OASIS-D Update

Presented by:
Suzi Hamlet RN, MSN, COS-C, OASIS Educational Coordinator
Robin Swarnes RN, BSN, COS-C

LEARNING OBJECTIVES

• Identify the changes to Outcome and Assessment Information Set (OASIS) resulting from the Improving Medicare Post-Acute Care Transformation (IMPACT) Act of 2014
• Describe the major changes from OASIS-C2 to OASIS-D
• Understand OASIS M-item coding instructions to accurately code new and revised OASIS items
• Identify available resources for implementing OASIS-D

Why OASIS-D?

IMPACT ACT OF 2014

• Improving Medicare Post-Acute Care Transformation Act of 2014
• Bipartisan bill signed into law by President Obama October 6, 2014
• Requires Post-Acute Care (PAC) providers to report standardized patient assessment data and quality measure data
  • Long Term Care Hospitals (LTCH)
  • Skilled Nursing Facilities (SNF)
  • Inpatient Rehailitative Facility (IRF)
  • Home Health Agencies (HHA)
  • Hospices
• PAC Medicare spending $73.8 Billion.
IMPACT ACT of 2014 Driving Forces

PURPOSE:
- Improve Medicare beneficiary outcomes
- Provide access to longitudinal data to facilitate coordinated care
- Enable comparable data and quality across PAC settings
- Improve hospital discharge planning
- Research

Why the attention on Post-Acute Care?
- Escalating cost associated with PAC
- Lack of data standards across PAC
- Goal of establishing payment rates according to the individual characteristics of the patient, not the care setting

Why Standardization in PAC?

Inpatient Rehab Facilities  Skilled Nursing Facilities  Home Health Agencies  Long Term Care Hospitals

IRF-PAI  MDS  OASIS  LCDS

Eating  Eating  Eating  Eating
Standardized Patient Assessment Data Elements (SPADEs)

- **SPADEs**:
  - Questions and response options that are identical in all four PAC assessment instruments
  - Identical standards and definitions apply

The move toward standardized assessment data elements facilitates cross-setting data collection, quality measurement, outcome comparison, and interoperable data exchange.

Why is OASIS Being Updated Now?

- **IMPaCT Act/Standardization**
- **Cross-Setting Alignment**
- **Standardized Data Collection**
- **Updates and Corrections**

**New Standardized Items**
- Section J: J1800 & J1800
- Section GG: GG0100, GG0110, GG0130, & GG0170

**Alignment** in content of items that support cross-setting measures:
- Drug Regimen Review
- Pressure Ulcers
- Active Diagnosis
- Height & Weight

**Reduction of burden**
- Quality measure changes
- Survey and certification

**General updates**
- Corrections made as necessary

**New items are added**
- Different time point versions of some items
- Removal of items
- Revision of some items
- Updated Skip Patterns
WHAT'S NEW WITH THE OASIS-D GUIDANCE?

✓ Chapter 3, two new sections of standard guidance added:
  • Section J – Health Conditions
  • Section GG – Functional Abilities and Goals
✓ Chapter 4, Illustrative Examples are retired
✓ Removal of many items and their corresponding guidance
✓ Revisions to existing Guidance for some OASIS items to update or clarify information
✓ Appendix F - sample reports are not included in this version. Users may refer to the Casper Reporting User Manual, Section 6, OASIS Quality Improvement Reports, located at: https://qtdo.cms.gov/hihatrain.html

OASIS-D Guidance Manual Changes

For these 33 items, the Guidance Manual has been updated in one or more of the following sections:
✓ Item Intent
✓ Time Points Collected
✓ Response Specific Instructions
✓ Examples
✓ Data Sources and Resources

OASIS-D Changes Effective January 1, 2019

OASIS-D New Items

Section J: Health Conditions (Falls)
• J1090: Any Falls Since SOC/ROC
• J1390: Number of Falls Since SOC/ROC

Section GG: Functional Abilities and Goals
• GG0100: Prior Functioning: Everyday Activities
• GG0110: Prior Device Use
• GG0120: Self-Care
• GG0130: Mobility
### OASIS-D Revised Items

OASIS Items Removed

28 Items Removed

• M0090, M1011, M1017, M1018, M1021, M1024, M1036, M1210, M1220, M1230, M1240, M1300, M1302, M1310, M1320, M1350, M1430, M1510, M1511, M1515, M1750, M1880, M1890, M1900, X2040, X2110, X2250, X2430

OASIS Items were removed if they were not used to support:

✓ HH QRP measures
✓ HH Prospective Payment System (PPS)
✓ Survey process for Medicare certification
✓ HH Value-Based Purchasing (VBP) demonstration measures
✓ Critical risk-adjustment factors
✓ Conditions of Participation

Updated One Clinician Rule

• Although one clinician must take responsibility for the comprehensive assessment collaboration with the patient, caregivers, and other health care personnel, including the physician, pharmacist, and/or other agency staff is appropriate. For items requiring patient assessment, the collaborating healthcare providers must have had direct contact with the patient.

• Agencies may have the comprehensive assessment completed by one clinician. If collaboration with other health care personnel and/or agency staff is utilized, the agency is responsible for establishing policies and practices related to collaborative efforts, including how assessment information from multiple clinicians will be documented within the clinical record, ensuring compliance with applicable requirements, and accepted standards of practice.

• When collaboration is utilized, the M0090 Date assessment completed should reflect the last date the assessing clinician gathered or received any input used to complete the comprehensive assessment, including the OASIS items.

• When used, collaboration must occur within the appropriate timeframe and consistent with data collection guidance. Any exception to this general convention concerning collaboration is identified in item-specific guidance.

Comprehensive Assessment Completion

• At the start of care time point, the comprehensive assessment should be completed within five days after the start of care date.

• At the resumption of care, the comprehensive assessment must be completed within 48 hours of return home after inpatient facility discharge, or within 48 hours of knowledge of a qualifying stay in an inpatient facility.

• A physician-ordered resumption of care (ROC) visit must be conducted on the physician-ordered ROC date.

• For the transfer to inpatient facility, discharge from home care, death at home, and other follow-up, the assessments must be completed on, or within 48 hours of becoming aware of the significant change in condition, transfer, discharge, or death date.
M0080 Discipline of Person Conducting Assessment

ITEM INTENT
Specifies the discipline of the clinician completing the comprehensive assessment during an actual visit to the patient's home at the specified OASIS time point or the clinician reporting the transfer to an inpatient facility or death at home.

Response Specific Instructions
While only the assessing clinician is responsible for accurately completing and signing a comprehensive assessment, he/she may collaborate to collect data for all OASIS items, if agency policy allows.

TIME POINTS ITEM(S) COMPLETED
- All

M0090 Date Assessment Completed

ITEM INTENT
Specifies the actual date the assessment is completed.

TIME POINTS ITEM(S) COMPLETED
- All

M0102 Date of Physician-ordered Start of Care (Resumption of Care)

ITEM INTENT
Specifies the date that home care services are ordered to begin or to resume following an inpatient stay of 24 hours or longer and for reasons other than diagnostic tests, if a SOC/ROC date was specified by the physician. The item refers to the order to start home care services (that is, provide the first covered service), or resume home care services that is provide the first visit following a qualifying inpatient stay regardless of the type of services ordered (for example, therapy only).

TIME POINTS ITEM(S) COMPLETED
- Start of care
- Resumption of care
M1000 Which of the following Inpatient Facilities was Patient Discharged within past 14 Days?

(M1000) From which of the following Inpatient Facilities was the patient discharged within the past 14 days? (Mark all that apply)

1 - Long-term nursing facility (NF)
2 - Skilled nursing facility (SNF/TCU)
3 - Short-stay acute hospital (IPPS)
4 - Long-term care hospital (LTCH)
5 - Inpatient rehabilitation hospital or unit (IRF)
6 - Psychiatric hospital or unit
7 - Other (specify) ____________________________

NA - Patient was not discharged from an inpatient facility (Go to M1021)

M1021 Primary Diagnosis / M1023 Other Diagnoses

• The assessing clinician is expected to complete the patient’s comprehensive assessment and understand the patient’s overall medical condition and care needs before selecting and assigning diagnoses and may elicit input from other agency staff that have had direct in-person contact with the patient, or have had some other means of gathering information to contribute to the OASIS data collection.

M1028 Active Diagnoses

(M1028) Active Diagnoses – Comorbidities and Co-existing Conditions – Check all that apply

See OASIS Guidance Manual for a complete list of relevant ICD-10 codes.

1 - Peripheral Vascular Disease (PVD) or Peripheral Arterial Disease (PAD)
2 - Diabetes Mellitus (DM)
3 - None of the above

ITEM INTENT
This item identifies whether two specific diagnoses are present and active. These diagnoses influence a patient’s functional outcomes or increase a patient’s risk for development or worsening of pressure ulcer(s).

TIME POINTS ITEM(S) COMPLETED
• Start of care
• Resumption of care
**M1028 Active Diagnoses**

**Coding Instructions**

- **Code 1.** Peripheral Vascular Disease (PVD) or Peripheral Arterial Disease (PAD), if the patient has an active diagnosis of Peripheral Vascular Disease (PVD) or Peripheral Arterial Disease (PAD).

- **Code 2.** Diabetes Mellitus (DM), if the patient has an active diagnosis of Diabetes Mellitus (DM) indicated by any of the following diagnosis codes:

- **Code 3.** None of the Above, if the patient does not have any of the active diagnoses listed above.

**CODING TIPS**

- The physician (nurse practitioner, physician assistant, clinical nurse specialist, or other authorized licensed staff if allowable under state licensure laws) may specifically indicate that a diagnosis is active.

- If there is documentation in the clinical record that a patient has diabetes mellitus, Select Response 2, Diabetes Mellitus (DM).

- If there is only documentation in the clinical record of a complication such as nephropathy or neuropathy and there is no documentation that the patient has diabetes, it should not be assumed the complication is associated with diabetes, and Response 2, Diabetes Mellitus, should not be checked.

**EXAMPLE 1**

- Mr. A is prescribed insulin for diabetes mellitus.

- He requires regular blood glucose monitoring to determine whether blood glucose goals are achieved by the current medication regimen.

- The physician progress note documents diabetes mellitus.

Select from the following:

- 1 - Peripheral Vascular Disease (PVD) or Peripheral Arterial Disease (PAD)
- 2 - Diabetes Mellitus (DM)
- 3 - None of the above
M1028 Active Diagnoses

EXAMPLE 2

- During the SOC/ROC assessment, Mrs. K told Nurse J, RN that she has had diabetes for 20 years.
- Nurse J reviewed the transfer documents from the acute care facility and all clinical records on the patient but was unable find a documented diagnosis of Diabetes Mellitus by physician, nurse practitioner, physician assistant or authorized licensed staff member in their state.
- There is no documented diagnosis of PVD or PAD.

(M1028) Active Diagnoses – Comorbidities and Co-existing Conditions – Check all that apply

- 1 - Peripheral Vascular Disease (PVD) or Peripheral Arterial Disease (PAD)
- 2 - Diabetes Mellitus (DM)
- 3 - None of the above

EXAMPLE 2

- During the SOC/ROC assessment, Mrs. K told Nurse J, RN that she has had diabetes for 20 years.
- Nurse J reviewed the transfer documents from the acute care facility and all clinical records on the patient but was unable find a documented diagnosis of Diabetes Mellitus by physician, nurse practitioner, physician assistant or authorized licensed staff member in their state.
- There is no documented diagnosis of PVD or PAD.

M1046 Influenza Vaccine Received, and M1056 Reason Pneumococcal Vaccine not received

RESPONSE-SPECIFIC INSTRUCTIONS for M1046:

- Enter Response 5 if the influenza vaccine is contraindicated for medical reasons.
- Refer to the Centers for Disease Control and Prevention (CDC) website for information on contraindications for the influenza vaccine (See link in Chapter 5).

RESPONSE-SPECIFIC INSTRUCTIONS for M1056:

- Enter Response 2 if pneumococcal vaccine administration is contraindicated for this patient.
- Refer to the Centers for Disease Control and Prevention (CDC) website for information on contraindications for the pneumococcal vaccine (See link in Chapter 5).

