Saving and Enhancing Lives

Through Organ, Eye and Tissue Donation –

A Strategic Approach for Missouri

July 2014 – June 2019
REVISED: June 2017
This plan is a public document and may be copied and shared for the purposes of informing, educating, promoting, and coordinating efforts to increase awareness about organ, eye and tissue donation and increase donor designations.
Electronic Document – How to Navigate

Three keys that will help you navigate Saving and Enhancing Lives; links, color and the back arrow key. Links will route you directly to another page within the plan or connect you to an Internet resource noted within the document. Color highlights areas that organizations and individuals may want to adopt to help impact organ, eye and tissue donation and donor designations in Missouri. Lastly, the back arrow key is the standard key used by leading web browser to move back and forth between web sites. Call 573.522.2864 for answers to questions you may have about this plan.

Introduction

Acknowledgements

Missouri’s plan, **Saving and Enhancing Lives**, guides programming that fosters efforts to increase awareness about organ, eye and tissue donation. The initial plan was the direct result of collaborative efforts between the Governor’s Organ Donation Advisory Committee (GODAC), Mid-America Transplant, Midwest Transplant Network, and the Missouri Organ and Tissue Donor Program of the Department of Health and Senior Services (DHSS). Subsequent reviews and revisions are the result of collaborative efforts between the GODAC, Mid-America Transplant, Midwest Transplant Network, Missouri Kidney Program, Department of Elementary and Secondary Education, Saving Sight, and the DHSS.

The **Saving and Enhancing Lives** plan continues to focus on three primary areas of need. The first is to gain insight into ways the GODAC can improve organ donation awareness within the definition of their advisory body role. Secondly, to assess the Organ and Tissue Donor Program’s capacity to implement programs and, lastly to use collaborative efforts to maximize resources and reduce duplication of effort. This plan:

- is an ever-changing plan based upon annual environmental assessment, evaluation and stakeholder input;
- includes overarching goals that can be adopted by partnering organizations; and
- acknowledges that any organization and/or individual can join in life-saving and life-enhancing efforts by adopting one or more goals or objectives on which to focus.

The purpose of this plan continues to be to save and heal the lives of people in need of an organ, eye or tissue transplant; increase education and awareness efforts; increase donor designation rates in Missouri; honor donors; and strive to close the gap between the need for and availability of organs and tissues. An annual plan report is published and available at [www.health.mo.gov/organdonor](http://www.health.mo.gov/organdonor) under Publications.
Moving Forward

The *Saving and Enhancing Lives* plan is available for use and implementation by all Missouri organizations and individuals with an interest in organ, eye and tissue donation. Existing partners are encouraged to seek opportunities to integrate objectives from this five-year plan into their organizational plans. The DHSS encourages other organizations, businesses, non-profits, and individuals to do the same. Combined implementation efforts and annual action plan reporting will aid in reaching plan goals and objectives and monitor progress.
A Public Health Issue

Organ donation remains a public health issue even in the face of advancing medical technology and treatment options and the continued rise in the number of potential donors. Someone is added to the national transplant waiting list every 10 minutes and on average 22 people die every day while waiting for a life-saving transplant.¹ Nationwide the number of individuals waiting for a transplant continues to grow.

Donate Life America announced that 98 percent of all adults have heard about organ donation and 86 percent have heard of tissue donation.² Ninety percent of Americans say they support donation, but only 30 percent know the essential steps to take to be a donor.² The need for education and recording donor designations continues to be a priority and two primary focus areas for closing the gap on the transplant waiting list.

Donor designation rate is the rate at which individuals join the state donor registry as a percentage of all driver licenses and identification cards issued within a specific time. There continues to be an increase in donor designations recorded in the Donor Registry System (DRS). At the close of fiscal year 2017, 3,642,509 individuals designated themselves as potential donors representing a 21.2 percent increase since the close of fiscal year 2012 (3,004,025).

The DHSS and its partners use data to monitor need and to drive educational efforts. The Organ Procurement and Transplantation Network (OPTN) maintains the national patient waiting list data as well as donation, transplantation, and waiting list statistics. Missouri’s DRS provides donor designation data. These data sources assist in planning, monitoring, and evaluating educational efforts.
People of every age give and receive organ donations:

Data subject to change based on future data submission or correction. Totals may be less than the sums due to patients included in multiple categories. Source: Organ Procurement and Transplant Network (https://optn.transplant.hrsa.gov/)

![Diagram showing Organ Wait List Candidates by Race/Ethnicity]

**Missouri Data**

Data subject to change based on future data submission or correction. Data sources: Organ Procurement and Transplant Network (https://optn.transplant.hrsa.gov/) and Missouri DRS.

