

Medical Marijuana Facility Progress

Note 1: Minimum Standards Review - all licensed and certified medical marijuana facilities, except seed-to-sale vendors, must complete the Department's minimum standards review process. The green bar indicates how many of these reviews have been completed.

Note 2: Change Request - if a facility chooses to make certain changes to what it originally proposed in its application for licensure, it must first seek and obtain Department approval for those changes.

Note 3: Commencement Inspection - each facility must request a Commencement Inspection from the Department when it has completed the Minimum Standards Review and is ready to begin operating. Once a facility has completed the Commencement Inspection, it will receive approval to operate and may then begin working with medical marijuana.