M1051 Pneumococcal Vaccine

[10/06/2018] Pneumococcal Vaccine

- Has the patient ever received the pneumococcal vaccination (for example, pneumovax)?
- Enter Code
- 1. No
- 2. Yes [Go to M2005 at TRN, Go to M1242 at DC]
M1060 Height and Weight

ITEM INTENT
• These items support calculation of the patient’s body mass index (BMI) using the patient’s height and weight.

TIME POINTS ITEM(S) COMPLETED
• Start of care
• Resumption of care

CODING INSTRUCTIONS

HEIGHT
• Measure height in accordance with the agency’s policies and procedures.
• Measure and record the patient’s height to the nearest whole inch.
• Use mathematical rounding (i.e., if height measurement is X.5 inches or greater, round height upward to the nearest whole inch. If height measurement number is X.1 to X.4 inches, round down to the nearest whole inch). For example, a height of 62.5 inches would be rounded to 63 inches, and a height of 62.4 inches would be rounded to 62 inches.
• Only enter a height that has been directly measured by agency staff. Do not enter a height that is self-reported or derived from documentation from another provider setting.

WEIGHT
• Weight should be measured in accordance with the agency’s policies and procedures.
• Measure and record the patient’s weight in pounds.
• Use mathematical rounding (e.g., if weight is X.5 pounds [lbs.] or more, round weight upward to the nearest whole pound. If weight is X.1 to X.4 lbs., round down to the nearest whole pound). For example, a weight of 152.5 lbs. would be rounded to 153 lbs. and a weight of 152.4 lbs. would be rounded to 152 lbs.
• If agency staff weighs the patient multiple times during the assessment period, use the first weight.
• Only enter a weight that has been directly measured by agency staff. Do not enter a weight that is self-reported or derived from documentation from another provider setting.

M1060 Height and Weight – When measuring, if the number is X.1-X.4 round down; X.5 or greater round up.
a. Height (in inches). Record most recent height measure since the most recent SOC/ROC.
b. Weight (in pounds). Base weight on most recent measure in last 30 days; measure weight consistently, according to standard agency practice (for example, in a.m. after voiding, before meal, with shoes off, etc.)
When reporting height for a patient with bilateral lower extremity amputation, measure and record the patient’s current height (i.e., height after bilateral amputation).

If a patient cannot be weighed, for example, because of extreme pain, immobility, or risk of pathological fractures, the use of a dash (—) is appropriate. Document the rationale on the patient’s medical record.

When there is an unsuccessful attempt to measure a patient’s height or weight, at SOC/ROC, and there is a documented agency-obtained height or weight from one or more previous home health visits, an agency-obtained height or weight from a documented visit conducted within the previous 30-day window may be used to complete M1060 for this SOC/ROC assessment.

Whenever possible, a current height and weight should be obtained by the agency as part of the SOC/ROC assessment.

### Pressure Ulcer / Injury Review

#### Deleted Items
- M1300 & M1302: Pressure Ulcer Risk
- Worsening of Pressure Ulcer Status
- M1330: Status of Most Problematic Pressure Ulcer
- M1350: Other Skin Lesions

#### Remaining Items
- M1306: Unhealed Pressure Ulcer at Stage 2 or Higher or Unstageable
- M1307: Oldest Stage 2 Pressure Ulcer
- M1311: Current Number Unhealed Pressure Ulcers/Injuries at Each Stage
- M1322: Current Number of Stage 1 Pressure Injuries
- M1324: Most Problematic Pressure Ulcer/Injury Stage

### Pressure Ulcer / Injury Terminology

| Stage 1 | Now called Pressure Injury |
| Stage 2, 3 & 4 | Now called Pressure Ulcer |
| DTI | Deep Tissue Injury |
| Unstageable | Unstageable due to Slough/Eschar – Pressure Ulcer |
| Unstageable | Unstageable due to Non-removable Dressing/Device – Pressure Ulcer/Injury |

Pressure Ulcer that was staged and now has a “scab” indicates it is healing and therefore staging does not change.
Pressure Ulcers/Injuries at Each Stage

### Definitions

#### Stage 2
Stage 2 pressure ulcers are characterized by partial thickness loss of dermis presenting as a shallow open ulcer with a red/pink wound bed. May also present as an intact or open/ruptured blister.

#### Stage 3
Stage 3 pressure ulcers are characterized by full thickness tissue loss. Subcutaneous fat may be visible but bone, tendon or muscle is not exposed. Slough may be present but does not obscure the depth of tissue loss. May include undermining or tunneling.

#### Stage 4
Stage 4 pressure ulcers are characterized by full thickness tissue loss with exposed bone, tendon or muscle. Slough or eschar may be present on some parts of the wound bed. Often includes undermining and tunneling.

---

### Pressure Ulcer / Injury Guidance

- Skin assessment should be completed as close to that actual time of the SOC/ROC as possible
  - Report pressure ulcer/injury stage (or whether unstageable) based on the first skin assessment
  - Do Not change OASIS coding if the ulcer/injury increases in numerical stage (worsens) or becomes stageable or unstageable within the assessment time period

- Once a Stage 2, 3, or 4 pressure ulcer is completely covered with new epithelial tissue, it is considered healed and no longer reported as a pressure ulcer

- A pressure ulcer treated with a skin graft is a surgical wound until the graft edges are completely healed

---

### Pressure Ulcer / Injury Guidance

- Pressure ulcers that are known to be present but that are unobservable due to a dressing/device. "Known" refers to when documentation is available that states a pressure ulcer/injury exists under the non-removable dressing/device.

- Pressure ulcers that have either tan, black, or brown slough (yellow, tan, gray, green or brown tissue) present such that the anatomical depth of soft tissue damage cannot be visualized in the wound bed, should be classified as unstageable. If this wound bed is only partially covered by nectar or slough, and the anatomical depth of tissue damage can be visualized, numerically stage the ulcer, and do not code this as unstageable.

- Pressure ulcers that are covered with slough and/or eschar, and the wound bed cannot be visualized, should be coded as unstageable because the true anatomical depth of soft tissue damage (and therefore stage) cannot be determined. Only until enough slough and/or eschar is removed to expose the anatomical depth of soft tissue damage involved, can the stage of the wound be determined.
M1306 Unhealed PU/Injury at Stage 2 or Higher

**ITEM INTENT**
Identifies the presence or absence of Unhealed Stage 2 or higher or Unstageable pressure ulcers/injuries only.

**TIME POINTS ITEM(S) COMPLETED**
- Start of care
- Resumption of care
- Follow-up
- Discharge from agency – not to inpatient facility

**ITEM TEST**
- Replaced "excludes...healed Stage 2 pressure ulcers" with "excludes...all healed pressure ulcers"
- Added Pressure ulcer/injuries

M1307 Oldest Stage 2 Pressure Ulcer

**ITEM INTENT**
- The intent of this item is to a) identify the oldest Stage 2 pressure ulcer that is present at the time of discharge and is not fully epithelialized (healed), b) assess the length of time this ulcer remained unhealed while the patient received care from the home health agency and c) identify patients who develop Stage 2 pressure ulcers while under the care of the agency.

**TIME POINTS ITEM(S) COMPLETED**
- Discharge from agency – not to inpatient facility

M1311 Current Number of Unhealed Pressure Ulcers/Injuries at Each Stage

**Revised Item**
- Now shows time point versions for each time point an assessment is completed
- For SOC/ROC and Follow-up OASIS assessments
  - Shows A1 to F1
- For Discharge OASIS assessment
  - Shows A1, A2, B1, B2, to F1, F2
- SOC/ROC and Discharge information used to calculate revised pressure ulcer measure
- Alignment with other PAC instruments
- Incorporated NPUAP terminology updates
- Skip pattern language and directions modified

Incorporated National Pressure Ulcer Advisory Panel (NPUAP) terminology updates to align with other PAC instruments.

**ITEM INTENT**
Identifies the presence or absence of Unhealed Stage 2 or higher or Unstageable pressure ulcers/injuries only.

**TIME POINTS ITEM(S) COMPLETED**
- Start of care
- Resumption of care
- Follow-up
- Discharge from agency – not to inpatient facility

**ITEM TEST**
- Replaced "excludes...healed Stage 2 pressure ulcers" with "excludes...all healed pressure ulcers"
- Added Pressure ulcer/injuries
M1311 Current Number of Unhealed Pressure Ulcers/Injuries at Each Stage

**ITEM INTENT**
- This item identifies the number of pressure ulcers/injuries at each stage (Stage 2, 3, and 4) and designated as Unstageable, that are observed on assessment.
- At discharge, this item also identifies if each pressure ulcer/injury present on the discharge assessment was observed at the same stage at the time of the most recent SOC/ROC.
- Stage 1 pressure injuries and all healed pressure ulcers/injuries are not reported in this item.

**TIME POINTS ITEMS COMPLETED**
- Start of Care
- Resumption of Care
- Follow-up
- Discharge from agency – not to inpatient facility
For each pressure ulcer/injury observed and coded in items M1311A1-F1 on Discharge, determine whether that pressure ulcer/injury was observed at the same stage at the time of the most recent SOC/ROC, and did not form during this home health quality episode.

- If the pressure ulcer/injury was unstageable at SOC/ROC but becomes numerically stageable later, when completing the Discharge assessment, the "Present at the most recent SOC/ROC" stage should be considered the stage at which it first becomes numerically stageable.
- If it subsequently increases in numerical stage, do not report the higher stage ulcer as being "present at the most recent SOC/ROC" when completing the Discharge assessment.
- The general standard of practice for patients starting or resuming care is that patient assessments are completed as close to the actual time of the SOC/ROC as possible.

**EXAMPLE 1**

The RN assesses Mr. J's skin at the SOC and identifies a DTI with intact skin on his left heel.

This DTI remains unchanged until the RN skin assessment 10 days later, which reveals open skin presenting as a Stage 3 pressure ulcer.

The pressure ulcer does not change for the remainder of the episode. At the discharge (DC) skin assessment, the ulcer remains a Stage 3.

(In this example, there are no other pressure ulcers/injuries at the SOC assessment, during the episode or at DC.)
EXAMPLE 2
The RN completes a skin assessment during the SOC visit for Mrs. K, and identifies a right hip DTI with intact skin.

This DTI is first numerically stageable 10 days later as a Stage 3 pressure ulcer and increases in numerical stage five days after that, to a Stage 4 pressure ulcer.

The pressure ulcer remains a Stage 4 at DC.

EXAMPLE 3
The RN assesses Mr. L's skin during the assessment timeframe for the SOC, and identifies a DTI with intact skin on his right heel.

This DTI first becomes numerically stageable at the third home visit, as a Stage 3 pressure ulcer.

At the DC skin assessment, this pressure ulcer is unstageable due to slough and eschar.

M1322 Current Number of Stage 1 Pressure Injuries

ITEM INTENT
Identifies the presence and number of Stage 1 pressure injuries.

TIME POINTS (ITEMS COMPLETED)
- Start of care
- Resumption of care
- Follow-up

Removed Discharge from Agency — Not to Inpatient Facility
M1324 Stage of Most Problematic Unhealed Pressure Ulcer/Injury that is Stageable

ITEM INTENT
- Identifies the stage of the most problematic stageable pressure ulcer/injury.
- Please note: pressure ulcers/injuries that have healed are not considered for this item.

TIME POINTS ITEM(S) COMPLETED
- Start of Care
- Resumption of Care
- Follow-up
- Discharge from agency – not to an inpatient facility

Stage of Most Problematic Unhealed Pressure Ulcer/Injury that is Stageable

M1332 Current Number of Stasis Ulcer(s) that are Observable

ITEM INTENT
- Identifies the number of visible (observable) stasis ulcers.

TIME POINTS ITEM(S) COMPLETED
- Start of care
- Resumption of care
- Follow-up
- Discharge from agency – not to an inpatient facility

Current Number of Stasis Ulcer(s) that are Observable

<table>
<thead>

<td>All stasis ulcers except those that are covered by a non-removable dressing/device, such as a cast or Unna boot, are considered observable.</td>
</tr>
</tbody>
</table>
M1334 Status of Most Problematic Stasis Ulcer that is Observable:

**ITEM INTENT**
- Identifies the degree of healing present in the most problematic, observable stasis ulcer. The “most problematic” ulcer may be the largest, the most resistant to treatment, an ulcer that is infected, etc., depending on the specific situation.

**TIME POINTS ITEM(S) COMPLETED**
- Start of care
- Resumption of care
- Follow-up
- Discharge from agency - not to inpatient facility

**RESPONSE SPECIFIC INSTRUCTIONS**
- Determine status of the most problematic stasis ulcer that is observable using healing status definitions developed by the Wound Ostomy and Continence Nurses (WOCN) Society.

M1340 Does the patient have a Surgical Wound?

**ITEM INTENT**
- Identifies the degree of healing present in the most problematic, observable surgical wound.

**TIME POINTS ITEM(S) COMPLETED**
- Start of care
- Resumption of care
- Follow-up
- Discharge from agency - not to inpatient facility

**RESPONSE SPECIFIC INSTRUCTIONS**
- Determine status of the most problematic surgical wound using healing status definitions developed by the Wound Ostomy and Continence Nurses (WOCN) Society. The clinician must first assess if the wound is healing entirely by primary intention (well-approximated with no dehiscence), or if there is a portion healing by secondary intention, (due to dehiscence, interruption of the incision, or intentional secondary healing).
M1610 Urinary Incontinence or Urinary Catheter Presence

**ITEM INTENT**
- Identifies presence of urinary incontinence or condition that requires urinary catheterization of any type, including intermittent or indwelling. The etiology (cause) of incontinence is not addressed in this item.

**TIME POINTS ITEM(S) COMPLETED**
- Start of care
- Resumption of care
- Follow-up

**M1730 Depression Screening**

**ITEM INTENT**
- Identifies if the home health agency screened the patient for depression using a standardized, validated depression screening tool.
- CMS does not mandate that clinicians conduct depression screening for all patients, nor is there a mandate for the use of the PHQ-2© or any other particular standardized, validated tool. The best practices stated in the item are not necessarily required in the Conditions of Participation.

**TIME POINTS ITEM(S) COMPLETED**
- Start of care
- Resumption of care

**RESPONSE SPECIFIC INSTRUCTIONS**
- In order to enter Response 1, 2 or 3, the standardized, validated depression screening tool must be completed during the time frame specified by CMS for completion of the assessment (specifically, within five days of SOC or within two days of inpatient facility discharge at ROC, or on the physician-ordered ROC date.)

- A clinician other than the assessing clinician may complete the standardized, validated depression screening for consideration by the assessing clinician.
Expansion of the One Clinician Rule, M1800 to M1870

**RESPONSE SPECIFIC INSTRUCTIONS**

- When coding this item, the assessing clinician may consider input from other agency staff who have had direct patient contact. Refer to Chapter 1 for additional details on these and other OASIS conventions.

- M1800 Grooming
- M1810 Dress Upper Body
- M1820 Dress Lower Body
- M1830 Bathing
- M1840 Toilet Transferring
- M1845 Toiletting Hygiene
- M1850 Transferring
- M1860 Ambulation/Locomotion
- M1870 Feeding or Eating

**M1910 Falls Risk Assessment**

<table>
<thead>
<tr>
<th>Item</th>
<th>Code</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>0</td>
<td>No falls risk</td>
</tr>
<tr>
<td></td>
<td>1</td>
<td>Falls risk</td>
</tr>
</tbody>
</table>

**ITEM INTENT**
- Identifies whether the home health agency has assessed the patient and home environment for characteristics that place the patient at risk for falls. The multi-factor falls risk assessment must include at least one standardized, validated tool that (1) has been scientifically tested in a population with characteristics similar to that of the patient being assessed (for example, community-dwelling elders, noninstitutionalized adults with disabilities, etc.) and (2) includes a standard response scale. The standardized, validated tool must be both appropriate for the patient based on their cognitive and physical status and appropriately administered per the tool's instructions.

**TIME POINTS**
- Start of care
- Resumption of care

**Deleted Sentence:**
This item is used to calculate process measures to capture the agency's use of best practices following completion of the comprehensive assessment.

**RESPONSE SPECIFIC INSTRUCTIONS**

- CMS does not mandate that clinicians conduct falls risk screening for all patients, nor is there a mandate for the use of a specific tool.
There are no new or updated Drug Regimen Review items for 2019.

The Drug Regimen Review items were first introduced to home health in 2010 and revised in January 1, 2017 (OASIS-C2).

During 2018, the Drug Regimen Review items are being implemented in IRF, LTCH, and SNF.

- Inpatient Rehabilitation Facilities
- Long Term Care Hospitals
- Skilled Nursing Facilities

Changes to the Drug Regimen Review items for home health in 2019 are limited to guidance refinement to promote cross-setting alignment.

**Drug Regimen Review**

**ITEM INTENT**

- Identifies if review of the patient’s medications indicated any potential or actual clinically significant medication issues.

**TIME POINTS ITEM(S) COMPLETED**

- Start of care
- Resumption of care

**M2001 Drug Regimen Review**

**ITEM INTENT**

- Identifies if review of the patient’s medications indicated any potential or actual clinically significant medication issues.

**TIME POINTS ITEM(S) COMPLETED**

- Start of care
- Resumption of care

**M2003 Medication Follow-up**

**ITEM INTENT**

- Identifies if potential or actual clinically significant medication issues identified through the drug regimen review were communicated to the physician (or physician-designee) and to the extent possible, prescribed/recommended actions were completed by midnight of the next calendar day following their identification.

**TIME POINTS ITEM(S) COMPLETED**

- Start of care
- Resumption of care
M2005 Medication Intervention

**ITEM INTENT**
Identifies if potential or actual clinically significant medication issues identified at the time of or at any time since the most recent SOC/ROC were communicated to the physician (or physician-designee) and to the extent possible, prescribed/recommended actions were completed by midnight of the next calendar day following their identification.

**TIME POINTS ITEM(S) COMPLETED**
- Transfer to an inpatient facility
- Death at home
- Discharge from agency – not to an inpatient facility

**M2001 Drug Regimen Review**
Did a complete drug regimen review identify potential clinically significant medication issues?

**Enter Code**
- 0. No – No issues found during review [Go to M2010]
- 1. Yes – Issues found during review
- 9. NA – Patient is not taking any medications [Go to M2102]

**M2003 Medication Follow-up**
Did the agency contact a physician (or physician-designee) by midnight of the next calendar day and complete prescribed/recommended actions in response to the identified potential clinically significant medication issues?

**Enter Code**
- 0. No
- 1. Yes
- 9. NA-There were no potential clinically significant medication issues identified since SOC/ROC or patient is not taking any medications

**M2005 Medication Intervention**
Did the agency contact and complete physician (or physician-designee) prescribed/recommended actions by midnight of the next calendar day each time potential clinically significant medication issues were identified since the SOC/ROC?

**Enter Code**
- 0. No
- 1. Yes
- 9. NA-There were no potential clinically significant medication issues identified since SOC/ROC or patient is not taking any medications

**M2010 Patient/Caregiver High-Risk Drug Education**
Has the patient/caregiver received instruction on special precautions for all high-risk medications (such as hypoglycemics, anticoagulants, etc.) and how and when to report problems that may occur?

**Enter Code**
- 0. No
- 1. Yes
- 9. NA-There were no potential clinically significant medication issues identified since SOC/ROC or patient is not taking any medications

**ITEM INTENT**
- Identifies if clinicians instructed the patient and/or caregiver about all high-risk medications the patient takes. High-risk medications are those identified by an authoritative source, such as the Institute for Safe Medication Practices as having considerable potential for causing significant patient harm when they are used in error.
- This item is targeted to high-risk medications as it may be unrealistic to expect that patients receive all medications upon admission and failure to provide patient education on high-risk medications such as hypoglycemics and anticoagulants (and others) at SOC/ROC could have severe negative impacts on patient safety and health.
- The best practices stated in the item are not necessarily required in the Conditions of Participation.
Pharmacists, instructed the patient/caregiver about how to
the Conditions of Participation.

ITEM INTENT
Identifies if agency staff and/or other health care providers, such as
pharmacists, instructed the patient/caregiver about how to
manage all medications effectively and safely within the time
period under consideration, including instruction related to
monitoring the effectiveness of drug therapy, adverse drug
reactions, and significant side effects, and how and when to report
problems that may occur.

The best practices stated in the item are not necessarily required in
the Conditions of Participation.

ITEM INTENT
The intent of the item is to identify the patient's ABILITY, not necessarily actual
performance. "Willingness" and "adherence" are not the focus of these items. These items
address the patient's ability to safely take injectable medications, given the current
physical and mental/emotional/cognitive status, activities permitted,
and environment. The patient must be viewed from a holistic perspective in assessing ability to perform
medication management. Ability can be temporarily or permanently limited by:

- Sensory impairments (for example, impaired vision, pain);
- Physical impairments (for example, limited manual dexterity);
- Emotional/cognitive/behavioral impairments (for example, memory deficits, impaired judgment, fear);
- Environmental barriers (for example, access to kitchen or medication storage
  area, stairs, narrow doorways).

ITEM INTENT
This item is intended to assess the patient's ability to take all injectable medications reliably
and safely at on day of assessment.

This item is intended to identify the patient's ability to take all injectable medications reliably
and safely, including administration of correct dosage at the appropriate times.

TIME POINTS ITEM(S) COMPLETED
- Transfer to an inpatient facility
- Discharge from agency – not to an
inpatient facility

M2016 Patient/Caregiver Drug
Education Intervention

M2020 Management of Oral Medications

M2030 Management of Injectable Medications

TIME POINTS ITEM(S) COMPLETED
- Start of care
- Resumption of care
- Discharge from agency – not to an
inpatient facility

TIME POINTS ITEM(S) COMPLETED
- Start of care
- Resumption of care
- Follow-up
- Removal - Discharge from agency – not to an inpatient facility
M2102 Types and Sources of Assistance (SOC/ROC)

**Types and Sources of Assistance:**
Determine the ability and willingness of non-agency caregivers (such as family members, friends, or privately paid caregivers) to provide assistance for the following activities, if assistance is needed. Excludes all care by your agency staff.

**f. Supervision and safety** (for example, due to cognitive impairment)

M2301 Emergent Care

**ITEM INTENT**
- Identifies whether the patient was seen in a hospital emergency department. Responses to this item include the entire period at or since the most recent SOC/ROC assessment, including current events. This item includes current events.

**REMOVED FROM INTENT**
- Identifies whether the patient was seen in a hospital emergency department at the time of or at any time since the most recent SOC/ROC assessment.
M2310 Reason for Emergency Care

(M2310) Reason for Emergency Care: For what reason(s) did the patient seek and/or receive emergent care (with or without hospitalization)? (Mark all that apply)

- 1 Improper medication administration, adverse drug reactions, medication side effects, toxicity, anaphylaxis
- 10 Hypo/hyperglycemia, diabetes out of control
- 19 Other than above reasons
- UK Reason Unknown

ITEM INTENT
• Identifies the reasons for which the patient sought and/or received care in a hospital emergency department.

TIME POINTS/ITEM(S) COMPLETED
• Transfer to an inpatient facility
• Discharge from agency – not to an inpatient facility

RESPONSE SPECIFIC INSTRUCTIONS
• If more than one reason contributed to the hospital emergency department visit, mark all appropriate responses. For example, if a patient received care for a fall at home and was found to have medication side effects, mark both Response 19, Other than above reasons (for the fall), and Response 1 (for the medication side effects).
• If a patient seeks care in a hospital emergency department for a specific suspected condition, report that condition, even if the suspected condition was ruled out (for example, patient was sent to ED for suspected DVT but diagnostic testing and evaluation were negative for DVT – select Response 19 – Other than above reasons).
• If the reason is not included in the choices, select Response 19 - Other than above reasons.
• If the patient has received emergent care in a hospital emergency department multiple times since the most recent SOC/ROC, include the reasons for all visits.

M2401 Intervention Synopsis

M2401 Intervention Synopsis: (Check only one box in each row.) At the time of or at any time since the most recent SOC/ROC assessment, were the following interventions BOTH included in the physician-ordered plan of care AND implemented?

<table>
<thead>
<tr>
<th>Plan/Intervention</th>
<th>No</th>

</tr>
</tbody>
</table>

*Note: This item excludes urgent care services not provided in a hospital emergency department, including care provided in a doctor’s office, care provided by an ambulance crew, or care received in urgent care facilities.*
**M2401 Intervention Synopsis**

**ITEM INTENT**
- Identifies if specific interventions focused on specific problems were both included on the physician-ordered home health Plan of Care AND implemented as part of care provided at the time of or at any time since the most recent SOC/ROC assessment. Included in the physician-ordered Plan of Care means that the patient condition was discussed and there was agreement as to the Plan of Care between the home health agency staff and the patient’s physician.
- The problem-specific interventions referenced in the item may or may not directly correlate to stated requirements in the Conditions of Participation.

**TIME POINTS ITEM(S) COMPLETED**
- Discharge from agency – not to an inpatient facility

### Section GG: Functional Abilities and Goals

**How will Section GG items be used?**

- GG items will be used to calculate the cross-setting quality process measure “Percent of Home Health Episodes with an Admission and Discharge Functional Assessment and a Care Plan That Addresses Function”

**Reports the percent of patients with a**

**MDS**

**SNF CARE**

#### Discharge Goal

1. **GG0130 Self-Care**
   - **[3 day assessment period]**

**Performance**

**SOC/ROC**

The ability to use suitable items to clean teeth. Dentures (if applicable): The ability to insert and remove dentures into and from the mouth, and manage denture soaking and rinsing with use of equipment.

The ability to maintain perineal hygiene, adjust clothes before and after voiding or having a bowel movement. If managing an ostomy, include wiping the opening but not managing equipment.

The ability to bathe self, including washing, rinsing, and drying self (excludes washing of face, hands, chest, and arms while sitting in a chair or bed).

The ability to use suitable utensils to bring food and/or liquid to the mouth and swallow food and/or liquid once the meal placed before the patient.

The ability to dress and undress above the waist; including fasteners, if applicable.

The ability to dress and undress below the waist, including fasteners; does not include equipment.

The ability to put on and take off socks and shoes or other footwear that is appropriate for safe mobility; including fasteners, if applicable.

The ability to wash, rinse and dry the face, hands, chest, and arms while sitting in a chair or bed.

**Section GG: Functional Abilities and Goals**

**Differences between Section GG and M-Items**

- GG items are not intended to be exactly the same as M-items
- Important to understand inclusions/exclusions
- Coding scales are different for GG items
Data Collection Conventions for GG Items

- **OBSERVE** - Assess patient's status based upon direct observation
- **LISTEN** - Consider reports by patient/family/caregiver
- **PROMOTE GREATEST SAFE INDEPENDENCE** - Provide the opportunity to perform the activity as independently as possible, while remaining safe

- **CONSIDER REQUIRED ASSISTANCE** - If caregiver assistance is required, code according to amount of assistance needed for safety
- **DEVICE USE DOESN'T REQUIRE DOWNCODING** - If the patient is able to safely get and use a device to complete the task with no help, code Independent
- **DETERMINE USUAL STATUS** - If performance varies during the assessment time frame, report the usual status

GG0100 Prior Functioning: Everyday Activities

ITEM INTENT
• This item identifies the patient’s usual ability with everyday activities, prior to the current illness, exacerbation or injury.

TIME POINTS ITEM(S) COMPLETED
• Start of care
• Resumption of care

RESPONSE SPECIFIC INSTRUCTIONS
• Code 3, Independent, if the patient completed the activities by him/herself, with or without an assistive device, with no assistance from a helper.
• Code 2, Needed Some Help, if the patient needed partial assistance from another person to complete activities.
• Code 1, Dependent, if the helper completed the activities for the patient.
• Code 8, Unknown, if the patient’s usual ability prior to the current illness, exacerbation or injury is unknown.
• Code 9, Not Applicable, if the activity was not applicable to the patient prior the current illness, exacerbation or injury.

Note: A DASH is a valid response for this item.
GG0100 Prior Functioning: Everyday Activities

EXAMPLE 1

Mr. and Mrs. Sells tell you, that Mr. Sells was able to do his own self cares prior to his hospitalization. Mr. Sells confirms he was able to take his own shower and complete ADLs, including grooming, dressing and eating before he was hospitalized.

Mr. Sells also tells the nurse he was ambulating with a walker around his home, and used a stair lift to negotiate the stairs to the second floor, where his bedroom is located.

The nurse assesses Mr. Sells to be alert, oriented and confirms he is able to take his medications correctly, and this was the same prior to hospitalization.

EXAMPLE 2

Mrs. Able tells you, she is a retired nurse and she broke her hip recently and just returned home from Rehab at a SNF. She says she has always been very independent and was able to do all her own self cares including all ADLs, shopping and medication management prior to the incident.

The nurse observes Mrs. Able's house is a one story, but noticed there are 4 steps going into the family room, from a remodel of the garage. Mrs. Able tells the nurse, she walked independently prior to her incident. She currently is using a walker to ambulate in the home.

Mrs. Able appears to be alert, oriented and has a medication planner (pill box) on the kitchen table, which she says is filled once a week.
GG0100 Prior Functioning: Everyday Activities

Indicate the patient's usual ability with everyday activities prior to the current illness, exacerbation, or injury.

Coding:
1. Independent – Patient completed the activities by himself/herself, with or without an assistive device, with no assistance from a helper.
2. Needed Some Help – Patient needed partial assistance from another person to complete activities.
3. Dependent – A helper completed the activities for the patient.
8. Unknown
9. Not Applicable

Enter Codes in Boxes

A. Self Care: Code the patient's need for assistance with bathing, dressing, using the toilet, or eating prior to the current illness, exacerbation, or injury.

B. Indoor Mobility (Ambulation): Code the patient's need for assistance with walking from room to room (with or without a device such as cane, crutch, or walker) prior to the current illness, exacerbation, or injury.

C. Stairs: Code the patient's need for assistance with internal or external stairs (with or without a device such as cane, crutch, or walker) prior to the current illness, exacerbation or injury.

D. Functional Cognition: Code the patient's need for assistance with planning regular tasks, such as shopping or remembering to take medication prior to the current illness, exacerbation, or injury.

EXAMPLE 2

Mrs. Able's daughter arrives to check on her mother and tells you, she checks on her mother daily and did this prior to her hip fracture. The daughter states she helped her mother into and out of the shower, due to safety concerns and brought groceries and provided supper daily prior to the current injury.

The nurse asks if Mrs. Able was able to ambulate independently prior to her hip fracture, the daughter tells you she sometimes used a cane, but was mostly independent. She was able to climb up and down stairs to the family room using the hand rail.

The daughter also states she filled Mrs. Able's medication planner weekly and checked each day to make sure she is taking her medications appropriately.

GG0100 Prior Functioning: Everyday Activities

Indicate the patient's usual ability with everyday activities prior to the current illness, exacerbation, or injury.

Coding:
1. Independent – Patient completed the activities by himself/herself, with or without an assistive device, with no assistance from a helper.
2. Needed Some Help – Patient needed partial assistance from another person to complete activities.
3. Dependent – A helper completed the activities for the patient.
8. Unknown
9. Not Applicable

Enter Codes in Boxes

A. Self Care: Code the patient's need for assistance with bathing, dressing, using the toilet, or eating prior to the current illness, exacerbation, or injury.

B. Indoor Mobility (Ambulation): Code the patient's need for assistance with walking from room to room (with or without a device such as cane, crutch, or walker) prior to the current illness, exacerbation, or injury.

C. Stairs: Code the patient's need for assistance with internal or external stairs (with or without a device such as cane, crutch, or walker) prior to the current illness, exacerbation or injury.

D. Functional Cognition: Code the patient's need for assistance with planning regular tasks, such as shopping or remembering to take medication prior to the current illness, exacerbation, or injury.
GG0110 Prior Device Use

**ITEM INTENT**

- This item identifies the patient's use of devices and aids immediately prior to the current illness, exacerbation, or injury to align treatment goals.

**TIME POINTS ITEM(S) COMPLETED**

- Start of care
- Resumption of care

**RESPONSE SPECIFIC INSTRUCTIONS**

- Interview patient or family or review the patient's clinical record describing the patient's use of prior devices and aids.
GG0110 Prior Device Use

Check all devices that apply.

- GG0110C - Mechanical lift, any device a patient or caregiver requires for lifting or supporting the patient’s bodyweight. Examples include, but are not limited to:
  - Stair lift
  - Hoyer lift
  - Bath tub lift

- GG0110D - Walker, All types of walkers. Examples include, but are not limited to:
  - Pick-up walker
  - Hemi-walker
  - Rolling walker
  - Platform walker

- Check Z, None of the Above, if the patient did not use any of the listed devices or aids immediately prior to the current illness, exacerbation or injury.

Example 1

Mrs. M is a bilateral lower extremity amputee and has multiple diagnoses including diabetes, obesity and peripheral vascular disease. She is unable to walk and did not walk prior to the current episode of care that started due to a pressure ulcer and respiratory infection. She used a motorized wheelchair to mobilize.
GG0110 Prior Device Use

Example 2

Mr. C has bilateral lower extremity neuropathy secondary to his diabetes.

Prior to this current episode, he used a cane.

Today, he is using a walker.

GG0110 Prior Device Use

Example 3

Mrs. Smith is a paraplegic and has used a manual wheelchair for a number of years now.

She has a mechanical lift to assist with transfers to the bed.
GG0110 Prior Device Use

GG0110: Prior Device Use. Indicate devices and aids used by the patient prior to the current illness, exacerbation, or injury.

Check all that apply:

- A. Manual wheelchair
- B. Motorized wheelchair
- C. Mechanical lift
- D. Walker
- E. Orthotics/Prosthetics
- F. None of the above

GG0130 Self-Care

GG0170 Mobility

ITEM INTENT
- This item identifies the patient's ability to perform the listed self-care activities, and discharge goal(s).

TIME POINTS ITEM(S) COMPLETED
- Start of care
- Resumption of care
- Follow-up
- Discharge from agency – not to an inpatient facility

GG0130 Self-Care [SOC/ROC]

1. SOC/ROC Performance
2. Discharge Goal

Enter Codes in Boxes

A. Eating:
The ability to use suitable utensils to bring food and/or liquid to the mouth and swallow food and/or liquid once the meal placed before the patient.

B. Oral Hygiene:
The ability to use suitable items to clean teeth. Dentures (if applicable): The ability to insert and remove dentures into and from the mouth, and manage denture soaking and rinsing with use of equipment.

C. Toileting Hygiene:
The ability to maintain perineal hygiene, adjust clothes before and after voiding or having a bowel movement. If managing an ostomy, include wiping the opening but not managing equipment.

E. Shower/bathe self:
The ability to bathe self, including washing, rinsing, and drying self (excludes washing of back and hair). Does not include transferring in/out of tub/shower.

F. Upper body dressing:
The ability to dress and undress above the waist; including fasteners, if applicable.

G. Lower body dressing:
The ability to dress and undress below the waist, including fasteners; does not include footwear.

H. Putting on/taking off footwear:
The ability to put on and take off socks and shoes or other footwear that is appropriate for safe mobility; including fasteners, if applicable.

GG0130 Self-Care [Follow-Up]

4. Follow-Up Performance

Enter Codes in Boxes

A. Eating:
The ability to use suitable utensils to bring food and/or liquid to the mouth and swallow food and/or liquid once the meal placed before the patient.

B. Oral Hygiene:
The ability to use suitable items to clean teeth. Dentures (if applicable): The ability to insert and remove dentures into and from the mouth, and manage denture soaking and rinsing with use of equipment.

C. Toileting Hygiene:
The ability to maintain perineal hygiene, adjust clothes before and after voiding or having a bowel movement. If managing an ostomy, include wiping the opening but not managing equipment.

The ability to put on and take off socks and shoes or other footwear that is appropriate for safe mobility; including fasteners, if applicable.
### GG0170 Mobility [SOC/ROC]

**Ability greater than 50% of the USUAL PERFORMANCE, ABILITY**

- Maximum number of days within which to complete this activity.
- Assessment timeframe is the time period under consideration.
- Time period under consideration is the span of time for data collection and assessment.
- For most OASIS items this is the day of assessment.
- For other items, item wording or related guidance will specify the time period under consideration, such as since the most recent SOC/ROC.

---

**Guidance will specify the time period under consideration.**

**Usual Performance, Ability**

A patient's usual performance is No/have ability greater than 50% of the assessment timeframe.

