Week 48: November 28, 2021 – December 4, 2021

Summary:

- The estimated influenza activity in Missouri is Regional\(^2\).

- During Week 48, a total of 476 laboratory-positive\(^3\) influenza cases (420 influenza A, 53 influenza B and 3 untyped) were reported. A season-to-date total of 1,373 laboratory-positive influenza cases (1,048 influenza A, 306 influenza B, and 19 untyped) have been reported in Missouri as of Week 48. The influenza type for reported season-to-date cases includes 76.3% influenza A, 22.3% influenza B, and 1.4% untyped. The percentage of respiratory specimens testing positive for influenza in Missouri laboratories reporting to the National Respiratory and Enteric Virus Surveillance System (NREVSS) remained low during Week 48 (Figure 5).

- Influenza-like illness (ILI) activity was above baseline for the hospital emergency room visit chief complaint data reported through ESSENCE. The reported percentage of visits for ILI through ESSENCE was 2.84% (Figure 6).

- One influenza-associated death has been reported in Missouri as of Week 48.

- One influenza or ILI-associated outbreak has been reported in Missouri as of Week 48.

- National influenza surveillance information is prepared by CDC and is included in the weekly FluView report, which is available online at [http://www.cdc.gov/flu/weekly/fluactivitysurv.htm](http://www.cdc.gov/flu/weekly/fluactivitysurv.htm).

---

\(^1\)The 2021-2022 influenza season begins CDC Week 40 (week ending October 9, 2021) and ends CDC Week 39 (week ending October 1, 2022).

\(^2\)Regional is defined as: Increased ILI in two regions and elevated numbers of laboratory-confirmed influenza cases in those regions.

\(^3\)Laboratory-positive influenza includes the following test methods: rapid influenza diagnostic tests (antigen), reverse transcriptase polymerase chain reaction (RT-PCR) and other molecular assays, immunofluorescence antibody staining (Direct (DFA) or Indirect (IFA)), or viral culture.

\(^4\)ILI is defined by ESSENCE as Emergency Department chief complaints for Influenza or (FeverPlus and (Cough or SoreThroat) and not NonILIfevers).

\(^5\)All influenza-associated deaths became reportable in Missouri in 2016.
Surveillance Data:

Interactive Maps

The jurisdiction-specific influenza data are provided through interactive maps available at https://arcg.is/G5LWv.

Click on the jurisdiction to view the influenza data specific to that jurisdiction.
