

### Consumer Personal Cultivation

The steps below provide how-to guidance for creating a consumer personal cultivation application.

A qualifying patient may not hold or obtain both a qualifying patient cultivation card and a consumer personal cultivation card at the same time regardless of if the caregiver holds the cultivation card on behalf of the qualifying patient.

Before you start the application, make sure you are creating an application for the correct individual on the account by verifying the name under **Selected Account**.

If you need to switch to a different account, click **'Switch Account'**, and select the correct individual.

You may create more than one application per user account.

The online registry portal works best when using Google Chrome as your internet browser to help minimize possible errors within the system.