---

**Discharge**

- Must be completed immediately after patient discharge.
- Independent — Patient completes the activity by himself/herself with no assistance from a helper.
- Supervised or touching assistance — Helper provides verbal cues and/or touching/steadying and/or contact guard assistance as patient completes activity. Assistance is given prior to or following the activity.
- Setup or clean-up assistance — Helper sets up or cleans up; patient completes activity. Helper assists only him/herself with no assistance from a helper.
- Setup or clean-up assistance — Helper provides more than half the effort.
- Setup or clean-up assistance — Helper provides less than half the effort.
- Independent and provides more than half the effort.

---

**Follow-Up**

- The ability to roll from lying on back to left and right side, and return to lying on back on the bed.
- Once standing, the ability to walk at least 10 feet in a room, corridor, or similar space.
- The ability to go up and down a curb and/or up and down one step.
- The ability to go up and down four steps with or without a rail.
- The ability to go up and down 12 steps with or without a rail.
- The ability to go up and down four steps with or without a rail.
- The ability to go up and down 12 steps with or without a rail.
- The ability to come to a standing position from a chair, wheelchair, or on the side of the bed.
- The ability to transfer in and out of a car or van on the passenger side. Does not include the ability to open/close door or fasten seat belt.
- Once seated in wheelchair/scooter, the ability to wheel at least 150 feet in a corridor or similar space.
- Once seated in wheelchair/scooter, the ability to wheel at least 50 feet and make two turns.

---

**Self-Care**

- Safety and Quality of Performance — A Helper assistance is required because patient’s performance is unsafe or of poor quality, score according to amount of assistance provided.

---

**Coding Instructions for:**

- Interim
- Medical
- Device

---

**Discharge**

- SS1. Indicate the type of wheelchair or scooter used.
  - Manual
  - Motorized

---

**Follow-Up**

- 1.  Yes        Continue to GG0170R, Wheel 50 feet with two turns.
- 2.  Motorized
- 1.  Manual
- 2.  Motorized

---

**Self-Care & GG0170 Mobility**

- Activities may be completed with or without assistance device.
- 06. Independent — Patient completes the activity by himself/herself with no assistance from a helper.
- 05. Setup or clean-up assistance — Helper sets up or cleans up; patient completes activity. Helper assists only him/herself with no assistance from a helper.
- 04. Setup or clean-up assistance — Helper provides more than half the effort.
- 03. Setup or clean-up assistance — Helper provides less than half the effort.
- 02. Independent and provides more than half the effort.
- 01. Independent and provides less than half the effort.

---

**Follow-Up**

- 09. Not applicable — Not attempted and the patient did not perform this activity prior to the current illness, exacerbation or injury.
- 08. Not attempted due to medical conditions or other reasons.
- 07. Patient refused.
- 06. Independent — Patient completes the activity by himself/herself with no assistance from a helper.
- 05. Setup or clean-up assistance — Helper sets up or cleans up; patient completes activity. Helper assists only him/herself with no assistance from a helper.
- 04. Setup or clean-up assistance — Helper provides more than half the effort.
- 03. Setup or clean-up assistance — Helper provides less than half the effort.
- 02. Independent — Helper does ALL of the effort. Patient does none of the effort to complete the activity. Or the assistance 2 to 3 more helpers is required for the patient to complete the activity.
- 01. Independent — Patient completes the activity by himself/herself with no assistance from a helper.

---

**Coding Instructions for:**

- Assistive
- Independent
- Device
1. Licensed clinicians may assess the patient's performance based on:

- Direct observation (preferred)
- Reports from the patient, clinicians, care staff, and/or family.

2. Patients should be allowed to perform activities as **independently as possible**, as long as they are safe.

- If helper assistance is required because patient's performance is unsafe or of poor quality, score according to amount of assistance provided.
- Activities may be completed with or without assistive device(s).
- Use of assistive device(s) to complete an activity should not affect coding of the activity.

3. Patients with cognitive impairments/limitations may need physical and/or verbal assistance when completing an activity.

4. Code based on the patient's need for assistance to perform the activity safely.

**Examples**

- Choking Risk due to rate of eating
- Choking Risk due to amount of food placed in mouth
- Fall Risk due to unsteady ambulation
1. Code the patient’s functional status based on a functional assessment that occurs at or soon after the patient’s SOC/ROC.
2. The SOC/ROC function scores are to reflect the patient’s SOC/ROC baseline status and are to be based on observation of activities, to the extent possible.
3. When possible, the assessment should occur prior to the start of therapy services to capture the patient’s true baseline status.

This is because therapy interventions can affect the patient’s functional status.

4. A patient’s functional ability can be impacted by the environment or situations encountered in the home.
5. Observing the patient in different locations and circumstances within the home is important for a comprehensive understanding of the patient’s functional status.

If the patient’s ability varies during the assessment timeframe, record their usual ability to perform each activity.

Do not record the patient’s best performance and do not record the patient’s worst performance, but rather the patient’s usual performance, which is true greater than 50% of the assessment timeframe.

1. Code the patient’s discharge goal(s) using the 6-point scale.
2. Use of the activity not attempted codes (07, 09, 10 or 88) is permissible to code discharge goal(s).

If activity was not attempted, code reason:
07. Patient refused
09. Not applicable – Not attempted and the patient did not perform this activity prior to the current illness, exacerbation or injury.
10. Not attempted due to environmental limitations (e.g., lack of equipment, weather constraints)
88. Not attempted due to medical conditions or safety concerns.

Activities may be completed with or without assistive devices:
06. Independent – Patient completes the activity by him/herself with no assistance from a helper.
05. Setup or clean-up assistance – Helper sets up or cleans up patient complete activity, helps access equipment, or is following the activity.
04. Supervision or touching assistance – Helper provides verbal cues and/or touching/steadying as patient completes activity. Assistance may be provided throughout the activity, or intermittently.
03. Partial/moderate assistance – Helper does less than half the effort. Helper lifts, holds or supports trunk or limbs, but provides less than half the effort.
02. Substantial/maximal assistance – Helper does more than half the effort. Helper lifts or holds trunk or limbs and provides more than half the effort.
01. Dependent – Helper does all of the effort. Patient does none of the effort to complete the activity. Or, the assistance of 2 or more helpers is required for the patient to complete the activity.
3. Discharge goal(s) may be coded:

[Options]
- Same as SOC/ROC performance
- Higher than SOC/ROC performance
- Lower than SOC/ROC performance

4. If the SOC/ROC performance of an activity was coded using one of the activity not attempted codes (07, 09, 10 or 88) a discharge goal may be submitted using the 6-point scale if the patient is expected to be able to perform the activity by discharge.

5. Licensed clinicians can establish a patient’s discharge goal(s) at the time of SOC/ROC based on:
- The patient’s prior medical condition
- SOC/ROC assessment
- Self-care and mobility status
- Discussions with the patient and family
- Professional judgment
- The profession’s practice standards
- Expected treatments
- Patient motivation to improve
- Anticipated length of stay
- The discharge plan

6. Goals should be established as part of the patient’s care plan.
### GG0130 Self-Care

#### GG 0170 Mobility

**TIME PERIOD UNDER CONSIDERATION**

The time period under consideration is the span of time for data collection and assessment. For most OASIS items this is the day of assessment. For other items, item wording or related guidance will specify the time period under consideration, such as, since the most recent SOC/ROC.

**Follow-up Performance:** Clinicians should code the patient's functional status based on a functional assessment that occurs within the assessment timeframe.

**Discharge Performance:** The discharge time period under consideration includes the last 5 days of care. This includes the date of the discharge visit plus the four preceding calendar days. Code the patient's functional status based on a functional assessment that occurs at or close to the time of discharge.

### RESPONSE SPECIFIC INSTRUCTIONS for:

[ ] Follow-Up

[ ] Discharge

### GG0130 Self-Care (SOC/ROC)

**Activities may be completed with or without assistive devices.**

- **Independent** – Patient completes the activity by himself/herself with no assistance from a helper.
- **Setup or clean-up assistance** – Helper sets up or cleans up; patient completes activity. Helper assists only prior to or following the activity.
- **Supervision or touching assistance** – Helper provides verbal cues and/or touching/steadying and/or contact guard assistance as patient completes activity. Assistance may be provided throughout the activity or intermittently.
- **Partial/m moderate assistance** – Helper does LESS THAN HALF the effort. Helper lifts, holds or supports trunk or limbs, but provides less than half the effort.
- **Substantial/maximal assistance** – Helper does MORE THAN HALF the effort. Helper lifts or holds trunk or limbs and provides more than half the effort.
- **Dependent** – Helper does ALL of the effort. Patient does none of the effort to complete the activity. Or, the activity cannot be completed without the assistance of 2 or more helpers.

### GG0130 Self-Care

**Activities may be completed with or without assistive devices.**

- **Eating:** The ability to use suitable utensils to bring food and/or liquid to the mouth and swallow food and/or liquid once the meal placed before the patient.
- **Oral Hygiene:** The ability to use suitable items to clean teeth. Dentures (if applicable): The ability to insert and remove dentures into and from the mouth, and manage denture soaking and rinsing with use of equipment.
- **Toileting Hygiene:** The ability to maintain perineal hygiene, adjust clothes before and after voiding or having a bowel movement. If managing an ostomy, include wiping the opening but not managing equipment.
- **Shower/bathe self:** The ability to bathe self, including washing, rinsing, and drying self (excludes washing of back and hair). Does not include transferring in/out of tub/shower.
- **Upper body dressing:** The ability to dress and undress above the waist; including fasteners, if applicable.
- **Lower body dressing:** The ability to dress and undress below the waist; does not include footwear.
- **Putting on/taking off footwear:** The ability to put on and take off socks and shoes or other footwear that is appropriate for safe mobility; including fasteners, if applicable.

**Activities may be completed with or without assistive devices.**

- **Setup or clean-up assistance** – Helper sets up or cleans up; patient completes activity. Helper assists only prior to or following the activity.
- **Supervision or touching assistance** – Helper provides verbal cues and/or touching/steadying and/or contact guard assistance as patient completes activity. Assistance may be provided throughout the activity or intermittently.
- **Partial/m moderate assistance** – Helper does LESS THAN HALF the effort. Helper lifts, holds or supports trunk or limbs, but provides less than half the effort.
- **Substantial/maximal assistance** – Helper does MORE THAN HALF the effort. Helper lifts or holds trunk or limbs and provides more than half the effort.
- **Dependent** – Helper does ALL of the effort. Patient does none of the effort to complete the activity. Or, the activity cannot be completed without the assistance of 2 or more helpers.

**Safety and Quality of Performance**

- **If helper assistance is required because patient’s performance is unsafe or of poor quality, score according to amount of assistance provided.**
GG0130 Self-Care

Patient uses a gastrostomy tube (G-Tube) or total parenteral nutrition (TPN):

1. Assistance with tube feedings or TPN is not considered when coding the item eating.

If the patient does not eat or drink by mouth and relies solely on nutrition and liquids through tube feedings or TPN due to a new (recent-onset) medical condition:

Code GG0130A as:
88, Not attempted due to medical condition or safety concerns.

If the patient does not eat or drink by mouth at the time of the assessment, and the patient did not eat or drink by mouth prior to the current illness, injury or exacerbation:

If the patient eats and drinks by mouth, and relies partially on obtaining nutrition and liquids via tube feedings or TPN:

Code GG0130A as:
09, Not applicable

Code eating based on the amount of assistance the patient requires to eat and drink by mouth.

GG0130 Self-Care

• If a patient does not perform oral hygiene during home visit, determine the patient’s abilities based on the patient’s performance of similar activities during the assessment, or on patient and/or caregiver report.

EXAMPLE 1
• Mrs. H does not have any food consistency restrictions, but often needs to swallow two or three times so that the food clears her throat due to difficulty with pharyngeal peristalsis.
• She requires verbal cues to use the compensatory strategy of extra swallows to clear the food.

EXAMPLE 2
• Mrs. V has difficulty seeing on her left side since her stroke.
• During meals, a helper must remind her to scan the entire plate to ensure she has seen all the food.

EXAMPLE 3
• Mr. R is unable to eat or drink by mouth since he had a stroke 1 week ago.
• He receives nutrition and hydration through a G-tube, which is administered by a helper.