The number of registrants in Missouri’s DRS continues to rise gradually. As of July 1, 2017, 3.6 million Missourians have registered their donor designation as a potential donor. While the average increase each year has slowed, the number of registrants has increased by 21.2 percent since fiscal year (FY) 2012. The slowing of yearly registrations may be due to a six-year driver license renewal cycle, for most residents, issued/renewed on an individual’s day of birth. The fluctuation in driver license transactions can range from 115,600 to 153,000 a month. Other contributing factors may be the “53” and Donate Life America’s “Register Me” registries. Both launched in FY16 and united in FY17. According to Donate Life America (DLA), the Donor Designation (DD) Rate is a key measure to determine the rate at which individuals’ join the state donor registry as a percentage of all driver’s licenses and identification cards issued within a specific time. DLA reports that Missouri’s DD Rate as of March 31, 2017 was 49.6 percent; placing Missouri seventh of all reporting states. The national average DD Rate is 58.5 percent. Missouri’s rate may be lower because the calculation is for adults 18 years of age and older and Missouri transaction data is for all driver licenses and identification cards issued, including for individuals younger than 18 years of age.
Missouri’s population demographic breakdown: Whites 84.45 percent; Black or African-American 12.51 percent; Asian/Native Hawaiian and Other Pacific Islander 2.33 percent; and American Indian and Alaska Native .70 percent.  

The actual number of available and viable donors at the time of death compared to the number of individuals on the waiting list for an organ creates the gap between need and availability. Every person is a potential donor. Viability assessment is determined at or near the time of death.

Donor Designation Share (DDS)
The percentage of the adult population (≥18 years of age) registered as donors divided by the number of individuals in the donor registry of a state by the adult population as measured by the most recent census.

Donor Designation Rate (DDR)
The percentage of individuals during a quarter who say “yes” to donation when given the opportunity during a motor vehicle department transaction.

Data limitations exist. For additional information, contact Donate Life America.

- 6-10 0.4%
- ≤5 1.8%

Missouri Donors by Fiscal Year:

Recovery Authorized by the Registry:

Missouri Donors vs. Transplants Performed by Fiscal Year:

Source: United Network of Organ Sharing (UNOS)
Missourians can actively reduce the gap or need for an organ transplant with a healthy lifestyle. According to Organ Procurement and Transplantation Network (OPTN), the primary diagnosis for 36,110 of the 122,042 (29.6 %), candidates waiting for an organ on the national waiting list is diabetes; 21,976 is uncontrolled high blood pressure (hypertensive nephrosclerosis) leading to end-stage renal disease; and 114 is coronary artery disease. The Kidney transplant waiting list was, and continues to be, the largest organ wait list. For Missouri, OPTN reports diabetes is the primary diagnosis for 28.4 percent (406) of the 1,432 waiting candidates; hypertensive nephrosclerosis for 22.3 percent (319); and no report for coronary artery disease as primary cause.

Prevention
Since diabetes and high blood pressure are the top two causes of end-stage renal disease, any effort toward prevention would reduce the need for the expensive, life-sustaining treatment of dialysis or kidney transplantation.
Missouri Organ and Tissue Donor Program

The Missouri Organ and Tissue Donor Program assists the Department of Health and Senior Services reach its Vision. A vision appropriate for all statewide organ, eye and tissue donor efforts as is the mission, culture, and values under which the Missouri Organ and Tissue Donor Program and the GODAC function.

Vision

Healthy Missourians for Life

Mission

Available organs and tissues through informed citizens and an efficient, confidential registry of potential donors.

Culture

Understand that organ, eye, and tissue donation saves and enhances lives.

Understand there is an organizational structure and established processes.

Values

Communication: Foster information sharing, resources and collaboration between partners.

Education: Ensure access to accurate information through a variety of channels so that residents can make an informed decision.

Environment: Acknowledge the perception about organ, eye, and tissue donation is ever changing and requires continuing education.

Evaluation: Measure strategic plan outcomes and adjust accordingly.

Partnership: Promote inclusion with all actively engaged stakeholders.

Quality Improvement: Use and share lessons learned to maximize reach, resources, and expand evidence-based practices.
Priority Areas

The plan has five primary priority areas: education, data, finance, registry, and stakeholders. A brief statement accompanies each below and the heading links to the goals and objectives for that priority area.

Education

Utilizing social media, providing positive publicity, expanding partnerships, bridging efforts, and educating people of all ages are opportunities to explore. The plan addresses education in a variety of settings and target populations.

Data

Assessing current conditions, evaluating activities and measuring progress toward goals and objectives are possible with data. In addition, data helps direct educational efforts. Monitoring data needs and capacity, enhancing data availability and sharing data are opportunities to aid decision making. The plan addresses data accuracy and relevancy.

Finance

Partners encourage contributions to the Organ Donor Program Fund. The fund supports education and registry maintenance and modification. Plan goals address financial sustainability and transparency.

Registry

Ever changing technology and public demands of that technology are indicators of how people learn, communicate, and process information. Constant monitoring, maintenance, and upgrades to the DRS are necessary to remain current. The plan addresses technology while maintaining confidentiality.

Stakeholders

As technology and health care systems continually change, medical breakthroughs made, and cultural beliefs change, it is critical that groups with similar goals and complimentary services, work together to maximize resources and reach. Through effective partnerships, educational opportunities expand and residents become better informed. Communication, engagement, and clearly defined roles provide opportunities to develop new partnerships while advancing existing partnerships to enhance education efforts. The plan addresses stakeholder engagement.
Plan Utilization

The DHSS’ Organ and Tissue Donation Program will follow this strategic plan in a collaborative effort with partners. DHSS staff will further refine the action plan to include detailed steps, timeframes, and assigned responsibilities. Evaluation measures will be refined where necessary and progress monitoring will be ongoing. The Organ and Tissue Donor Program, with input from GODAC and partners, will determine updates needed for the action plan. The GODAC will receive annual reports describing accomplishments, challenges, success stories, and partner–submitted action plans. The committee may annually recommend revisions to the strategic plan. During the plan’s fifth year, the GODAC and partners will participate in a strategic planning process to determine course direction for the next five years.

Successful implementation of this strategic plan is dependent upon the support of existing and future partners. Support in the way of expertise, staff, volunteers, leadership and financial contributions are necessary. Current funding from the organ procurement organizations, Gift of Life, Missouri Kidney Program, and the Organ Donor Program Fund support current educational efforts and the Donor Registry System in Missouri. Expanded efforts, as outlined in Saving and Enhancing Lives, may require additional funding. The DHSS’ Organ and Tissue Donor Program will continually seek funding sources, notify partners of funding opportunities and when applicable, apply for funding. Key decision makers will need to identify and implement policies that improve resources, direct best practices and assure a technologically current system that addresses donor Sdesignations.

The DHSS and the GODAC are optimistic that many organizations and individuals within the state of Missouri will adopt one or more goals and objectives from this strategic plan. There are several tools available, including those outlined in the addendum, that individuals and organizations can use to develop action plans.

Partner Participation

Successful implementation of this strategic plan is dependent upon the support of existing and future partners. To aid this effort, potential action steps, partners, and success indicator text is printed in blue on pages 8–31.

Individuals and organizations wanting to help achieve the goals and objectives outlined in this plan should annually submit action plans by July 15th of every year in order to have their collaboration incorporated into the larger strategic plan.
### Priority Area

#### Data – Data that Informs

**Goal:**
Accurate and relevant data used to make informed decisions.

**Objective(s):**
1. By June 2018, upgrade Donor Registry System reporting features to provide timely data without compromising confidentiality.

*Record major action steps below. Color text highlights areas that organizations and individuals may want to adopt to help impact organ, eye and tissue donation and donor designations in Missouri.*

**Priority Area**  
**Education – Emergency Management Services (EMS)**

**Goal:** Educate and build awareness about organ, eye, and tissue donation so people can make an informed decision.

**Objective(s):**
1. By June 2017, increase from zero to 500 the number of emergency management personnel that complete the *Keep Hope Alive* training.
2. By June 2017, increase knowledge among emergency management personnel as measured by *Keep Hope Alive* training pre- and post-test scores.
3. By June 2018, increase from zero to 12 the number of *Keep Hope Alive* presentations to fire and/or Emergency Management Services departments.

*Record major action steps below. Color text highlights areas that organizations and individuals may want to adopt to help impact organ, eye and tissue donation and donor designations in Missouri.*

### Priority Area
**Education – Local Driver License Offices**

**Goal:** Educate and build awareness about organ, eye, and tissue donation so people can make an informed decision.

**Objective(s):**
1. By June 2019, develop and deploy a training program for all local license office employees about organ, eye and tissue donation and the donor registry system.
2. Through June 2019, share information about organ, eye and tissue donation with local license offices.

*Record major action steps below. Color text highlights areas that organizations and individuals may want to adopt to help impact organ, eye and tissue donation and donor designations in Missouri.*

**Priority Area**  
**Education – High School Education**

**Goal:** Educate and build awareness about organ, eye, and tissue donation so people can make an informed decision.

**Objective(s):**
1. By June 2016, increase the number of high schools implementing the Gift of Life program from 80 as of June 30, 2013 to 90. *(As of November 2015, 90 high schools have implemented the program.)*
2. By June 2019, offer a minimum of two organ and tissue donation learning module options for public schools.

*Record major action steps below. Color text highlights areas that organizations and individuals may want to adopt to help impact organ, eye and tissue donation and donor designations in Missouri.*

## Priority Area  Stakeholders – Communication

**Goal:** Engaged stakeholders making recommendations for Donor Registry System operations and education initiatives through open and transparent communication

**Objective(s):**
1. By June 20, 2015, document roles of primary stakeholders.
2. By June 30, 2015, document communication process between the advisory committee and the Department.
4. By June 2018, engage stakeholders on Donor Registry System operations and education efforts.

Record major action steps below. **Color text highlights areas that organizations and individuals may want to adopt to help impact organ, eye and tissue donation and donor designations in Missouri.**

*Note: The DHSS is currently reviewing a legislative proposal submitted by the Organ and Tissue Donor Program*
Plan Update

Strategic Plan – Review

The Governor’s Organ Donation Advisory Committee formed a sub-committee of members and partners to review the original plan. The review included reviewing each goal, objectives and action steps listed to determine if they were still relevant, needed amending or if they should be removed for the statewide plan. Once the initial review was completed, the lead subcommittee member presented the changes to the full advisory committee for review and comment. The revised plan was then submitted to, and reviewed and approved by the Department of Health and Senior Services. It is the intention of the GODAC to review the plan again during FY17.

Plan Development

Strategic Plan – Development

The Governor’s Organ Donation Advisory Committee conducted an analysis using a process to identify strengths, weaknesses, threats and opportunities (SWOT). Active partners participating in the process included the Missouri Kidney Program, Gift of Life of Kansas City, Saving Sight (formally Heartland Lions Eye Banks) and members of DHSS’ Bureau of Cancer and Chronic Disease Control staff. The GODAC contracted with the Harry S. Truman School of Public Affairs to conduct the assessment to help the Committee gain insight into ways to improve organ donation awareness and their role as an advisory body.

The Harry S. Truman School of Public Affairs Capstone Team used semi-structured interviews, literature review and program content reviews from many states. The Team’s findings and analysis resulted in recommendations in four key areas: organizational development, public awareness, advocacy and organizational legitimacy and progress. The Capstone Team determined that by improving organizational performance and advocacy practices, the committee and its partners could more effectively address the disparity between need and availability of organs for transplant, expand education efforts and increase donor designations. While developing the strategic framework, the following Capstone Team recommendations were considered.
1. The advisory committee needs to stand out as its own solidified group, apart from the aspects of the cause and be proactive rather than reactive, serve as advisors to the DHSS and other interested parties.

2. Narrow the SWOT analysis and gauge results after action at a later date.

3. Share analysis frequently with committee members.

4. Improve relations between all interested parties.

5. Improve relations with Donate Life America and its marketing programs.

6. Increase targeted campaigns at specific populations, e.g., campus outreach, African-American outreach and older American outreach.

7. Utilize social media and story-building to its full potential.

Using the results of the SWOT analysis and the Capstone Project Report, a sub-committee of partners developed a strategic framework outlining major strategy areas, overarching goals and objectives for five priority areas; education, data, finance, registry and stakeholders. GODAC adopted the strategic framework in fiscal year 2013 and is the foundation of this comprehensive five-year strategic plan.

