Summary:

- The estimated influenza activity in Missouri is Widespread.

- During Week 8, a total of 5,237 laboratory-positive influenza cases (4,982 influenza A, 223 influenza B, and 32 untyped) were reported. A season-to-date total of 33,166 laboratory-positive influenza cases have been reported in Missouri as of Week 8. The influenza type for reported season-to-date cases includes 91.4% influenza A, 7.9% influenza B and 0.7% untyped. Ten laboratory-positive cases of influenza A (6 H1N1 and 4 H3) were reported by the Missouri State Public Health Laboratory (MSPHL) during Week 8. The number of specimens testing positive for influenza in Missouri laboratories reporting to the National Respiratory and Enteric Virus Surveillance System (NREVSS) decreased during Week 8 (Figure 6).

- Influenza-like illness (ILI) activity was above baseline for the Missouri Outpatient ILI Surveillance Network (ILINet) and for the hospital emergency room visit chief complaint data reported through ESSENCE. The reported percentage of visits for ILI was 6.59% (Figure 5) and 4.03% (Figure 7) through ILINet and ESSENCE respectively. The ILI data from a small number of sites located in the Northwest Region of the state is currently unavailable in ESSENCE. Therefore, the ILI data for the Northwest Region should be interpreted with caution.

- A season-to-date total of 19 influenza-associated deaths have been reported in Missouri as of Week 8. During Week 7, 65 deaths involving Pneumonia and Influenza (P&I) were reported to the Bureau of Vital Records, resulting in a season-to-date total of 1,063 P&I associated deaths in Missouri.

- A season-to-date total of 10 influenza outbreaks and eight influenza or ILI-associated school closures have been reported in Missouri as of Week 8.

- Influenza activity continued to increase in the United States during Week 7. National influenza surveillance information is prepared by CDC and is included in the weekly FluView report, which is available online at [http://www.cdc.gov/flu/weekly/fluactivitysurv.htm](http://www.cdc.gov/flu/weekly/fluactivitysurv.htm).

---

1 The 2018-2019 influenza season begins CDC Week 40 (week ending October 6, 2018) and ends CDC Week 39 (week ending September 28, 2019).

2 Widespread is defined as: Outbreaks of influenza or increases in ILI cases and recent laboratory-confirmed influenza in at least half the regions of the state with recent laboratory evidence of influenza in the state.

3 Laboratory-positive influenza includes the following test methods: rapid influenza diagnostic tests (antigen), reverse transcriptase polymerase chain reaction (RT-PCR) and other molecular assays, immunofluorescence antibody staining (Direct (DFA) or Indirect (IFA)), or viral culture.

4 Influenza-like illness (ILI) is defined by ILINet as fever (temperature of 100°F [37.8°C] or greater) and a cough and/or a sore throat without a known cause other than influenza. ILI is defined by ESSENCE as Emergency Department chief complaints for Influenza or (FeverPlus and (Cough or SoreThroat) and not NonILIfevers).

5 All influenza-associated deaths became reportable in Missouri in 2016.

6 The P&I data are available one week later. The P&I data for the CDC Week provided is the most current data available.

Figure 4. Number of Laboratory-positive† Influenza Cases by CDC Week, Missouri, 2015-2019*
Figure 5. Percentage of Outpatient Visits for Influenza-like Illness (ILI), Missouri Outpatient ILI Surveillance Network (ILINet) 2015-2019*†

The ILINet Region 7 (MO, IA, KS, NE) baseline is the mean percentage of patient visits for ILI during non-influenza weeks for the previous three seasons, plus two standard deviations. A non-influenza week is defined as periods of two or more consecutive weeks in which each week accounted for less than 2% of the season’s total number of specimens that tested positive for influenza. Data Source: U.S. Outpatient Influenza-like Illness Surveillance Network (ILINet), Centers for Disease Control and Prevention (CDC).

† 2018-2019 season-to-date through the week ending May 18, 2019 (Week 20).