GG0130 Self-Care

EXAMPLE 1
• Mrs. H does not have any food consistency restrictions, but often needs to swallow two or three times so that the food clears her throat due to difficulty with pharyngeal peristalsis.
• She requires verbal cues to use the compensatory strategy of extra swallows to clear the food.

EXAMPLE 2
• Mrs. V has difficulty seeing on her left side since her stroke.
• During meals, a helper must remind her to scan the entire plate to ensure she has seen all the food.

EXAMPLE 3
• Mr. R is unable to eat or drink by mouth since he had a stroke 1 week ago.
• He receives nutrition and hydration through a G-tube, which is administered by a helper.

Coding Tips for: GG130B Oral Hygiene

Coding Tips for: GG130A Eating
**GG0130 Self-Care**

### EXAMPLE 4
- Ms. J cannot swallow any food or liquids secondary to ALS.
- She has a J-tube and has been on tube feedings for several years.
- She is being admitted to skilled home health care for treatment of a sacral pressure injury.
- Her treatment includes TPN to support wound healing.

### EXAMPLE 5
- Mr. B has been prescribed bowel rest for pancreatitis, and he is not to eat or drink anything for one week, after which the home health nurse will support advancing back to a regular diet.
- TPN has been prescribed, and he is being admitted to home care for TPN teaching and management.

### EXAMPLE 6
- The helper provides steadying assistance to Mr. S as he walks to the bathroom.
- The helper applies toothpaste onto Mr. S’s toothbrush.
- Mr. S then brushes his teeth at the sink in the bathroom without physical assistance or supervision.
- Once Mr. S is done brushing his teeth and washing his hands and face, the helper returns and provides steadying assistance as the patient walks back to his bed.

### EXAMPLE 7
- During the SOC/ROC assessment, Mrs. E states she prefers to participate in her oral hygiene twice daily.
- On assessment, the clinician identifies that Mrs. E’s caregiver completes more than half of this activity.
- Mrs. E has severe arthritis, Parkinson’s disease, diabetic neuropathy, and renal failure. These conditions result in multiple impairments, including limited endurance, weak hand grasp, slow movements, and tremors.
- The assessing clinician, using professional judgment, all available information and collaboration as allowed, determines that Mrs. E is not expected to progress to a higher level of functioning during the episode of care.
- However, the clinician anticipates that Mrs. E will be able to maintain her SOC/ROC performance level.
- The clinician discusses functional goals with Mrs. E and they agree maintaining functioning is a reasonable goal.
GG0130 Self-Care

Example 8

- Mrs. T has a progressive neurological illness that affects her strength, coordination, and endurance.
- Mrs. T prefers to use the bedside commode for as long as possible rather than using incontinence undergarments.
- The helper currently supports Mrs. T while she is standing so that Mrs. T can pull down her underwear before sitting onto the bedside commode.
- When Mrs. T has finished voiding, she wipes her perineal area.
- Mrs. T then requires the helper to support her trunk while Mrs. T pulls up her underwear.
- The assessing clinician, using professional judgment, all available information and collaboration as allowed anticipates that Mrs. T will weaken further by discharge, and while she will still be able to use the bedside commode, she will need the helper to assist with all toileting hygiene.

C. Toileting Hygiene: The ability to maintain perineal hygiene, adjust clothes before and after voiding or having a bowel movement. If managing an ostomy, include wiping the opening but not managing the stoma.

Example 9

During SOC/ROC functional assessment, Mr. M states he prefers to bathe himself rather than depending on helpers or his wife to perform this activity.

The clinician assesses Mr. M's SOC/ROC performance for Shower/Bathe self, and determines the helper performs more than half the effort.

The assessing clinician, using professional judgement, available information and collaboration as allowed anticipates that by discharge Mr. M will require a helper for less than half of the activity Shower/Bathe self.

Example 10

Mrs. D has been unable to eat or drink by mouth for several weeks, due to a large, cancerous lesion on the soft palate.

A week ago, the lesion worsened becoming very painful and required surgical removal.

At the SOC, she remains restricted from any oral intake, with the expected goal of progressing to small sips of water and soft foods by mouth with supervision by discharge from home health.

B. Oral Hygiene: The ability to use suitable items to clean teeth. Dentures (if applicable): The ability to insert and remove dentures into and from the mouth, and manage denture soaking and rinsing with use of equipment.
Mr. James has a history of CHF and COPD with dyspnea. He is being admitted for after care following a right arm fracture with cast from a recent fall at home. Prior to his fall he was independent with self cares.

He needs set-up assistance from caregiver to eat due to cast. He is able to eat and drink with left hand once food is set up and has no problems swallowing.

He has dentures and is able to remove and replace them, but is unable to manage the necessary equipment/supplies to soak dentures.

He also needs assistance with toileting, showering, and dressing but is expected to make a full recovery to his prior level of functioning.

He needs total assistance with socks and shoes.

---

Mr. James is being recertified due to complications. He now has the right arm in a sling, but very little ROM due to the sling and edema.

He continues to need set-up assistance from caregiver to eat. He is able to eat and drink with left hand once food is set up and has no problems swallowing.

He has dentures and is able to remove and replace them, but is unable to manage the necessary equipment/supplies to soak dentures.

He continues to need assistance with toileting.

GG0170 Mobility

### Goal

#### Performance

1. The ability to go up and down four steps with or without a rail.
   - A. Roll left and right:
   - C. Lying to sitting on side of bed:
   - J. Walk 50 feet with two turns:
   - D. Sit to stand:
   - R. Wheel 50 feet with two turns:
   - N. 4 steps:

2. The ability to move from sitting on side of bed to lying flat on the bed.
   - B. Sit to lying:
   - C. Lying to sitting on side of bed:
   - D. Sit to stand:
   - F. Toilet transfer:
   - E. Chair/bed-to-chair transfer:
   - G. Car transfer:

3. The ability to come to a standing position from a chair, wheelchair, or on the side of the bed.
   - Once standing, the ability to walk at least 10 feet in a room, corridor, or similar space.

4. The ability to get on and off a toilet or commode.
   - Once sitting in wheelchair/scooter, the ability to wheel at least 150 feet in a corridor or similar space.

#### Manual

- If SOC/ROC performance is coded 07, 09, 10 or 88, skip to GG0170P, Picking up object.
- If Discharge performance is coded 07, 09, 10 or 88, skip to GG0170P, Picking up object.

#### Motorized

- If SOC/ROC performance is coded 07, 09, 10 or 88, skip to GG0170P, Picking up object.
- If Follow-Up performance is coded 07, 09, 10 or 88, skip to GG0170M, 1 step (curb).

#### New York

- If SOC/ROC performance is coded 07, 09, 10 or 88, skip to GG0170M, 1 step (curb).
**GG0170 Mobility**

Does the patient complete the activity by him/herself with **NO ASSISTANCE**? (no physical, verbal/nonverbal cueing, setup or cleanup assistance needed)

- Yes: Continue to GG0170R, Wheel 50 feet with two turns.
- No: Skip to J1800, Any falls since SOC/ROC, whichever is more recent.

If Discharge performance is coded 07, 09, 10 or 88, skip to GG0170P, Picking up object.

Does the patient complete the activity with **ONLY** setup or cleanup assistance from 1 helper?

- Yes: Continue to GG0170R, Wheel 50 feet with two turns.
- No: Skip to J1800, Any falls since SOC/ROC, whichever is more recent.

If Discharge performance is coded 07, 09, 10 or 88, skip to GG0170M, 1 step (curb).

Does the patient complete the activity with **ONLY** physical assistance from one helper with the helper providing more than half the effort?

- Yes: Continue to GG0170R, Wheel 50 feet with two turns.
- No: Skip to J1800, Any falls since SOC/ROC, whichever is more recent.

If Discharge performance is coded 07, 09, 10 or 88, skip to GG0170M, 1 step (curb).

Does the helper provide all of the effort to complete the activity? Or is the activity completed with the assistance of 2 or more helpers?

- Yes: Continue to GG0170R, Wheel 50 feet with two turns.
- No: Skip to J1800, Any falls since SOC/ROC, whichever is more recent.

If Discharge performance is coded 07, 09, 10 or 88, skip to GG0170M, 1 step (curb).

CODING TIPS

- If a patient:
  - Does not attempt the activity, and;
  - A helper does not complete the activity, and;
  - The patient’s usual status cannot be determined based on patient or caregiver report.

Code the reason the activity was not attempted:

- Code 07 if the patient refused to attempt the activity;
- Code 10 if the activity was not attempted due to environmental limitations;
- Code 08 if the patient could not perform an activity at the time of assessment, and also could not perform the activity prior to the current illness, exacerbation or injury;
- Code 09 if the patient could not perform an activity at the time of assessment, but could perform the activity prior to the current illness, exacerbation or injury.
**GG0170 Mobility**

**CODING TIPS**

- **If the only help a patient needs to complete an activity is:**
  - A helper to retrieve an assistive device or adaptive equipment,
  - Such as a cane for walking, or
  - A tub bench for bathing

Then

- **Code 05, Set up or clean-up assistance**

If two or more helpers are required to assist the patient to complete the activity.

Then

- **Code 01, Dependent**

**CODING TIPS**

- Do not use a DASH (−) if the reason that the item was not assessed was because:
  - The patient refused (code 07);
  - The item is not applicable (code 09);
  - The activity was not attempted due to environmental limitations (code 10); or
  - The activity was not attempted due to medical condition or safety concerns (code 88).

**CODING TIPS** for:

- **GG0170A**, Roll Left and Right
- **GG0170B**, Sit to Lying
- **GG0170C**, Lying to Sitting on Side of Bed

If at the time of the assessment the patient is unable to lie flat due to medical conditions or restrictions, but could perform this activity prior to the current illness, exacerbation or injury.

- **Code 88, Not Attempted Due to medical condition or safety concerns**

**A DASH (−) indicates “No information.”**
• If at the time of the assessment the patient is unable to lie flat due to medical conditions or restrictions, and;
• Could not perform the activity prior to the current illness, exacerbation or injury.

Code 09, Not applicable. Then CLINICAL JUDGMENT should be used to determine what is considered a “lying” position for the patient. For example, a clinician could determine that a patient’s preferred slightly elevated resting position is “lying” for that patient.

A. Roll left and right: The ability to roll from lying on back to left and right side, and return to lying on back on the bed.

B. Sit to lying: The ability to move from sitting on side of bed to lying flat on the bed.

C. Lying to sitting on side of bed: The ability to move from lying on the back to sitting on the side of bed with feet flat on the floor, and with no back support.

EXAMPLE 1
At SOC, the physical therapist helps Mr. R turn onto his right side by instructing him to bend his left leg and roll to his right side. He then instructs him how to position his limbs to return to lying on his back and then to repeat a similar process for rolling onto his left side and then return to lying on his back. Mr. R completes the activity without physical assistance from a helper. Mr. R was moving about in bed without difficulty prior to hospitalization. The therapist expects Mr. R will roll left and right by himself by discharge.

EXAMPLE 2
• Mr. A suffered multiple vertebral fractures due to a fall off a ladder.
• At SOC, he requires assistance from a therapist to get from a sitting position to lying flat on the bed because of significant pain in his lower back.
• The therapist supports his trunk and lifts both legs to assist Mr. A from sitting at the side of the bed to lying flat on the bed.
• Mr. A assists himself a small amount by raising one leg onto the bed and then bending both knees while transitioning into a lying position.
EXAMPLE 3

• At SOC, Mrs. H requires assistance from two helpers to transfer from sitting at the edge of the bed to lying flat on the bed due to paralysis on her right side, obesity, and cognitive limitations.
• One of the helpers explains to Mrs. H each step of the sitting to lying activity.
• Mrs. H is then fully assisted to get from sitting to a lying position on the bed.
• Mrs. H makes no attempt to assist when asked to perform the incremental steps of the activity.

EXAMPLE 4

• Ms. H is recovering from a spinal fusion.
• At SOC, she rolls to her right side and pushes herself up from the bed to get from a lying to a seated position.
• The therapist provides needed verbal cues to guide Ms. H as she safely uses her hands and arms to support her trunk and avoid twisting as she raises herself from the bed.
• Ms. H then safely maneuvers to the edge of the bed, finally lowering her feet to the floor to complete the activity without hands-on assistance.
If the only help a patient needs to complete the sit to stand activity is for a helper to retrieve an assistive device or adaptive equipment, such as a walker or ankle foot orthosis.

