Current COVID-19 Severity based on State Averages

- Typical
- Above Average
- High
- Severe

COVID-19 Total Patients in the Hospital by Day for KC Region (Bates, Carroll, Cass, Clay, Henry, Jackson, Johnson, Lafayette, Pettis, Ray and Saline)

SITUATIONAL SUMMARY:

In recent weeks, most areas of Missouri have experienced a surge in COVID-19 cases and hospitalizations. The Delta variant is the predominant cause. **Cases in Johnson (299), Lafayette (256) and Saline (165) have increased within the past 14 days.** Hospitals in the region are seeing resource strain from dramatically increased numbers of COVID-19 patients and hospitalizations. As a result, several hospitals in the region are at or near capacity. Continued disease spread into Northwest Missouri is expected.*

The percentage of people fully vaccinated in **Johnson (23.4.0%), Lafayette (34.5%) and Saline (35.8%) counties.** Experts say at least 70% - 80% of people, depending on the type of variant virus, need immunity to provide the best chance of minimizing spread within a community.**

Delta Variant Update:

- Delta cases are on the rise and the variant appears to spread more easily and poses higher risk of hospitalization than prior strains.
- Vaccination is the best way to prevent COVID-19. Social distancing, masking, handwashing, and other precautions remain important.

Value of Vaccination for Individuals:

- All approved vaccines are very effective, even against new variants.
- There is no cost for the COVID-19 vaccine, even if you are uninsured.
- Fully vaccinated individuals are less likely to miss work, school, or social functions due to illness.
- Fully vaccinated individuals are not asked to quarantine when exposed to COVID-19 and not symptomatic.

Value of Vaccination for Workplaces/Communities:

- Helps prevent or reduce outbreaks that create high absenteeism in businesses and hamper community social events.
- Minimizes health care resources and protects workers and patients.

Safety:

- Administered safely to millions in the US under intense safety monitoring.
- Authorized quickly, without ignoring safety checks, by cutting 'red tape'.
- Reduces the risk of COVID-19 and especially prevents severe illness.

“The COVID-19 vaccine is Missouri’s pathway to recovery. We strongly encourage Missourians to protect themselves by getting vaccinated as soon as possible.”

— Daniel P. Mehan, President and CEO
Missouri Chamber of Commerce and Industry

“Vaccination reduces COVID-19 hospitalizations. Hospital ICUs are struggling to keep up. You can help ensure this space is available for other life-threatening illnesses.”

— Herb B. Kuhn, President and CEO
Missouri Hospital Association

COVID-19 VACCINES ARE WIDELY AVAILABLE:
