### Microbusiness Applicant Identifier Notification:

Pursuant to 19 CSR 100-1.060(6)(A)3, applications were assigned unique identifiers for the lottery drawing based on Missouri congressional districts as drawn and effective December 6, 2018. The congressional district chosen in the application has been verified using the proposed facility address provided. If an applicant's proposed facility address was not located within the applicant's chosen congressional district, the department used the congressional district where the applicant's proposed address is located.

Selection of an application by the lottery does not guarantee a license will be issued. After lottery selection, the Department will review the top drawn applicants to verify the information within the application is complete and demonstrates eligibility for a microbusiness license. During this review, the Department may request additional information or documents be provided by the applicant before a license is issued. Applicants will have three (3) business days to provide the requested information or the application will be subject to denial. The Department may also request additional information after licensure to verify that a licensee meets minimum standards for licensure and operation. If, after a license has been issued, the Department determines a licensee is not eligible for microbusiness ownership or does not meet minimum standards, the Department reserves the right to revoke the license.