**Code 05, Setup or Clean-up Assistance.**

**Sit to stand:** The ability to come to a standing position from sitting in a chair, wheelchair, or on the side of a bed.

**EXAMPLE 5**
- Mr. B is being admitted to home health for pressure ulcer care.
- He has complete tetraplegia from an injury one year ago and has been unable to bear weight in standing since the injury.
- At SOC, using a patient lift that does not require him to come to standing, he is transferred from his bed into a wheelchair with assistance.

**Chair/bed-to-chair transfer:** The ability to transfer to and from a bed to a chair (or wheelchair).

**EXPLANATIONS**

1. The activity begins with the patient sitting (in a chair, wheelchair, or at the edge of the bed) and transferring to sitting in a chair, wheelchair, or at the edge of the bed.
2. If a mechanical lift is used to assist in transferring a patient for a chair/bed-to-chair transfer and two helpers are needed to assist with a mechanical lift transfer, then Code 01, Dependent, even if the patient assists with any part of the chair/bed-to-chair transfer.
• Mr. L had a stroke and uses a wheelchair for mobility.
• When Mr. L gets out of bed at SOC, the therapist moves the wheelchair into the correct position and locks the brakes so that Mr. L can transfer into the wheelchair safely.
• Mr. L transfers into the wheelchair by himself without the need for supervision or assistance during the transfer.
• The family reports that Mr. L does transfer safely without the need for supervision, once the wheelchair is placed and locked.
• The nurse does not expect Mr. L’s mobility status to change by discharge.

---

1. Use of assistive device(s) and adaptive equipment (for instance a grab bar or elevated toilet) required to complete the toilet transfer should not affect coding of the activity.
2. If the only help a patient needs to complete the toilet transfer activity is for a helper to retrieve and place the toilet seat riser, and remove it after patient use, then enter code 05, Setup or clean-up assistance.
3. Toileting hygiene and clothing management are not considered part of the toilet transferring activity.
4. If the patient requires assistance from two or more helpers to get on and off the toilet or commode, then enter Code 01, Dependent.

---

• The assessing clinician notes that the home health aide visit note (documented on the afternoon visit on the SOC date) stated that the aide needed to steady Mrs. Z with a light contact when the patient lowers her underwear and then transfers onto the toilet.
• After voiding, Mrs. Z cleanses herself. She then stands up supporting her own weight as the aide steadies her.
• Mrs. Z pulls up her underwear as the aide steadies her to ensure Mrs. Z does not lose her balance.
EXAMPLE 8
At SOC, Mrs. S is on bedrest due to a new medical complication. She uses a bedpan for bladder and bowel management. The assessing clinician expects the patient will return to independent use of the bathroom toilet once the current condition resolves.

F. Toilet transfer: The ability to get on and off a toilet or commode.

1. If the patient is not able to attempt car transfers (for example because no car is available, or there are weather or other environmental constraints), and the patient’s usual status cannot be determined based on patient or caregiver report.
   Then Code 10, Not Attempted due to environmental limitations.

2. If at the time of the assessment the patient is unable to attempt car transfers, and could not perform the car transfers prior to the current illness, exacerbation or injury.
   Then Code 09, Not Applicable

G. Car transfer: The ability to transfer in and out of a car or van on the passenger side. Does not include the ability to open/close doors or fasten seat belts.

EXAMPLE 9
- Mrs. W uses a wheelchair and ambulates for only short distances.
- At SOC, Mrs. W requires the physical therapist to lift most of her weight to get from a seated position in the wheelchair to a standing position.
- The therapist provides trunk support when Mrs. W takes several steps during the transfer turn.
- Mrs. W lowers herself into the car seat with steadying assistance from the therapist.
- Mrs. W moves her legs into the car as the therapist lifts the weight of her legs from the ground.
Example 10

- The day after being admitted to home health, Mrs. N works with an occupational therapist on transfers in and out of the passenger side of a car.
- When reviewing the therapist's evaluation, the assessing clinician reads that when performing car transfers, Mrs. N required verbal reminders for safety and contact guarding assistance from the OT for guidance and direction.
- The therapist instructed the patient on strategic hand placement while Mrs. N transitioned to sitting into the car seat.
- Documentation showed that the therapist opened and closed the car door.

Coding Tips for:

- Use of assistive device(s) and adaptive equipment (e.g., instance a cane or leg brace) required to complete the walking activity should not affect coding of the activity.
- If the only help a patient needs to complete the walking activity is for a helper to retrieve and place the walker and/or put it away after patient use, then enter Code 05, Setup or clean-up assistance.

Example 11

- Mr. L had bilateral amputations 3 years ago, and prior to this HH admission he used a wheelchair and did not walk.
- At SOC, Mr. L does not use prosthetic devices and only uses a wheelchair for mobility.
- Mr. L’s care plan includes assisting with fitting and use of bilateral lower extremity prostheses.
- The therapist’s care plan goal is for Mr. L to walk distances of 30 feet with supervision within his home and then discharge to outpatient therapy.
GG0170 Mobility

1. The turns are 90 degree turns and may be in the same direction or may be in different directions.
2. The 90 degree turns should occur at the patient’s ability level (i.e., not jeopardizing patient safety), and can include the use of an assistive device without affecting coding of the activity.

GG0170 Mobility

EXAMPLE 12

• At SOC, Mr. B is recovering from a recent stroke and now has difficulty walking. Even with assistance, he is able to walk only 30 feet.
• Mr. B’s care plan includes muscle strengthening and gait training.
• The therapist expects Mr. B will be able to walk 50 feet with two turns safely with the assistance of a caregiver for verbal cues and contact guard for steadying on the turns at discharge.

GG0170 Mobility

1. If the patient’s environment does not accommodate a walk of 150 feet without turns, but the patient demonstrates the ability to walk with or without assistance 150 feet with turns without jeopardizing the patient’s safety, code using the 6-point scale.
2. Use of assistive devices and adaptive equipment (for instance a rolling walker or quad cane) required to complete the walking activity should not affect coding of the activity.

If the only help a patient needs to complete the walking activity is for a helper to retrieve and place the walker and/or put it away after patient use, then enter

Code 05, Setup or clean-up assistance.
**EXAMPLE 13**

- Mr. R has recent endurance limitations due to an exacerbation of heart failure and is only walking about 30 feet before he tires, loses strength and must sit and rest.
- He reports he was walking 150 feet or more with his cane prior to this exacerbation of his heart failure.

**EXAMPLE 14**

- Mrs. N has severe joint degenerative disease and is recovering from sepsis.
- When walking on the uneven driveway was attempted yesterday when Mrs. N came home from the hospital, she reports that her neighbor had to hold her belt and help lift her a little during a few steps.
- The neighbor also provided help to advance the walker across the gravel driveway as the patient walked.
CODING TIPS for: GG0170M, 1 Step (curb)

Use of assistive device(s) and adaptive equipment (for instance a railing or cane) required to complete the activity should not affect coding of the activity.

EXAMPLE 15
- Mrs. Z had a stroke and needs to learn how to step up and down one step to enter and exit her home.
- At SOC, the physical therapist provides needed verbal cueing as Mrs. Z uses her quad cane to aid her balance in stepping up and back down one step.
- The therapist does not provide any physical assistance.

CODING TIPS for: GG0170N, 4 Steps

If at the time of the assessment the patient is unable to complete the activity due to a physician prescribed restriction BUT
The patient could perform this activity prior to the current illness, exacerbation or injury.

Use of assistive device(s) and adaptive equipment (for instance a railing or cane) required to complete the activity should not affect coding of the activity.

Code 88, Not Attempted, due to medical condition or safety concern.
GG0170 Mobility

EXAMPLE 16
• At SOC, Mr. J has lower body weakness and the physical therapist provides light touching assistance when he ascends 4 steps.
• While descending 4 steps, the physical therapist faces the patient and descends the stairs providing minimal trunk support, with one hand on the patient’s hip and the other holding the gait belt, as Mr. J holds the stair railing.

EXAMPLE 17
• At SOC, Ms. Y is recovering from a stroke and has 12 stairs with a railing and she needs to use these stairs to enter and exit her home.
• The physical therapist uses a gait belt around her trunk and at times is required to support much of the patient’s weight as Ms. Y ascends and then descends 12 stairs.

EXAMPLE 18
• Mrs. D is returning home after a hip replacement.
• She is restricted from stair climbing until she is seen for her follow-up MD appointment.
• Just prior to her surgery, she was able to climb her flight of 12 stairs with stand-by assist of her niece.

CODING TIPS for:
GG0170O, 12 Steps
If at the time of the assessment the patient is unable to complete the activity due to a physician prescribed restriction BUT could perform this activity prior to the current illness, exacerbation or injury.

Code 88, Not Attempted due to medical condition or safety concern.

12 steps: The ability to go up and down 12 steps with or without a rail.

Use of assistive devices and adaptive equipment (for instance a railing or cane) required to complete the activity should not affect coding of the activity.
If at the time of the assessment the patient is unable to complete the activity (for instance is unable to stand), AND could not stand to perform this activity prior to the current illness, exacerbation or injury:

Use of assistive device(s) and adaptive equipment (for instance a cane to support balance and a reacher to pick up the object) required to complete the activity should not affect coding of the activity.

**P. Picking up object:** The ability to bend/stoop from a standing position to pick up a small object, such as a pencil, from the floor.

**EXAMPLE 19**
- Mr. P has a neurologic condition that has resulted in coordination and balance problems.
- At SOC, he reports he and his wife worked with the OT in the SNF on picking things off the floor.
- He demonstrates how he stoops to pick up a pencil from the floor as his wife provides the right amount of verbal cues for safety and stands by, ready to help in case he loses his balance.

**EXAMPLE 20**
- Ms. C has recently undergone a hip replacement. At SOC, she walks with a walker without assistance.
- When she drops a hair brush from her walker basket, she asks her daughter to locate her long-handled reacher and bring it to her.
- Using the reacher, Mrs. C is able to bend slightly, and safely pick up the hair brush with the reacher, without need of additional assistance or verbal cue.

**CODING TIPS for:**

**GG0170Q**, Does the patient use a wheelchair and/or scooter?

The intent of the wheelchair mobility item is to assess the ability of patients who are learning how to self-mobilize using a wheelchair or patients who used a wheelchair prior to admission.

Q. Does patient use wheelchair and/or scooter?
- 0. No         Skip GG0170R, GG0170RR1, GG0170S, and GG0170SS1.
- 1. Yes        Continue to GG0170R, Wheel 50 feet with two turns.

If the patient is ambulatory and is not learning how to mobilize in a wheelchair, and only uses a wheelchair for transport within a larger living facility (assisted living facility or apartment complex) or for community mobility outside the home (for instance a physician appointment or to shop):

**Use clinical judgment to determine if the patient’s use of a wheelchair is for self-mobilization due to the patient’s medical condition or safety.**

Then:

**Code 0, No**
1. Indicate whether the wheelchair or scooter used is manual or motorized.

2. The turns are 90 degree turns and may be in the same direction (two 90 degree turns to the right or two 90 degree turns to the left) or may be in different directions (one 90 degree turn to the right and one 90 degree turn to the left).

The 90 degree turns should occur at the patient’s ability level (i.e., not jeopardizing patient safety).

R.
RRT 1. Wheel 50 feet with two turns: Once seated in wheelchair/scooter, the ability to wheel at least 50 feet and make two turns.

RR1. Indicate the type of wheelchair or scooter used.
1. Manual
2. Motorized

EXAMPLE 21
• At SOC, Mrs. M is unable to bear any weight on her right leg due to a recent fracture.
• The nurse observes as the certified nursing assistant in the assisted living facility provides steadying assistance when transferring Mrs. M from the bed into her motorized wheelchair.
• Once in her wheelchair, Mrs. M propels herself safely about 60 feet down the hall and safely makes two turns without any necessary physical assistance or supervision.

EXAMPLE 22
• Once seated in the manual wheelchair, Ms. R wheels about 10 feet, including around one corner to the hallway.
• Due to shoulder pain, she asks her son to push the wheelchair the additional 40 feet around another corner and into her bathroom.

