health care for a variety of reasons.
- **unilateral -** Affecting one side of the body. For example, unilateral breast cancer occurs in one breast only. (Also see *bilateral*.)
- **unproven methods of cancer management -** Any therapy that has not been subjected to traditional scientific study and proved effective in clinical trials. Such methods range from harmless to life-threatening, especially if used in place of medically sound methods of treatment. The American Cancer Society maintains a reference file on proven methods of cancer management. Information is available by request from the society's toll-free cancer information hotline, 1-800-ACS-2345. (Also see *therapy*.)
- **x-rays -** One form of radiation that can, at low levels, produce an image of cancer on film, and at high levels can destroy cancer cells.