**Strategic Plan – Planning Tools**

There are several tools available for developing action plans. One such tool is [Donate Life America’s Program Pre-Planning Tool](http://www.health.mo.gov/living/organdonor/publications.php). (Figures 1 and 2)

Another tool is [CDC’s Framework for Program Evaluation in Public Health](http://www.cdc.gov/eval/framework/index.htm). The framework is a set of steps for practical evaluation by programs and partners. While the focus is public health program evaluation, the approach is generalizable to any community planning and evaluation effort. From the CDC site, you can also access other evaluation resources, such as the Community Toolbox. Additional tools are available electronically at [http://www.cdc.gov/eval/index.htm](http://www.cdc.gov/eval/index.htm).

The [Community Tool Box](http://ctb.ku.edu/en/table-of-contents/analyze/where-to-start/participatory-approaches/main) site has numerous tools to walk individuals and organizations through designing community activities including how to approach participatory planning of community activities, identify targets and agents of change and use sectors of the community to reach targets.

The Missouri Organ and Tissue Donor Program Strategy/Program Action Plan template also serves as a reporting mechanism that can be shared with other organizations. The template allows the reader to identify the status of the priority area quickly.
The **Collaboration Multiplier**, a newer tool ([http://www.preventioninstitute.org/component/jlibrary/article/id-44/127.html](http://www.preventioninstitute.org/component/jlibrary/article/id-44/127.html)) released by the **Prevention Institute**, is an interactive framework tool that can analyze collaborative efforts. It guides organizations in determining partners needed and how to engage them. Alternatively, the tool can help identify activities to achieve a common goal, identify missing sectors that can contribute to a solution, delineate partner perspectives and contributions and acquire expertise and resources for those organizations already working together. The **Collaboration Multiplier** tool, while designed to complement and inform the **Prevention Institute**’s multi-level strategic action as a best practice for primary prevention, the tool provides a means to evaluate each partner’s skill set, effectively target individual and joint efforts, share each other’s skill sets and amplify accomplishments.
## Strategy/Program Action Plan

Comments:                                                                                                           

Comments By:
Evaluation

Program evaluation is essential in order to assure the best possible outcomes and best practices. Program evaluation is important in Missouri to ensure maintenance of effective programs and allocation of resources. By evaluating programs, resources can be directed to effective programs and ineffective programs discarded. Repeated replication of positive results indicate an effective program which provides the evidence needed to demonstrate, at a minimum, the program to be a best practice and at its best, evidence-based program—proven to be effective. Existing and future partners are more likely to invest in programs that are effective and easily replicated.

Evaluation findings are used to make decisions about program implementation and to improve program effectiveness. The GODAC used the following evaluation questions as a guide in developing its dashboard:

- Implementation: Were activities implemented as originally intended?
- Effectiveness: Did the program achieve the goals and objectives it intended to accomplish?
- Efficiency: Were activities produced with appropriate use of resources, e.g., budget and staff time?
- Cost-Effectiveness: Does the value or benefit of achieving the program goals and objectives exceed the cost of producing them?
- Attribution: Can progress toward goals and objectives be shown to be related to the program, as opposed to other things that are going on at the same time?

The above evaluation questions serve to document progress, demonstrate accountability or identify ways to make the program better.
Uniform Anatomical Gift Act

The Revised Uniform Anatomical Gift Act (194.210 to 194.294 RSMo) passed during the 2008 legislative session effective August 28, 2008 and means:

- Missouri’s organ and tissue donor registry, called the Donor Registry System (DRS), is a first-person consent registry,
- First-person consent makes your decision final unless revoked in a manner provided by law,
- Family consent is no longer required, you are in charge of this decision,
- Taking your name off of the registry does not mean that you cannot make a gift at the time of your death,
- Suspension, expiration or loss of your driver/nondriver license does not invalidate your decision,
- You can amend or revoke your gift at any time,
- You have the right to bar others from making a gift on your behalf by executing a refusal as outlined by law,
- You are not required to have your name included in the registry and can take your name off at any time and that
- Registry information is shared with authorized procurement agencies to determine donor status at or near death.