S.
SRT 1. Wheel 150 feet: Once seated in wheelchair/scooter, the ability to wheel at least 150 feet in a corridor or similar space.

SS1. Indicate the type of wheelchair or scooter used.
1. Manual
2. Motorized

If the patient’s environment does not accommodate wheelchair/scooter use of 150 feet without turns, but the patient demonstrates the ability to mobilize the wheelchair/scooter with or without assistance 150 feet with turns without jeopardizing the patient’s safety, code using the 6-point scale.
Mr. N uses a below-the-knee prosthetic limb.
Mr. N has peripheral neuropathy and limited vision due to complications of diabetes.
Via observation and patient report, the assessing clinician determines that Mr. N's usual performance is that a helper is needed to provide verbal cues for safety due to vision deficits, and the patient mobilizes his manual wheelchair a distance of 150 within his home.

S. Wheel 150 feet: Once seated in wheelchair/scooter, the ability to wheel at least 150 feet in a corridor or similar space.

Section J: Health Conditions

J1800 Any Falls Since SOC/ROC, whichever is more recent

Enter Code
Has the patient had any falls since SOC/ROC, whichever is more recent?

0. No       Skip J1900
1. Yes      Continue to J1900, Number of Falls since SOC/ROC, whichever is more recent.

J1900. Number of Falls Since the SOC/ROC, whichever is more recent.
CODING:

0. None
1. One
2. Two or more

A. No injury: No evidence of any injury is noted on physical assessment by the nurse or primary care clinician; no complaints of pain or injury by the patient; no change in the patient’s behavior is noted after the fall

B. Injury (except major): Skin tears, abrasions, lacerations, superficial bruises, hematomas and sprains; or any fall-related injury that causes the patient to complain of pain

C. Major injury: Bone fractures, joint dislocations, closed head injuries with altered consciousness, subdural hematoma

J1800 Any Falls Since SOC/ROC, whichever is more recent

ITEM INTENT
This item identifies if the patient had any witnessed or unwitnessed falls since the most recent SOC/ROC.

TIME POINTS ITEM(S) COMPLETED
• Transfer to an inpatient facility
• Death at home
• Discharge from agency – not to an inpatient facility
Definitions related to Falls

**FALL**
- Unintentional change in position coming to rest on the ground, floor, or onto the next lower surface (such as a bed or chair).
- The fall may be witnessed or unwitnessed, reported by the patient or an observer, or identified when a patient is found on the floor or ground.
- Falls are not a result of an overwhelming external force (such as a person pushes a patient).

**INTERCEPTED FALL**
- An intercepted fall occurs when the patient would have fallen if he or she had not caught him/herself or had not been intercepted by another person.

**REMEMBER**
An intercepted fall is considered a fall.

**CHALLENGING A PATIENT’S BALANCE**
- CMS understands that challenging a patient’s balance and training him/her to recover from a loss of balance is an intentional therapeutic intervention and does not consider anticipated losses of balance that occur during supervised therapeutic interventions as intercepted falls.
J1800 Any Falls Since SOC/ROC, whichever is more recent

RESPONSE-SPECIFIC INSTRUCTIONS
- Review home health clinical record, incident reports and any other relevant clinical documentation (for example, fall logs)
- Interview patient and/or caregiver about occurrence of falls

CODING INSTRUCTIONS
- Code 0, No, if the patient has not had any fall since the most recent SOC/ROC.
- Code 1, Yes, if the patient has fallen since the most recent SOC/ROC.

EXAMPLE 1
- The discharging RN reviews the clinical record and interviews the patient and caregiver, Mrs. K and her daughter Susan, determining that a single fall occurred since the most recent SOC/ROC.
- The fall is documented on a clinical note from an RN home visit in which Susan reported her mother slipped from her wheelchair to the floor the previous day.

EXAMPLE 2
- An incident report describes an event in which Mr. S appeared to slip on a wet spot on the floor during a home health aide bath visit.
- He lost his balance and bumped into the wall, but was able to steady himself and remain standing.
J1800 Any Falls Since SOC/ROC, whichever is more recent

**EXAMPLE 3**
- A patient is participating in balance retraining activities during a therapy visit.
- The therapist is intentionally challenging the patient’s balance, anticipating a loss of balance.
- The patient has a loss of balance to the left due to hemiplegia and the physical therapist provides minimal assistance to allow the patient to maintain standing.

**EXAMPLE 4**
- A patient is ambulating with a walker with the help of the physical therapist.
- The patient stumbles and the therapist has to bear some of the patient’s weight in order to prevent a fall.

J1900 Number of Falls Since SOC/ROC, whichever is more recent

**ITEM INTENT**
This item identifies the number of falls a patient had since the most recent SOC/ROC, and fall-related injury.

**TIME POINTS (ITEMS) COMPLETED**
- Transfer to an inpatient facility
- Death at home
- Discharge from agency – not to an inpatient facility

**INJURY RELATED TO A FALL**
Any documented or reported injury that occurred as a result of, or was recognized within a short period of time (e.g., hours to a few days) after the fall and attributed to the fall.

**NO INJURY**
No evidence of any injury noted on assessment, no complaints of pain or injury by the patient; no change in the patient’s behavior is noted after the fall.

Definitions related to Fall Injuries
Definitions related to Fall Injuries

**INJURY (EXCEPT MAJOR)**
- Skin tears,
- Abrasions,
- Lacerations,
- Superficial bruises,
- Hematomas, and
- Sprains; or
- Any fall-related injury that causes the patient to complain of pain.

**MAJOR INJURY**
- Bone fractures,
- Joint dislocations,
- Closed head injuries with altered consciousness, and
- Subdural hematoma.

J1900 Number of Falls Since SOC/ROC, whichever is more recent

RESPONSE SPECIFIC INSTRUCTIONS
- **Review** the home health clinical record, incident reports and any other relevant clinical documentation, such as fall logs.
- **Interview** the patient and/or caregiver about occurrence of falls.
- **Determine** the number of falls that occurred since the most recent SOC/ROC, and, code the level of fall-related injury for each.

- **Code** falls no matter where the fall occurred.
- **Code** each fall only once.

If the patient has multiple injuries in a single fall, code the fall for the highest level of injury.
**J1900 Number of Falls Since SOC/ROC, whichever is more recent**

**CODING: 0. None**

- **Code 0, None:** if the patient had no injurious falls since the most recent SOC/ROC.
- **Code 1, One:** if the patient had one non-injurious fall since the most recent SOC/ROC.
- **Code 2, Two or more:** if the patient had two or more non-injurious falls since the most recent SOC/ROC.

### No Injury
- No evidence of any injury is noted on physical examination by the nurse or primary care clinician; no complaints of pain or injury by the patient; no change in the patient’s behavior is noted after the fall.

### Injury (except major)
- Skin tears, abrasions, lacerations, superficial bruises, hematomas and sprains; or any fall-related injury that causes the patient to complain of pain.

### Major Injury
- Bone fractures, joint dislocations, closed head injuries with altered consciousness, subdural hematoma.

**Coding Instructions for:**

- **/xrhombus J1900A, No Injury**
- ADASH is a valid response for this item.

**J1900 Number of Falls Since the SOC/ROC, whichever is more recent**

**CODING: 0. None**

- **Code 0, None:** if the patient had no falls with major injury since the most recent SOC/ROC.
- **Code 1, One:** if the patient had one fall with major injury since the most recent SOC/ROC.
- **Code 2, Two or more:** if the patient had two or more falls with major injury since the most recent SOC/ROC.

### No Injury
- No evidence of any injury is noted on physical examination by the nurse or primary care clinician; no complaints of pain or injury by the patient; no change in the patient’s behavior is noted after the fall.

### Injury (except major)
- Skin tears, abrasions, lacerations, superficial bruises, hematomas and sprains; or any fall-related injury that causes the patient to complain of pain.

### Major Injury
- Bone fractures, joint dislocations, closed head injuries with altered consciousness, subdural hematoma.

**Coding Instructions for:**

- **/xrhombus J1900B, Injury, Except Major**
- ADASH is a valid response for this item.

**J1900 Number of Falls Since the SOC/ROC, whichever is more recent**

**CODING: 0. None**

- **Code 0, None:** if the patient had no falls since the most recent SOC/ROC.
- **Code 1, One:** if the patient had one non-fall since the most recent SOC/ROC.
- **Code 2, Two or more:** if the patient had two or more non-falls since the most recent SOC/ROC.

### No Injury
- No evidence of any injury is noted on physical examination by the nurse or primary care clinician; no complaints of pain or injury by the patient; no change in the patient’s behavior is noted after the fall.

### Injury (except major)
- Skin tears, abrasions, lacerations, superficial bruises, hematomas and sprains; or any fall-related injury that causes the patient to complain of pain.

### Major Injury
- Bone fractures, joint dislocations, closed head injuries with altered consciousness, subdural hematoma.

**Coding Instructions for:**

- **/xrhombus J1900C, Major Injury**
- ADASH is a valid response for this item.
J1900 Number of Falls Since SOC/ROC, whichever is more recent

J1900 Number of Falls Since SOC/ROC, whichever is more recent

**EXAMPLE 4**
- Review of the patient record, incident reports, and patient/caregiver report identify that two falls occurred since the most recent SOC/ROC:
  - The RN assessment identified no injury.
  - The first describes an event during which Mr. G tripped on the bathroom rug and almost fell, but caught himself against the sink.
  - The second describes an event during which Mr. G, while coming up the basement stairs with the laundry, fell against the stair and sustained a bruise and laceration on his left knee.

**CODING**:
- **0. None**
- **1. One**
- **2. Two or more**

Enter Codes in Boxes:

**A. No Injury**
- No evidence of any injury is noted on physical assessment by the nurse or physician; no complaints of pain or injury by the patient; no change in the patient’s behavior is noted after the fall

**B. Injury (Except Major)**
- Skin tears, abrasions, lacerations, superficial bruises, hematomas and sprains; or any fall-related injury that causes the patient to complain of pain

**C. Major Injury**
- Bone fractures, joint dislocations, closed head injuries with altered consciousness, subdural hematoma

---

J1900 Number of Falls Since SOC/ROC, whichever is more recent

**EXAMPLE 5**
- Review of the patient record, incident reports, and patient/caregiver report identify that a single fall occurred since the most recent SOC/ROC:
  - The fall is documented on an incident report, which describes an event during which Mrs. J fell while walking from her bedroom to the bathroom and was transported to the emergency room via ambulance.
  - Examination and testing revealed a skin tear on Mrs. J’s left hand, bruising on both knees, and a fractured left hip.

**CODING**:
- **0. None**
- **1. One**

Enter Codes in Boxes:

**A. No Injury**
- No evidence of any injury is noted on physical assessment by the nurse or physician; no complaints of pain or injury by the patient; no change in the patient’s behavior is noted after the fall

**B. Injury (Except Major)**
- Skin tears, abrasions, lacerations, superficial bruises, hematomas and sprains; or any fall-related injury that causes the patient to complain of pain

**C. Major Injury**
- Bone fractures, joint dislocations, closed head injuries with altered consciousness, subdural hematoma

---

**Section J: Highlights**

- **J1800**: Any Falls Since SOC/ROC and **J1900**: Number of Falls Since SOC/ROC, are completed at:
  - Transfer
  - Discharge-not to an Inpatient Facility
  - Death at Home
- **An intercepted fall** is considered a fall.
- CMS does not consider anticipated losses of balance that occur during supervised therapeutic interventions as intercepted falls.
- There are three levels of fall-related injury:
  - No Injury
  - Injury (Except Major)
  - Major Injury
Summary

• OASIS-D to be implemented with all assessments with a M0090 Date Assessment Completed date of January 1, 2019, or later

• Changes to OASIS-D include:
  • New standardized patient assessment data elements
  • Alignment in content of items that support cross-setting measures (revised)
  • Comprehensive Item Use Evaluation, resulting in reduction of burden and quality measure changes (removal)
  • Updates and corrections to guidance

Summary

• Revisions to OASIS-D involve either:
  • Changes in the assessment item and related guidance
  • Revisions to the Guidance Manual
  • Some response options have been removed to reduce provider burden
  • Different time point versions created for some items
  • Incorporated NPUAP terminology updates
  • Revised language to align with other PAC settings
  • Consult the OASIS-D Guidance Manual for specific direction
