Printing the Registry Donor Card

Anyone who has registered in the Missouri Donor Registry System (DRS) has the ability to print a Donor Card directly from the DRS. If you have not previously logged in to the DRS, you will be required to set up a profile before you are able to access the Donor Card.

Step 1: Select the Registry Donor Card link on the Publications page of the Missouri Organ and Tissue Donor Program website.

Step 2: Click the Checkbox next to “YES! I wish to donate my organs, eyes, and tissues to save or enhance someone’s life through transplantation.” Then click the “Continue” button once it becomes available (after the check appears in the “YES!” checkbox).
Step 3: After reviewing the Informed Consent information, click the Checkbox next to “I have read and understand the above statements and consent to be a donor at the time of my death.” Then click the “Continue” button once it becomes available (after the check appears in the checkbox).

Step 4: Enter the personal information required to access your record in the Donor Registry System. All required information is marked with an asterisk (*) and is case sensitive. Click the “Continue” button once all required information has been entered.
Step 5: Select the “Print Donor Cards” button.

Step 6: A new window will pop-up displaying the Donor Cards, which can now be printed.