Many groups collaborate to promote awareness and education about organ, eye and tissue donation and/or assist in recording individual donor designations within the DRS. These organizations include:

- Missouri Department of Revenue
- Missouri Department of Health and Senior Services
- Midwest Transplant Network
- Mid-American Transplant Services
- Saving Sight (Formally Heartland Lions Eye Banks)
- Gift of Life
- Missouri Kidney Program
- Missouri Hospital Association
- Missouri Association of Fire Protection Districts
- Missouri State Fire Chiefs Association
- Governor’s Organ Donation Advisory Committee
Organ Donor Program Fund

The Organ Donor Program Fund (194.297 RSMo), a fund made of a combination of voluntary contributions, supports efforts of the Organ and Tissue Donor Program and the state's DRS. The fund is the only source of revenue for the maintenance and enhancement of the DRS and for educational efforts by the DHSS. No general revenue is allocated for the fund. Following are methods of donation:

- A dollar donation at the time of driver’s license or identification card renewal,
- Specialty license plate,
- Cash donation with an annual vehicle renewal,
- Contributing a portion of the Missouri Individual State Income Tax reimbursement,
- Missouri State Employee’s Charitable Campaign, or
- Direct donation to the Organ Donor Program Fund 0824.

Beginning August 28, 2012, an individual, or a corporation can donate to the fund at least $2.00 on a Missouri individual income tax return or at least $4.00 on a combined return of his or her tax refund amount to the fund. Details about the fund and the tax designation option are in Missouri statues (143.1016 RSMo). For information about how to make a donation visit www.missouriorgandonor.com and select the “Make a Contributions” tab.

Governor’s Organ Donation Advisory Committee (GODAC)

The GODAC, appointed by the Governor and confirmed by the Senate, is a 10-member committee that meets regularly and is authorized to:

- Assist the DHSS and the Department of Elementary and Secondary education in the development of organ donor awareness programs to educate the general public on the importance of organ donations,
- Recommend priorities in the expenditures from the Organ Donor Program Fund and
- Submit a report of its activities and recommendations annually to the Director of DHSS, the general assembly and the governor.

Members serve for five-year terms and at the pleasure of the Governor. During the latter part of fiscal year 2011, the full committee held a brainstorming session and identified key strategy areas and potential goals, objectives and measures. A sub-committee of members and stakeholders met on a regular basis during fiscal year 2012 and 2013 to outline a broad vision, mission, goals, and objectives. Broad goals and objectives provide the Missouri Organ and Tissue Donor Program staff and collaborating organizations the ability to develop individualized organizational yearly action plans. The full committee reviewed the plan, voted and recommended the framework as a practical plan to the DHSS in February 2013. The Department accepted the framework after minor modifications in the fall of 2013. The framework was the foundation used to develop this formal document.
Missouri Department of Health and Senior Services’ Organ and Tissue Donor Program

Staff of the Organ and Tissue Donor Program:

- Administers and maintains the DRS,
- Provides DRS technical support for procurement and tissue organizations,
- Assists in the development and maintenance of partnerships,
- Develops and monitors contracts,
- Seeks and shares funding opportunities,
- Monitors income and expenses of the Organ Donor Trust Fund,
- Collects and shares data related to this strategic plan,
- Develops action plans and assists with strategic planning,
- Recognizes local driver license offices with the highest enrollment rates in collaboration with partners, and whenever possible
- Participates in education and awareness activities.

In addition, program staff provides direct support to the GODAC by handling all meeting logistics and serving as the formal secretary of the committee and publishing the annual report. Program staff works collaboratively with other organizations as noted in this plan.
Organ and Tissue Procurement Agencies

The organ procurement organizations (OPOs) and tissue recovery organization play a major role in increasing education and awareness throughout the state. Existing organizations have many volunteers and champions that are available to share their story making organ and tissue donation personal and relatable.

**Midwest Transplant Network (MTN)**

“Save lives by honoring the gift of donation with dignity and compassion” is MTN’s mission, a 40-year-old federally certified not-for-profit organ procurement organization (OPO). Their primary purpose is to facilitate and coordinate the organ, eye and tissue donation process for the western two-thirds of Missouri and the state of Kansas. The OPO works with donors, donor families and hospitals to extend legacies, provide hope and give life.

