Missouri Delta has officially signed up with Pulsara and should be live within the next 3 months. We are looking to get the entire region on board with Pulsara to help with communication. The best practice would be to use this on every single patient so that when if a time comes for a mass casualty event, every person is familiar with how to use the software.

STARS

- We currently have 114 active STARS patients. Post call surveys are now live and being sent out as needed. Cardinal Glennon is also working on getting on board with Pulsara for these patients.