The successful development of organ and tissue transplantation is one of the most extraordinary triumphs of modern medicine, and MTN works to increase education and awareness to fulfill the serious need for organ and tissue donors and make it possible to deliver this miracle. MTN has a staff person that reaches out to the local driver license offices to provide education and answer questions as needed. Outreach includes a monthly newsletter that is pertinent to staff within that setting. In addition, MTN works closely with hospitals to increase Registry enrollments and the Gift of Life (GOL) program to provide educational opportunities in high schools.
Mid-America Transplant

“We save lives through excellence in organ and tissue donation” is Mid-America Transplant’s mission, a federally certified not-for-profit OPO. Mid-America Transplant’s primary service offering is to facilitate and coordinate the organ, eye and tissue donation process for the eastern third of Missouri plus a small number of counties in Southwest Missouri and parts of Illinois and Arkansas. The OPO relentlessly pursues core values of compassion, quality, teamwork, innovation and integrity to create a positive donation experience for donor families.

Their secondary focus is educating people about organ, eye and tissue donation and utilizing DRS data to focus educational efforts in specific zip code areas where donor designation registration is low. The OPO is working to increase awareness and to dispel myths. The agency also provides educational opportunities for high school students in the St. Louis City, St. Louis County, and Springfield, Mo. areas by providing an interactive program on organ and tissue donation. Thus, engaging high school students to learn about science and health that may potentially spark their interest in a healthcare career. The program meets the state’s education standards in health and sciences.

Saving Sight

Saving Sight, formally Heartland Lions Eye Banks, is a 501(c)(3) nonprofit organization with a mission to change lives by saving sight. Founded in 1960, the organization introduced eye donation and the gift of sight to Missouri. One of their primary purposes is to facilitate cornea recovery and transplant, working diligently to assure corneal transplants, eye health research, and increasing Registry enrollments.

Services are implemented with stewardship of gifts, integrity, collaboration, teamwork, leadership and accountability as the guiding principles. Saving Sight leads Missouri’s donor designation work group (Team Missouri), pulling partners together to discuss implementation of group activities and data reporting to Donate Life America. Efforts have resulted in a steady increase in donor designations over the past four years.
Other Partners

**Missouri Department of Revenue (DOR) Division of Motor Vehicles**

The Missouri Department of Revenue, another key partner, serves as the central collection agency for state revenues. The primary duties of DOR are the collection of taxes, titling and registration of motor vehicles, and licensing of drivers throughout the state.

Over 98 percent of DRS donor designations are recorded through agency contracts. In addition, DOR works closely with the DHSS to incorporate organ and tissue donation information into electronic correspondence with local driver license office personnel. They are the lead agency for the DOR/DHSS workgroup that addresses increasing education and awareness at the local driver license offices for the public, wording of registry questions asked at the license offices, and encrypted data transfer to the DRS.

**Gift of Life (GOL)**

The Gift of Life organization implements the LifeSavers™ program in high schools in a three-county area in Missouri. Student volunteers, along with the assistance of a sponsoring teacher, distribute educational brochures to empower teens to communicate the life value of organ and tissue donation to their families. The purpose is to encourage families to discuss organ and tissue donation, build public awareness and acceptance about the value of organ and tissue donation, and reduce the number of patients waiting for a transplant. The LifeSavers™ program began expanding in fiscal year 2012 into rural Missouri.
Missouri Kidney Program (MoKP)

The Missouri Kidney Program (MoKP) provides a free Patient Education Program (PEP) for patients, families and friends. Community classes inform people about kidney disease, how to delay kidney disease progression, treatment options, and living well with kidney disease. Class subject matter includes introduction to kidney disease and treatment, diet and kidney disease, finances and coping with kidney disease, and kidney transplantation and dialysis options.

The MoKP participates in GODAC meetings, encourages Registry enrollments, and actively supports partner education efforts through time and other resources.

University of Missouri Emergency Medical Services Education Institute

The mission of the University of Missouri’s Emergency Medical Services Education Institute is to provide an evolving and dynamic education and training program to new and existing EMS and Allied Healthcare Professionals that meets and exceeds the current standard of care.

“Keep Hope Alive” is an educational training program initially developed by Sierra Donor Services. The Emergency Medical Services Education Institute provides contact hours for those completing the training. This video training program and contact hours are available at no cost to participants. Once the participant successfully completes the program, they are able to receive a certificate of completion that provides documentation needed to maintain emergency management licensure in Missouri.

Missouri Department of Elementary and Secondary Education (DESE)

The DESE is a key partner for integrating educational initiatives within the public school setting. Integrating organ and tissue donation information into the public schools will provide opportunities for students to learn of organ and tissue donation and be prepared to respond to the questions at the local license office when applying for a permit, driver or non-driver license.
